Michigan's Updated Top 10 Strategic Education Plan

[Michigan's Top 10 Strategic Education Plan](#) provides focused direction to Michigan's educational community in support of all learners. The plan is both directional and aspirational and designed to concentrate energy and resources, strengthen operations, and set success measures to ensure that all stakeholders are working together toward common education goals. Michigan's Strategic Education Plan has a mission, vision, guiding principles, focused goals, and metrics for each goal area to help monitor Michigan's educational progress. Collaboration among the Michigan Department of Education (MDE), education partners and stakeholders, business and industry, and communities is needed for the plan's successful implementation.

To aid in facilitating collaboration, MDE has partnered with the Michigan Association of Intermediate School Administrators (MAISA) to develop a public-facing web-based platform where Michigan's educational community can share and view promising practices specific to the State's strategic education plan goals. The [Promising Practices Exchange](#) is where Intermediate School Districts (ISDs), Local Education Agencies (LEAs), both traditional public school districts and public school academies (PSAs) can participate and see their connection to the State's strategic education plan and their role in its implementation. MDE is asking partners to submit promising practices where content experts vet submitted practices to ensure the practices demonstrate improved outcomes for learners. From August 11 to October 14, 2022, MDE is requesting early literacy promising practices as part of the State's Strategic Education Plan, goal 2: Improving Early Literacy Achievement. You can visit the Promising Practices Exchange at <https://mipromisingpractices.org/> to view or submit promising practices. We hope you will support Michigan's Top 10 Strategic Education Plan.

Our organization intends to support the updated plan by...
