12:15 p.m. to 1:00 p.m.**

Speakers:

Maysaa Basha, MD, FAES, FANA, Associate Professor and Interim Chair Department of Neurology, Wayne State University School of Medicine

Andrea Thomas, MA, LLP, Henry Ford Comprehensive Epilepsy Center

Cost: FREE

About this Webinar Series

The Michigan Pediatric Epilepsy Project is partnering with primary and specialty care providers across the state along with Epilepsy Foundation of Michigan, Michigan AAP, and other stakeholders to improve access to care for children and youth with epilepsy. These webinars are open to project partners and others interested in these topics.

Upcoming 2024 Webinars

- **February 20** ~ *Supporting Patients & Families with Epilepsy with Resources*
- **April 16** ~ *Seizure Safe Schools Act*
- **May 22** ~ *Examining the Social Determinants of Health and Epilepsy*

Functional seizures, or psychogenic non-epileptic seizures, can be difficult to identify and treat. The webinar speakers will provide information about what providers need to know to support and manage their pediatric patients with functional seizures.

Learning objectives:

1. Understand the difference between functional seizures and epileptic seizures.
2. Be familiar with the etiology and psychopathology of functional seizures.
3. Recognize treatment and management options for those experiencing functional seizures.

Desired result:

At the end of the webinar, providers will understand how they can support pediatric patients with functional seizures for optimal outcomes.
