*Our mission is to advance knowledge of health and well-being through policy evaluation, collaborative partnerships, quality improvement initiatives, and research.*

## Introduction

The goal of the MI Choice Enrollee Satisfaction Survey is to provide performance feedback that is actionable and that will aid in improving patient-centered service delivery. The CAHPS Home and Community-Based Services Survey was selected because (1) it is the most widely used survey with benchmarking and standardized questions for assessing patient experiences in the United States, (2) the survey tool and technical guidance is publicly available from the Agency for Healthcare Research and Quality, (3) the survey has a strong track record of rigorous scientific development and testing to ensure reliability and validity, and (4) the survey is commonly used as the federal reporting standard to the Centers for Medicaid and Medicaid Services.

## Methodology

There were 8,729 enrollees who met the following criteria for the sampling frame: (1) enrolled in the MI Choice program for at least three months between February and April 2019; (2) had at least one claim during that time period; (3) 18 years of age or older; and (4) did not participate in the 2018 MI Choice Enrollee Satisfaction Survey. A random number methodology per agency was then applied resulting in 3,417 enrollees being included in the telephone sample frame. The sampling frame for the Region 3B Area Agency was 150 with 26 completed surveys.

Prior to the survey administration, a pre-notification letter was sent informing enrollees to anticipate a telephone call. Enrollees were assured that the survey was being sponsored by the State of Michigan and answers kept confidential by Michigan State University.

MI Choice enrollees completed the telephone survey from May to September 2019. The survey was considered viable for inclusion if the respondent answered three cognitive screening questions with valid responses: (1) Does someone come into your home to help you? (2) How do they help you? and (3) What do you call them?

Survey results were standardized to a 100-point scale with mean scores calculated in accordance with the Technical Assistance Guide for Analyzing Data from the CAHPS Home and Community-Based Services Survey. Less than five percent of the respondents opted to use the alternative responses where options were presented as “mostly yes” or “mostly no” instead of a more cognitively challenging Likert-type scale. The alternative responses were also converted to the standardized scale.

Statewide and agency specific calculations are provided within this report. Please note that agency results are informational only and not intended for federal reporting. Official reporting of CAHPS results requires 100 valid surveys per unit of analysis completed by an approved vendor. Cells under five were either suppressed or excluded from presentation because of the instability of reporting small numbers.

## Demographics

When comparing Region 3B Area Agency respondents to the overall demographics, Region 3B respondents were more likely to be older, female, and white as well as indicate a higher mental health score (69.2% vs. 59.7%, 88.5% vs. 66.9%, 80.8% vs. 71.0%, and 59.2% vs. 47.9%; respectively) as shown in Table 1.

**Table 1  
 Demographics**

Demographics	Response	State		Region 3B	
		%	#	%	#
Age	18-64 years old	40.3	242	30.8	8
	65+ years old	59.7	359	69.2	18
Gender	Female	66.9	402	88.5	23
	Male	33.1	199	s	3
Education Level	High School or Less	56.6	328	60.0	15
	Some College or More	43.4	252	40.0	10
Race	White	71.0	427	80.8	21
	Black	18.8	113	19.2	5
	Hispanic	3.0	18	-	0
	Other	5.2	31	-	0
	Unknown	2.0	12	-	0
Overall Health	Scale from 1-100	59.5	595	60.8	26
Mental Health	Scale from 1-100	47.9	587	59.2	25

*'s' indicated suppressed due to cell size less than 5.*

## Results

The CAHPS survey asks 46 questions which can be grouped into 11 domains of objective and actionable information for quality improvement. These domains address issues such as unmet need, physical safety, helpfulness of the case manager, the quality of the patient-caregiver relationship, and the respondent’s feelings of self-determination. CAHPS domain results are presented in Table 2.

Region 3B Area Agency on Aging scored at noticeably lower than the state average on Case Manger is Helpful (88.9% vs. 94.5%) but noticeably higher on Choosing Services that Matter to You (96.4% vs. 90.9%). The remaining CAHPS domains were within five-percentage points of the state average.

**Table 2**  
**2019 MI Choice Enrollee Satisfaction Survey**

Category	Question	State Percent n=601	Region 3B Percent n=26
<b>Global Ratings Measures</b>	<b>Category Score</b>	<b>92.0</b>	<b>91.1</b>
