2026-27 COVID-19 Vaccine Recommendations

STAGES	RECOMMENDED GUIDANCE
Infants and Children	**All infants and children ages 6 months through 23 months and all children ages 2 years through 18 years with risk factors or whose parents would like them to be vaccinated.** Talk to your health care provider to determine the number of doses.
Pregnancy	**All pregnant individuals.*** One dose anytime during the pregnancy.
Adults 19 through 64	**All adults 19 through 64 years of age should receive one dose of the COVID-19 vaccine.*** Immunocompromised individuals should talk to the health care provider about recommended COVID-19 vaccination.
Adults 65 and older	**All adults 65 and older.*** Should receive two doses of the updated COVID-19 vaccine, with doses separated by 6 months.

*Health care personnel should receive updated COVID-19 vaccinations given their repeated occupational exposure and contact with patients at high risk of severe disease.

For more information on COVID-19 vaccines, including details about the 2026-27 Food and Drug Administration approval, visit Michigan.gov/COVIDFluRSV. The MDHHS COVID-19 vaccine guidance aligns with the guidance from the American Academy of Pediatrics, the American College of Obstetricians and Gynecologists and the American Academy of Family Physicians.

Individuals who have not received the 2026-27 COVID-19 vaccine and do not have a contraindication, may be considered high risk and eligible to receive an age-appropriate dose.

As a reminder, speak to your health care provider about all the vaccines that are recommended for you.
