

## Child and Adolescent Health Centers Program (CAHC) Fiduciary Requirements for Laboratory Set Up Content Relevant to: CAHC and SWP Models

Laboratory set up and function, in compliance with CLIA and any other requirements, is the responsibility of the fiduciary. This checklist includes Planning, Working Lab Preparation, Personnel Training/Competency, and Other Considerations to help organize your process. CAHC and SWP laboratory best practices are also included below to take into consideration in your start up process.

LAB PLANNING		
	Determine scope of lab services using target population/community data to inform space requirements for equipment, refrigeration, etc. and the testing procedures to be provided (storage for point-of-care tests, machines, controls) NOTE: At minimum, pregnancy testing and HIV testing (CAHC requirement)	
	Include lab space essentials when finalizing decisions on where the site space will be located NOTE: Consider space requirements for immunizations and/or other medications. Immunization storage and preparation often share laboratory space (immunization services a CAHC requirement MPR #1)	
	Include lab space essentials in construction/renovation of new/existing site	
	Budget for purchasing required equipment, supplies, testing materials, PPE, spill kit, etc.	
	Apply for appropriate CLIA license or certificate of waiver and/or add to fiduciary existing CLIA certificates	
	Appoint/designate a "Lab Director"	
For more information about CAHC and SWP requirements and best practices regarding LAB PLANNING, refer to:  • Laboratory Space Configuration and Storage Guidance (in Laboratory Services Toolkit)  • CLIA Application - CMS 116 CLIA Application  • CLIA Brochure - CMS Lab Director Responsibilities		

WORKING LAB PREPARATION		
	Develop lab policies & procedures (P&P):	
	General lab operation P&Ps	
	Consents for service (parent and minor)	
	Assemble a Lab Manual for the site defined as:	
	Point-of-care (POC) test manufacturer package inserts	
	Safety Data Sheet (SDS) for lab materials	
	CAHC and/or SWP standing orders specific to lab testing	
	Laboratory policy and procedure (i.e., send out tests)	
	Develop lab standing orders as appropriate for the site/model	
	Establish process for consultation on "out of normal" test results as needed	
	Develop methods/materials for all required documentation	
	Determine if/how point-of-care testing will be billed	
	Determine need for reference lab(s) to send out specimens and/or proficiency	
	testing	
	Contracts or agreements completed/consider confidential billing issues	
	Reference lab(s) materials/access/transport or pickup	
	Post CLIA license or certificate of waiver appropriate for testing conducted in lab	
	area	
For more information about CAHC and SWP requirements and best practices regarding		
WORKING LAB PREPARATION, refer to:		
CAHC Clinical Laboratory Requirements and Best Practice Considerations (in		
Laboratory Toolkit)		
Ready? Set? Test! Booklet Self-Assessment Checklist & Tips and Reminders		
MMWR Good Laboratory Practices		
• <u>Mi</u>	chigan Department of Health and Human Services (MDHHS) Lab Services	
	PERSONNEL TRAINING/COMPETENCY	
	Designated staff who will perform any/all lab functions receive training	
	Designated staff reach "competence" for each test performed on site and	
	annually	
	Designate an outside laboratory to complete proficiency testing for any moderate	
	complexity test desired (i.e., microscopy, KOH slides)	
	Designated staff are oriented to CAHC program lab requirements and testing	
	quality measures	
	Review Ready Set Test!	

For more information about PERSONNELTRAINING/COMPETENCY, refer to CMS: What Do I Need to Do to Assess Personnel Competency

OTHER LABORATORY CONSIDERATIONS  The components listed below are either CAHC and/or SWP program requirements and best practices. Ask your consultant for assistance and further guidance.		
	Clinic flow for testing process	
	Outside billing processes	
	Confidentiality of billing and results	
	Lab results populating in EHR	
	EHR and parent/guardian portal	
	Giving test results	
	What method?	
	<ul><li>When (consider "sensitive" point-of-care test)?</li></ul>	
	Maintaining confidentiality	
	Age-appropriate testing considerations	
	Resolving problems	
	Recall testing	
	CAHC Quarterly Reporting of Lab Services	
	Fiduciary oversight of lab processes	
	<ul> <li>Compliance with CLIA requirements</li> </ul>	
	<ul> <li>Compliance with OSHA requirements for waste disposal and safety</li> </ul>	
For more information about CAHC and SWP requirements and best practices regarding OTHER LABORATORY CONSIDERATIONS, refer to:  • CAHC Clinical Laboratory Requirements and Best Practice Considerations		
	(in Laboratory Services Toolkit)	
•	Laboratory Space Configuration and Storage Guidance (in Laboratory	
	Services Toolkit)	
•	CAHC Quarterly Reporting Element Definitions
