**Subject: Update on Guidance for Moderna COVID-19 Vaccine**

Good Morning Immunization Partners,

The Division of Immunization would like to share specific Moderna COVID-19 vaccine documents to address important topics such as booster guidance, documentation, storage and handling, inventory reporting, and waste reporting.

The attached document titled "[Moderna Booster Key Points](#)" is a summary of the Emergency Use Authorization (EUA) for Moderna, along with recent CDC guidance on waste reporting.

Moderna has developed a [healthcare provider letter](#) which is attached and hyperlinked in the Moderna Booster Key Points Summary.

Lastly, CDC released guidance on to help determine the amount of waste that may be reported in vials of Moderna-14 or Moderna-10 when administering a combination of primary (0.5mL) and booster (0.25 mL) doses. That guidance is attached and titled "[Moderna 14 and 10 Booster Wastage Tables](#)".

Thank you for all your hard work to protect Michiganders from vaccine-preventable diseases!

The Immunization Nurse Education Team,

Andrea, Dianne, Heidi, Maria, Sarah, and Terri
