Introduction

This document is a guide for navigating Michigan's Dynamic Score Reporting Site (DSRS). The DSRS will provide Michigan score reports for the M-STEP, PSAT 8/9 for Grade 8, PSAT 8/9 for Grade 9, PSAT 10, SAT with Essay, MI-Access, and Early Literacy and Mathematics Benchmark Assessments administrations.

Student-level data are data from one student's performance. It provides the educator with a snapshot of information about how one student performed, at one point in time, relative to Michigan's content standards.

Aggregate data measures groups of students' performance relative to Michigan's standards at one point in time. These data can be used to look at program effectiveness, to determine how a building's program is serving students in different demographic groups, or to gauge how a program serves students in one grade level over time. Aggregate data can also be used to compare program effectiveness in one school with another in the district, with the district as a whole, or in comparison with statewide results.

Family Educational Rights and Privacy Act (FERPA)

Reports that provide student level data include federally protected student data. Some aggregate reports may contain score data representing small numbers of students. The Office of Educational Assessment and Accountability (OEAA) does not suppress or mask data on aggregate reports; therefore, data representing small numbers of students is also considered federally protected student data. It is imperative that report users understand the sensitive and confidential nature of the data presented on assessment reports and comply with all [Family Educational Rights and Privacy Act](https://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.html) (<https://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.html>) regulations.

What's New in the Dynamic Score Reporting Site for 2024?

New this year is the ability to view and select all assessments from the DSRS regardless of what the user chose from the Secure site. The DSRS will default the secure site selection but as long as the district and/or school has data in an assessment, it will be visible for selection.

Embargo Period

Results from the Spring summative assessments are embargoed until MDE publicly releases the results. The public release happens in late summer, typically before Labor Day. Prior to the public release, individual student results may be shared with parents, but it is not permissible to share any school-, district-, or state-level results with parents, the community, or other external parties until the embargo has been lifted by the Michigan Department of Education. School board meetings are considered open meetings; therefore, the sharing of embargoed assessment results at these meetings is not allowed until the embargo is lifted. A message to this effect will appear on the DSRS welcome page.

48-Hour Reports

Preliminary Student Roster Reports are available within 48 hours of test submission for students taking the M-STEP and MI-Access assessments online. These reports provide a preliminary view of student performance on the M-STEP and MI-Access assessments. Detailed information about these reports is found in the About This Report documents associated with the reports on the Dynamic Score Reporting Site. The Preliminary Student Roster reports are inactivated once final reports are made available, typically in August. Results reported on the Preliminary Student Roster reports are embargoed.

Early Literacy and Mathematics Benchmark student-level reports are also available within 48 hours of test submission. For more information about the Early Literacy and Mathematics Benchmark Assessment's reports, see the [Interpretive Guide to Early Literacy and Mathematics Reports](#), which is available on the [Early Literacy and Mathematics Benchmark Assessments web page](#) (www.michigan.gov/earlylitandmath) and under the Help icon (?) in the Dynamic Score Reporting Site.

Accessing the Dynamic Score Reporting Site

The DSRS is accessed through the [Office of Educational Assessment and Accountability \(OEAA\) Secure Site](#). Until November 7, 2024, educators can continue using their [Michigan Education Information System \(MEIS\)](#) login to access the site. After that date, educators must use the [MiLogin for Business](#), the centralized State of Michigan's identify management solution, to access the site. Guidance on linking your MEIS and MiLogin for Business accounts can be found on the [Secure Site Training web page](#) (<https://www.michigan.gov/mde/Services/Student-Assessment/secure-site-training>). Supported browsers for the DSRS are Chrome, Firefox, and Microsoft Edge for PC.

Reports are available through the [OEAA Secure Site](#) (www.michigan.gov/oeaa-secure) under the Reports tab. Secure Site access is only available to district and school employees with authorized user roles and permissions granted by their district. For instructions on accessing the OEAA Secure Site, go to the [Secure Site Training web page](#) (www.michigan.gov/securitesitetraining) and select **How do I get access to the Secure Site?**

STEP 1: Log in to the OEAA Secure Site using your appropriate login credentials. Choose the appropriate profile that allows access to the desired school or district assessment data from the required field in the **Choose the profile to be used** dropdown (Figure 1). Once the profile is selected, select the OK button.

Note: If a user does not have access to multiple profiles, this option will not be provided.

These users will go directly to Step 2.

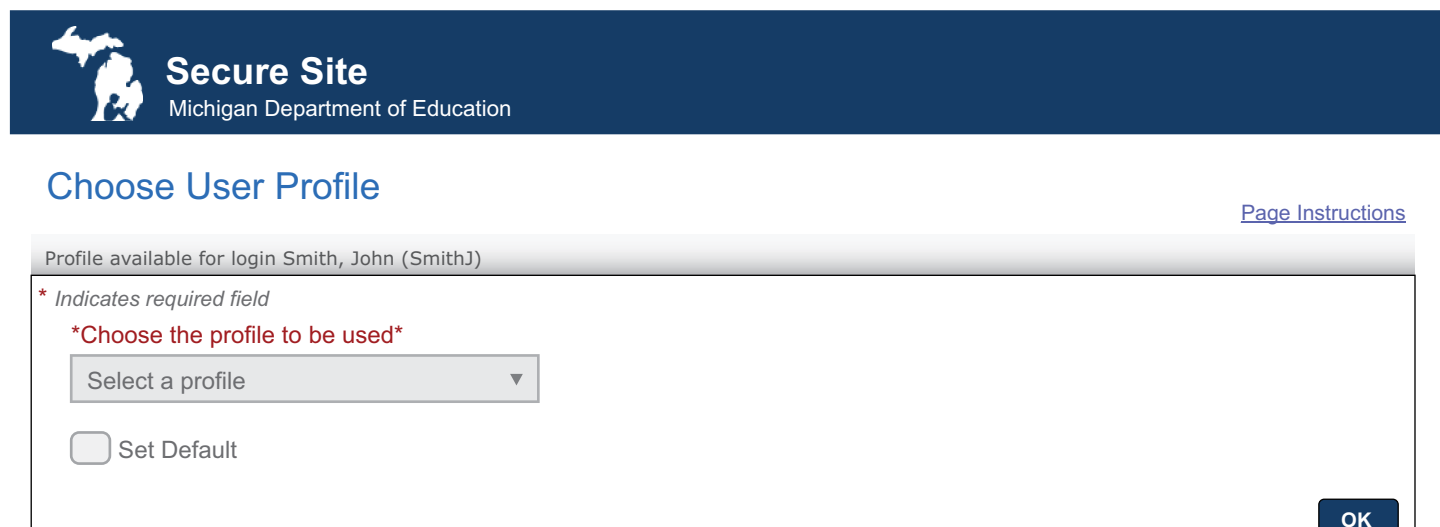

Figure 1: Choose User Profile screen

STEP 2: Choose **Reports** in the menu bar and select **Dynamic Score Reports** (Figure 2).

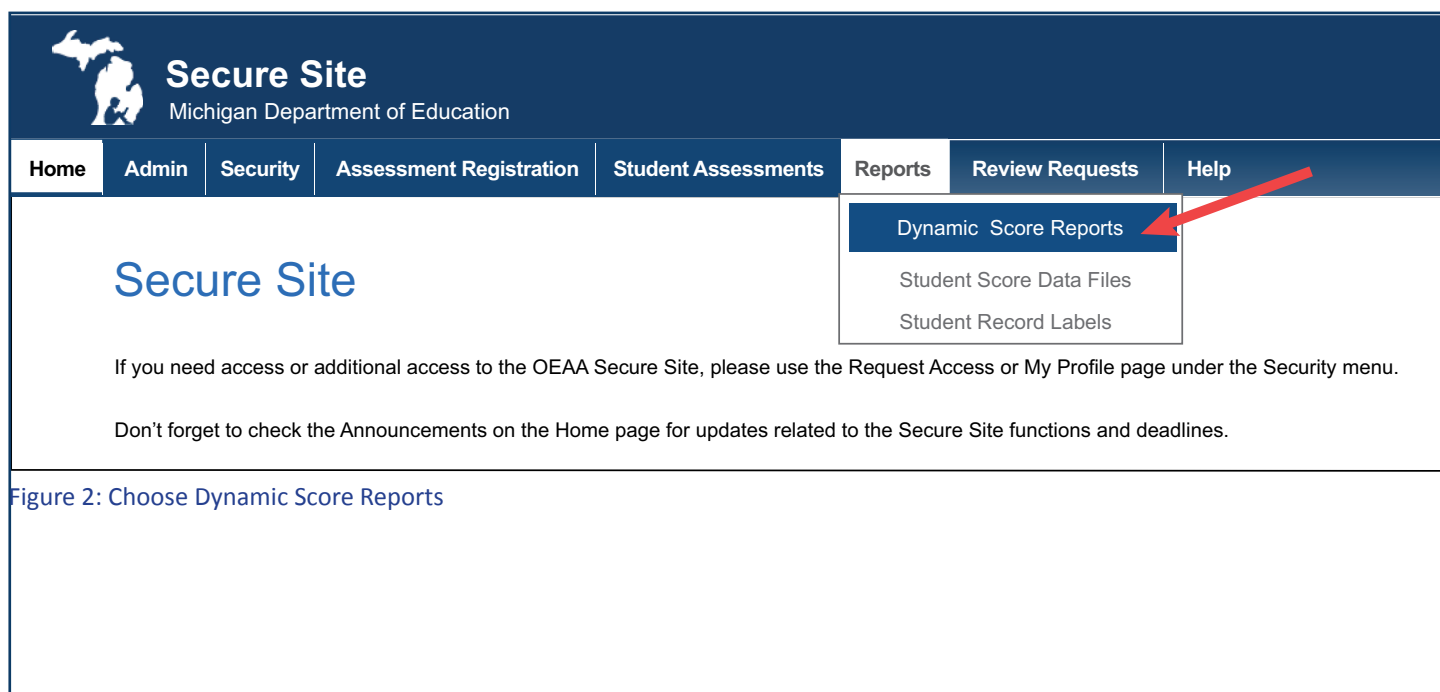

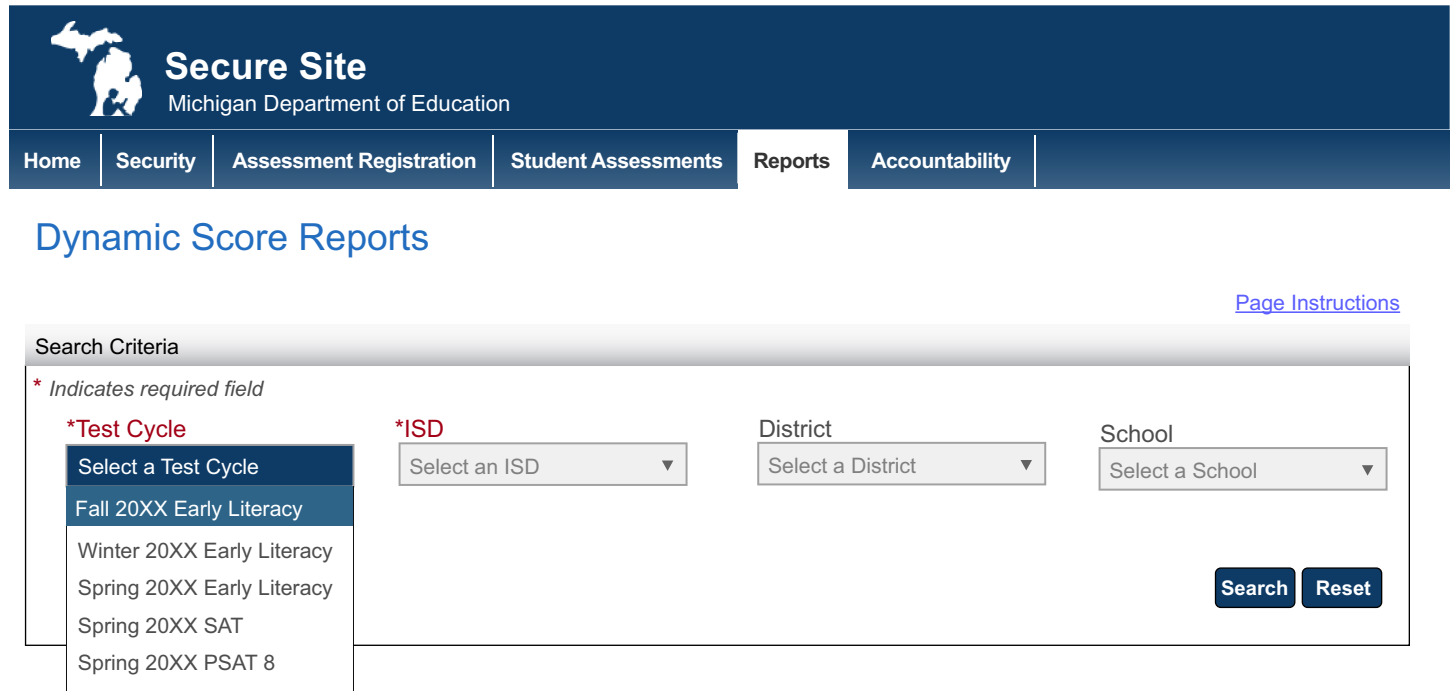

Figure 2: Choose Dynamic Score Reports

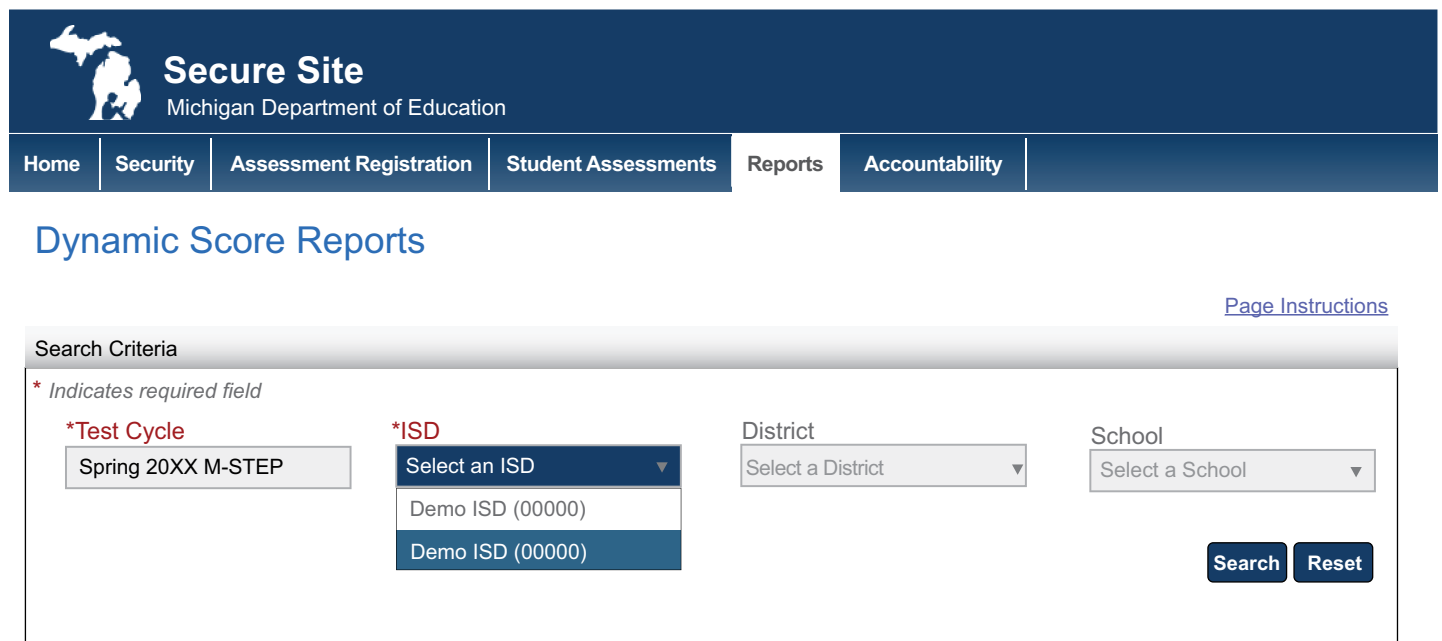

STEP 3: On the Search Criteria page section, select the appropriate test cycle (i.e., Spring 20XX M-STEP, Spring 20XX MI-Access, etc.) from the required Test Cycle drop-down menu (Figure 3).

The screenshot shows the 'Secure Site' header for the Michigan Department of Education. Below the header is a navigation bar with links: Home, Security, Assessment Registration, Student Assessments, Reports, and Accountability. The 'Dynamic Score Reports' section is active. A 'Page Instructions' link is in the top right. The 'Search Criteria' form contains four fields: '*Test Cycle', '*ISD', 'District', and 'School'. The '*Test Cycle' dropdown menu is open, showing options: 'Select a Test Cycle', 'Fall 20XX Early Literacy', 'Winter 20XX Early Literacy', 'Spring 20XX Early Literacy', 'Spring 20XX SAT', and 'Spring 20XX PSAT 8'. The other fields are currently empty. 'Search' and 'Reset' buttons are at the bottom right of the form.

Figure 3: Select Test Cycle

STEP 4: If not pre-populated, select the appropriate Intermediate School District (ISD) in the required ISD drop-down menu (Figure 4). Select **Search**.

The screenshot shows the same 'Secure Site' header and navigation bar. In the 'Dynamic Score Reports' section, the 'Search Criteria' form has the '*Test Cycle' field populated with 'Spring 20XX M-STEP'. The '*ISD' dropdown menu is open, showing options: 'Select an ISD', 'Demo ISD (00000)', and 'Demo ISD (00000)'. The 'District' and 'School' fields are empty. 'Search' and 'Reset' buttons are at the bottom right of the form.

Figure 4: Select an ISD

Selecting the Search Criteria of **District** and **School** is optional (Figure 5). If you have access to more than one district within the ISD selected and search without selecting a specific district, all districts that you have access to will be returned in the search results. If you only have access to one district within the ISD selected, that district will be pre-populated. Similarly, if you have access to more than one school within the ISD and district selected, all schools that you have access to will be returned in the search results unless a specific school is selected in the search criteria. If you only have access to one school, that school will be pre-populated. When all selections have been made, select **Search**.

Clear Filters and Sorts Open Report

Figure 6: Search Results Grid

After you select the test cycle, ISD, district and/or school, a Search Results grid (Figure 6) will display all the options available within the searched criteria. If you have district-level access, you will have access to both district- and school-level score data in the DSRS. If you do not have district-level access, only school records will be returned. You will be able to see:

- A** which schools or districts have score data in the **Data Available** column
- B** the report level (school or district) in the **Report Level** column
- C** the district name in the **District** column
- D** the school name (or **All Schools** for district-level records) in the **School** column
- E** the date on which scores were last modified in the Scores Last **Modified Date** column

All columns are filterable and sortable.

STEP 5: To access the report for a specific school or district, select **F** the check box in the far-left column of the record, and then **G**, the **Open Report** button in the bottom right corner of the Search Results grid. Only one record can be selected at a time (Figure 6).

STEP 6: While the system is retrieving data, a message letting you know that you are connecting to the DSRS will appear (Figure 7).

Connecting to the Dynamic Score Reporting Site
Please Stand by. . .

Figure 7: Connecting Message

Minimum Browser Requirements and Settings

IMPORTANT: Be sure that your browser's pop-up blocker is set to allow the Dynamic Score Reports to be viewed. If your browser is configured to block all pop-ups, you will not be able to access the DSRS until your browser's pop-up blocker is disabled. If you need further assistance with pop-up blockers, contact your district's network administrator to configure your browser settings to allow access to the DSRS.

Minimum Browser Requirements:

To ensure the best possible experience while accessing and navigating the DSRS, MDE recommends using the most recent versions of the following browsers:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge

MDE recommends using the most current production release of each browser.

MDE will provide best effort support for browser versions older than two versions prior to the most recent version.

The version of the browser in use can be found by looking in the Help menu and choosing About.

Once you have accessed the DSRS through the Secure Site, you will first come to the Authorization Page (Figure 8). Once you have read the text and accept the terms of the disclaimer, select Continue to enter the site.

Notice: Authorized Use Only

Important Family Educational Rights and Privacy Act (FERPA) reminder: Many reports available through the Michigan Dynamic Score Reporting Site contain protected student data. It is imperative that all users understand the sensitive and confidential nature of the data available on these reports and ensure compliance with all Family Educational Rights and Privacy Act (FERPA) regulations: www.ed.gov/policy/gen/guid/fpco/ferpa/index.html

I accept the terms of the disclaimer

Close this browser window if you DO NOT agree with the terms.

Figure 8: Authorization Page

You will then see the Welcome page (Figure 9), which provides detailed directions for accessing the reports available, based on your user role.

Welcome to Michigan's Dynamic Score Reporting Site

To access your reports, verify the assessment (M-STEP, MI-Access, PSAT-related Assessments, SAT with Essay, or Early Literacy and Mathematics Benchmark Assessments). The Dynamic Score Reporting Site will default to the assessment based on your test cycle selection in the OEAA Secure Site. For MI-Access results, you will also need to select the Test Type (Functional Independence, Supported Independence, or Participation).

Once you have verified or selected the assessment, then:

1. Select a **Level**. Options may include State, District, School or Student. Student level reports are available before aggregate level reports.
2. Select a **Report**.
3. School may need to be selected.
4. Select the **Next** button.
5. Select the ^odesired filters.
6. Select the **VIEW REPORT** button to generate and open the requested report. (Note: your filter selections will remain in place until you select different filter options.)

Figure 9: The DSRS Welcome Screen

The Report Navigation Menu

The Report Navigation Menu allows you to choose the assessment report and filter it according to several options, which vary based on the report selected.

Report Navigation Menu Header

The **Report Navigation Menu Header** at the top of the report screen (Figure 10) displays the selected assessment and entity information, such as **Year, Assessment, ISD, District, and School**, as well as the selected filters in the Report Navigation Menu. Selecting the caret to the right of the search criteria expands the menu for viewing and selecting again hides the menu. For a complete list of the available reports for the assessment selected, see the assessment-specific Interpretive Guide to Reports available on each assessment's respective web page.

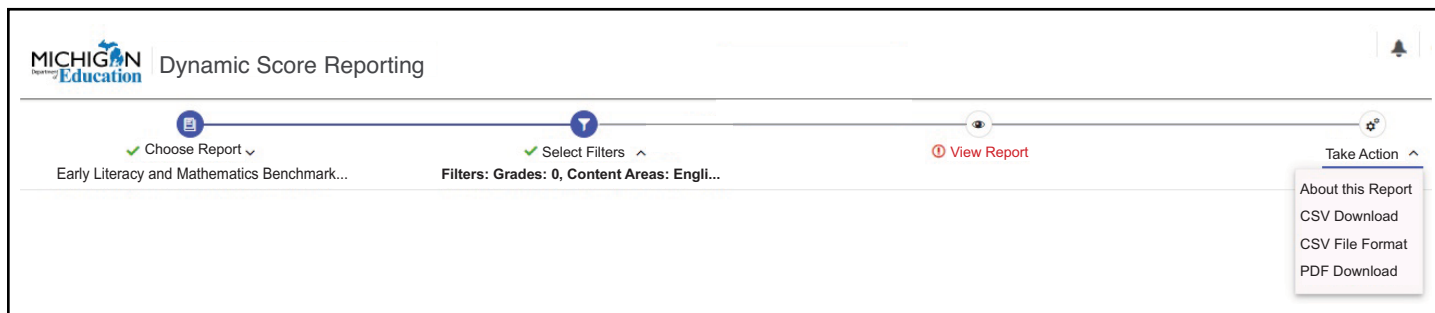

Figure 10: Report Navigation Menu search progress bar

Choose Report

To access your reports, verify the assessment (M-STEP, MI-Access, PSAT 8/9 for Grade 8, PSAT 8/9 for Grade 9, PSAT 10, SAT, or Early Literacy and Mathematics Benchmark). The DSRS will default to the assessment based on your test cycle selection in the OEAA Secure Site. For MI-Access results you will also need to select the Test Type: (Functional Independence, Supported Independence, or Participation). Then, select the level, which may include State, District, School, or Student, again depending on your user role, and the available reports (Figure 11). Student level reports are available before the aggregate level reports. Next, select a Report.

Note: The Preliminary Student Roster Report option will not be available once final reports are released.

Depending on your user role (District or School user) and your selections in the Secure Site, you may be able to choose a school (Figure 12) within a district. The District and ISD are carried over from the Secure Site. School users will only see their school name. Select NEXT to continue (Figure 13).

Figure 13: Select NEXT to continue Filter Options

Filter Options

Figure 14: Filter options

Based on the assessment and report selected, you may choose the available filter options (Figure 14).

A Grades:

The Grades filter defaults to the lowest grade assessed by the chosen assessment and served in the selected school. Multiple grades can be selected. Select the grade(s) of the report to be generated. You can select all grades on all reports by selecting All.

B Content area:

The Content Area filter defaults to the first content area on the list. Select the content area(s) for the report to be generated. To select all content areas, select the box next to All.

C Students:

On some reports, you may select the students whose reports are to be generated. The Students filter (Figure 15) defaults to listing students alphabetically by last name regardless of grade, based on all other current filter selections. The **All** students selection is checked by default. This filter also contains a predictive search function that will populate the list of students when you begin typing in the search field below **Students**. The search field accepts some special characters such as hyphens, apostrophes, periods, etc., when searching for a student name. The search will retrieve only the student names containing the entered characters.

Figure 15: Select Students

D Reporting Codes:

In some reports, if reporting codes were previously specified by your school, you may generate reports grouped by Reporting Codes (Figure 16). Like the Student Search field, the codes are displayed in alphanumeric order. This filter also has a predictive search function; you can narrow the results by typing in the search field below Reporting Codes.

E Performance Levels:

You can choose the desired performance level which is dependent on the chosen assessment's reported performance levels. All performance levels are selected by default.

F Homeschooled:

On some individual level reports, you may be able to choose students who are homeschooled. The Homeschooled filter defaults to No.

G Additional filters:

Filter options vary by report and assessment, and, in addition to the filters above, may include the following:

- Designated Supports
- Economically Disadvantaged
- English Learner
- Ethnicity
- Former English Learner
- Foster Care
- Gender
- Homeless
- Migrant
- Military Connected
- Students with Disabilities
- Tested in Enrolled Grade

Back/Reset All/View Report

After choosing all desired filters, the View Report icon at the top of the page will turn red (Figure 17).

H To view a report, either select this icon or select the View Report button (Figure 18) at the bottom of the page, and the filtered results will be displayed in the Report Body section.

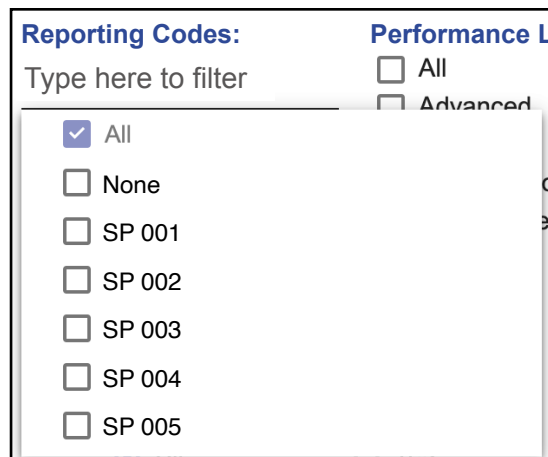

The image shows a dropdown menu for the 'Reporting Codes' filter. At the top, there is a search bar labeled 'Type here to filter'. Below the search bar, a list of options is displayed: 'All' (which is selected and has a checkmark), 'None', 'SP 001', 'SP 002', 'SP 003', 'SP 004', and 'SP 005'. Each option is preceded by a checkbox.

Figure 16: Reporting Codes

Figure 17: View Report icon

The image shows three buttons arranged horizontally within a larger container. The first button is labeled 'BACK' in blue. The second button is labeled 'RESET ALL' in blue. The third button is labeled 'VIEW REPORT' in blue and features a red eye icon to its left.

Figure 18: View Report button

The **Back/Reset/View Report** options allow you to go back to the previous menu to select a different report, to reset all filter options, or to refresh the report after filters have been changed.

If any search criteria are changed in the filters, you must select the View Report button to refresh the results. Hovering over the red  icon displays a tool tip (Figure 19).

Figure 19: View Report button

Take Action Menu

The Take Action Menu provides additional information about the report, generates PDF files from the reports that may be printed and saved, and in some reports, exports Comma Delimited Files (CSV) that may be opened in Microsoft Excel or any other spreadsheet application. Selectable actions will vary by report. The Take Action menu is active before a report is generated. All actions are fully functional. PDF Download or CSV Download (including the Large PDF Download function) results will be generated according to the selected filters in the Report Navigation Menu.

About this Report

This action will open a new browser tab containing a document called **About This Report** (Figure 20). This explains in detail the purpose and content of the report and offers guidance on how to understand the information and data presented in the report. Each report will have its own **About This Report** document.

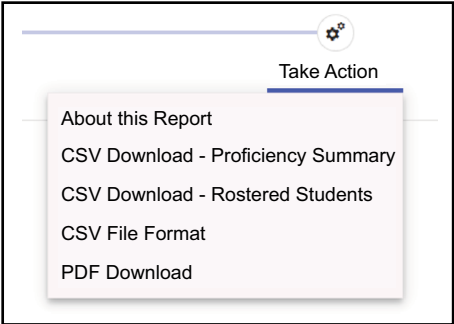

Figure 20: About This Report in the Take Action Menu – Student Roster Report

Print Options

All reports provide the option of downloading, printing, and saving a PDF version of the report. Many of the student level reports have the Large PDF Download Request function (see next section).

- **To view a PDF** of the selected reports, select PDF Download (Figure 21) in the Take Action drop-down menu. If PDF Download is selected prior to viewing a report, the resulting PDF will be generated according to the selected filters in the Report Navigation Menu. Reports can be printed and/or downloaded and saved to your computer.

Note: It might take a few seconds to generate a PDF using this PDF Download function, depending on the number of pages being produced.

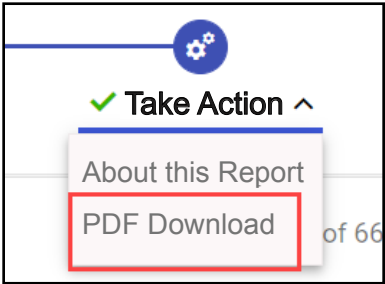

Figure 21: Download in the Take Action Menu – Individual Student Report

Large PDF Download Functionality

To download large quantities of PDFs (>100 students) or CSV Files (> 2000 rows of data) in the DSRS, follow these instructions.

1. Select the student level report to view and the desired number of students.
2. For PDF requests, select the PDF Download (Figure 22) option in the **Take Action** menu. For CSV File requests, select the CSV Download (Figure 22) option in the **Take Action** Menu.

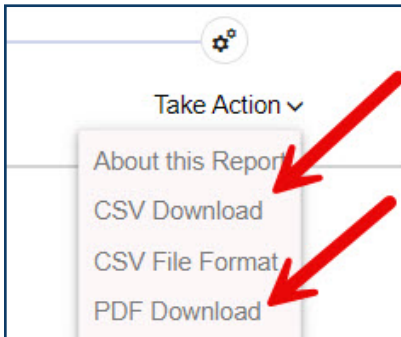

Figure 22: PDF/CSV download in the Take Action menu

3. If the number of students desired is greater than the threshold allowed, the Large File Request tool will be triggered. To begin generating the report, you will see a pop-up window (Figure 23) requesting your email address.

Large File Download Request ×

File requests that generate large reports are submitted to a queue for processing. When your request has been completed, you will receive an email notification to the email address provided below.

To access your reports, login to the OEAA Secure Site, navigate to the Dynamic Score Reporting Site (DSRS) again, and you can download your file(s).

If you are navigating in the DSRS when your reports become available, a pop-up screen will appear letting you know your report is ready.

Files are available for seven days from the time of request via the Alerts icon 🛎 at the top right corner of the page. Select the desired file(s) from the table provided.

To receive notification of file generation, provide your school or district email address.

Email:

Confirm Email:

Figure 23: Queue PDF Download – Requesting Your Email

4. When the requested file download of the reports is ready, you will see a notification in the Alerts (Figure 24) icon at the top right of the screen. The Alerts pop-up will allow you to download, save, and print the PDF or CSV if you are in the system. If you are logged out and log back in, the Alerts pop-up will appear as soon as you confirm the disclaimer. You will also receive an email alert. Click on the blue Alert Indicator to see the Alert.

Figure 24: Alert notification – Reports are ready

5. The Alerts list (Figure 25) will show all the available downloads that are available, along with the date requested and date that the downloaded reports will expire, which is 7 days from the date requested. To view the reports, select the PDF icon. To delete, select the Trash Can Icon.

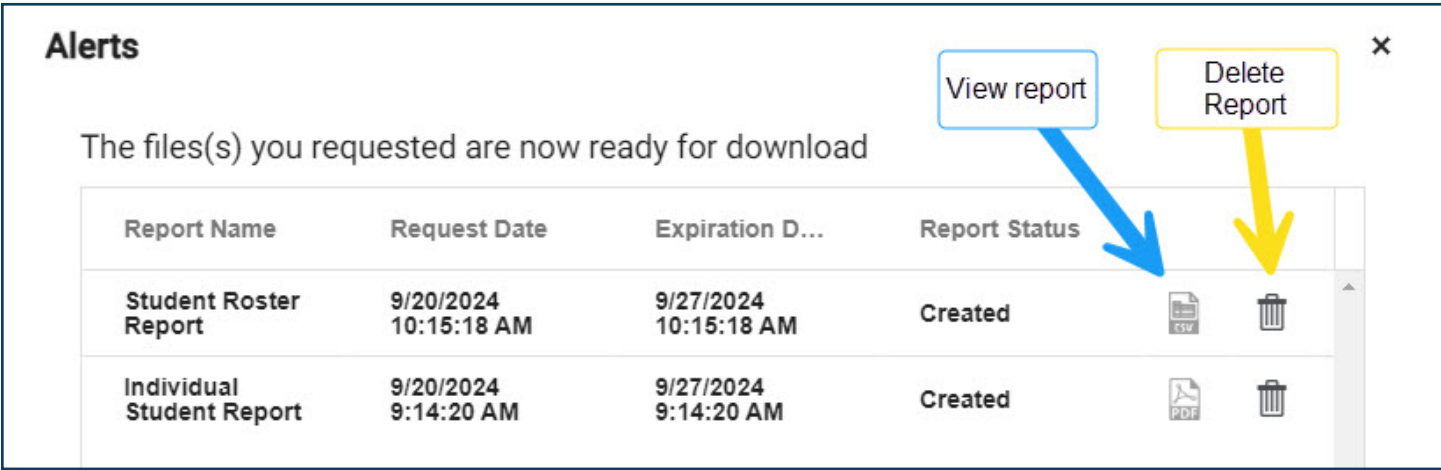

Figure 25: Alert notification – Shows available downloads

To view the reports, select the **PDF** icon. To delete, select the **Trash** icon (Figure 26).

Figure 26: PDF Selections are Ready for download – Select icon to Generate PDF

Other Functions and Navigation Options

Alert/Help/Contact/Log Out panel

In the top right corner of the Report Navigation Menu, there is a four-function panel of buttons displayed (Figure 27). When you hover over each button, a tool tip will appear naming the function. Each function is described as follows:

Figure 27: Alert, Help, Contact, and Log Out panel

A Alerts: This button opens a pop-up window (Figure 28) displaying alerts (see Figure 25 for functionality).

Figure 28: Alert button

B Help: Selecting this button opens a window (Figure 29) that provides links to helpful documents that explain in detail how to navigate the reports and, by assessment, how to interpret the data contained in them. **Please note that users should select Option 1, not Option 3, as the system shows.** The system will be updated to reflect this change during Fall 2024.

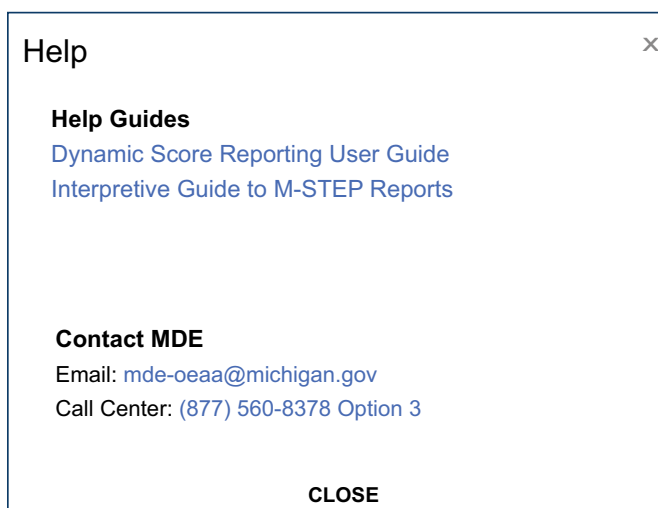

Figure 29: Help Pop-up

It also contains information on how to contact the OEAA Help Desk.

C Contact Us: This function also provides information for contacting the OEAA Help Desk (Figure 30). **Please note that users should select Option 1, not Option 3, as the system shows.** The system will be updated to reflect this change during Fall 2024.

D Log Out: Selecting this button logs the user out of the Dynamic Score Reporting System.

Figure 30: Contact Us

Go to Student Link

When student-level reports for the statewide summative assessments such as Individual Student Report, Student Overview Reports, Parent Report, and Student Growth and Proficiency Report have been generated, you can use the **Go to Student** (Figure 31) link to go directly to the selected student and view the displayed student results in the **Report Body**. This filter includes a Predictive Search feature, similar to the Student filter and Reporting Codes filter, shown in Figure 12 and Figure 13 respectively.

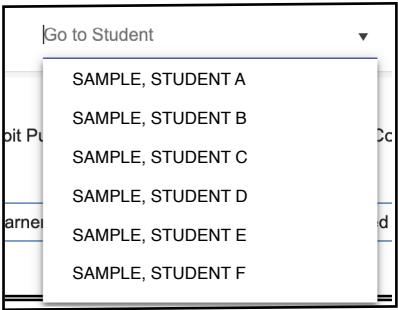

Figure 31: Go to Student

Display Number of Students Per Page

Some student-level reports contain additional functionality that allows you to navigate the reports more easily. In these student level reports, you may choose the number of students per page to display (Figure 32). Your choices are 50, 100, and 250 students.

Note: As more students are added to the displayed page, system performance may be impacted. You may see a ‘spinning wheel’ icon as the report refreshes to return the desired student count.

Figure 32: Display Number of Students per Page

Go to Next Page

The **Go to the Next Page** (Figure 33) function allows you to navigate to the next page, the previous page, the last page, an individual page, or, when a large number of reports are generated, pages beyond the sequence displayed as indicated by the three dots. Each page displays the number of students per page selected, as shown in Figure 32.

Figure 33: Go to the Next Page

Report Components and Functionality

Michigan’s Dynamic Score Reporting Site presents data for a variety of reports, including individual student reports, student rosters, and aggregate-level reports such as school and district demographic reports. Depending on the report selected, you will encounter the following components in each report type (Figure 34). Each component in the DSRS has a different purpose and functionality. M-STEP, PSAT 8/9 for Grade 8, PSAT 8/9 for Grade 9, PSAT 10, SAT with Essay, MI-Access, and Early Literacy and Mathematics Benchmark Assessments reports will display unique features associated with each of these assessments.

Note: The actual report may be different than what is shown in Figure 35.

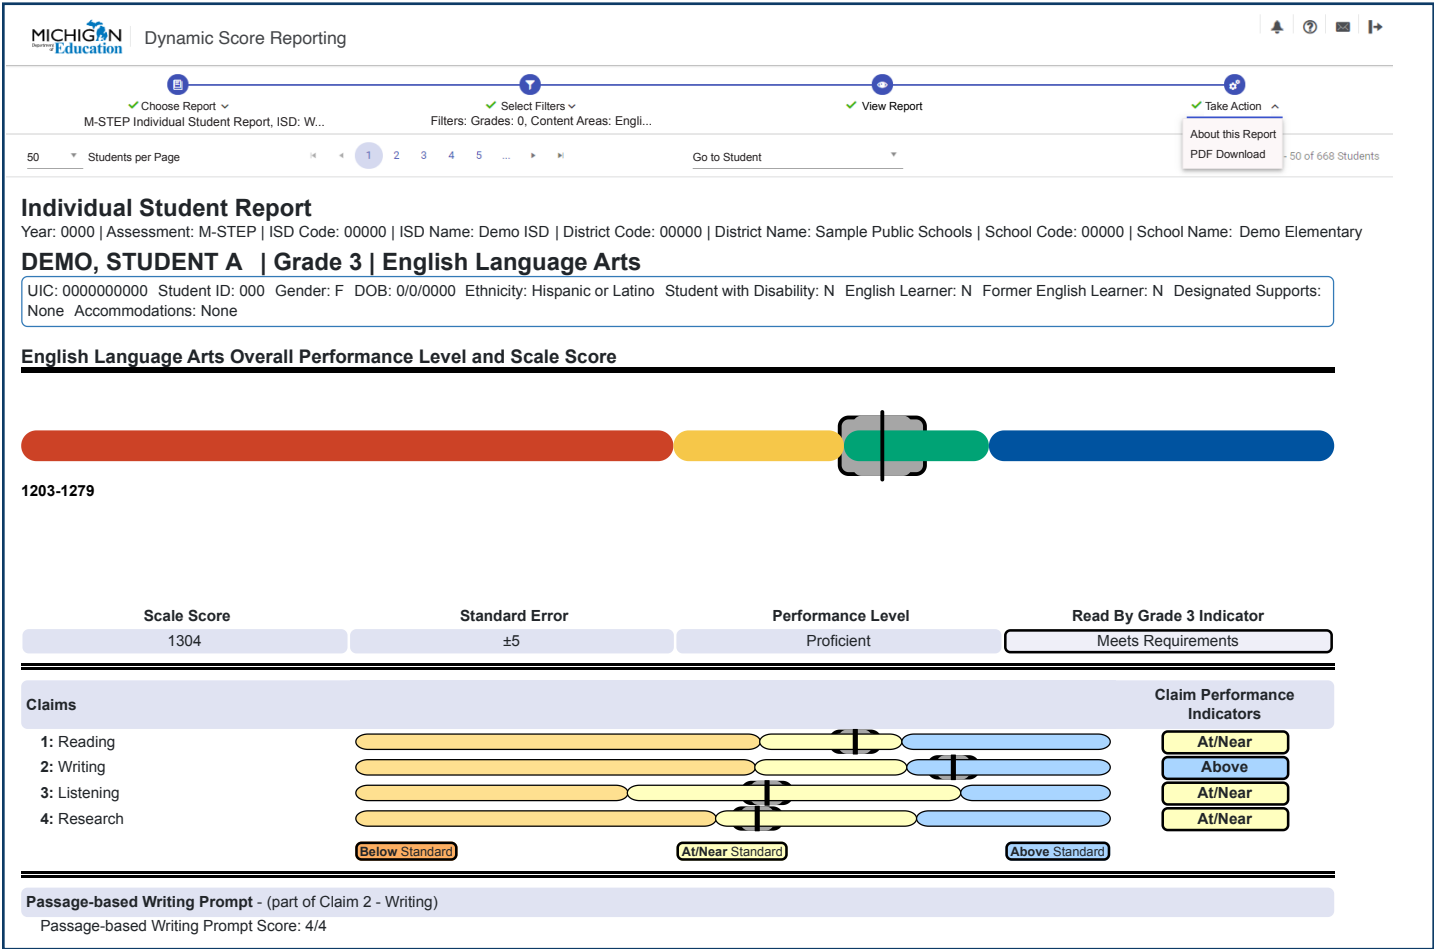

Figure 34: The Individual Student Report

Report Body

This is the main section of the report. The **Report Body** (Figure 35) contains the result of the user input from all filter tools. Depending on the report, the Report Body will contain different sections. In order to see all sections of the Report Body, you may have to scroll down using the scroll bar on the right side of the screen.

The Report Heading is displayed at the top of the Report Body. This heading is a static bar that provides the same information as the Search Results Heading, shown in Figure 34. Below the Report Heading is the Student Information Heading, which includes the student’s name, grade, content area, Unique Identification Code (UIC), District Student ID, Date of Birth (DOB), and other student information. This information is specific to each student and may vary.

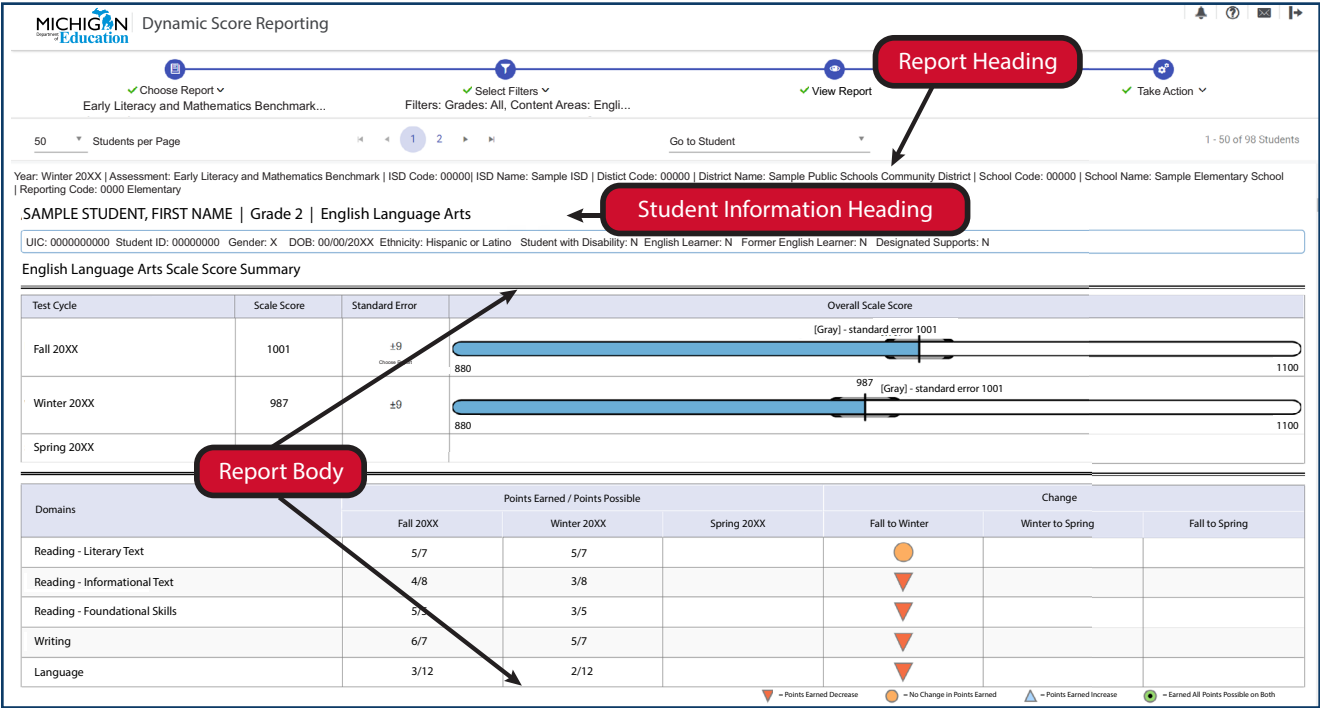

Figure 35: Report Body, Early Literacy and Mathematics Benchmark Assessment Individual Student Report

In some reports, such as the Student Roster report, data may be sorted. The **Sort Function** is available in data columns with headers that also have ascending and descending triangles for sorting. The triangles will appear black depending on the sorting section chosen. Hovering over the header displays “Click to Sort” (Figure 36).

This function is especially useful when sorting students by scale score, claim, or discipline performance in ascending or descending order.

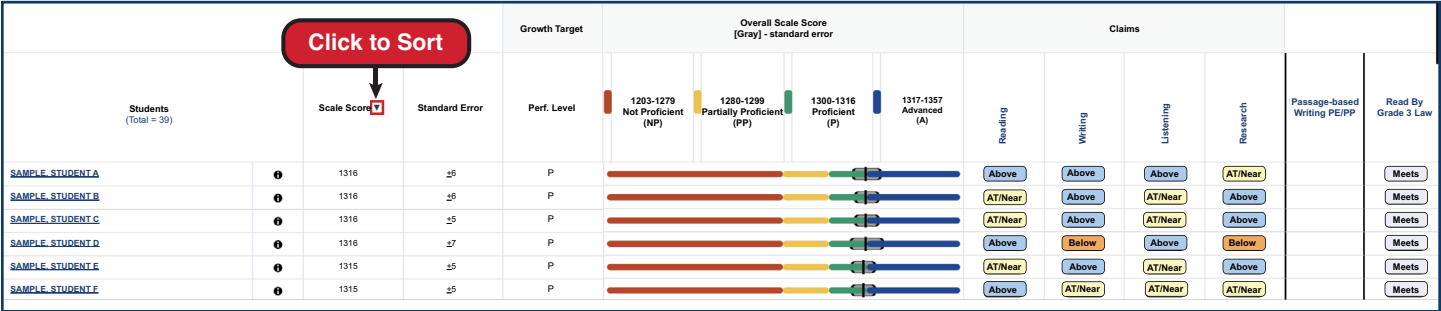

Figure 36: Click to Sort

In some reports, hovering over the **Student Information** ⓘ symbol next to a student’s name displays the student’s Unique Identification Code (UIC) and Date of Birth (DOB) (Figure 37). In the Early Literacy and Mathematics Benchmark Assessment report, you may see an ⓘ next to a student’s name. This indicates that the student’s test was invalid and the reason why the test was invalid (Figure 38).

Figure 37: Student Information

Figure 38: Invalid Reason

Some sections of the Report Body are dynamic and will allow the view to be customized (Figure 39). For example, in the **District Demographic Report**, you may expand and/or collapse this table as desired. In some aggregate reports, such as the M-STEP and MI-Access School and District Demographic report and the District Comprehensive report, you can view All Students/All Grades and all students in the selected grade, displayed in the stacked bar graph on the left side of the report. You can also select up to eight rows of comparison data in the table, which is also displayed on the left side of the report in a stacked bar graph with a different patterned graph color for each group.

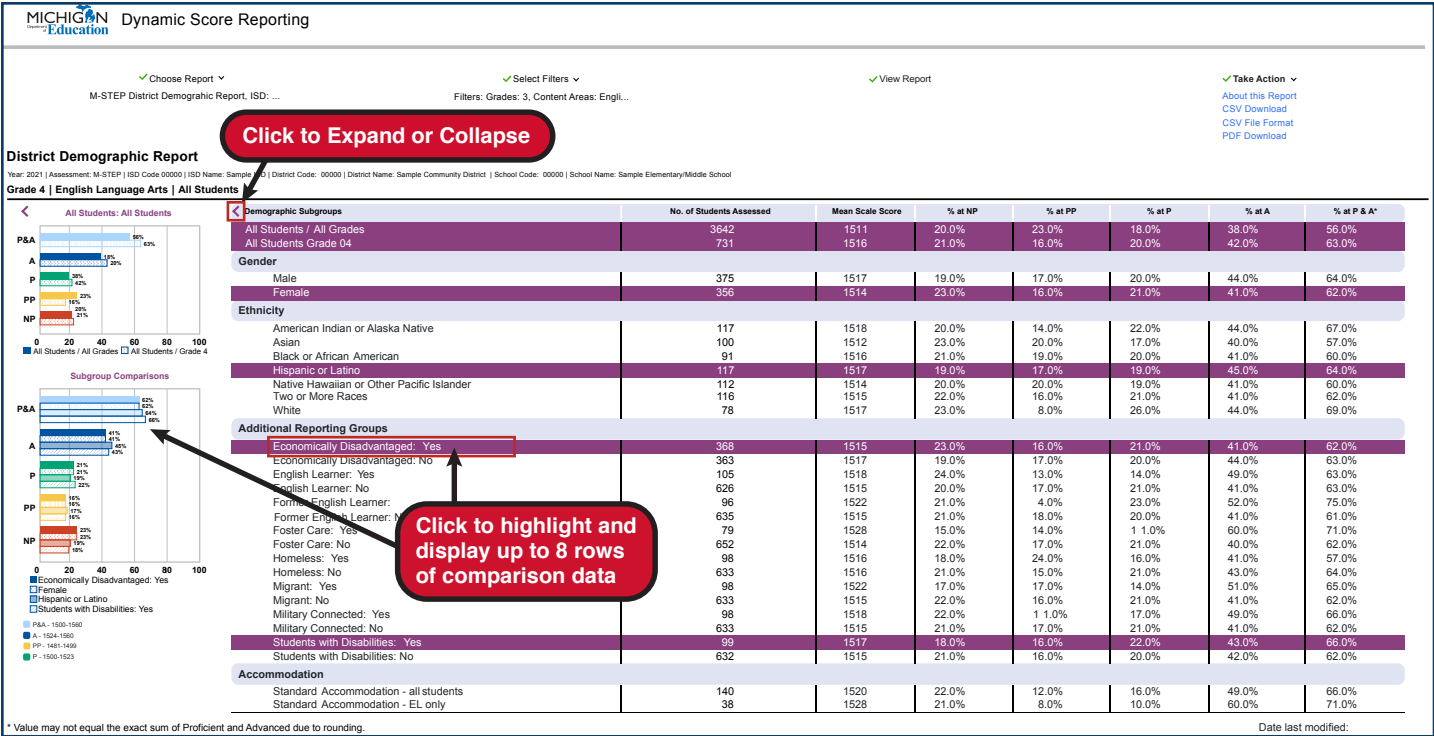

Figure 39: The District Demographic Report

Drill-Down Feature

The Dynamic Score Reporting Site has a drill-down feature for reports.

This table shows the drill-down path for each assessment and report.

Assessment	Level	Drill-Down Path
M-STEP	District/School/Student	District Comprehensive Report > School Demographic Report > Student Roster Report > Individual Student Report > Student Growth and Proficiency Report
MI-Access (FI only)	District/School/Student	District Comprehensive Report > School Demographic Report > Student Roster Report > Individual Student Report > Student Growth and Performance Report
MI-Access (SI and P)	School/Student	School Demographic Report>Student Roster Report>Individual Student Report
Early Literature and Mathematics Benchmark	School/Student	School Demographic Report > Student Roster Report > Individual Student Report
Early Literature and Mathematics Benchmark	School/Student	School Change Report >Domain Analysis Report > Individual Student Report
PSAT™ 8/9 for Grade 8	District/School/Student	District Comprehensive Report > School Demographic Report > Student Roster Report > Individual Student Report > Student Growth and Proficiency Report
PSAT™ 8/9 for Grade 9	Student	School Demographic Report > Student Roster Report > Individual Student Report
PSAT™ 8/9 for Grade 9	School	School Demographic Report
PSAT™ 10	Student	School Demographic Report > Student Roster Report > Individual Student Report
SAT® with Essay	District/School/Student	District Comprehensive Report > School Demographic Report > Student Roster Report > Individual Student Report > Student Growth and Proficiency Report

For example, in the School Demographic Report (Figure 40), the drill-down feature allows you to select the bold blue link in the Number of Students Assessed column to open a Student Roster Report and then an Individual Student Report.

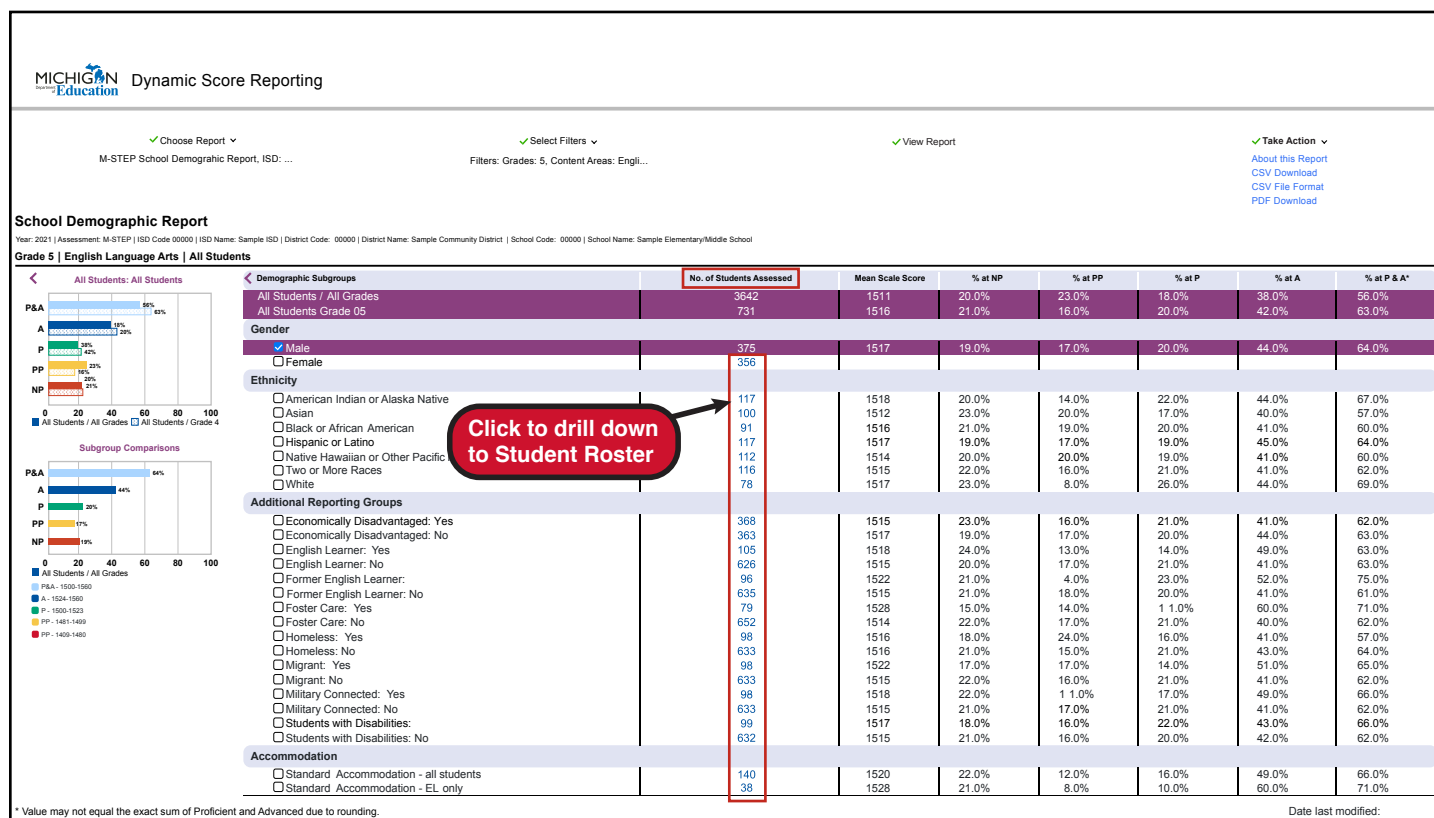

Figure 40: School Demographic Report

On the School Demographic Report, if the number of students assessed in any demographic subgroup is one or more, the number will display as a link. If the number of students assessed is zero, the number displayed is 0 and is not an active link.

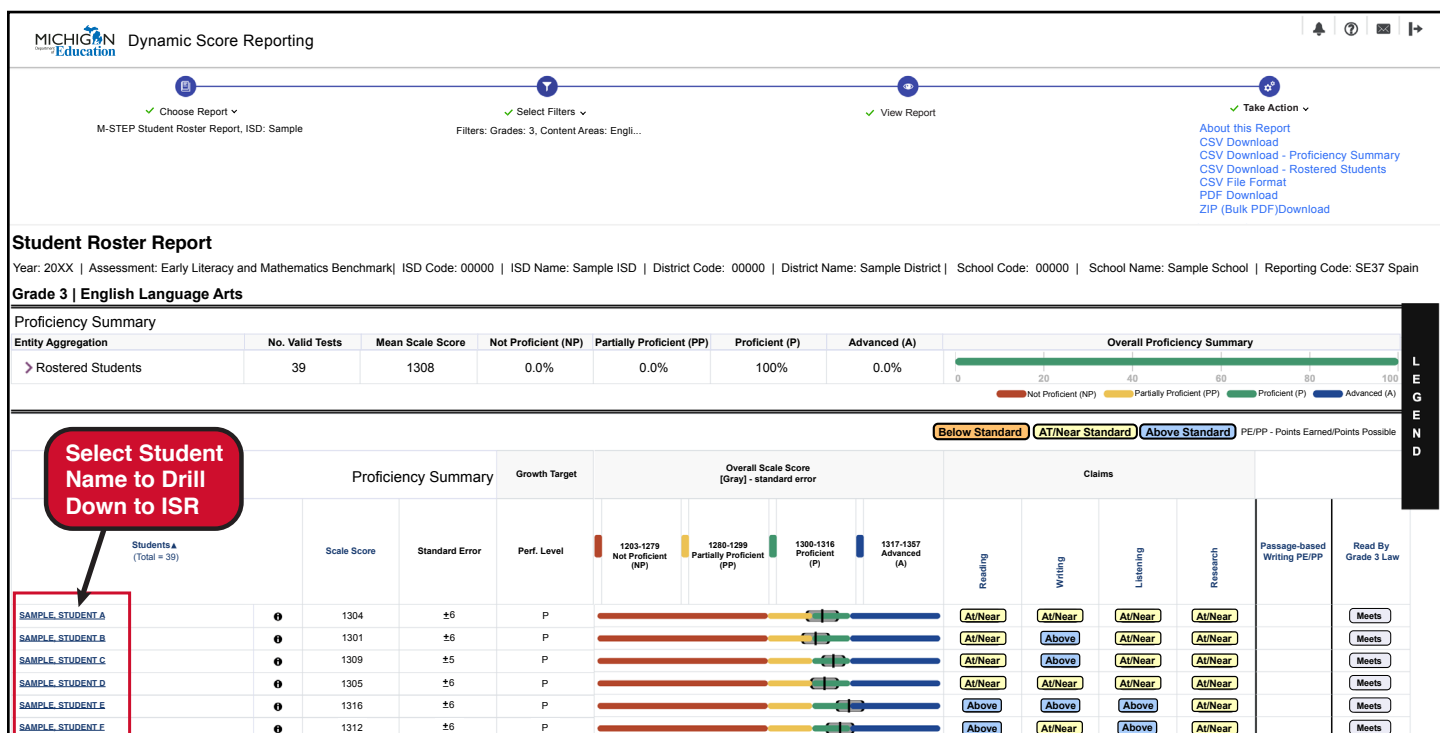

Figure 41: Student Roster Report

The Student Roster Report (Figure 41) includes a drill-down feature that allows you to select the student name on the Student Roster Report to open an Individual Student Report (Figure 42).

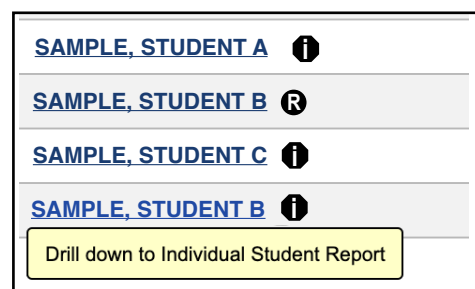

Figure 42: Drill-down to Individual Student Report link

After you have selected a student name to drill-down into the Individual Student Report and the Individual Student Report displays, a breadcrumb area appears above the Individual Student Report title that displays **Student Roster Report > Individual Student Report**. (Figure 43)

To return to the Student Roster Report, select **Student Roster Report**.

Figure 43: Drill-down Breadcrumb

When you drill down into a report, the Select Filters option is not available. You can view the report and use its sorting functionality or drill-down further. However, to select new filter options, you must select the desired report from the Choose Report menu, select NEXT, (Figure 44) and then choose from the available filter options for that report. The drill-down feature is not available on all reports (see table on page 24).

Figure 44: Choose New Report

For more information on how to drill-down on each report that features a drill-down function, please see the About This Report document available for each report, or the M-STEP/MI-Access Interpretive Guide to Reports, which will be available on each assessment's web page when final reports are released in the fall.

Exiting the Dynamic Score Reporting Site

To exit the Dynamic Score Reporting Site, select the Log Out icon () from the Alert/Help/Contact/Log Out panel (Figure 45) in the upper right-hand corner of the screen. Be sure to log out of your account which you are finished using the Secure Site.
