

EB Blue Water Bridge CMGC – Request for Qualifications

Questions & Answers

01/17/2023

Question 1: In section 2.4 Prequalification of the RFQ, it requires the submitter to be N4 with Fa subclassification. Due to the structural repairs, analysis of the structure, and design/construction of the work platforms and containment, it would seem to make sense the Submitter should be Fa qualified with a N4 subclass. Can you confirm if this is acceptable?

A1: The Contractor qualifications are based on the construction cost estimate for work types. Based on the engineer's estimate, the primary classification is N4 and the subclassification is Fa as listed in the RFQ.
