

HOW TO OPT-OUT OF AN COVID-19 VACCINE ANCILLARY KIT

Review the guidance below for opting out of a COVID-19 vaccine ancillary kit.

Opt-Out Instructions:

- Providers may now opt out of *all COVID-19 adult vaccine ancillary supply kits* including:
 - J&J/Janssen
 - Moderna 10
 - Pfizer Gray Cap/Tris Sucrose
- Please note: The opt-out option is **not currently available for pediatric COVID-19 vaccine** as Pfizer pediatric ancillary kits contain the diluent necessary to administer the vaccine.
- To opt out of an ancillary kit, contact the local health department (LHD) **at the time the vaccine order is placed**.
 - This **MUST** be done at the time the order is placed, otherwise the order may have already been submitted and opting out is no longer an option.
- When requesting to opt out of an ancillary kit, please provide the order number and which ancillary kit you would like to opt out of if your order contains more than one vaccine.
- The LHD will pass this information on to the appropriate contact at MDHHS who will opt out of the ancillary kit on your behalf.
