K-8 Mathematics Grade Level Content Expectations

New Core and Extended Designations

Introduction

In 2004, the K-8 Mathematics Grade Level Content Expectations (GLCE) was released representing a new level of expectation in mathematics achievement for all students. Since content expectations are the foundation for statewide testing, the GLCE also affected the Michigan Education Assessment Program (MEAP). No Child Left Behind (NCLB) required states to assess students in grades 3-8 in mathematics and the GLCE guided test development at these grades.

Recognizing that educators needed time to adjust curriculum and instruction to reflect the shift from assessing at grade span around broad benchmarks to assessing at grade level around specific expectations, the Michigan Department of Education (MDE) decided to designate some expectations as “future.” MDE, working with the Michigan Council of Teachers of Mathematics (MCTM) identified those expectations which represented content that was not typically taught at that grade level. Those expectations were designated “future” for five years in 2004. The future expectations were assessed but not included in proficiency measures for adequate yearly progress (AYP). All other expectations were labeled as either core or extended core, with core expectations tested with three items and extended tested with one item, thus keeping the assessment a reasonable size for the testing window.

The time has come to incorporate the future expectations into the Fall 2009 MEAP assessments and score them as part of the AYP. MDE also faces a need to shorten the test to accommodate the one-day window for assessment. A work team from MDE and MCTM decided to reorganize the core and extended designations using the National Council of Teachers of Mathematics (NCTM) 2006 Focal Points (www.nctm.org) as guide. The NCTM Focal Points identified key mathematical content that should be the focus of instruction at each grade level (K-8).

What resulted are Michigan Focal Points, which represent the focus of instruction that should surround the GLCE. *Core GLCE are now those GLCE linked to a Michigan Focal Point and as such will be tested with two items on the MEAP. Extended core GLCE will be tested with 1 item and are those expectations either not linked to a Focal Point at that grade level or are a subset of a core expectation so 2 items are not needed.*

None of the GLCE were changed or eliminated. The GLCE have always represented the measurable skills and concepts that result from a good curriculum. The Michigan Focal Points represent the organization of curriculum and instruction; they identify those big mathematical ideas that should be considered when planning instruction at each grade level. Thus the assessment should be weighted toward those expectations linked to an important mathematical idea. More information on Michigan’s Focal Points can be found at www.michigan.gov/glce.

Michigan Focal Points

What follows is a table that outlines the Michigan Focal Points at each grade level. The language in each Michigan Focal Point is in many cases the same as an NCTM Focal Point. There is one column that lists each Michigan Focal Point by grade level and another column that specifies the topics from that same grade level that are linked to the Focal Point. These are the topics from which the core expectations (2nd-7th grade) were selected. The new core and extended designations by grade level begin after the Michigan Focal Points table.

Grade	Focal Point	Topics
K	Representing, comparing, and ordering whole numbers and joining and separating sets	<ul style="list-style-type: none"> ▪ Count, write, and order numbers ▪ Compose and decompose numbers ▪ Add and subtract numbers ▪ Explore number patterns
K	Describing shapes and space	<ul style="list-style-type: none"> ▪ Create, explore, and describe shapes ▪ Explore geometric patterns
K	Ordering objects by measurable attributes	<ul style="list-style-type: none"> ▪ Explore other measurement attributes
1st	Developing understandings of addition and subtraction and strategies for basic addition facts and related subtraction facts	<ul style="list-style-type: none"> ▪ Count, write, and order numbers ▪ Add and subtract whole numbers ▪ Solve problems ▪ Work with money
1st	Developing an understanding of whole number relationships, including grouping in tens and ones	<ul style="list-style-type: none"> ▪ Explore place value
1st	Developing an understanding of linear measurement and facility in measuring lengths	<ul style="list-style-type: none"> ▪ Estimate and measure length
2nd	Developing an understanding of the base-ten numeration system and place-value concepts	<ul style="list-style-type: none"> ▪ Count, write, and order whole numbers ▪ Understand place value
2nd	Developing quick recall of addition facts and related subtraction facts and fluency with multi-digit addition and subtraction	<ul style="list-style-type: none"> ▪ Add and subtract whole numbers ▪ Measure, add, and subtract length ▪ Record, add and subtract money ▪ Solve measurement problems ▪ Tell time and solve time problems
2nd	Composing and decomposing geometric shapes	<ul style="list-style-type: none"> ▪ Identify and describe shapes ▪ Work with unit fractions
3rd	Developing understandings of multiplication and division and strategies for basic multiplication facts and related division facts	<ul style="list-style-type: none"> ▪ Count in steps, and understand even and odd numbers ▪ Multiply and divide whole numbers ▪ Problem-solving with whole numbers
3rd	Developing an understanding of area and perimeter and determining the areas and perimeters of two-dimensional shapes	<ul style="list-style-type: none"> ▪ Understand meaning of area and perimeter and apply in problems ▪ Estimate perimeter and area ▪ Solve measurement problems
3rd	Describing properties of two-dimensional shapes and classifying three-dimensional shapes	<ul style="list-style-type: none"> ▪ Recognize the basic elements of geometric objects ▪ Name and explore properties of shapes ▪ Explore and name three-dimensional solids

Grade	Focal Point	Topics
3rd	Developing an understanding of fractions and fraction equivalence	<ul style="list-style-type: none"> ▪ Understand simple fractions, relation to the whole, and addition and subtraction of fractions ▪ Understand simple decimal fractions in relation to money
4th	Developing fluency with multiplication of whole numbers	<ul style="list-style-type: none"> ▪ Use factors and multiples ▪ Multiply and divide whole numbers
4th	Developing an understanding of fractions and decimals, including the connections between them	<ul style="list-style-type: none"> ▪ Read, interpret and compare decimal fractions ▪ Understand fractions
5th	Developing an understanding of and fluency with division of whole numbers	<ul style="list-style-type: none"> ▪ Understand division of whole numbers ▪ Multiply and divide whole numbers ▪ Find prime factorizations of whole numbers ▪ Multiply and divide by powers of ten ▪ Know, and convert among, measurement units within a given system ▪ Find and interpret mean and mode for a given set of data
5th	Developing an understanding of and fluency with addition and subtraction of fractions and decimals	<ul style="list-style-type: none"> ▪ Add and subtract fractions using common denominators ▪ Solve applied problems with fractions
5th	Analyzing properties of two-dimensional shapes, including angles	<ul style="list-style-type: none"> ▪ Find areas of geometric shapes using formulas ▪ Know the meaning of angles, and solve problems ▪ Solve problems about geometric shapes
6th	Developing an understanding of operations on all rational numbers	<ul style="list-style-type: none"> ▪ Multiply and divide fractions ▪ Represent rational numbers as fractions or decimals ▪ Add and subtract integers and rational numbers ▪ Find equivalent ratios ▪ Solve decimal, percentage and rational number problems ▪ Calculate rates
6th	Writing, interpreting, and using mathematical expressions and equations and solving linear equations	<ul style="list-style-type: none"> ▪ Use variables, write expressions and equations, and combine like terms ▪ Represent linear functions using tables, equations, and graphs ▪ Solve equations

Grade	Focal Point	Topics
6th	Describing three-dimensional shapes and analyzing their properties, including volume and surface area	<ul style="list-style-type: none"> ▪ Convert within measurement systems ▪ Find volume and surface area
7th	Developing an understanding of and applying proportionality, including similarity	<ul style="list-style-type: none"> ▪ Understand derived quantities ▪ Understand and solve problems involving rates, ratios, and proportions ▪ Understand and apply directly proportional relationships and relate to linear relationships ▪ Understand and solve problems about inversely proportional relationships ▪ Understand the concept of similar polygons, and solve related problems
7th	Analyzing and representing linear functions and solving linear equations and systems of linear equations	<ul style="list-style-type: none"> ▪ Understand and represent linear functions ▪ Apply basic properties of real numbers in algebraic contexts ▪ Combine algebraic expressions and solve equations ▪ Recognize irrational numbers ▪ Compute with rational numbers ▪ Represent and interpret data
8th	Analyzing and representing non-linear functions	<ul style="list-style-type: none"> ▪ Understand the concept of non-linear functions using basic examples ▪ Understand and represent quadratic functions
8th	Developing an understanding of and using formulas to determine surface areas and volumes of three-dimensional shapes	<ul style="list-style-type: none"> ▪ Understand concepts of volume and surface area, and apply formulas ▪ Visualize solids
8th	Analyzing two- and three-dimensional space and figures by using distance and angle	<ul style="list-style-type: none"> ▪ Understand and use the Pythagorean Theorem ▪ Solve problems about geometric figures ▪ Understand and apply concepts of transformation and symmetry
8th	Analyzing and summarizing data sets	<ul style="list-style-type: none"> ▪ Draw, explain, and justify conclusions based on data

Core and Extended Designations

SECOND GRADE

Focal Points

- Developing an understanding of the base-ten numeration system and place-value concepts
- Developing quick recall of addition facts and related subtraction facts and fluency with multi-digit addition and subtraction
- Composing and decomposing geometric shapes

Number and Operations

Count, write, and order whole numbers

N.ME.02.01 Count to 1000 by 1's, 10's, and 100's starting from any number in the sequence. **[Core - NC]**

N.ME.02.02 Read and write numbers to 1000 in numerals and words, and relate them to the quantities they represent. **[Core - NC]**

N.ME.02.03 Compare and order numbers to 1000; use the symbols $>$ and $<$. **[Core - NC]**

N.ME.02.04 Count orally by 3's and 4's starting with 0, and by 2's, 5's, and 10's starting from any whole number. **[NASL]**

Understand place value

N.ME.02.05 Express numbers through 999 using place value, e.g., 137 is 1 hundred, 3 tens, and 7 ones; use concrete materials. **[NASL]**

Add and subtract whole numbers

N.FL.02.06 Decompose 100 into addition pairs, e.g., $99 + 1$, $98 + 2$... **[Core - NC]**

N.MR.02.07 Find the distance between numbers on the number line, e.g., How far is 79 from 26? **[Core - NC]**

N.MR.02.08 Find missing values in open sentences, e.g., $42 + \square = 57$; use relationship between addition and subtraction. **[Core - NC]**

N.MR.02.09 Given a contextual situation that involves addition and subtraction using numbers through 99: model using objects or pictures; explain in words; record using numbers and symbols; solve. **[Core - NC]**

N.FL.02.10 Add fluently two numbers through 99, using strategies including formal algorithms; subtract fluently two numbers through 99. **[Core - NC]**

N.FL.02.11 Estimate the sum of two numbers with three digits. **[Ext - NC]**

N.FL.02.12 Calculate mentally sums and differences involving: three-digit numbers and ones; three-digit numbers and tens; three-digit numbers and hundreds. **[NASL]**

Understand meaning of multiplication and division

N.MR.02.13 Understand multiplication as the result of counting the total number of objects in a set of equal groups, e.g., 3×5 gives the number of objects in 3 groups of 5 objects, or $3 \times 5 = 5 + 5 + 5 = 15$. **[Ext - NC]**

N.MR.02.14 Represent multiplication using area and array models. **[Ext - NC]**

N.MR.02.15 Understand division (\div) as another way of expressing multiplication, using fact families within the 5×5 multiplication table; emphasize that division “undoes” multiplication, e.g., $2 \times 3 = 6$ can be rewritten as $6 \div 2 = 3$ or $6 \div 3 = 2$. **[Ext - NC]**

N.MR.02.16 Given a simple situation involving groups of equal size or of sharing equally, represent with objects, words, and symbols; solve. **[Ext - NC]**

N.MR.02.17 Develop strategies for fluently multiplying numbers up to 5×5 . **[NASL]**

Work with unit fractions

N.ME.02.18 Recognize, name, and represent commonly used unit fractions with denominators 12 or less; model $\frac{1}{2}$, $\frac{1}{3}$ and $\frac{1}{4}$ by folding strips. **[Ext - NC]**

N.ME.02.19 Recognize, name, and write commonly used fractions: $\frac{1}{2}$, $\frac{1}{3}$, $\frac{2}{3}$, $\frac{1}{4}$, $\frac{2}{4}$, $\frac{3}{4}$. **[Ext - NC]**

N.ME.02.20 Place 0 and halves, e.g., $\frac{1}{2}$, $1\frac{1}{2}$, $2\frac{1}{2}$, on the number line; relate to a ruler. **[Ext - NC]**

N.ME.02.21 For unit fractions from $\frac{1}{12}$ to $\frac{1}{2}$, understand the inverse relationship between the size of a unit fraction and the size of the denominator; compare unit fractions from $\frac{1}{12}$ to $\frac{1}{2}$. **[Ext - NC]**

N.ME.02.22 Recognize that fractions such as $\frac{2}{2}$, and $\frac{3}{3}$ and $\frac{4}{4}$ are equal to the whole (one). **[Ext - NC]**

Measurement

Measure, add, and subtract length

M.UN.02.01 Measure lengths in meters, centimeters, inches, feet, and yards approximating to the nearest whole unit and using abbreviations: cm, m, in, ft, yd. **[Ext - NC]**

M.PS.02.02 Compare lengths; add and subtract lengths (no conversion of units). **[Core -NC]**

Understand the concept of area

M.UN.02.03 Measure area using non-standard units to the nearest whole unit. **[Ext - NC]**

M.TE.02.04 Find the area of a rectangle with whole number side lengths by covering with unit squares and counting, or by using a grid of unit squares; write the area as a product. **[Ext - NC]**

Tell time and solve time problems

M.UN.02.05 Using both A.M. and P.M., tell and write time from the clock face in 5-minute intervals, and from digital clocks to the minute; include reading time: 9:15 as nine-fifteen and 9:50 as nine-fifty. Interpret time both as minutes after the hour and minutes before the next hour, e.g., 8:50 as eight-fifty and ten to nine. Show times by drawing hands on clock face. **[Ext - NC]**

M.UN.02.06 Use the concept of duration of time, e.g., determine what time it will be half an hour from 10:15. **[Core - NC]**

Record, add and subtract money

M.UN.02.07 Read and write amounts of money using decimal notations, e.g., \$1.15. **[Core - NC]**

M.PS.02.08 Add and subtract money in mixed units, e.g., \$2.50 + 60 cents and \$5.75 - \$3, but not \$2.50 + \$3.10. **[Ext - NC]**

Read thermometers

M.UN.02.09 Read temperature using the scale on a thermometer in degrees Fahrenheit. **[Ext - NC]**

Solve measurement problems

M.PS.02.10 Solve simple word problems involving length and money. **[Core - NC]**

M.TE.02.11 Determine perimeters of rectangles and triangles by adding lengths of sides, recognizing the meaning of perimeter. **[Core - NC]**

Geometry

Identify and describe shapes

G.GS.02.01 Identify, describe, and compare familiar two-dimensional and three-dimensional shapes, such as triangles, rectangles, squares, circles, semi-circles, spheres, rectangular prisms. **[Core - NC]**

G.GS.02.02 Explore and predict the results of putting together and taking apart two-dimensional and three-dimensional shapes. **[Core - NC]**

G.GS.02.04 Distinguish between curves and straight lines and between curved surfaces and flat surfaces. **[Ext - NC]**

G.SR.02.05 Classify familiar plane and solid objects, e.g., square, rectangle, rhombus, cube, pyramid, prism, cone, cylinder, and sphere, by common attributes such as shape, size, color, roundness or number of corners and explain which attributes are being used for classification. **[Core - NC]**

G.TR.02.06 Recognize that shapes that have been slid, turned or flipped are the same shape, e.g., a square rotated 45° is still a square. **[Ext - NC]**

Use coordinate systems

G.LO.02.07 Find and name locations using simple coordinate systems such as maps and first quadrant grids. **[Ext - NC]**

Data and Probability

Create, interpret, and solve problems involving pictographs

D.RE.02.01 Make pictographs using a scale representation, using scales where symbols equal more than one. **[Ext - NC]**

D.RE.02.02 Read and interpret pictographs with scales, using scale factors of 2 and 3. **[Ext - NC]**

D.RE.02.03 Solve problems using information in pictographs; include scales such as “each  represents 2 apples.”; avoid partial cases. **[Ext - NC]**

THIRD GRADE

Focal Points

- Developing an understanding of area and perimeter and determining the areas and perimeters of two-dimensional shapes
- Describing properties of two-dimensional shapes and classifying three-dimensional shapes
- Developing an understanding of fractions and fraction equivalence

Number and Operations

Understand and use number notation and place value

N.ME.03.01 Read and write numbers to 10,000 in both numerals and words, and relate them to the quantities they represent, e.g., relate numeral or written word to a display of dots or objects. **[Ext - NC]**

N.ME.03.02 Identify the place value of a digit in a number, e.g., in 3,241, 2 is in the hundreds place. Recognize and use expanded notation for numbers using place value through 9,999, e.g., 2,517 is $2000 + 500 + 10 + 7$; 4 hundreds and 2 ones is 402. **[Ext - NC]**

N.ME.03.03 Compare and order numbers up to 10,000. **[Ext - NC]**

Count in steps, and understand even and odd numbers

N.ME.03.04 Count orally by 6's, 7's, 8's, and 9's starting with 0, making the connection between repeated addition and multiplication. **[NASL]**

N.ME.03.05 Know that even numbers end in 0, 2, 4, 6, or 8; name a whole number quantity that can be shared in two equal groups or grouped into pairs with no remainders; recognize even numbers as multiples of 2. Know that odd numbers end in 1, 3, 5, 7, or 9. Work with patterns involving even and odd numbers. **[Ext - NC]**

Add and subtract whole numbers

N.FL.03.06 Add and subtract fluently two numbers through 999 with regrouping and through 9,999 without regrouping. **[Ext - NC]**

N.FL.03.07 Estimate the sum and difference of two numbers with three digits (sums up to 1000), and judge reasonableness of estimates. **[Ext - NC]**

N.FL.03.08 Use mental strategies to fluently add and subtract two-digit numbers. **[NASL]**

Multiply and divide whole numbers

N.MR.03.09 Use multiplication and division fact families to understand the inverse relationship of these two operations, e.g., because $3 \times 8 = 24$, we know that $24 \div 8 = 3$ or $24 \div 3 = 8$; express a multiplication statement as an equivalent division statement. **[Core - NC]**

N.MR.03.10 Recognize situations that can be solved using multiplication and division including finding “How many groups?” and “How many in a group?” and write mathematical statements to represent those situations. **[Core - NC]**

N.FL.03.11 Find products fluently up to 10×10 ; find related quotients using multiplication and division relationships. **[Core - NC]**

N.MR.03.12 Find solutions to open sentences, such as $7 \times \square = 42$ or $12 \div \square = 4$, using the inverse relationship between multiplication and division. **[Ext]**

N.FL.03.13 Mentally calculate simple products and quotients: up to a three-digit number by a one-digit number involving multiples of 10, e.g., 500×6 , or $400 \div 8$. **[NASL]**

N.MR.03.14 Solve division problems involving remainders, viewing the remainder as the “number left over”; interpret based on problem context, e.g., when we have 25 children with 4 children per group then there are 6 groups with 1 child left over. **[Core]**

Problem solving with whole numbers

N.MR.03.15 Given problems that use any one of the four operations with appropriate numbers, represent with objects, words, (including “product” and “quotient”), and mathematical statements; solve. **[Core]**

Understand simple fractions, relation to the whole, and addition and subtraction of fractions

N.ME.03.16 Understand that fractions may represent a portion of a whole unit that has been partitioned into parts of equal area or length; use the terms “numerator” and “denominator.” **[Core - NC]**

N.ME.03.17 Recognize, name and use equivalent fractions with denominators 2, 4, and 8, using strips as area models. **[Core - NC]**

N.ME.03.18 Place fractions with denominators of 2, 4, and 8 on the number line; relate the number line to a ruler; compare and order up to three fractions with denominators 2, 4, and 8. **[Core - NC]**

N.ME.03.19 Understand that any fraction can be written as a sum of unit fractions, e.g.

$$\frac{3}{4} = \frac{1}{4} + \frac{1}{4} + \frac{1}{4}. \quad \text{[Ext - NC]}$$

N.MR.03.20 Recognize that addition and subtraction of fractions with equal denominators can be modeled by joining or taking away segments on the number line. **[Ext - NC]**

Understand simple decimal fractions in relation to money

N.ME.03.21 Understand and relate decimal fractions to fractional parts of a dollar, e.g.,

$\frac{1}{2}$ dollar = \$0.50; $\frac{1}{4}$ dollar = \$0.25. **[Ext]**

Measurement

Measure and use units for length, weight, temperature, and time

M.UN.03.01 Know and use common units of measurements in length, weight and time. **[Ext]**

M.UN.03.02 Measure in mixed units within the same measurement system for length, weight and time: feet and inches, meters and centimeters, kilograms and grams, pounds and ounces, liters and milliliters, hours and minutes, minutes and seconds, years and months. **[Ext]**

M.UN.03.03 Understand relationships between sizes of standard units, e.g., feet and inches, meters and centimeters. **[Ext]**

M.UN.03.04 Know benchmark temperatures such as freezing (32°F, 0°C); boiling (212°F, 100°C); and compare temperatures to these, e.g., cooler, warmer. **[Ext - NC]**

Understand meaning of area and perimeter and apply in problems

M.UN.03.05 Know the definition of area and perimeter and calculate the perimeter of a square and rectangle given whole number side lengths. **[Core]**

M.UN.03.06 Use square units in calculating area by covering the region and counting the number of square units. **[Core – NC]**

M.UN.03.07 Distinguish between units of length and area, and choose a unit appropriate in the context. **[Core - NC]**

M.UN.03.08 Visualize and describe the relative sizes of one square inch and one square centimeter. **[Ext - NC]**

Estimate perimeter and area

M.TE.03.09 Estimate the perimeter of a square and rectangle in inches and centimeters; estimate the area of a square and rectangle in square inches and square centimeters. **[Core - NC]**

Solve measurement problems

M.PS.03.10 Add and subtract lengths, weights and times using mixed units, within the same measurement system. **[Ext]**

M.PS.03.11 Add and subtract money in dollars and cents. **[Ext]**

M.PS.03.12 Solve applied problems involving money, length, and time. **[Core]**

M.PS.03.13 Solve contextual problems about perimeters of rectangles and areas of rectangular regions. **[Core]**

Geometry

Recognize the basic elements of geometric objects

G.GS.03.01 Identify points, line segments, lines, and distance. **[Core - NC]**

G.GS.03.02 Identify perpendicular lines and parallel lines in familiar shapes and in the classroom. **[Core - NC]**

G.GS.03.03 Identify parallel faces of rectangular prisms, in familiar shapes and in the classroom. **[Core - NC]**

Name and explore properties of shapes

G.GS.03.04 Identify, describe, compare and classify two-dimensional shapes, e.g., parallelogram, trapezoid, circle, rectangle, square and rhombus, based on their component parts (angles, sides, vertices, line segment) and the number of sides and vertices. **[Core - NC]**

G.SR.03.05 Compose and decompose triangles and rectangles to form other familiar two-dimensional shapes; e.g., form a rectangle using two congruent right triangles, or decompose a parallelogram into a rectangle and two right triangles. **[Core - NC]**

Explore and name three-dimensional solids

G.GS.03.06 Identify, describe, build and classify familiar three-dimensional solids, e.g., cube, rectangular prism, sphere, pyramid, cone, based on their component parts (faces, surfaces, bases, edges, vertices). **[Core - NC]**

G.SR.03.07 Represent front, top, and side views of solids built with cubes. **[Ext - NC]**

Data and Probability

Use bar graphs

D.RE.03.01 Read and interpret bar graphs, in both horizontal and vertical forms. **[Ext - NC]**

D.RE.03.02 Read scales on the axes and identify the maximum, minimum, and range of values in a bar graph. **[Ext - NC]**

D.RE.03.03 Solve problems using information in bar graphs, including comparison of bar graphs. **[Ext]**

FOURTH GRADE

Focal Points

- Developing fluency with multiplication of whole numbers
- Developing an understanding of fractions and decimals, including the connections between them

Number and Operations

Understand and use number notation and place value

N.ME.04.01 Read and write numbers to 1,000,000; relate them to the quantities they represent; compare and order. **[Ext - NC]**

N.ME.04.02 Compose and decompose numbers using place value to 1,000,000's, e.g., 25,068 is 2 ten thousands, 5 thousands, 0 hundreds, 6 tens, and 8 ones. **[Ext - NC]**

N.ME.04.03 Understand the magnitude of numbers up to 1,000,000; recognize the place values of numbers, and the relationship of each place value to the place to its right, e.g., 1,000 is 10 hundreds. **[Ext - NC]**

Use factors and multiples

N.ME.04.04 Find all factors of a whole number through 50, list factor pairs, and determine if a one-digit number is a factor of a given whole number. **[Core - NC]**

N.ME.04.05 List the first ten multiples of a given one-digit whole number; determine if a whole number is a multiple of a given one-digit whole number. **[Core - NC]**

N.MR.04.06 Know that some numbers, including 2, 3, 5, 7, and 11 have exactly two factors (1 and the number itself) and are called prime numbers. **[Ext - NC]**

N.MR.04.07 Use factors and multiples to compose and decompose whole numbers. **[Core - NC]**

Add and subtract whole numbers

N.FL.04.08 Add and subtract whole numbers fluently. **[Ext - NC]**

Multiply and divide whole numbers

N.ME.04.09 Multiply two-digit numbers by 2, 3, 4, and 5, using the distributive property, e.g., $21 \times 3 = (1 + 20) \times 3 = (1 \times 3) + (20 \times 3) = 3 + 60 = 63$. **[Core - NC]**

N.FL.04.10 Multiply fluently any whole number by a one-digit number, and a three-digit number by a two-digit number; for two-digit by one-digit multiplication, use distributive property to develop meaning for the algorithm. **[Core - NC]**

N.FL.04.11 Divide numbers up to four-digits by one-digit numbers and by 10. **[Core - NC]**

N.FL.04.12 Find the value of the unknowns in equations such as $a \div 10 = 25$; $125 \div b = 25$. **[Core - NC]**

N.MR.04.13 Use the relationship between multiplication and division to simplify computations and check results. **[Ext]**

N.MR.04.14 Solve contextual problems involving whole number multiplication and division. **[Core]**

Read, interpret and compare decimal fractions

N.ME.04.15 Read and interpret decimals up to two decimal places; relate to money and place value decomposition. **[Core]**

N.ME.04.16 Know that terminating decimals represent fractions whose denominators are 10, 10×10 , $10 \times 10 \times 10$, etc., e.g., powers of 10. **[Ext]**

N.ME.04.17 Locate tenths and hundredths on a number line. **[Ext - NC]**

N.ME.04.18 Read, write, interpret, and compare decimals up to two decimal places. **[Core - NC]**

N.MR.04.19 Write tenths and hundredths in decimal and fraction forms, and know the decimal equivalents for halves and fourths. **[Core - NC]**

Understand fractions

N.ME.04.20 Understand fractions as parts of a set of objects. **[Ext - NC]**

N.MR.04.21 Explain why equivalent fractions are equal, using models such as fraction strips or the number line, for fractions with denominators of 12 or less, or equal to 100. **[Core]**

N.MR.04.22 Locate fractions with denominators of 12 or less on the number line; include mixed numbers. **[Core - NC]**

N.MR.04.23 Understand the relationships among halves, fourths and eighths, and among thirds, sixths and twelfths. **[Core - NC]**

N.ME.04.24 Know that fractions of the form $\frac{m}{n}$, where m is greater than n , are greater than 1 and are called improper fractions; locate improper fractions on the number line; **[Ext - NC]**

N.MR.04.25 Write improper fractions as mixed numbers, and understand that a mixed number represents the number of “wholes” and the part of a whole remaining, e.g.,

$$\frac{5}{4} = 1 + \frac{1}{4} = 1\frac{1}{4}. \text{ [Core - NC]}$$

N.MR.04.26 Compare and order up to three fractions with denominators 2, 4, and 8, and 3, 6, and 12, including improper fractions and mixed numbers. **[Core - NC]**

Add and subtract fractions

N.MR.04.27 Add and subtract fractions less than 1 with denominators 12 and/or 100, in cases where the denominators are equal or when one denominator is a multiple of the other.

e.g., $\frac{1}{12} + \frac{5}{12} = \frac{6}{12}$; $\frac{2}{25} + \frac{7}{50} = \frac{11}{50}$. **[Ext - NC]**

N.MR.04.28 Solve contextual problems involving sums and differences for fractions where one denominator is a multiple of the other (denominators 2 through 12, and 100). **[Ext - NC]**

N.MR.04.29 Find the value of the unknown in equations such as:

$\frac{1}{8} + x = \frac{5}{8}$ or $\frac{3}{4} - y = \frac{1}{2}$. **[Ext - NC]**

Multiply fractions by whole numbers

N.MR.04.30 Multiply fractions by whole numbers, using repeated addition and area or array models. **[Ext - NC]**

Add and subtract decimal fractions

N.MR.04.31 For problems that use addition and subtraction of decimals through hundredths, represent with mathematical statements and solve. **[Ext]**

N.FL.04.32 Add and subtract decimals through hundredths. **[Ext - NC]**

Multiply and divide decimal fractions

N.FL.04.33 Multiply and divide decimals up to two decimal places by a one-digit whole number where the result is a terminating decimal, e.g., $0.42 \div 3 = 0.14$, but not $5 \div 3 = 1.\bar{6}$. **[Ext - NC]**

Estimate

N.FL.04.34 Estimate the answers to calculations involving addition, subtraction, or multiplication. **[Ext - NC]**

N.FL.04.35 Know when approximation is appropriate and use it to check the reasonableness of answers; be familiar with common place-value errors in calculations. **[Ext - NC]**

N.FL.04.36 Make appropriate estimations and calculations fluently with whole numbers using mental math strategies. **[NASL]**

Measurement

Measure using common tools and appropriate units

M.UN.04.01 Measure using common tools and select appropriate units of measure.

[Ext - NC]

M.PS.04.02 Give answers to a reasonable degree of precision in the context of a given problem. **[Ext]**

M.UN.04.03 Measure and compare integer temperatures in degrees. **[Ext - NC]**

M.TE.04.04 Measure surface area of cubes and rectangular prisms by covering and counting area of the faces. **[NASL]**

Convert measurement units

M.TE.04.05 Carry out the following conversions from one unit of measure to a larger or smaller unit of measure: meters to centimeters, kilograms to grams, liters to milliliters, hours to minutes, minutes to seconds, years to months, weeks to days, feet to inches, ounces to pounds (using numbers that involve only simple calculations.) **[Ext]**

Use perimeter and area formulas

M.TE.04.06 Know and understand the formulas for perimeter and area of a square and a rectangle; calculate the perimeters and areas of these shapes and combinations of these shapes using the formulas. **[Ext]**

M.TE.04.07 Find one dimension of a rectangle given the other dimension and its perimeter or area. **[Ext]**

M.TE.04.08 Find the side of a square given its perimeter or area. **[Ext]**

M.PS.04.09 Solve contextual problems about perimeter and area of squares and rectangles in compound shapes. **[Ext]**

Understand right angles

M.TE.04.10 Identify right angles and compare angles to right angles. **[Ext - NC]**

Problem solving

M.PS.04.11 Solve contextual problems about surface area. **[Ext]**

Geometry

Understand perpendicular, parallel, and intersecting lines

G.GS.04.01 Identify and draw perpendicular, parallel, and intersecting lines using a ruler and a tool or object with a square (90°) corner. **[Ext - NC]**

Identify basic geometric shapes and their components, and solve problems

G.GS.04.02 Identify basic geometric shapes, including isosceles, equilateral and right triangles, and use their properties to solve problems. **[Ext - NC]**

G.SR.04.03 Identify and count the faces, edges, and vertices of basic three-dimensional geometric solids including cubes, rectangular prisms, and pyramids; describe the shape of their faces. **[Ext - NC]**

Recognize symmetry and transformations

G.TR.04.04 Recognize plane figures that have line symmetry. **[Ext - NC]**

G.TR.04.05 Recognize rigid motion transformations (flips, slides, turns) of a two-dimensional object. **[Ext - NC]**

Data and Probability

Represent and solve problems for given data

D.RE.04.01 Construct tables and bar graphs from given data. **[Ext]**

D.RE.04.02 Order a given set of data, find the median, and specify the range of values. **[Ext]**

D.RE.04.03 Solve problems using data presented in tables and bar graphs, e.g., compare data represented in two bar graphs; read bar graphs showing two data sets. **[Ext]**

FIFTH GRADE

Focal Points

- Developing an understanding of and fluency with division of whole numbers
- Developing an understanding of and fluency with addition and subtraction of fractions and decimals
- Analyzing properties of two-dimensional shapes, including angles

Number and Operations

Understand division of whole numbers

N.MR.05.01 Understand the meaning of division of whole numbers, with and without remainders; relate division to fractions and to repeated subtraction. **[Core - NC]**

N.MR.05.02 Relate division of whole numbers with remainders to the form $a = bq + r$, e.g., $34 \div 5 = 6 \text{ r } 4$, so $5 \cdot 6 + 4 = 34$; note remainder (4) is less than divisor (6). **[Ext - NC]**

N.MR.05.03 Write mathematical statements involving division for given situations. **[Core - NC]**

Multiply and divide whole numbers

N.FL.05.04 Multiply a multi-digit number by a two-digit number; recognize and be able to explain common computational errors such as not accounting for place value. **[Core - NC]**

N.FL.05.05 Solve applied problems involving multiplication and division of whole numbers. **[Core]**

N.FL.05.06 Divide fluently up to a four-digit number by a two-digit number. **[Ext - NC]**

Find prime factorizations of whole numbers

N.MR.05.07 Find the prime factorization of numbers from 2 through 50, express in exponential notation, e.g., $24 = 2^3 \times 3^1$, and understand that every whole number greater than 1 is either prime or can be expressed as a product of primes. **[Core]**

Understand meaning of decimal fractions and percentages

N.ME.05.08 Understand the relative magnitude of ones, tenths, and hundredths and the relationship of each place value to the place to its right, e.g., 1 is 10 tenths, one tenth is 10 hundredths. **[Ext - NC]**

N.ME.05.09 Understand percentages as parts out of 100, use % notation, and express a part of a whole as a percentage. **[Ext]**

Understand fractions as division statements; find equivalent fractions

N.ME.05.10 Understand a fraction as a statement of division, e.g., $2 \div 3 = \frac{2}{3}$, using simple fractions and pictures to represent. **[Ext - NC]**

N.ME.05.11 Given two fractions, e.g., $\frac{1}{2}$ and $\frac{1}{4}$, express them as fractions with a common denominator, but not necessarily a least common denominator, e.g., $\frac{1}{2} = \frac{4}{8}$ and $\frac{3}{4} = \frac{6}{8}$; use denominators less than 12, or factors of 100. **[Ext - NC]**

Multiply and divide fractions

N.ME.05.12 Find the product of two unit fractions with small denominators using area model. **[Ext - NC]**

N.MR.05.13 Divide a fraction by a whole number and a whole number by a fraction, using simple unit fractions. **[Ext - NC]**

Add and subtract fractions using common denominators

N.FL.05.14 Add and subtract fractions with unlike denominators through 12 and/or 100, using the common denominator that is the product of the denominators of the 2 fractions, e.g., $\frac{3}{8} + \frac{7}{10}$; use 80 as the common denominator. **[Core - NC]**

Multiply and divide by powers of ten

N.MR.05.15 Multiply a whole number by powers of 10: 0.01, 0.1, 1, 10, 100, and 1000; identify patterns. **[Ext - NC]**

N.FL.05.16 Divide numbers by 10's, 100's, 1000's, using mental strategies. **[Core]**

N.MR.05.17 Multiply one-digit and two-digit whole numbers by decimals up to two decimal places. **[Ext - NC]**

Solve applied problems with fractions

N.FL.05.18 Use mathematical statements to represent an applied situation involving addition and subtraction of fractions. **[Core - NC]**

N.MR.05.19 Solve contextual problems that involve finding sums and differences of fractions with unlike denominators, using knowledge of equivalent fractions. **[Core - NC]**

N.FL.05.20 Solve applied problems involving fractions and decimals; include rounding of answers and checking reasonableness. **[Core]**

N.MR.05.21 Solve for the unknown in such equations as: $\frac{1}{4} + x = \frac{7}{12}$ **[Ext - NC]**

Express, interpret, and use ratios; find equivalences

N.MR.05.22 Express fractions and decimals as percentages, and vice versa. **[Ext]**

N.ME.05.23 Express ratios in several ways, given applied situations, e.g., 3 cups to 5 people, 3:5; $\frac{3}{5}$; recognize and find equivalent ratios. **[Ext]**

Measurement

Know, and convert among, measurement units within a given system

M.UN.05.01 Recognize the equivalence of 1 liter, 1000 ml and 1000 cm³ and include conversions among liters, milliliters, and cubic centimeters. **[Ext]**

M.UN.05.02 Know the units of measure of volume: cubic centimeter, cubic meter, cubic inches, cubic feet, cubic yards, and use their abbreviations: cm³, m³, in³, ft³, yd³. **[Ext - NC]**

M.UN.05.03 Compare the relative sizes of one cubic inch to one cubic foot, and one cubic centimeter to one cubic meter. **[Ext]**

M.UN.05.04 Convert measurements of length, weight, area, volume, and time within a given system, using easily manipulated numbers. **[Core - NC]**

Find areas of geometric shapes using formulas

M.PS.05.05 Represent relationships between areas of rectangles, triangles and parallelograms using models. **[Core - NC]**

M.TE.05.06 Understand and know how to use the area formula of a triangle:
 $A = \frac{1}{2}bh$ (where b is length of the base and h is the height), and represent using models and manipulatives. **[Core]**

M.TE.05.07 Understand and know how to use the area formula for a parallelogram:
 $A = bh$, and represent using models and manipulatives. **[Core]**

Understand the concept of volume

M.TE.05.08 Build solids with unit cubes and state their volumes. **[NASL]**

M.TE.05.09 Use filling (unit cubes or liquid), and counting or measuring to find the volume of a cube and rectangular prism. **[NASL]**

M.PS.05.10 Solve applied problems about the volumes of rectangular prisms using multiplication and division and using the appropriate units. **[Ext]**

Geometry

Know the meaning of angles, and solve problems

G.TR.05.01 Associate an angle with a certain amount of turning; know that angles are measured in degrees; understand that 90° , 180° , 270° , and 360° are associated, respectively, with $1/4$, $1/2$, $3/4$ and full turns. **[Ext - NC]**

G.GS.05.02 Measure angles with a protractor and classify them as acute, right, obtuse or straight. **[Core - NC]**

G.GS.05.03 Identify and name angles on a straight line and vertical angles. **[Ext - NC]**

G.GS.05.04 Find unknown angles in problems involving angles on a straight line, angles surrounding a point and vertical angles. **[Core - NC]**

G.GS.05.05 Know that angles on a straight line add up to 180° and angles surrounding a point add up to 360° ; justify informally by “surrounding” a point with angles. **[Core - NC]**

G.GS.05.06 Understand why the sum of the interior angles of a triangle is 180° and the sum of the interior angles of a quadrilateral is 360° , and use these properties to solve problems. **[Core]**

Solve problems about geometric shapes

G.GS.05.07 Find unknown angles using the properties of: triangles, including right, isosceles, and equilateral triangles; parallelograms, including rectangles and rhombuses; and trapezoids. **[Core]**

Data and Probability

Construct and interpret line graphs

D.RE.05.01 Read and interpret line graphs, and solve problems based on line graphs, e.g., distance - time graphs, and problems with two or three line graphs on same axes, comparing different data. **[Ext]**

D.RE.05.02 Construct line graphs from tables of data; include axis labels and scale. **[Ext]**

Find and interpret mean and mode for a given set of data

D.AN.05.03 Given a set of data, find and interpret the mean (using the concept of fair share) and mode. **[Core]**

D.AN.05.04 Solve multi-step problems involving means. **[Ext]**

SIXTH GRADE

Focal Points

- Developing an understanding of operations on all rational numbers
- Writing, interpreting, and using mathematical expressions and equations, and solving linear equations
- Describing three-dimensional shapes and analyzing their properties, including volume and surface area

Number and Operations

Multiply and divide fractions

N.MR.06.01 Understand division of fractions as the inverse of multiplication, e.g.,

if $\frac{4}{5} \div \frac{2}{3} = \square$, then $\frac{2}{3} \times \square = \frac{4}{5}$, so $\square = \frac{4}{5} \cdot \frac{3}{2} = \frac{12}{10}$. **[Core - NC]**

N.FL.06.02 Given an applied situation involving dividing fractions, write a mathematical statement to represent the situation. **[Core - NC]**

N.MR.06.03 Solve for the unknown in equations such as:

$\frac{1}{4} \div \square = 1$, $\frac{3}{4} \div \square = \frac{1}{4}$ and $\frac{1}{2} = 1 \times \square$ **[Core - NC]**

N.FL.06.04 Multiply and divide any two fractions, including mixed numbers, fluently. **[Core - NC]**

Represent rational numbers as fractions, or decimals

N.ME.06.05 Order rational numbers and place them on the number line. **[Ext]**

N.ME.06.06 Represent rational numbers as fractions or terminating decimals when possible, and translate between these representations. **[Ext]**

N.ME.06.07 Understand that a fraction or a negative fraction is a quotient of two integers, e.g., $-\frac{8}{3}$ is -8 divided by 3. **[Ext - NC]**

Add and subtract integers and rational numbers

N.MR.06.08 Understand integer subtraction as the inverse of integer addition. Understand integer division as the inverse of integer multiplication. **[Ext - NC]**

N.FL.06.09 Add and multiply integers between - 10 and 10; subtract and divide integers using the related facts. Use number line and chip models for addition and subtraction. **[Core - NC]**

N.FL.06.10 Add, subtract, multiply and divide positive rational numbers fluently. **[Core - NC]**

Find equivalent ratios

N.ME.06.11 Find equivalent ratios by scaling up or scaling down. **[Core]**

Solve decimal, percentage and rational number problems

N.FL.06.12 Calculate part of a number given the percentage and the number.
[Core - NC]

N.MR.06.13 Solve contractual problems involving percentages such as sales taxes and tips. **[Ext]**

N.FL.06.14 For applied situations, estimate the answers to calculations involving operations with rational numbers. **[Core]**

N.FL.06.15 Solve applied problems that use the four operations with appropriate decimal numbers. **[Core]**

Use exponents

N.ME.06.16 Understand and use integer exponents, excluding powers of negative bases; express numbers in scientific notation. **[Ext]**

Understand rational numbers and their location on the number line

N.ME.06.17 Locate negative rational numbers (including integers) on the number line; know that numbers and their negatives add to 0, and are on opposite sides and at equal distance from 0 on a number line. **[Ext - NC]**

N.ME.06.18 Understand that rational numbers are quotients of integers (non-zero denominators), e.g., a rational number is either a fraction or a negative fraction.
[Ext - NC]

N.ME.06.19 Understand that 0 is an integer that is neither negative nor positive.
[Ext - NC]

N.ME.06.20 Know that the absolute value of a number is the value of the number, ignoring the sign; or is the distance of the number from 0. **[Ext - NC]**

Algebra

Calculate rates

A.PA.06.01 Solve applied problems involving rates, including speed, e.g., if a car is going 50 mph, how far will it go in $3\frac{1}{2}$ hours? **[Core]**

Understand the coordinate plane

A.RP.06.02 Plot ordered pairs of integers and use ordered pairs of integers to identify points in all four quadrants of the coordinate plane. **[Ext - NC]**

Use variables, write expressions and equations, and combine like terms

A.FO.06.03 Use letters, with units, to represent quantities in a variety of contexts, e.g., y lbs., k minutes, x cookies. **[Core - NC]**

A.FO.06.04 Distinguish between an algebraic expression and an equation. **[Core - NC]**

A.FO.06.05 Use standard conventions for writing algebraic expressions, e.g., $2x + 1$ means “two times x, plus 1” and $2(x + 1)$ means “two times the quantity (x + 1)”. **[Ext - NC]**

A.FO.06.06 Represent information given in words using algebraic expressions and equations. **[Core]**

A.FO.06.07 Simplify expressions of the first degree by combining like terms, and evaluate using specific values. **[Ext - NC]**

Represent linear functions using tables, equations, and graphs

A.RP.06.08 Understand that graphs and tables can suggest relationships between quantities. **[Ext]**

A.PA.06.09 Solve problems involving linear functions whose input values are integers; write the equation; graph the resulting ordered pairs of integers, e.g., given c chairs, the “leg function” is $4c$; if you have 5 chairs, how many legs?: if you have 12 legs, how many chairs? **[Ext]**

A.RP.06.10 Represent simple relationships between quantities, e.g., perimeter-side relationship for a square, distance-time graphs, and conversions such as feet to inches; use verbal descriptions, formulas or equations, tables, and graphs. **[Ext]**

Solve equations

A.FO.06.11 Relate simple linear equations with integer coefficients; e.g., $3x = 8$ or $x + 5 = 10$, to particular contexts, and solve. **[Core - NC]**

A.FO.06.12 Understand that adding or subtracting the same number to both sides of an equation creates a new equation that has the same solution. **[Core - NC]**

A.FO.06.13 Understand that multiplying or dividing both sides of an equation by the same non-zero number creates a new equation that has the same solution. **[Core - NC]**

A.FO.06.14 Solve equations of the form $ax + b = c$, e.g., $3x + 8 = 15$, by hand for positive integer coefficients less than 20, using calculators otherwise, and interpret the results. **[Ext]**

Measurement

Convert within measurement systems

M.UN.06.01 Convert between basic units of measurement within a single measurement system, e.g., square inches to square feet. **[Ext]**

Find volume and surface area

M.PS.06.02 Draw patterns (of faces) for a cube and rectangular prism that, when cut, will cover the solid exactly (nets). **[Core - NC]**

M.TE.06.03 Compute the volume and surface area of cubes and rectangular prisms given the lengths of their sides, using formulas. **[Core]**

Geometry

Understand and apply basic properties

G.GS.06.01 Understand and apply basic properties of lines, angles, and triangles, including

- triangle inequality
- relationships of vertical angles, complementary angles, supplementary angles
- congruence of corresponding and alternate interior angles when parallel lines are cut by a transversal, and that such congruencies imply parallel lines
- locate interior and exterior angles of any triangle and use the property that an exterior angle of a triangle is equal to the sum of the remote (opposite) interior angles
- know that the sum of the exterior angles of a convex polygon is 360° **[Ext - NC]**

Understand the concept of congruence and basic transformations

G.GS.06.02 Understand that for polygons, congruence means corresponding sides and angles have equal measures. **[Ext - NC]**

G.TR.06.03 Understand the basic rigid motions in the plane (reflections, rotations, translations), relate these to congruence, and apply them to solve problems. **[Ext - NC]**

G.TR.06.04 Understand and use simple compositions of basic rigid transformations, e.g., a translation followed by a reflection. **[Ext - NC]**

Construct geometric shapes

G.SR.06.05 Use paper folding to perform basic geometric constructions of perpendicular lines, midpoints of line segments and angle bisectors, and justify informally. **[NASL]**

Data and Probability

Understand the concept of probability and solve problems

D.PR.06.01 Express probabilities as fractions, decimals or percentages between 0 and 1; know that 0 probability means an event will not occur, and that probability 1 means an event will occur. **[Ext]**

D.PR.06.02 Compute probabilities of events from simple experiments with equally likely outcomes, e.g., tossing dice, flipping coins, spinning spinners, by listing all possibilities and finding the fraction that meets given conditions. **[Ext]**

SEVENTH GRADE

Focal Points

- Developing an understanding of and applying proportionality, including similarity
- Analyzing and representing linear functions and solving linear equations and systems of linear equations

Number and Operations

Understand derived quantities

N.MR.07.02 Solve problems involving derived quantities such as density, velocity, and weighted averages.. **[Ext]**

Understand and solve problems involving rates, ratios, and proportions

N.FL.07.03 Calculate rates of change, including speed. **[Core]**

N.MR.07.04 Convert ratio quantities between different systems of units, such as feet per second to miles per hour. **[Core]**

N.FL.07.05 Solve proportion problems using such methods as unit rate, scaling, finding equivalent fractions, and solving the proportion equation $a/b = c/d$; know how to see patterns about proportional situations in tables. **[Core]**

Recognize irrational numbers

N.MR.07.06 Understand the concept of square root and cube root, and estimate using calculators. **[Ext]**

Compute with rational numbers

N.FL.07.07 Solve problems involving operations with integers. **[Core - NC]**

N.FL.07.08 Add, subtract, multiply and divide positive and negative rational numbers fluently. **[Core - NC]**

N.FL.07.09 Estimate results of computations with rational numbers. **[Core - NC]**

Algebra

Understand and apply directly proportional relationships; relate to linear relationships

A.PA.07.01 Recognize when information given in a table, graph, or formula suggests a directly proportional or linear relationship. **[Core- NC]**

A.RP.07.02 Represent directly proportional and linear relationships using verbal descriptions, tables, graphs and formulas, and translate among these representations. **[Core - NC]**

A.PA.07.03 Given a directly proportional or other linear situation, graph and interpret the slope and intercept(s) in terms of the original situation; evaluate $y = mx + b$ for specific x values, e.g., weight vs. volume of water, base cost plus cost per unit. **[Core]**

A.PA.07.04 For directly proportional or linear situations, solve applied problems using graphs and equations; e.g., the heights and volume of a container with uniform cross-section; height of water in a tank being filled at a constant rate; degrees Celsius and degrees Fahrenheit; distance and time under constant speed. **[Core]**

A.PA.07.05 Recognize and use directly proportional relationships of the form $y = mx$, and distinguish from linear relationships of the form $y = mx + b$, b non-zero; understand that in a directly proportional relationship between two quantities one quantity is a constant multiple of the other quantity. **[Core]**

Understand and represent linear functions

A.PA.07.06 Calculate the slope from the graph of a linear function as the ratio of “rise/run” for a pair of points on the graph, and express the answer as a fraction and a decimal; understand that linear functions have slope that is a constant rate of change. **[Core]**

A.PA.07.07 Represent linear functions in the form $y = x + b$, $y = mx$, and $y = mx + b$, and graph, interpreting slope and y -intercept. **[Ext]**

A.FO.07.08 Find and interpret the x and/or y intercepts of a linear equation or function. Know that the solution to a linear equation of the form $ax+b=0$ corresponds to the point at which the graph of a $y=ax+b$ crosses the x axis. **[Ext]**

Understand and solve problems about inversely proportional relationships

A.PA.07.09 Recognize inversely proportional relationships in contextual situations; know that quantities are inversely proportional if their product is constant, e.g., the length and width of a rectangle with fixed area, and that an inversely proportional relationship is of the form $y = k/x$ where k is some non-zero number. **[Ext]**

A.RP.07.10 Know that the graph of $y = k/x$ is not a line; know its shape, and know that it crosses neither the x - nor the y -axis. **[Ext - NC]**

Apply basic properties of real numbers in algebraic contexts

A.PA.07.11 Understand and use basic properties of real numbers: additive and multiplicative identities, additive and multiplicative inverses, commutativity, associativity, and the distributive property of multiplication over addition. **[Core]**

Combine algebraic expressions and solve equations

A.FO.07.12 Add, subtract, and multiply simple algebraic expressions of the first degree, e.g., $(92x + 8y) - 5x + y$, or $x(x + 2)$, and justify using properties of real numbers. **[Core]**

A.FO.07.13 From applied situations, generate and solve linear equations of the form $ax + b = c$ and $ax + b = cx + d$, and interpret solutions. **[Ext]**

Geometry

Draw and construct geometric objects

G.SR.07.01 Use a ruler and other tools to draw squares, rectangles, triangles and parallelograms with specified dimensions. **[Ext - NC]**

G.SR.07.02 Use compass and straightedge to perform basic geometric constructions: the perpendicular bisector of a segment, an equilateral triangle, and the bisector of an angle; understand informal justifications. **[NASL]**

Understand the concept of similar polygons, and solve related problems

G.TR.07.03 Understand that in similar polygons, corresponding angles are congruent and the ratios of corresponding sides are equal; understand the concepts of similar figures and scale factor. **[Core]**

G.TR.07.04 Solve problems about similar figures and scale drawings. **[Core]**

G.TR.07.05 Show that two triangles are similar using the criteria: corresponding angles are congruent (AAA similarity); the ratios of two pairs of corresponding sides are equal and the included angles are congruent (SAS similarity); ratios of all pairs of corresponding sides are equal (SSS similarity); use these criteria to solve problems and to justify arguments. **[Core]**

G.TR.07.06 Understand and use the fact that when two triangles are similar with scale factor of r , their areas are related by a factor of r^2 . **[Core]**

Data and Probability

Represent data and interpret

D.RE.07.01 Represent and interpret data using circle graphs, stem and leaf plots, histograms, and box-and-whisker plots, and select appropriate representation to address specific questions. **[Core]**

D.AN.07.02 Create and interpret scatter plots and use an estimated line of best fit to answer questions about the data. **[Core]**

Compute statistics about datasets

D.AN.07.03 Calculate and interpret relative frequencies and cumulative frequencies for given data sets. **[Ext]**

D.AN.07.04 Find and interpret the median, quartiles, and interquartile range of a given set of data. **[Ext]**
