

We want to SHARE in making treatment choices!

We know about epilepsy care.

You know about your child.

Let's work together to make the best treatment choices for your child.

We will:

- Explain your child's health in a way you understand.
- Explain all treatment choices.
- Tell you the good and bad for each choice.

You can:

- Ask as many question as you want.
- Ask for more information or tools to help you choose.
- Talk it over with family and friends.

Share what matters most to your family!

What do you want the treatment to do?

- Improve your child's overall quality of life?
- Let your child do their favorite activity?
- Help your child have fewer seizures?

Will the treatment work for your family?

- Does it fit with school or work schedules?
- How long will it take your child to recover?
- How much will it cost?

What happens after we make a treatment choice?

- How will we know if the treatment is working?
- What do we do if the treatment is not working?
