

WHAT'S THE POINT?

THE BENEFITS OF SYRINGE SERVICES PROGRAMS

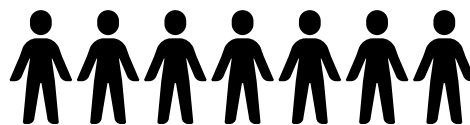

SSP 101

For more info, scan QR code above or visit: Michigan.gov/SSP

A syringe services program (SSP) is a community-based public health program that provides services to prevent unsafe drug use, HIV and viral hepatitis. SSPs save health care costs by preventing new infections.

People who use drugs and utilize a SSP are five times more likely to enter a drug treatment program than non-clients. SSPs benefit public health, public safety and communities. They do not increase drug use or crime.

WHO BENEFITS?

50%

Reduction in HIV incidence.

66%

Reduction of accidental needle sticks in law enforcement professionals.

50%

Reduction in hepatitis C incidence.

WHAT DO SSPS OFFER?
