

**Bulletin Number:** MSA 05-17

**Distribution:** Hospitals, Medicaid Health Plans

**Issued:** March 1, 2005

**Subject:** Rebasing DRG Rates  
DRG Grouper Update  
Per Diem Rates Update

**Effective:** April 1, 2005

**Programs Affected:** Medicaid, Children's Special Health Care Services (CSHCS)

Effective April 1, 2005, claims for inpatient hospital admissions reimbursed using the Diagnosis Related Group (DRG) methodology will be processed using the Medicare Grouper Version 22.0. The Department of Community Health (DCH) has established its own relative weights, average lengths of stay, and high and low day outlier thresholds for each DRG based on paid claims data taken from Medicaid and CSHCS hospital admissions. The DRG hospital prices and relative weights will be rebased with the following changes:

- Three years of paid claims data will be used. The base period for inpatient hospital admissions is from September 1, 1999 through August 31, 2002.
- Three years of hospital cost report data will be used. The data used to calculate the hospital cost to charge ratios and indirect medical education (IME) adjustors will be taken from hospital cost reports ending between September 1, 2000 and August 31, 2003. The wage data will be drawn from the Centers for Medicare and Medicaid Services (CMS) audited wage data as published in the Federal Register and includes the three most recent periods available for hospital cost reports ending between September 1, 1999 and August 31, 2002. All hospital cost report and wage data is weighted 60% for the most recent period, 24% for the middle period and 16% for the oldest period.
- Hospitals will be grouped by U.S. Census Core Based Statistical Areas (CBSAs) as determined by the Centers for Medicare and Medicaid Services for the Medicare program for wage data. (A table with each hospital's geographic location used for the calculation of the Medicaid wage index is attached to this bulletin.) Medicaid hospital geographic classifications will continue to exclude the Medicare Section 508 reclassifications.
- The cost adjustor is changed as follows:

$$\text{Cost Adjustor} = 0.71066 \times \text{Wage Adjustor} + 0.28934$$

The cost adjustor formula reflects Medicare estimate of labor related costs as a portion of total hospital costs as published in the Federal Register.

- The cost outlier threshold is reduced from \$50,000 to \$35,000.
- The high day outlier threshold for each DRG will be set at the greater of: 1) 50 days, 2) the average length of stay plus 30 days, or 3) the 97 percentile length of stay.

- The indirect medical education (IME) formula is changed by replacing the 0.715 multiplier with a 0.6435 multiplier. Each hospital's IME adjustor is calculated as follows:

$$1 + \left( \left[ \frac{1 + \text{Interns \& Residents}}{\text{Beds}} \right] \cdot 0.5795 - 1 \right) \times 0.6435$$

- A budget neutrality factor is added to the hospital price calculation. Hospital prices will be reduced by the percentage necessary so that total aggregate hospital payments using the new hospital prices and DRG relative weights do not exceed the total aggregate hospital payments made using the prior hospital base period data and DRG Grouper relative weights. The estimate will be based on one year's paid claims for the period of September 1, 2002 through August 31, 2003 paid by August 25, 2004. The calculated DRG prices will be deflated by the percentage necessary for the total payments to equate to the amount currently paid.

### Hospital Cost Report Data

Data used to develop the hospital cost to charge ratios and hospital IME adjustors will be taken from filed cost reports submitted to and accepted by DCH. The most recent data available to DCH will be used. For the current rebasing, data will be taken from hospital cost reports for fiscal years ending in the following three periods: 1) September 1, 2000 to August 31, 2001, 2) September 1, 2001 to August 31, 2002, and 3) September 1, 2002 to August 31, 2003.

Inflation and weighting factors are applied to bring all periods up to a common point in time. The following factors, with inflation derived from the 2<sup>nd</sup> Quarter 2004 Data Resources, Inc. PPS-Type Hospital Market Basket Index, will be used.

<u>Fiscal Year Ending</u>	<u>Cost Inflation Factors</u>	<u>Weighting Factors</u>

Rates will be adjusted by an inflation factor of 1.0536 for the period from August 31, 2003 to April 1, 2005.

### Audited Wage Data

Salary and wage data used to develop the base and update cost adjustors are taken from the CMS website, public use files. All data were subject to appeal through the hospital's Medicare Fiscal Intermediary. The most recent data available to DCH will be used. This includes hospital cost report data for fiscal years included in the following three years: 1) September 1, 1999 through August 31, 2000, 2) September 1, 2000 through August 31, 2001, and 3) September 1, 2001 through August 31, 2002.

### **Rehabilitation Hospitals and Distinct-Part Units**

Rehabilitation hospitals and distinct-part rehabilitation units per diems will be updated using the same base period, cost report periods, inflation and weighting factors used for the medical/surgical hospitals. Hospitals will be grouped by U.S. Census CBSAs as published in the most recent Federal Register for wage data.

### **Medicaid Health Plan Payments to Out of Network Hospitals**

Medicaid Health Plans are to reimburse out of network medical/surgical hospitals for admissions on and after April 1, 2005 at Medicaid DRG hospital prices effective on April 1, 2005. Medicaid Health Plans are to reimburse out of network freestanding rehabilitation hospitals and distinct-part rehabilitation units for dates of service on and after April 1, 2005 at Medicaid per diem rates effective on April 1, 2005. Medicaid Health Plans are to use Medicare Grouper 22.0 effective April 1, 2005 to process out of network inpatient hospital claims, assign DRGs to determine relative weights, outliers, and average lengths of stay.

The hospital Medicaid operating cost to charge ratios effective on April 1, 2005 are to be used for admissions on and after April 1, 2005 in the calculation of low day outliers, cost outliers, and organ transplants (except kidney transplants which are paid under relative weights). With the exception of bone marrow, which is to be reimbursed based on the cost to charge ratio in each hospital, organ acquisitions are to be reimbursed at 100% of charges.

In addition to the DRG or per diem payment, a separate capital payment must be made for each out of network medical/surgical hospital admission at the per discharge rate. A separate capital payment must also be made for each day a patient receives care in an out of network freestanding rehabilitation hospital and distinct-part rehabilitation unit. Capital payments for acute care and rehabilitation units and freestanding hospitals will be updated effective for dates of admission on and after April 1, 2005.

### **Subacute Ventilator-Dependent Care**

The Medicaid Provider Manual currently states that the negotiated per diem rate is not to exceed the per diem rate that would be paid for outlier days under DRG 483. Grouper 22 has replaced DRG 483 with DRG 541 and DRG 542. Therefore, the average outlier per diem between DRG 541 and DRG 542 will replace the former DRG 483.

## Manual Maintenance

This bulletin should be retained until the information is incorporated into the Medicaid Provider Manual.

## Questions

Any questions regarding this bulletin should be directed to Provider Inquiry, Michigan Department of Community Health, P.O. Box 30731, Lansing, Michigan 48909-8231, or e-mail at [ProviderSupport@michigan.gov](mailto:ProviderSupport@michigan.gov). When you submit an e-mail, be sure to include your name, affiliation, and phone number so you may be contacted if necessary. Providers may phone toll-free 1-800-292-2550.
