

Information on the MDSS release version 1.5.3009

March 29th, 2006

Enhancements for all users

- Store Ordering Provider Information for ELR Messages with each lab. If the case report is initiated via the ELR message the information will be placed in the Primary Physician field under the 'Referrer' tab in addition to the Ordering Provider fields under the 'Lab Reports' tab.
- Added an advanced search option to search for Electronic Laboratory Reporting Cases Only, Non Electronic Laboratory Reporting cases only or the default option search both ELR and non ELR cases. Choosing to search for Electronic Laboratory Reporting Cases Only will only return case reports that were first reported into the MDSS via ELR messaging. Please note that ELR cases referred prior to this release will not show up when searching for 'Electronic Laboratory Reporting Cases Only'.
- Check box indicating case received via ELR added to 'Referrer' page.
- Change ELR HL7 Mappings to enhance and improve information displayed under the 'Lab Reports' tab.
- Updated MDSS Support Page link in the page footer to take users to www.michigan.gov/mdss.
- Enabled the Epi- Linked question on the Varicella case detail form to be edited after the initial case is saved.

Enhancements for Administrators

- Added an 'Export User' button to allow for a CSV export of the user list. The export will include the following fields: User ID, Last Name, First Name, E-mail Address, Jurisdiction, Role, Active User, Automatic Case Assignment and Receive Registration E-mails.

Enhancements for MDCH-BOE Admin/Super User

- Added a link under administration titled 'Lab Table'. This is a lookup table for lab information that is used to populate certain lab fields when retrieving a case is received via ELR messaging.
- Fixed issues with NETSS YTD export not running.
- Fixed issues with NETSS extended case information for Measles cases.
