Dear Colleagues,

This information is to let you know the updates for NEMT have been implemented through the Children's HealthCare Automated Support Services (CHASS) system. The revised NEMT Authorization Addendum has a spot for the family to sign and the instruction sheet that contains your local health department's address for the family to return back to you for processing. Please check to make sure the correct local health department address is printed. Also, attached is the process for the local health department staff to follow when the travel information has been received back from the family.

Please let us know if you have any questions with the information provided.

Thank You.
