Scheurer Hospital-Pigeon	Yes	IV
McLaren Thumb Region-Bad Axe	Yes	IV-Provisional
MyMichigan Health Gladwin-Gladwin	Yes	IV-Provisional
MyMichigan Health West Branch-West Branch	Yes	IV-Provisional

Injury Prevention

Objective: The Region 3 Trauma Network will collaborate to provide injury prevention programs in both inner city and rural locations based on the current needs of the region.

Progress: The Region 3 Trauma Injury Prevention Subcommittee has advocated for trauma centers to collaborate to provide injury prevention programs throughout the region. The group has connected injury prevention staff from different trauma centers that have worked together to provide injury prevention programs. The group shares responsibilities creating seasonal educational brochures and supplements that may be used by any of the trauma centers in the region.

Infrastructure

Objective: The Region 3 Trauma Network/RPSRO will develop a process to evaluate the effectiveness of the Trauma Triage and Destination criteria to ensure the transport of trauma patients to the appropriate trauma facility.

Progress: The Region 3 RPSRO and Trauma Triage and Destination Subcommittee has recently formed an ad hoc workgroup to complete this objective. The group has met and discussed which data elements from multiple data platforms that will be used to create a report capable of measuring system performance in relation to this objective. The group has additional meetings scheduled and will be presented with a draft report template to discuss. The region understands this to be an important part of monitoring system performance of its current trauma triage and destination criteria/protocol as well as any future modifications such as the recently published ACS field triage guidelines.

Continuum of Care

Objective: The Region 3 Trauma Network will establish a regional trauma rehabilitation subcommittee as the first step to developing a plan for the integration of rehabilitation services into the regional trauma system.

Progress: The Region 3 Trauma Rehabilitation Subcommittee has been formed. There has been a list of acute inpatient trauma rehabilitation services within the region. The region has shared a contact list of discharge planners/case management staff with BETP/MPHI staff that is conducting an environmental scan of trauma rehabilitation for the State of Michigan. The region has encouraged participation with this survey and has communicated some of the key informants to interview from the region. The group looks forward to reviewing the results of the BETP/MPHI environmental scan survey and key informant

interviews to share with regional stakeholders. The region will continue to interact with the maturing Michigan Trauma System with a goal of measuring functional outcome as a performance measure of the regional trauma system.

Administrative Rule Requirements:

- Yes No Quarterly meeting minutes on shared drive.
- Yes No All MCA's participating in the RTN.
- Yes No Performance improvement ongoing.
