

## MCSP NEWSBLAST: NAACCR Version 22

March 16, 2022

---

Submission of all reportable cancer incidence case reports from hospitals, independent laboratories, physician offices, dentists and clinic directors is **required by Michigan Compiled Laws and [Administrative Rules on Cancer Reporting](#)**. All reportable conditions must be reported **within 180 days from the date of initial diagnosis**. All reportable pre-invasive cervical (C53) lesions should be **submitted within 90 days from the date of initial diagnosis**. A copy of the MCSP Cancer Program Manual and reference materials, including “Case Definitions for Pre-Invasive Cervical Lesions (C53) is available at <http://www.michigan.gov/mcsp>

### **NAACCR FORMAT VERSION 22**

**Electronic file submission to MCSP thru Web Plus must be in the NAACCR format version as specified by MCSP, which is currently NAACCR format version 21 (v21) for cases diagnosed through year 2021.** Notification of when MCSP has upgraded to NAACCR format version 22 will be distributed via MCSP NEWSBLAST. Note: All reportable conditions for diagnosis year 2021 and missed case reports for earlier diagnosis years must be reported to MCSP in v21 before July of 2022 (exceptions will not be granted by MCSP for late reporting of cases).

If your facility uses proprietary software (i.e., METRIQ, OncoLog, CRStar), **do NOT upgrade to NAACCR Format Version 22 (v22) until all reportable conditions through diagnosis year 2021 have been submitted to MCSP through Web Plus in v21** (or MCSP has indicated via MCSP NEWSBLAST that it has upgraded to NAACCR format v22 and is able to receive electronic file submissions thru Web Plus in v22.).

**Note:** Facilities who use the online abstracting function in the MI Web Plus application can abstract diagnosis year 2022 case reports in Web Plus; however, case reports are to be held in pending until MCSP upgrade of Web Plus to NAACCR format version 22 is completed.
