Census Data

The Census Bureau has established March 15, 2023, as the deadline to submit challenges in cases where non-statistical errors can be documented. Generally included in these are errors the Census Bureau may have made in (1) processing the data used to run its estimation models and (2) processing information that defines a school district's geographic boundaries.

If you believe the census estimates are incorrect, **please contact the Census Bureau directly to obtain information on how to challenge the data:**

School District Boundary Information

The list of school districts used for the 2021 estimates is based on the school year 2020-21 district boundary information. Also, the school districts on this list include only "regular" districts with geographic boundaries. The list does not include charter schools or regional vocational education districts. Your school district boundary map can be viewed at:
