

Family Center for Children and Youth with Special Health Care Needs

Parent Connect Call

Conversations with parents of children with special needs!

**Please join our call as Michelle Burgher from
Children's Special Health Care Services speaks about Transition!**

As youth get older, they must prepare for the transition to adult life. Transitioning to adult life means planning for future needs including health care, employment, education, and independent living. As youth approach adulthood the transition planning process should provide them with tools and resources to increase their ability to lead productive adult lives.

Michelle Burgher from Children's Special Health Care Services will be speaking about Transition and available to answer any questions you may have.

**Date – Wednesday March 8, 2023, at 4:00-5:00pm EST.
Microsoft Teams**
