

Community Information Exchange June Meeting Summary

On Thursday, June 15th, 2023, the Michigan Department of Health and Human Services (MDHHS), with the support of the Michigan Public Health Institute (MPHI) and Open Referral Initiative, convened the ninth Community Information Exchange Task Force meeting. Members of the task force include representatives from community-based organizations (CBOs), health care organizations, health payers, health IT, consumers, and government entities.

At the June CIE Task Force meeting, the task force discussed guidelines for potential pilot scenarios and defining success for each set of the final recommendations. The Task Force broke into small, rotating groups to envision what success would look like in each of the identified areas for key statewide CIE capacities.

The group will spend their final meeting in July reviewing a draft version of the final report.

The CIE Task Force final report will be published in late summer of 2023 following the final Task Force meeting in July.

The task force meets the third Thursday of each month through at least July of 2023.

About CIE: The Community Information Exchange (CIE) is a localized effort to create and sustain the technology and relationships required to support the social needs of both individual and community. CIE maximizes a person-centered approach by ensuring social care information is collected only as needed and is stored safely. CIE also promotes streamlined access to health enhancing non-clinical services (e.g., social services and supports), helping to coordinate care across a variety of clinical and non-clinical partners, while using data on existing community resources, needs, and gaps to drive policy change.
