

Selecting a Digital Signature Application

We offer three application options:

1. DocuSign Installed Software
2. DocuSign Web App
3. DocuSign Mobile App

1. DocuSign Installed Software

This is the most full-featured option. Software is installed on a user's computer that offers the fastest processing speed along with the ability to manage a wide range of signing functions and custom user configurations.

This is a good option if you plan on signing many documents.

2. DocuSign Web App

Sign documents easily and without installing software by using the web app.

Good option if you occasionally sign documents.

3. DocuSign Mobile App

Use the mobile app to easily sign documents with your smart phone or tablet.

The mobile app can be installed on Android or Apple iOS devices.

Good option if you sign documents on the go.
