## Instructions and Signature

### Instructions

The findings from this inspection will be submitted to the Michigan Department of Health and Human Services (MDHHS) to determine compliance with requirements for licensure. This inspection form does not indicate licensure status. The MDHHS upon determination of compliance with applicable statutory and regulatory requirements and standards, will issue the license in accordance with Part 209 of the Public Health Code (PA368 of 1978), as amended.

Items on this inspection form checked "NC" indicates that the item was not clean, was missing, or non-functional at the time of this inspection, causing MDHHS to consider each applicable vehicle to be in violation of Part 209 of the Public Health Code (PA 368 of 1978), as amended. Non-sterile items must be clean and functional. Sterile items must be intact in their package, usable, integrity of package must not be compromised, and must not be expired.

### Instructions for Required Corrections

#### Non-Compliant (NC)

- If MDHHS makes the determination that a vehicle is non-compliant with equipment items, the agency has 24 hours to bring the vehicle into compliance. If the life support vehicle is not brought into compliance within that time period, the vehicle will be taken out of service. The life support agency shall demonstrate to the department, in writing, when the vehicle has been brought into compliance. A re-inspection may occur after the vehicle corrections are made within 15 days of notification.
- If a life support vehicle remains out of compliance for more than 15 calendar days from the date of inspection, then the vehicle license shall be automatically revoked.

#### Other Licensure Issues

- MDHHS may order a life support vehicle out of immediate service if it determines that the health, safety, and welfare of a patient may be in jeopardy due to non-compliance with equipment items, defective and non-functional equipment, or other applicable reasons. A notice of such action shall be issued to the life support agency by MDHHS based upon the deficiencies identified in the inspection report.
- A life support agency may immediately address potential violations during the inspection. The inspection report will reflect the action taken and MDHHS will consider that the indicator was met.

**Documentation of completed corrections may be faxed or emailed to MDHHS**

**Email: [FloryD@michigan.gov](mailto:FloryD@michigan.gov)**

**Fax: 517-335-9434**

### Signature

The inspection was completed via video technology. A separate form will be signed by the agency representative to acknowledge and confirm the inspection.

The representative of the above service, acknowledge receipt of a copy of this inspection report, supplemental notes and corrective action statement (if applicable). Failure to correct the deficiencies within the established time frames will subject the service to administrative action and penalties as outlined in Sections 201 and 209 of the Michigan Public Health Code and the Administrative Rules thereunder.
