

# We want to SHARE in making treatment choices!

**We are experts in epilepsy care**

**You are experts on your child and family**

**Let's work together to make the best treatment choices for your child**

**We will:**

**You can:**

- Explain your child's health in a way you understand.
- Explain all treatment choices.
- Tell you the good and bad for each choice.

- Ask as many questions as you want.
- Ask for more information or tools to help you choose.
- Talk it over with family and friends.

## Share what matters most to your family!

### What do you want the treatment to do?

- Help with your child's pain?
- Let your child do their favorite activity?
- Help your child have fewer seizures?

### Will the treatment work for your family?

You might think about:

- School or work schedules
- How long it will take your child to recover
- How much it will cost

### What happens after we make a treatment choice?

- How will we know if the treatment is working?
- What do we do if the treatment is not working?
