2023 State Test Scores Improve in Many Grades in Math, Science, Social Studies, and English Language Arts

Test scores for the spring 2023 M-STEP state assessments increased in all tested grades in science and social studies; in six of the seven tested grades in math; and in three grades in English language arts (ELA), the Michigan Department of Education (MDE) reported today.

These data follow the 2022 statewide test results where a majority of Michigan school districts showed improvement over the previous year's results.

"We continue to be encouraged by the gradual improvements in student achievement," said State Superintendent Dr. Michael Rice. "Though the 2022-23 school year was far from normal, given persistent staffing challenges and residual adverse impact of the pandemic, it was the most stable school year of the last four. Michigan's educators worked hard to help students continue to rebound and to increase their learning."

Of the 20 statewide assessments administered to students in Spring 2023, scores increased in 15 of the assessments, decreased in four, and remained the same in one.
