

## Garden and Donated Produce Pricing Guide

*Last Updated: June 2024*

To participate in 10 Cents a Meal for Michigan’s Kids and Farms, grantees must submit information about the price or value of the local food items that they purchased, grew, or received for their food program. Food items grown at or donated to the program site are eligible to be reimbursed through the grant. Grantees may use this pricing guide to determine the price to use on their 10 Cents a Meal submission for items that were grown on-site or donated to the program. Please note that community members or educators who wish to *sell* food items that they grew themselves may set their own prices and are not required to use the prices listed in this guide.

These prices are rounded averages calculated by the MDE Farm to Program team with reference to pricing data provided by the Michigan Farmers Market Association, USDA Agricultural Marketing Service, Eastern Market, USDA Economic Research Service, and Iowa Local Food Purchasing Assistance Program. Please contact [MDE-FarmToProgram@michigan.gov](mailto:MDE-FarmToProgram@michigan.gov) if you have any questions, feedback, or suggestions for additional pricing references.
