Correct VIM Vaccine Lot Transactions for Returns & Wastage Reports

The Return/Waste Reports in MCIR are populated by the transactions you create in your MCIR VFC inventory. The table below explains what transactions populate a Waste report and what transactions populate a Return report and shows the correct transactions you should be using to remove non-viable vaccine from your inventory. Using the correct ACTION and REASON transactions when removing the dose(s) from your VFC inventory ensures that the Return and Waste reports created in MCIR will be correct, too.

These transactions populate a WASTE report		
Action	Reason	When to use
ADJUSTMENT	Breakage	Vaccine is dropped, kicked out of hand by patient or
	_	otherwise broken.
	Drawn Not Used	Vaccine is drawn up, but for some reason not used and
		could not be used later (always check and double check
		that the dose is needed and never pre-draw doses ahead of time).
	Unable to Locate	Unable to locate vaccine when balancing your inventory.
		Please check with your LHD before using this transaction.
		Every effort should be made to locate the dose, including
		making sure all records/shots have been entered into
	National Biographic	MCIR, before using this transaction.
	Natural Disaster	Vaccine could not be found due to a true natural disaster
		(flood, tornado, earthquake, etc.). Use of this transaction should be RARE.
NON RETURN		n to account for partially used multi-dose vial vaccine that
OPENED MDV		o longer usable due to storage/temperature issues. A
	partially used mu	lti-dose vial cannot be returned to McKesson.
These transactions populate a RETURN report		
Action	Reason	When to use
RETURN TO	Equipment	Vaccine is no longer usable because the
DISTRIBUTOR	١ ،	refrigerator/freezer got too warm.
	warm)	
	Fautiomont	
	Equipment	Vaccine is no longer usable because the
	Failure (too cold)	refrigerator/freezer got too cold.
		refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use
	Failure (too cold)	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially
	Failure (too cold) Expired Vaccine	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine.
	Failure (too cold) Expired Vaccine Failure to Store	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored
	Failure (too cold) Expired Vaccine Failure to Store Properly	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored properly (left out on counter, stored in door of unit, etc.)
	Failure (too cold) Expired Vaccine Failure to Store	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored properly (left out on counter, stored in door of unit, etc.) The vaccine is no longer usable because the unit got too
	Failure (too cold) Expired Vaccine Failure to Store Properly Power Outage	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored properly (left out on counter, stored in door of unit, etc.) The vaccine is no longer usable because the unit got too warm due to an interruption in power to the unit.
	Failure (too cold) Expired Vaccine Failure to Store Properly	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored properly (left out on counter, stored in door of unit, etc.) The vaccine is no longer usable because the unit got too warm due to an interruption in power to the unit. Vaccine was recalled by the manufacturer and can no
	Failure (too cold) Expired Vaccine Failure to Store Properly Power Outage Recalled	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored properly (left out on counter, stored in door of unit, etc.) The vaccine is no longer usable because the unit got too warm due to an interruption in power to the unit. Vaccine was recalled by the manufacturer and can no longer be used.
	Failure (too cold) Expired Vaccine Failure to Store Properly Power Outage	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored properly (left out on counter, stored in door of unit, etc.) The vaccine is no longer usable because the unit got too warm due to an interruption in power to the unit. Vaccine was recalled by the manufacturer and can no longer be used. Vaccine was spoiled during shipment due to the fault of
	Failure (too cold) Expired Vaccine Failure to Store Properly Power Outage Recalled Spoiled in	refrigerator/freezer got too cold. Vaccine is no longer usable because it has expired. Use the Non Return Opened MDV transaction for partially used multi-dose vials of expired vaccine. Vaccine is no longer usable because it was not stored properly (left out on counter, stored in door of unit, etc.) The vaccine is no longer usable because the unit got too warm due to an interruption in power to the unit. Vaccine was recalled by the manufacturer and can no longer be used.
