

MiTracking gathers existing Michigan environmental, health and population data. This data are available in one online location through the MiTrackingData Portal. The website hosts information and resources about each data topic.

The Data Portal makes it easy to find data at the state, county and sometimes local levels. Data are displayed in tables, charts and maps. You can download, save and print these data visualizations.

Everyone, from community members to public health professionals to students, can easily run MiTracking data searches. With these tools, MiTracking can help all Michiganders explore how the environment may impact health.

Michigan is part of the Centers for Disease Control and Prevention's (CDC) National Environmental Public Health Tracking Program. The CDC Tracking Program is a system of integrated health, exposure and hazard data from national, state and local sources.

For information about the CDC Tracking Program and additional Michigan and nationwide data, visit [CDC.gov/Environmental-Health-Tracking](https://www.cdc.gov/Environmental-Health-Tracking).

What types of data are available?

ENVIRONMENT

- Air Quality
- Animals and Bugs (Rabies, Ticks)
- Climate Change
- Community Public Drinking Water

HEALTH

- Asthma
- Birth Defects
- Cancer
- Carbon Monoxide Poisoning
- COPD
- Drug Poisoning (Overdose)
- Heart Attacks
- Heat Illness
- Lead Exposure
- Pesticide Illnesses and Injuries
- Reproductive and Birth Outcomes
- Work-related Illnesses and Injuries

POPULATION

- Age of Housing
- Population Characteristics (Demographics)

The MiTracking Program will continue to add data and information.

What can you do with MiTracking?

Find information on environmental hazards, health conditions and population demographics.

Search for data by various geographic levels within Michigan.

Select and download customized tables, charts and maps.

Discover trends and measure progress over time.

Compare data across race, age and gender for some measures.

Create greater awareness of environmental health concerns in communities.

Use the data to inform research, programs, policies and grant applications.
