- MCIR calculates the need for each vaccine based on how many are currently on hand (in inventory), the average number of doses administered per month, and how many doses you will need for a 1-month inventory and 3-month inventory. If you are ordering more or less doses than MCIR has projected you will need, this column will turn pink and you will need to select a reason for ordering more than the projected need on the Override Reason screen. There are five reasons available – choose the one that best explains why you are over/under ordering for each vaccine:

**Override Reason**

Number of doses ordered for the following products is not within projected quantities. Please choose the item that best explains the overage/underage for each product:

INFANRIX (58160-0810-11): Back to School ▼

GARDASIL 9 (00006-4121-02): Special Clinic ▼

ROTATEQ (00006-4047-41): New Vaccine ▼

- **CDC / McKesson requirement requires at least ONE 4 hour block of time for vaccine delivery besides Monday. Be sure your shipping hours reflect this or your vaccine order could be delayed.**
- Verify and update the shipping address and hours each time you order. Anticipate office hours and contacts for the time period the order will be delivered. Vaccine losses due to improper shipping information are the responsibility of the receiving provider.
