Training

Is there any PHD training? If so, when is offered?

Refresher training and full training will be offered on a yearly basis to assist users. These will be web-based training sessions that will provide users with the opportunity to attend without traveling to another location. Typically, these will occur in late fall or early winter. Training dates will be announced in advance. Additionally, a quick reference guide is available.

An informational e-mail subscription service has been established for users. This is intended to provide information that will alert users of updates and make data entry easier. Anyone within MDOT may subscribe to the listing. To subscribe, email the PHD administrator.

Is there PHD training specifically for consultants?

Yes, this is also offered at the same time as the refresher and full trainings. It is a specific training created for consultants and MDOT personnel who work with those consultants.
