

## Monkeypox Vaccine and Therapeutics Provider Considerations for Approval

Michigan health care providers are an integral part of keeping our communities safe from the spread of monkeypox virus (MPV). Vaccine and therapeutics for MPV are considered a scarce resource and require sound management practices. Local health departments will work with selected providers prior to receiving vaccine and/or therapeutics. Before a provider is chosen to be an approved site, the following criteria shall be met:

### ➤ Eligibility

- Any clinical organization with providers licensed to administer vaccines and prescribe/dispense therapeutics is eligible to apply. Providers treating individuals living with HIV/STI or those serving high-risk populations, are especially encouraged to apply.

### ➤ Requirements

- Approval to receive and administer vaccine will be considered based on the following criteria:
  - Abide by the [HHS Monkeypox Vaccination Program Provider Agreement](#).
  - Submit [MDHHS JYNNEOS IIS Program Provider Addendum](#) with a physician's authorized signature.
  - Current [MI Care Improvement Registry \(MCIR\)](#) user with experience managing outbreak vaccine inventory.
  - Completion of all checklist items listed in the [MDHHS JYNNEOS Vaccine Operational Guide](#).
    - Prior experience with vaccine storage/handling.
    - Experience with Intra-Dermal (ID) administration.
    - Agree to an onsite vaccine storage/handling visit by the local health department to confirm vaccine management practices.
    - Agree to continuous vaccine quality assurance monitoring.
    - Redistribution of JYNNEOS vaccine is not allowed.
- Approval to receive and administer therapeutics will be considered based on the following criteria:
  - Comply with the CDC health care provider reporting requirements: [CDC Guidance for Tecovirimat Use Under Expanded Access Investigational New Drug Protocol during U.S. Monkeypox Cases](#).
  - Review and attest to submit [all required documentation](#) to the Centers for Disease Control and Prevention (CDC).
  - Current [MI Care Improvement Registry \(MCIR\)](#) user or willingness to report utilization and inventory through MCIR.
  - Redistribution of therapeutics is not allowed.
  -
