# Introduction

The Michigan Department of Health and Human Services (MDHHS) contracted with Health Services Advisory Group, Inc. (HSAG) to administer and report the results of a child dental plan survey (Child Dental Survey) as part of its process for evaluating the quality of dental services provided to child members enrolled in its contracted dental plans. The Consumer Assessment of Healthcare Providers and Systems (CAHPS<sup>®</sup>) Dental Plan Survey, currently available for the adult population only, was modified by HSAG for administration to a child population to create a Child Dental Survey.<sup>1-1</sup> The goal of the survey is to provide performance feedback that is actionable and will aid in improving the dental care and services of child members enrolled in the Healthy Kids Dental (HKD) Program. Results presented in this report include four global ratings, three composite measures, and three individual item measures. Table 1-1 provides a list of the dental plans that participated in the survey.<sup>1-2</sup>

Program/Plan Name	Program/Plan Abbreviation	
Healthy Kids Dental Program	HKD Program	
Blue Cross Blue Shield of Michigan	BCBSM	
Delta Dental of Michigan	Delta Dental	

#### Table 1-1—Participating Dental Plans

<sup>&</sup>lt;sup>1-1</sup> CAHPS<sup>®</sup> is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ).

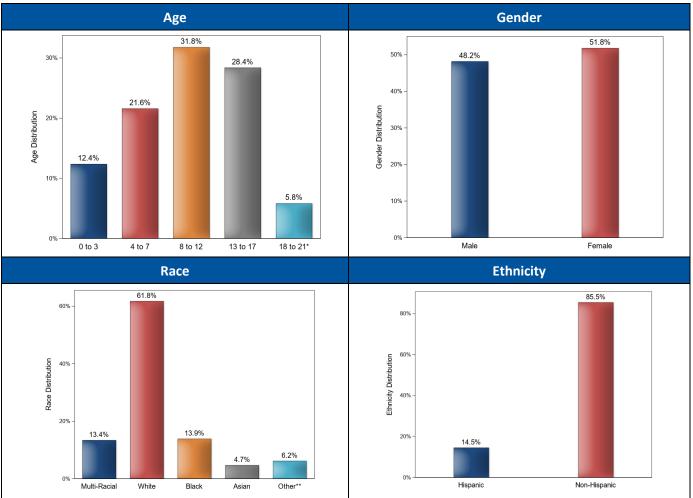

<sup>&</sup>lt;sup>1-2</sup> The HKD Program results presented in this report are derived from the combined results of the participating dental plans (i.e., aggregate).

# **Key Findings**

# Child and Respondent Demographics

Table 1-2 provides an overview of the demographic characteristics of children for whom a parent/caretaker completed a survey for the HKD Program. Please note, some percentages displayed in the table below may not total 100 percent due to rounding.

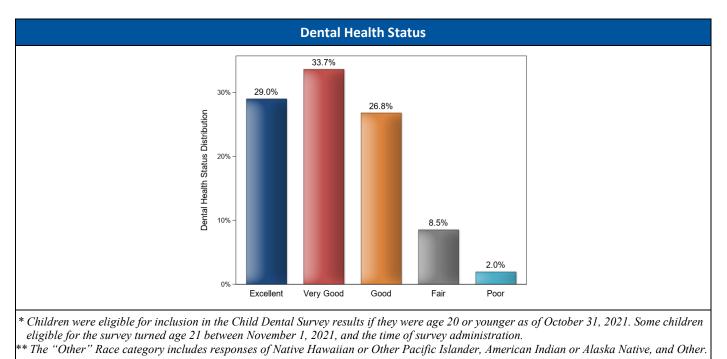

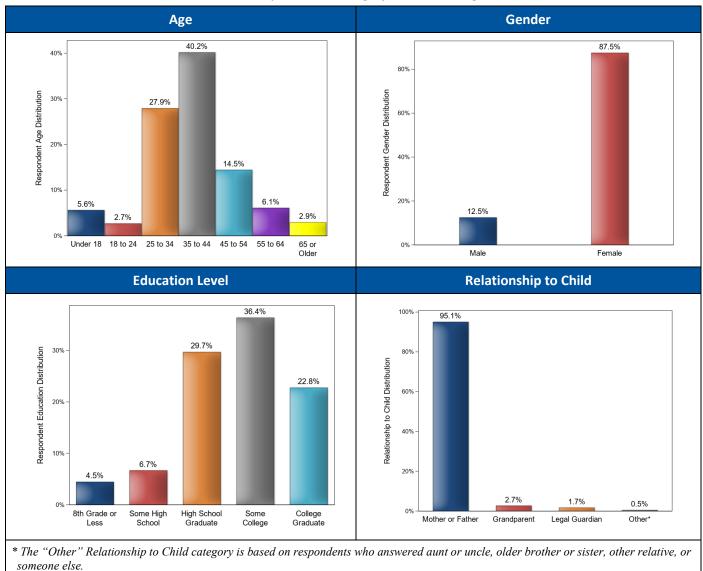

Table 1-3 provides an overview of the demographics of parents/caretakers who completed a survey on behalf of their child member. Please note, some percentages displayed in the table below may not total 100 percent due to rounding.

# Survey Administration Overview

Figure 1-1 displays a summary of the survey disposition for the HKD Program.

### Statewide Comparisons

HSAG compared BCBSM's results to Delta Dental's results to determine if the plans' results were statistically significantly different from each other. The detailed results of this analysis are in the Statewide Comparisons subsection beginning on page 3-5. Table 1-4 shows a summary of the statistically significant results of this analysis. There were no statistically significant differences for the following measures: *Rating of Regular Dentist, Rating of All Dental Care, Rating of Dental Plan, Care from Dentists and Staff, Access to Dental Care, Dental Plan Information and Services, Care from Regular Dentist, Would Recommend Regular Dentist, and Would Recommend Dental Plan.* 

Measures	BCBSM	Delta Dental		
Rating of Finding a Dentist	↓+	$\uparrow^+$		
<ul> <li>+ Indicates fewer than 100 responses. Caution should be exercised when evaluating these results.</li> <li>↑ Statistically significantly higher than the comparative plan's score.</li> <li>↓ Statistically significantly lower than the comparative plan's score.</li> </ul>				

### **Trend Analysis**

A trend analysis was performed that compared 2022 scores to the 2020 and 2021 scores. The detailed results of this analysis are in the Trend Analysis section beginning on page 4-1. Table 1-5 shows a summary of the most recent statistically significant results of this analysis (i.e., 2022 results compared to 2021 results). There were no statistically significant differences for the following measures: *Rating of Regular Dentist, Rating of All Dental Care, Rating of Dental Plan, Care from Dentists and Staff, Access to Dental Care, Dental Plan Information and Services, Care from Regular Dentist, Would Recommend Regular Dentist, and Would Recommend Dental Plan.* 

#### Table 1-5—Trend Analysis Summary: Statistically Significant Results

Measures	HKD Program	BCBSM	Delta Dental	
Rating of Finding a Dentist		_	<b>A</b>	
<ul> <li>▲ Statistically significantly higher in 2022 than 2021.</li> <li>▼ Statistically significantly lower in 2022 than 2021.</li> <li>− Not statistically significantly different in 2022 than 2021.</li> </ul>				

# Key Drivers of Member Experience Analysis

In order to determine potential items for quality improvement efforts, HSAG conducted a key drivers analysis. HSAG focused the key drivers of member experience analysis on three measures: *Rating of All Dental Care, Rating of Dental Plan*, and *Would Recommend Dental Plan*. HSAG refers to the individual items (i.e., questions) for which the odds ratio is statistically significantly greater than 1 as "key drivers" since these items are driving members' levels of experience with each of the three measures. The detailed results of this analysis are described in the Key Drivers of Member Experience Analysis section beginning on page 5-1. Table 1-6 provides a summary of the survey items identified for each of the three measures as being key drivers of member experience for the HKD Program (indicated by a  $\checkmark$ ).

Key Drivers	Response Options	Rating of All Dental Care	Rating of Dental Plan	Would Recommend Dental Plan
Q13. Dentists or dental staff helped child feel comfortable during dental	(Never + Sometimes) vs. Always	$\checkmark$	NS	NS
work	Usually vs. Always	√	NS	NS
Q14. Dentists or dental staff explained	(Never + Sometimes) vs. Always	√	NS	NS
during child's treatment	Usually vs. Always	$\checkmark$	NS	NS
Q15. Received appointment as soon as	(Never + Sometimes) vs. Always	$\checkmark$	NS	NS
wanted	Usually vs. Always	$\checkmark$	NS	NS
Q21. Child's dental plan covered all services parent/caretaker thought	(Never + Sometimes) vs. Always	NA	NS	$\checkmark$
covered	Usually vs. Always	NA	NS	$\checkmark$
Q21a. Child's dental plan met all of child's dental care needs	(Never + Sometimes) vs. Always	NA	✓	$\checkmark$
child's dental care needs	Usually vs. Always	NA	$\checkmark$	$\checkmark$
Q22. Child's dental plan covered what child needed	(Never + Sometimes) vs. Always	NA	✓	NS
Q26. Information helped find dentist for child that parent/caretaker is happy with	(Never + Sometimes) vs. Always	NA	✓	NS

#### Table 1-6—Key Drivers of Member Experience: HKD Program

NA indicates that this question was not evaluated for this measure.

NS indicates that the calculated odds ratio estimate is not statistically significantly higher than 1.0; therefore, respondents' answers for those responses do not significantly affect their rating.

# 2. Reader's Guide

# **Dental Plan Performance Measures**

The Child Dental Survey yielded 10 measures that include four global rating measures, three composite measures, and three individual item measures. The global rating measures reflect overall experience with regular dentists, dental care, ease of finding a dentist, and the dental plan. The composite measures are sets of questions grouped together to assess different aspects of dental care (e.g., *Care from Dentists and Staff* and *Access to Dental Care*). The individual item measures are individual questions that look at a specific area of care (e.g., *Care from Regular Dentist*).

Figure 2-1 lists the measures included in the survey.

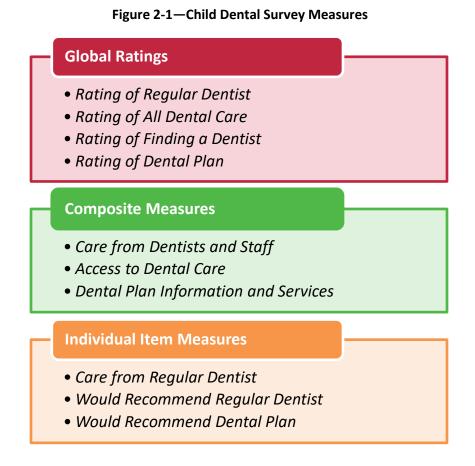

Table 2-1 presents the survey language and response options for the measures.

Question Language	Response Categories
Global Ratings	
Rating of Regular Dentist	
12. Using any number from 0 to 10, where 0 is the worst regular dentist possible and 10 is the best regular dentist possible, what number would you use to rate your child's regular dentist?	0–10 Scale
Rating of All Dental Care	
20. Using any number from 0 to 10, where 0 is the worst dental care possible and 10 is the best dental care possible, what number would you use to rate all of the dental care your child received in the last 12 months?	0–10 Scale
Rating of Finding a Dentist	
27. Using any number from 0 to 10, where 0 is extremely difficult and 10 is extremely easy, what number would you use to rate how easy it was for you to find a dentist for your child?	0–10 Scale
Rating of Dental Plan	
31. Using any number from 0 to 10, where 0 is the worst dental plan possible and 10 is the best dental plan possible, what number would you use to rate your child's dental plan?	0–10 Scale
Composite Measures	
Care from Dentists and Staff	
6. In the last 12 months, how often did your child's regular dentist explain things about your child's dental health in a way that was easy to understand?	Never, Sometimes, Usually, Always
7. In the last 12 months, how often did your child's regular dentist listen carefully to you?	Never, Sometimes, Usually, Always
8. In the last 12 months, how often did your child's regular dentist treat you with courtesy and respect?	Never, Sometimes, Usually, Always
10. In the last 12 months, how often did your child's regular dentist explain things in a way that was easy for <u>your child</u> to understand?	Never, Sometimes, Usually, Always
11. In the last 12 months, how often did your child's regular dentist spend enough time with your child?	Never, Sometimes, Usually, Always
13. In the last 12 months, how often did the dentists or dental staff do everything they could to help your child feel as comfortable as possible during his or her dental work?	Never, Sometimes, Usually, Always
14. In the last 12 months, how often did the dentists or dental staff explain what they were doing while treating your child?	Never, Sometimes, Usually, Always

#### Table 2-1—Question Language and Response Categories

Question Language	Response Categories			
Composite Measures				
Access to Dental Care				
15. In the last 12 months, how often were your child's dental appointments as soon as you wanted?	Never, Sometimes, Usually, Always			
16. If your child needed to see a dentist right away because of a dental emergency in the last 12 months, did your child get to see a dentist as soon as you wanted?	Definitely Yes, Somewhat Yes, Somewhat No, Definitely No <sup>2-1</sup>			
17. If you tried to get an appointment for your child with a dentist who specializes in a particular type of dental care (such as an oral or dental surgeon) in the last 12 months, how often did you get an appointment for your child as soon as you wanted?	Never, Sometimes, Usually, Always <sup>2-2</sup>			
18. In the last 12 months, how often did you have to spend more than 15 minutes in the waiting room before your child saw someone for his or her dental appointment?	Never, Sometimes, Usually, Always			
19. If you had to spend more than 15 minutes in the waiting room before your child saw someone for his or her appointment, how often did someone tell you why there was a delay or how long the delay would be?	Never, Sometimes, Usually, Always			
Dental Plan Information and Services				
21. In the last 12 months, how often did your child's dental plan cover all of the services you thought were covered?	Never, Sometimes, Usually, Always			
21a. In the last 12 months, did your child's dental plan meet all of his or her dental care needs?	Definitely Yes, Somewhat Yes, Somewhat No, Definitely No			
22. In the last 12 months, did your child's dental plan cover what your child needed to get done?	Definitely Yes, Somewhat Yes, Somewhat No, Definitely No			
24. In the last 12 months, how often did the toll-free number, website, or written materials provide the information you wanted about your child's dental plan?	Never, Sometimes, Usually, Always			
26. Did this information (from your dental plan) help you find a dentist for your child that you were happy with?	Definitely Yes, Somewhat Yes, Somewhat No, Definitely No			
29. In the last 12 months, how often did customer service at your child's dental plan give you the information or help you needed?	Never, Sometimes, Usually, Always			
30. In the last 12 months, how often did customer service staff at your child's dental plan treat you with courtesy and respect?	Never, Sometimes, Usually, Always			

<sup>&</sup>lt;sup>2-1</sup> "My child did not have a dental emergency in the last 12 months" was also a valid response option for this question. However, this response option is not assessed as part of this composite (i.e., this response is treated as missing data).

<sup>&</sup>lt;sup>2-2</sup> "I did not try to get an appointment with a specialist dentist for my child in the last 12 months" was also a valid response option for this question. However, this response option is not assessed as part of this composite (i.e., this response is treated as missing data).

Question Language	Response Categories			
Individual Item Measures				
Care from Regular Dentist				
11a. In the last 12 months, how often were you satisfied with the overall care provided to your child by his or her regular dentist?	Never, Sometimes, Usually, Always			
Would Recommend Regular Dentist				
12a. Would you recommend your child's regular dentist to other parents or people who are looking for a new dentist for their child?	Definitely Yes, Probably Yes, Probably No, Definitely No			
Would Recommend Dental Plan				
32. Would you recommend your child's dental plan to other parents or people who want to join?	Definitely Yes, Probably Yes, Probably No, Definitely No			

# How Survey Results Were Collected

### Sampling Procedures

MDHHS provided HSAG with a list of all eligible child members in the HKD Program for the sampling frame. HSAG inspected the records to check for any apparent problems with the files, such as missing address elements. HSAG sampled child members who met the following criteria:

- Were 20 years or younger as of October 31, 2021.
- Were currently enrolled in a dental plan (i.e., BCBSM or Delta Dental).
- Had been continuously enrolled in the dental plan for at least 11 out of 12 months of the measurement period (November 1, 2020 to October 31, 2021).<sup>2-3</sup>
- Had a paid or denied dental claim during the measurement year.

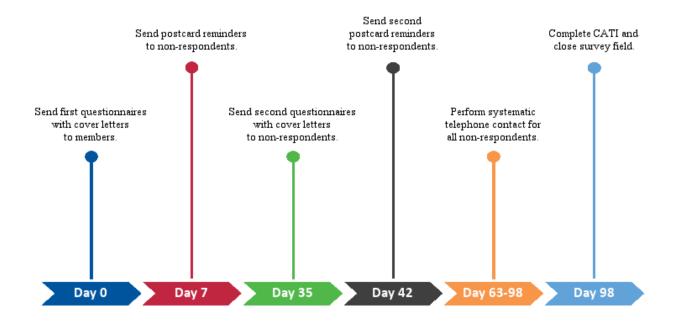

A sample of 1,650 child members was selected from each dental plan for inclusion in the survey. No more than one member per household was selected as part of the survey samples. HSAG tried to obtain new addresses for members selected for the sample by processing sampled members' addresses through the United States Postal Service's National Change of Address (NCOA) system.

<sup>&</sup>lt;sup>2-3</sup> To determine continuous enrollment, no more than one gap in the enrollment period of up to 45 days, or for a child member for whom enrollment is verified monthly, up to a one-month gap in the enrollment period was allowed.

### **Survey Protocol**

The survey administration protocol employed was a mixed mode methodology. All sampled members received an English version of the survey.<sup>2-4</sup> Non-respondents received a reminder postcard, followed by a second survey mailing and a second postcard reminder. Due to lower-than-expected responses from parents/caretakers of child members through the mail, HSAG implemented a telephone follow-up phase (i.e., Computer Assisted Telephone Interviewing [CATI]) for parents/caretakers of child members who did not mail in a completed survey to attempt to increase response rates. Up to three CATI calls to each non-respondent were attempted. The survey administration started in December 2021 and survey field remained open until closing in March 2022. Figure 2-2 shows the timeline used for the survey administration.

<sup>&</sup>lt;sup>2-4</sup> Sampled members had the option to complete the survey in Spanish via Computer Assisted Telephone Interviewing (CATI). Members had to call a customer service toll-free number to request completing the survey in Spanish.

# How Survey Results Were Calculated

HSAG developed a scoring approach, based in part on scoring standards devised by the Agency for Healthcare Research and Quality (AHRQ), the developers of CAHPS, to comprehensively assess member experience. In addition to individual plan results, HSAG calculated an HKD Program average (i.e., combined results from the dental plans). This section provides an overview of each analysis.

### Who Responded to the Survey

The response rate was defined as the total number of completed surveys divided by all eligible members of the sample. HSAG considered a survey completed if at least one question was answered. Eligible members included the entire sample minus ineligible members. Ineligible members met at least one of the following criteria: they were deceased, were invalid (did not meet the eligible population criteria), or had a language barrier.

Response Rate = <u>Number of Completed Surveys</u> Sample - Ineligibles

### **Respondent Analysis**

HSAG evaluated the demographic characteristics (i.e., age, gender, race, and ethnicity) of child members as part of the respondent analysis. HSAG performed a t test to determine whether the demographic characteristics of child members whose parents/caretakers responded to the survey (i.e., respondent percentages) were statistically significantly different from demographic characteristics of all child members in the sample frame (i.e., sample frame percentages). A difference was considered statistically significant if the two-sided p value of the t test is less than 0.05. The two-sided p value of the t test is the probability of observing a test statistic as extreme as or more extreme than the one actually observed by chance. Respondent percentages within a particular demographic category that were significantly higher or lower than the sample frame percentages are noted with black arrows in the tables. MDHHS should exercise caution when extrapolating the survey results to the entire population if the respondent population differs significantly from the actual population of the plan or program.

### **Child and Respondent Demographics**

The demographics analysis evaluated demographic information of child members and respondents based on parents'/caretakers' responses to the surveys. The demographic characteristics of children included age, gender, race, ethnicity, and dental health status. Self-reported respondent demographic information included age, gender, level of education, and relationship to the child.

# Statewide Comparisons

#### **Global Ratings, Composite Measures, and Individual Item Measures**

HSAG calculated top-box scores for each measure. The scoring involved assigning top-box responses a score of one, with all other responses receiving a score of zero. A "top-box" response was defined as follows:

- "9" or "10" for the global ratings.
- "Usually/Always," "Probably Yes/Definitely Yes," or "Somewhat Yes/Definitely Yes" for the composite measures and individual item measures.

The exception to this was Question 18 in the *Access to Dental Care* composite measure, where the response option scale was reversed so responses of "Sometimes/Never" were considered top-box responses.

#### **Dental Plan Comparisons**

HSAG compared the plans' results to each other to determine if the results were statistically significantly different. A t test was performed to determine whether BCBSM's results were statistically significantly different from Delta Dental's results. A difference was considered statistically significant if the two-sided p value of the t test was less than 0.05. Statistically significant differences were noted using colors in the figures.

### **Trend Analysis**

HSAG compared the 2022 results to the corresponding 2021 and 2020 results to determine whether there were statistically significant differences. A t test was performed to determine whether results in 2022 were statistically significantly different from the previous two years' results. A difference was considered statistically significant if the two-sided p value of the t test was less than 0.05. The two-sided p value of the t test is the probability of observing a test statistic as extreme as or more extreme than the one actually observed.

Scores that were statistically significantly higher in 2022 than in 2021 or 2020 are noted with black upward ( $\blacktriangle$ ) triangles. Scores that were statistically significantly lower in 2022 than in 2021 or 2020 are noted with black downward ( $\blacktriangledown$ ) triangles. Scores in 2022 that were not statistically significantly different from scores in 2021 or 2020 are not noted with triangles.

# Key Drivers of Member Experience Analysis

HSAG performed an analysis of key drivers of member experience for the following three measures: *Rating of All Dental Care, Rating of Dental Plan*, and *Would Recommend Dental Plan*. The purpose of the key drivers of member experience analysis is to help decision makers identify specific aspects of care that will most benefit from quality improvement activities.

Table 2-2 depicts the survey items (i.e., questions) that were analyzed for each measure in the key drivers of member experience analysis as indicated by a checkmark ( $\checkmark$ ), as well as each survey item's baseline response that was used in the statistical calculation.

Question Number	Rating of All Dental Care	Rating of Dental Plan	Would Recommend Dental Plan	Baseline Response
Q6. Child's dentist explained things in understandable way	$\checkmark$	~	√	Always
Q7. Child's dentist listened carefully to parent/caretaker	$\checkmark$	✓	√	Always
Q8. Child's dentist treated parent/caretaker with courtesy and respect	$\checkmark$	√	✓	Always
Q10. Child's dentist explained things in understandable way for child	$\checkmark$	✓	✓	Always
Q11. Child's dentist spent enough time with child	$\checkmark$	✓	✓	Always
Q13. Dentists or dental staff helped child feel comfortable during dental work	$\checkmark$	√	✓	Always
Q14. Dentists or dental staff explained during child's treatment	$\checkmark$	√	√	Always
Q15. Received appointment as soon as wanted	$\checkmark$	✓	✓	Always
Q16. Child saw dentist as soon as parent/caretaker wanted	$\checkmark$	✓	√	Definitely Yes
Q17. Parent/caretaker received appointment for child as soon as wanted for specialized dentist and dental care	$\checkmark$	√	~	Always
Q18. Spent more than 15 minutes in waiting room before child's appointment	$\checkmark$	✓	✓	Never
Q19. Someone explained delay for spending more than 15 minutes in waiting room before appointment	$\checkmark$	✓	~	Always

#### Table 2-2—Potential Key Drivers

Question Number	Rating of All Dental Care	Rating of Dental Plan	Would Recommend Dental Plan	Baseline Response
Q21. Child's dental plan covered all services parent/caretaker thought covered		√	√	Always
Q21a. Child's dental plan met all of child's dental care needs		√	$\checkmark$	Definitely Yes
Q22. Child's dental plan covered what child needed		$\checkmark$	$\checkmark$	Definitely Yes
Q24. 800 number, written materials, or website provided parent/caretaker with wanted information		√	√	Always
Q26. Information helped find dentist for child that parent/caretaker is happy with		√	√	Definitely Yes
Q29. Child's dental plan's customer service staff gave parent/caretaker the information or help needed		√	√	Always
Q30. Child's dental plan's customer service staff treated parent/caretaker with courtesy and respect		✓	✓	Always

HSAG assessed each measure's performance by assigning the responses into a three-point scale as follows:

- 0 to 6/Definitely No = 1 (Dissatisfied)
- 7 to 8/Probably Yes or Probably No = 2 (Neutral)
- 9 to 10/Definitely Yes = 3 (Satisfied)

For each item evaluated, HSAG calculated the relationship between the item's response and performance on each of the three measures using a polychoric correlation, which is used to estimate the correlation between two theorized normally distributed continuous latent variables, from two observed ordinal variables. HSAG then prioritized items based on their correlation to each measure.

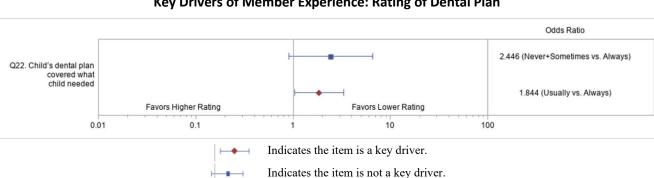

The correlation can range from -1 to 1, with negative values indicating an inverse relationship between overall member experience and a particular survey item. However, the correlation analysis conducted is not focused on the direction of the correlation, but rather on the degree of correlation. Therefore, the absolute value of the correlation is used in the analysis, and the range is 0 to 1. A zero indicates no relationship between the response to a question and the member's experience. As the value of the correlation increases, the importance of the question to the respondent's overall experience increases.

After prioritizing items based on their correlation to each measure, HSAG estimated the odds ratio, which is used to quantify the respondents' tendency to choose a lower rating over a higher rating based on their responses to the evaluated items. The odds ratio can range from 0 to infinity. Key drivers are those items for which the odds ratio is statistically significantly greater than 1. If a response to an item

has an odds ratio value that is statistically significantly greater than 1, then a respondent who provides a response other than the baseline (e.g., "Always") is more likely to provide a lower rating on the measure than respondents who provide the baseline response. As the odds ratio value increases, the tendency for a respondent who provides a non-baseline response to choose a lower rating increases.

In the example figure below, the results indicate that respondents who answered either "Never" or "Sometimes" or answered "Usually" to Question 22 are 2.446 or 1.844 times, respectively, more likely to provide a lower rating for their dental plan than respondents who answered "Always." The items identified as key drivers are indicated with a red diamond.

#### Key Drivers of Member Experience: Rating of Dental Plan

# **Limitations and Cautions**

The findings presented in this report are subject to some limitations in the survey design, analysis, and interpretation. These limitations should be considered when interpreting or generalizing the findings.

### **Causal Inferences**

Although this report examines whether respondents report differences in experience with various aspects of their child's dental care experiences, these differences may not be completely attributable to the HKD Program. The survey by itself does not necessarily reveal the exact cause of these differences.

### Lack of National Data for Comparisons

Currently AHRQ has not established a child dental survey; therefore, national benchmark data were not available for comparisons.

### Non-Response Bias

The experiences of the survey respondent population may be different than that of non-respondents with respect to their dental care services and may vary by plan or program. According to research, late respondents (i.e., respondents who submitted a survey later than the first mailing/round) could

potentially be non-respondents if the survey had ended earlier.<sup>2-5</sup> Similarly, respondents who completed a survey by phone could potentially be non-respondents if the survey mode was mail-only. To identify potential non-response bias, HSAG compared the top-box scores from late respondents to early respondents (i.e., respondents who submitted a survey during the first mailing/round) as well as by mode (i.e., respondents who completed a survey by mail to respondents who completed a survey by phone) for each measure. Results indicate that early respondents are not statistically significantly more likely to provide a higher or lower top-box response for any measure; however, results indicate that respondents who completed the survey by phone for the *Care from Dentists and Staff* composite measure and *Care from Regular Dentist* individual item measure. MDHHS should consider that potential non-response bias exists when interpreting CAHPS results for these measures.

### Survey Instrument

The Child Dental Survey is a modified version of AHRQ's CAHPS Dental Survey. The CAHPS Dental Survey, currently available for the adult population only, was customized for administration to a child population.

<sup>&</sup>lt;sup>2-5</sup> Korkeila, K., et al. "Non-response and related factors in a nation-wide health survey." European journal of epidemiology 17.11 (2001): 991-999.

# Who Responded to the Survey

A total of 3,300 surveys were mailed to parents/caretakers of child members enrolled in the HKD Program. A total of 207 and 280 surveys were completed for BCBSM and Delta Dental, respectively. Table 3-1 shows the total number of members sampled, the number of surveys completed, the number of ineligible members, and the response rates.

Program/Plan Name	Sample Size	Completes	Ineligibles	Response Rates
HKD Program	3,300	487	70	15.08%
BCBSM	1,650	207	44	12.89%
Delta Dental	1,650	280	26	17.24%

#### Table 3-1—Total Number of Respondents and Response Rates

# **Respondent Analysis**

HSAG compared the demographic characteristics of child members whose parents/caretakers responded to the survey to the demographic characteristics of all child members in the sample frame for statistically significant differences. The demographic characteristics evaluated as part of the respondent analysis included age, gender, race, and ethnicity. Table 3-2 through Table 3-5 present the results of the respondent analysis. Please note that variables from the sample frame were used as the data source for this analysis; therefore, these results will differ from those presented in the demographics subsection, which uses responses from the survey as the data source.

#### Table 3-2—Respondent Analysis: Age

Program/Plan Name		0 to 3	4 to 7	8 to 12	13 to 17	18 to 20
HKD Program	R	<b>14.4%</b> ↑	21.6%↓	31.6%	27.1%	5.3%
IIKD Frogram	SF	8.1%	26.0%	32.4%	26.3%	7.2%
DCDCM	R	24.6%	19.3%↓	28.0%	25.1%	2.9%↓
BCBSM	SF	22.3%	25.2%	27.1%	19.5%	6.0%
Delta Dental	R	6.8%	23.2%	34.3%	28.6%	7.1%
	SF	5.6%	26.1%	33.4%	27.5%	7.4%

An "R" indicates respondent percentage, and an "SF" indicates sample frame percentage.

↑ Indicates the respondent percentage is statistically significantly higher than the sample frame percentage.

↓ Indicates the respondent percentage is statistically significantly lower than the sample frame percentage.

Respondent percentages that are not statistically significantly different than the sample frame percentages are not noted with arrows.

#### Table 3-3—Respondent Analysis: Gender

Program/Plan Name		Male	Female
	R	47.8%	52.2%
HKD Program	SF	49.6%	50.4%
BCBSM	R	52.2%	47.8%
BCBSIM	SF	49.1%	50.9%
Delta Dental	R	44.6%	55.4%
Denta Dentai	SF	49.6%	50.4%

An "R" indicates respondent percentage, and an "SF" indicates sample frame percentage.

↑ Indicates the respondent percentage is statistically significantly higher than the sample frame percentage.

1 Indicates the respondent percentage is statistically significantly lower than the sample frame percentage.

Respondent percentages that are not statistically significantly different than the sample frame percentages are not noted with arrows.

#### Table 3-4—Respondent Analysis: Race

Program/Plan Name		White	Black	Asian	Native Hawaiian or other Pacific Islander	American Indian or Alaska Native	Other
	R	66.1%	19.8%↓	4.1%↑	0.6%	0.6%	8.7%
HKD Program	SF	63.7%	25.7%	2.3%	0.1%	1.1%	7.2%
BCBSM	R	56.6%	23.9%↓	5.4%	1.0%	1.0%	12.2%
BCBSM	SF	53.5%	34.0%	3.0%	0.1%	1.1%	8.4%
Delta Dental	R	73.1%↑	16.8%↓	3.2%	0.4%	0.4%	6.1%
Dena Denial	SF	65.5%	24.2%	2.2%	0.1%	1.1%	7.0%

An "R" indicates respondent percentage, and an "SF" indicates sample frame percentage.

↑ Indicates the respondent percentage is statistically significantly higher than the sample frame percentage.

1 Indicates the respondent percentage is statistically significantly lower than the sample frame percentage.

Respondent percentages that are not statistically significantly different than the sample frame percentages are not noted with arrows.

#### Table 3-5—Respondent Analysis: Ethnicity

Program/Plan Name		Hispanic	Non-Hispanic
	R	10.6%	89.4%
HKD Program	SF	10.5%	89.5%
DCDSM	R	10.9%	89.1%
BCBSM	SF	11.3%	88.7%
Delta Dental	R	10.4%	89.6%
Denta Dental	SF	10.4%	89.6%

An "R" indicates respondent percentage, and an "SF" indicates sample frame percentage.

*↑ Indicates the respondent percentage is statistically significantly higher than the sample frame percentage.* 

↓ Indicates the respondent percentage is statistically significantly lower than the sample frame percentage.

Respondent percentages that are not statistically significantly different than the sample frame percentages are not noted with arrows.

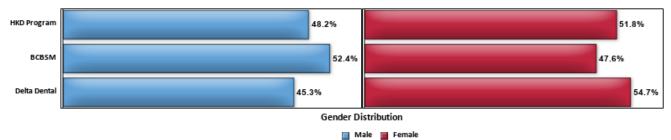

# **Child and Respondent Demographics**

Figure 3-1 through Figure 3-5 depict the self-reported demographic characteristics of children for whom a parent/caretaker completed a survey.

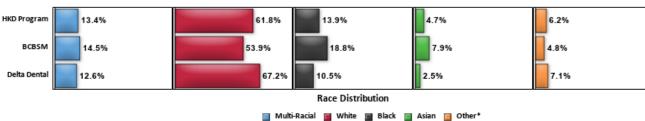

\*Children were eligible for inclusion in the Child Dental Survey results if they were age 20 or younger as of October 31, 2021. Some children eligible for the survey turned age 21 between November 1, 2021, and the time of survey administration.

#### Figure 3-2—Child Member Demographics: Gender

#### Figure 3-3—Child Member Demographics: Race

\*The "Other" Race category includes responses of Native Hawaiian or Other Pacific Islander, American Indian or Alaska Native, and Other.

#### Figure 3-4—Child Member Demographics: Ethnicity

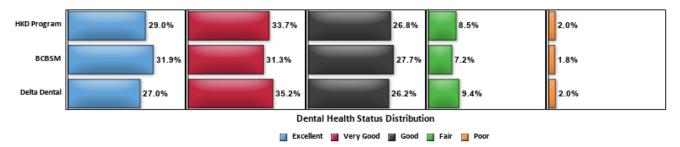

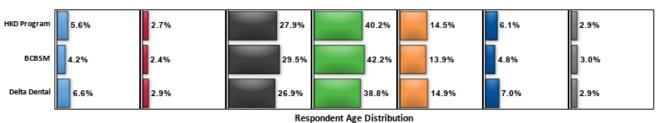

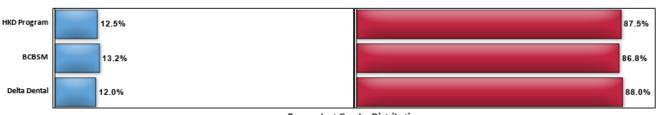

Figure 3-6 through Figure 3-9 depict the self-reported age, gender, education level, and relationship to child for the respondents who completed the survey.

🔲 Under 18 📓 18 to 24 📓 25 to 34 📓 35 to 44 📔 45 to 54 📓 55 to 64 📓 65 or Older

Respondent Gender Distribution

🔲 Male 📕 Female

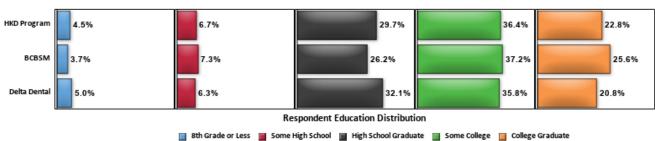

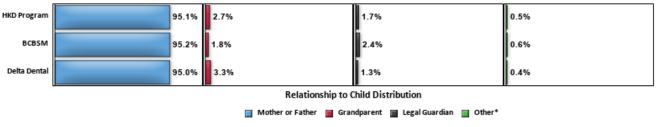

Figure 3-8—Respondent Demographics: Education Level

#### Figure 3-9—Respondent Demographics: Relationship to Child

\*The "Other" Relationship to Child category is based on respondents who answered aunt or uncle, older brother or sister, other relative, or someone else.

# **Statewide Comparisons**

HSAG calculated top-box scores for each measure. A "top-box" response was defined as follows:

- "9" or "10" for the global ratings.
- "Usually/Always," "Probably Yes/Definitely Yes," or "Somewhat Yes/Definitely Yes" for the composite measures and individual item measures.

The exception to this was Question 18 in the *Access to Dental Care* composite measure, where the response option scale was reversed so a response of "Sometimes/Never" was considered a top-box response. For additional information on the survey language and response options for the measures, please refer to the Reader's Guide beginning on page 2-2.

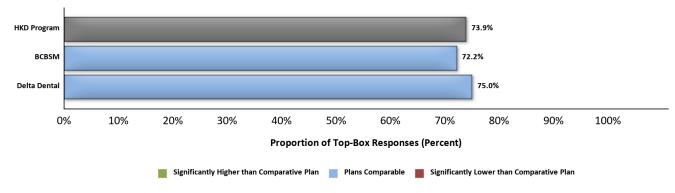

HSAG compared the plans' results to each other to determine if the results were statistically significantly different. Colors in the figures note statistically significant differences. Green indicates a top-box score for one dental plan that was statistically significantly higher than the other dental plan. Conversely, red indicates a top-box score for one dental plan that was statistically significantly significantly lower than the other dental plan. Blue represents top-box scores that were not statistically significantly different from each other. Scores with fewer than 100 respondents are denoted with a cross (+). Caution should be used when evaluating scores derived from fewer than 100 respondents.

— Not statistically significantly different in 2022 than in previous years.

# 5. Key Drivers of Member Experience Analysis

HSAG performed an analysis of key drivers of member experience for the following measures: Rating of All Dental Care, Rating of Dental Plan, and Would Recommend Dental Plan. Key drivers of member experience are defined as those items for which the odds ratio is statistically significantly greater than 1. For additional information on the statistical calculation, please refer to the Reader's Guide on page 2-8.

Figure 5-1 through Figure 5-3 depict the results of the analysis for the HKD Program. The items identified as key drivers are indicated with a red diamond.

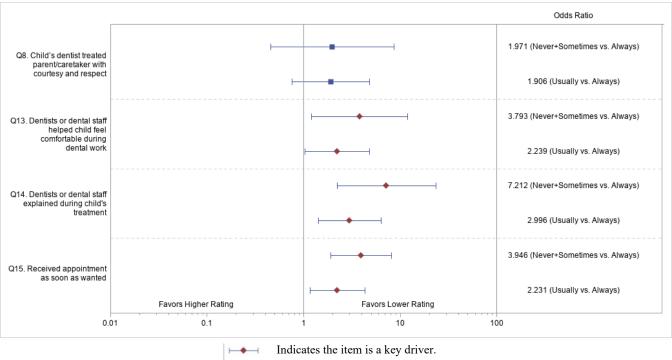

Figure 5-1—Key Drivers of Member Experience: HKD Program—Rating of All Dental Care

Indicates the item is not a key driver.

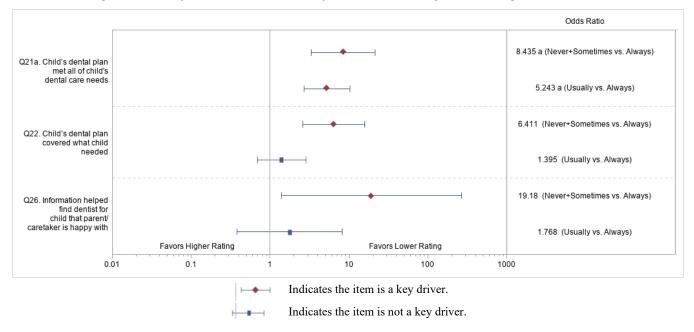

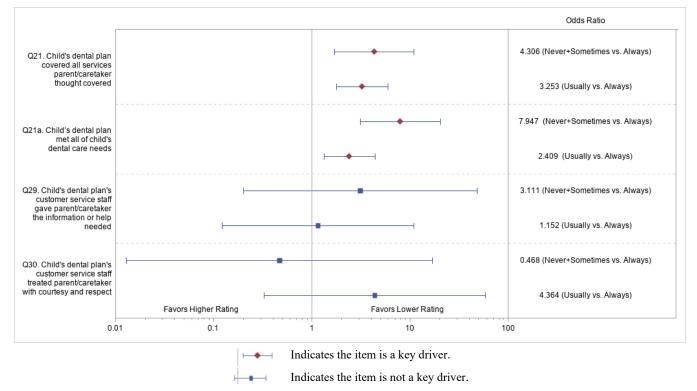

Figure 5-2—Key Drivers of Member Experience: HKD Program—Rating of Dental Plan

# 6. Survey Instrument

This section provides a copy of the survey instrument administered to child members enrolled in the HKD Program.

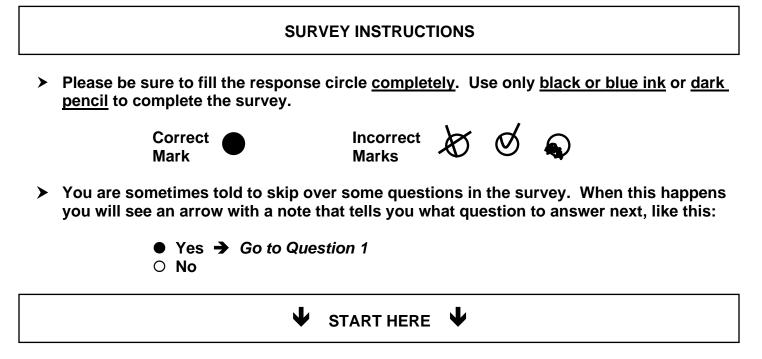

Your privacy is protected. The research staff will not share your personal information with anyone without your OK. Personally identifiable information will not be made public and will only be released in accordance with Federal laws and regulations.

You may choose to answer this survey or not. If you choose not to, this will not affect the dental benefits your child gets. You may notice a number on the cover of this survey. This number is ONLY used to let us know if you returned your survey so we don't have to send you reminders.

If you want to know more about this study, please call 1-877-455-3393.

Please answer the questions for the child listed on the envelope. Please do not answer for any other children.

1. Our records show that your child is now in the (insert dental plan name). Is that right?

O Yes → Go to Question 3
O No

2. What is the name of your child's dental plan? (Please print)

809-01 ||...|.||...|.|...|.|...||...||

- 3. In the last 12 months, did your child go to a dentist's office or clinic for care?
  - Yes → Go to Question 4
  - No → Please stop and return this survey in the postage-paid envelope. Thank you.

# YOUR CHILD'S REGULAR DENTIST

- 4. A regular dentist is one your child would go to for check-ups and cleanings or when he or she has a cavity or tooth pain. Does your child have a regular dentist?
  - O Yes
  - No → Go to Question 13
- 5. Has your child seen his or her regular dentist in the last 12 months?
  - O Yes
  - No, My child has seen someone else → Go to Question 13
- 6. In the last 12 months, how often did your child's regular dentist explain things about your child's dental health in a way that was easy to understand?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 7. In the last 12 months, how often did your child's regular dentist listen carefully to you?
  - O Never
  - O Sometimes
  - O Usually
  - O Always

- 8. In the last 12 months, how often did your child's regular dentist treat you with courtesy and respect?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 9. Is your child able to talk with his or her regular dentist about his or her dental care?
  - O Yes
  - No → Go to Question 11
- 10. In the last 12 months, how often did your child's regular dentist explain things in a way that was easy for <u>your</u> <u>child</u> to understand?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 11. In the last 12 months, how often did your child's regular dentist spend enough time with your child?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 11a. In the last 12 months, how often were you satisfied with the overall care provided to your child by his or her regular dentist?
  - O Never
  - O Sometimes
  - O Usually
  - O Always

12. Using any number from 0 to 10, where 0 is the worst regular dentist possible and 10 is the best regular dentist possible, what number would you use to rate your child's regular dentist?

- 12a. Would you recommend your child's regular dentist to other parents or people who are looking for a new dentist for their child?
  - O Definitely yes
  - O Probably yes
  - O Probably no
  - O Definitely no

YOUR CHILD'S DENTAL CARE IN THE LAST 12 MONTHS

So far, the questions on this survey have been about your child's regular dentist. The next set of questions asks about any dental care your child had in the last 12 months, including dental care your child had with his or her regular dentist or with someone else.

- 13. In the last 12 months, how often did the dentists or dental staff do everything they could to help your child feel as comfortable as possible during his or her dental work?
  - O Never
  - O Sometimes
  - O Usually
  - O Always

- 14. In the last 12 months, how often did the dentists or dental staff explain what they were doing while treating your child?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 15. In the last 12 months, how often were your child's dental appointments as soon as you wanted?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 16. If your child needed to see a dentist right away because of a dental emergency in the last 12 months, did your child get to see a dentist as soon as you wanted?
  - My child did not have a dental emergency in the last 12 months
  - O Definitely yes
  - O Somewhat yes
  - O Somewhat no
  - O Definitely no
- 17. If you tried to get an appointment for your child with a dentist who specializes in a particular type of dental care (such as an oral or dental surgeon) in the last 12 months, how often did you get an appointment for your child as soon as you wanted?
  - O I did not try to get an appointment with a specialist dentist for my child in the last 12 months
  - O Never
  - O Sometimes
  - O Usually
  - O Always

- 18. In the last 12 months, how often did you have to spend more than 15 minutes in the waiting room before your child saw someone for his or her dental appointment?
  - Never → Go to Question 20
  - O Sometimes
  - O Usually
  - O Always
- 19. If you had to spend more than 15 minutes in the waiting room before your child saw someone for his or her appointment, how often did someone tell you why there was a delay or how long the delay would be?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 20. Using any number from 0 to 10, where 0 is the worst dental care possible and 10 is the best dental care possible, what number would you use to rate all of the dental care your child received in the last 12 months?

0	0	0	0	0	0	0	0	0	0	0	
0	1	2	3	4	5	6	7	8	9	10

# YOUR CHILD'S DENTAL PLAN

The next set of questions asks about your child's dental plan. For these questions, answer only about your child's dental plan.

- 21. In the last 12 months, how often did your child's dental plan cover all of the services you thought were covered?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 21a. In the last 12 months, did your child's dental plan meet all of his or her dental care needs?
  - O Definitely yes
  - O Somewhat yes
  - O Somewhat no
  - O Definitely no
- 22. In the last 12 months, did your child's dental plan cover what your child needed to get done?
  - O Definitely yes
  - O Somewhat yes
  - O Somewhat no
  - O Definitely no
- 23. In the last 12 months, did you try to find out how your child's dental plan works by calling their toll-free number, visiting their website, or reading printed materials?

O Yes

○ No → Go to Question 25

- ۲
- 24. In the last 12 months, how often did the toll-free number, website, or written materials provide the information you wanted about your child's dental plan?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 25. In the last 12 months, did you use any information from your child's dental plan to help you find a new dentist for your child?
  - O Yes
  - No → Go to Question 28
- 26. Did this information help you find a dentist for your child that you were happy with?
  - O Definitely yes
  - O Somewhat yes
  - O Somewhat no
  - O Definitely no
- 27. Using any number from 0 to 10, where 0 is extremely difficult and 10 is extremely easy, what number would you use to rate how easy it was for you to find a dentist for your child?

0	0	0	0	0	Ο	0	0	Ο	0	0
0	1	2	3	4	5	6	7	8	9	10
Extremely Extre										nely
Dif	ficul	lt							E	asy

- 28. In the last 12 months, did you try to get information or help from customer service at your child's dental plan?
  - O Yes
  - No → Go to Question 31

- 29. In the last 12 months, how often did customer service at your child's dental plan give you the information or help you needed?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 30. In the last 12 months, how often did customer service staff at your child's dental plan treat you with courtesy and respect?
  - O Never
  - O Sometimes
  - O Usually
  - O Always
- 31. Using any number from 0 to 10, where 0 is the worst dental plan possible and 10 is the best dental plan possible, what number would you use to rate your child's dental plan?

0	0	0	0	0	0	0	0	0	0	0

- 32. Would you recommend your child's dental plan to other parents or people who want to join?
  - O Definitely yes
  - O Probably yes
  - O Probably no
  - O Definitely no

# ABOUT YOUR CHILD AND YOU

- 33. In general, how would you rate the overall condition of your child's teeth and gums?
  - O Excellent
  - O Very Good
  - O Good
  - O Fair
  - O Poor
- 34. What is your child's age?
  - O Less than 1 year old

YEARS OLD (write in)

### 35. Is your child male or female?

- O Male
- O Female
- 36. Is your child of Hispanic or Latino origin or descent?
  - O Yes, Hispanic or Latino
  - O No, Not Hispanic or Latino
- 37. What is your child's race? Mark one or more.
  - O White
  - O Black or African-American
  - O Asian
  - Native Hawaiian or other Pacific Islander
  - O American Indian or Alaska Native
  - O Other

### 38. What is your age?

- O Under 18
- O 18 to 24
- O 25 to 34
- O 35 to 44
- O 45 to 54
- O 55 to 64
- O 65 to 74
- O 75 or older

### 39. Are you male or female?

- O Male
- O Female
- 40. What is the highest grade or level of school that you have completed?
  - O 8th grade or less
  - O Some high school, but did not graduate
  - O High school graduate or GED
  - O Some college or 2-year degree
  - O 4-year college graduate
  - O More than 4-year college degree

### 41. How are you related to the child?

- O Mother or father
- O Grandparent
- O Aunt or uncle
- O Older brother or sister
- O Other relative
- O Legal guardian
- O Someone else
- 42. Did someone help you complete this survey?
  - Yes → Go to Question 43
  - No → Thank you. Please return the completed survey in the postage-paid envelope.

8.	How did that person help you? Mark one or more.
	<ul> <li>Read the questions to me</li> <li>Wrote down the answers I gave</li> <li>Answered the questions for me</li> <li>Translated the questions into my language</li> <li>Helped in some other way</li> </ul>
	Thanks again for taking the time to nplete this survey! Your answers are greatly appreciated.
	When you are done, please use the iclosed prepaid envelope to mail the survey to:
er	closed prepaid envelope to mail the
