

Community Information Exchange May Meeting Summary

On Thursday, May 18th, 2023, the Michigan Department of Health and Human Services (MDHHS), with the support of the Michigan Public Health Institute (MPHI) and Open Referral Initiative, convened the eighth Community Information Exchange Task Force meeting. Members of the task force include representatives from community-based organizations (CBOs), health care organizations, health payers, health IT, consumers, and government entities.

At the May CIE Task Force meeting, the task force focused on developing final recommendations for CIE capacities. The Task Force reviewed draft recommendations regarding longitudinal data, coordinating entities, legal and ethical frameworks, resource directories, and technical elements.

The group spent the remainder of the May meeting working toward developing recommendations around governance and sustainability for CIE. To explore sustainability, the Task Force reviewed existing funding streams and resources to support various elements of CIE. In break out groups, the CIE Task Force worked toward analyzing key elements of CIE governance through examining what structures would need to be in place to support the values and principles the group adopted earlier this year.

The CIE Task Force final report will be published in late summer of 2023 following the final Task Force meeting in June.

The task force meets the third Thursday of each month through at least July of 2023.

About CIE: The Community Information Exchange (CIE) is a localized effort to create and sustain the technology and relationships required to support the social needs of both individual and community. CIE maximizes a person-centered approach by ensuring social care information is collected only as needed and is stored safely. CIE also promotes streamlined access to health enhancing non-clinical services (e.g., social services and supports), helping to coordinate care across a variety of clinical and non-clinical partners, while using data on existing community resources, needs, and gaps to drive policy change.
