			Joy Turney-Hartman - turnej02@wsdmi.org
<b>PROGRAM SPECIFICS:</b>	SYSCO staff uses past ordering trends to forecast the needs of SPARC members for items that hold well. SPARC members may place orders accordingly. We ask SPARC members to preorder any DOD items that are not stocked two weeks in advance through their school specialist. This ensures items are fresh when you receive them. *Items that need to be preordered (some items are not available for the entire school year). \$2.60/case delivery fee.	GLC has selected the most popular items based on past usage, focusing on the longest shelf-life products. This ensures that product will be fresh and will allow districts time to utilize their produce. Once produce is delivered to GFS, GLC members may place orders accordingly. GFS does not take preorders and does not auto-ship DoD produce. Produce is ordered as needed, with no need to pre-order. GLC will work with Gordon Food Service to review the products available throughout the year. \$2.75/case delivery fee.	To ensure fresh product, the MOR consortia asks districts to order one week in advance or set up standing orders with Van Eerden. Van Eerden ships the product on their next scheduled delivery date. This system has been able to give districts wider product offerings with greater shelf life after it arrives at the district. \$2.75/case delivery fee.
<b>DOD PRODUCE SLOTTED:</b>	available)	Apples (2-3 varieties, Michigan grown, when available)	Apples (2-3 varieties inc. MI grown, when available)
