

## Exciting Update about MICIP Testing

MICIP is pleased to announce that our first testing session was a success! Fifty-two testing partners from ISDs and districts began testing the MICIP platform (see map for testing partner locations).

Users of the system will follow the same process that testers followed: they crafted data stories from a data set, used a root cause analysis tool, and summarized the findings with a challenge statement.

One tester commented, “I think it is a great start, and it follows through on all of the promises and examples that have been shown around the state so far.”

Reports and data from MiSchoolData are also used in MICIP.

Another tester noted, “This was straightforward, and having the familiarity of [the] MiSchoolData chart is nice.”

Overall, testers rated their first encounter with the MICIP platform as a 4.1 out of 5.0!

Thank you to all of our testing partners!
