TCN Composition Worksheet

Introduction

The following resource gives user an index of the digits and how they make up the Transaction Control Number (TCN).

Example: 211215010000189000

Position 1: **Input Indicator**

> 0 = Reserved
> 1 = Paper (the claim was received via paper)
> 2 = DDE Web Submission
> 3 = Electronic (HIPAA) Claim or Encounter was submitted as an electronic batch
> 4 = CE System Generated
> 5 = CM System Generated (generated by Contracts Mgmt. Subsystem)
> 6 -7 = Reserved
> 8 = Paper with Attachments
> 9 = Reserved

Position 2: TCN Category

> 0 = Reserved
> 1 = FFS
> 2 = Crossover (assigned to any claim received from Group Health, Inc.(GHI))
> 3 = Encounters
> 4 = Capitation Claims
> 5 = Gross Adjustments
> 6 = Pharmacy Encounters
> 7 = Recurring Payments
> 8-9 = Reserved

Position 3-4: Two digit service year (YY)

Position 5-7: Three digit Julian date (refer to the Medicaid Provider Manual Julian calendar)

Position 8: Adjustment Indicator

> 1 = Original Claim
> 7 =Replacement/Adjustment
> 8 = Void

Position 9-15: Sequence Number

> Starting with 0000001 at the beginning of each Julian date

Position 16-18: Line Number

> Will begin with 001 for every new claim and increment by 1 for each claim line. Any replacement or void claims, use the header TCN. Header TCN always ends in 000.
