## DCH-0713, 2024 MEDICAL CONTRAINDICATION (Revised 1-24)

Michigan immunization law requires that a child enrolled in a school or childcare center be immunized against the diseases specified unless a valid exemption applies. A child is exempt from these requirements for any specific immunization, for any period of time for which a physician (MD/DO) certifies that a specific immunization is or may be detrimental to the child's health. For more information on medical contraindications to immunizations please refer to the contraindications and precautions listed on the [Centers for Disease Prevention Immunization Schedules](#). Any child with a valid medical contraindication to a particular vaccine is considered susceptible to that vaccine-preventable disease and is subject to exclusion from the school or childcare center if an outbreak of the disease occurs in the school or childcare center.
