

# Required Equipment for Initial Education Programs

CE Sponsor must have equipment to meet approved lesson plans

Equipment for every 6 students or skills rotation plan required

Device	Meets	Notes
--------	-------	-------

## MFR/EMR

Long backboard (s)  
Straps  
Head immobilizer  
Various sized cervical collars  
Short backboard or extrication device (s)  
Traction splint (s)  
Adult airway trainer (s)  
Infant airway trainer (s)  
Rigid splints  
Stethoscope and BP cuffs  
Sufficient bandaging supplies  
Arterial tourniquet (commercial device)  
Pediatric OPAs, NPAs, BVMs  
Adult OPAs, NPA, pocket masks, BVMs  
Mechanical suction device with rigid and flexible catheters  
Oxygen tank with regulator  
Pediatric nasal cannula, non-rebreather  
Adult nasal cannula, non-rebreather  
igel® airway  
Colormetric device  
Pulse oxymeter  
OB kits  
Burn sheet (s)  
CPR manikins for pediatric and adult  
AED trainer or simulator  
Narcotic antagonist trainer device  
Epi-pen trainer  
Glucometer  
Instant glucose  
Helmet/s (motorcycle, football, bicycle, etc.)  
Personal protective equipment  
Hand sanitizer  
N-95 mask (s)

## EMT (MFR equipment plus)

Supraglottic airways (King®, Combitube®, igel®)  
Commercial device tube holder  
Metered-dose inhaler trainer  
nebulizer

CPAP

Simple face mask

IV bag of NS 0.9%, D5W, LR

IV tubing

Simulated aspirin

Simulated nitroglycerine

Simulated inhaled beta-agonist

Simulated analgesics

Child restraint device

### **Specialist/AEMT (MFR/EMT equipment plus)**

Capnography or CO2 detectors

IO Manikin or simulator

IO Needles

Various sized syringes

IV arm (s)

Various sized IV needles/catheters

IV tubing (microgtt, macrogtt, blood)

IV extension tubing

IV fluids

Sharps container

IV start kit (alcohol prep, betadine, tape, venous tourniquet)

Pediatric lenth based tape

Mi-Medic cards-most recent

Drug box

Simulated Dextrose 50%

Simulated Epinephrine IM/SQ

Simulated Nitrous oxide

Simulated Glucagon

Simulated Naloxone

Simulated nitroglycerine (paste, spray, tablets)

### **Paramedic (MFR/EMT/Specialist equipment plus)**

Endotracheal tubes, various sizes

Laryngoscope handles and blades (Miller and Mac-all sizes)

Replacement bulbs for laryngoscope blades

Replacement batteries for laryngoscope handles

Magill forceps (adult and pediatric)

Cardiac Monitor capable of cardioversion, pacemaking, and 12-lead

Cables for cardiac monitor

Batteries for cardiac monitor in working order

Cardiac rhythm generator

Electrodes for EKG monitoring and defibrillation

Medications in simulation form

Needles (filter, various lengths and guages)

Subcutaneous and IM simulation device (s)

Various sized syringes

Piggyback IV set-up

Pleural decompression model  
Needle Cricothyroidotomy simulation device  
Drug box  
Simulated Adenosine  
Simulated Amiodarone  
Simulated Atropine  
Simulated Calcium Chloride  
Simulated Detrose 50%  
Simulated Sodium Chloride  
Simulated Diphenhydramine  
Simulated Dopamine  
Simulated Epinephrine 1:1, 1:10  
Simulated Fentanyl  
Simulated Ipratropium Bromide  
Simulated Ketamine  
Simulated Lidocaine  
Simulated Ketorolac  
Simulated Magnesium Sulfate  
Simulated Methylprednisolone  
Simulated Midazolam  
Simulated Morphine  
Simulated Naloxone  
Simulated Nitroglycerine  
Simulated Ondansetron  
Simulated Prednisone  
Simulated Sodium Bicarbonate  
Simulated Tranexamic Acid
