GUIDANCE FOR DEVELOPING PROCESS DESCRIPTIONS

Generally, a properly designed accounting system consists of several accounting processes that collectively achieve the following:

- Proper segregation of costs.
- Identification and accumulation of direct costs by cost objective/contract.
- A logical consistent method for allocating indirect costs.
- Accumulation of costs in various subaccounts under general ledger control.
- Interim (e.g. monthly) determination of costs charged to a contract through routine posting to books of account.
- Exclusion of costs that are not allowable pursuant to the *Federal Acquisition Regulation*, Part 31 (a.k.a. *FAR* Part 31) or other contract provisions, from costs charged to government contracts.
- Identification of costs by appropriate business units, if required by the contract.

For the purpose of the Michigan Department of Transportation (MDOT) financial prequalification questionnaire, a properly documented accounting process includes, but is not limited to, the following attributes:

- A description of the process from initiation to reporting. For example, the process description for Direct Labor might start with an employee filling out a timesheet, include manager review, cost system recording, payroll functions, and end with an invoice. The process description should specifically include:
 - An identification of the risks of serious noncompliance associated with each process. For example, pertaining to Direct Labor, risks include, but are not limited to, a) wrong job number, b) inaccurate hourly rate, c) inaccurate number of hours worked, etc.
 - A description of the key/critical control procedures that reduce or eliminate the potential risks of serious noncompliance. For example, when preparing your invoices, describe a) the steps you take to ensure that the right job number is used, b) describe the steps you take to ensure that the accurate hourly rate is used, and c) describe the steps you take to ensure the accuracy of the number of hours charged.
 - A description of the steps that management takes to ensure that the controls described in the prior paragraph are actually working. Include a description of the documentation that is maintained to show management's efforts.

General Considerations:

It might be beneficial to consider the following risks when documenting the processes requested by MDOT throughout the Financial Prequalification Questionnaires.

1. Billing Process (including labor charging)

The largest single cost element for companies is normally labor. Tracking time, converting time charged to labor costs, and accounting for these costs are, therefore, major areas of concern to MDOT.

a. Example Risks:

- (1) Misstatement of payroll hours
- (2) Inappropriately allocating between direct labor and indirect labor
- (3) Misclassification of employees (e.g. reporting employees at an incorrect classification)
- (4) Charging to the incorrect job
- (5) Billing incorrect wage and salary rates

2. Direct & Indirect Costs

Correctly recording direct and indirect costs is another major concern for MDOT.

a. Example Risks:

- (1) Misallocating a direct cost as an indirect cost
- (2) Inappropriately and/or inaccurately allocating a direct cost to more than one project
- (3) Allocating indirect costs to final cost objectives that is inconsistent with stated company practices
- (4) Using adjusting journal entries to inappropriately reclassify indirect costs to direct costs.

3. Recording Allowable/Unallowable Costs

Unallowable costs and related directly associated costs need to be identified and excluded from billings, claims, or proposals for MDOT contracts. However, unallowable costs must participate in indirect cost allocations as if the unallowable costs were allowable; meaning, for example, the unallowable direct labor costs must remain in the direct labor base for the purpose of calculating an indirect cost rate. That is, all activities that benefit from the indirect cost, including unallowable activities, must receive an appropriate allocation of indirect costs.

Example Risks:

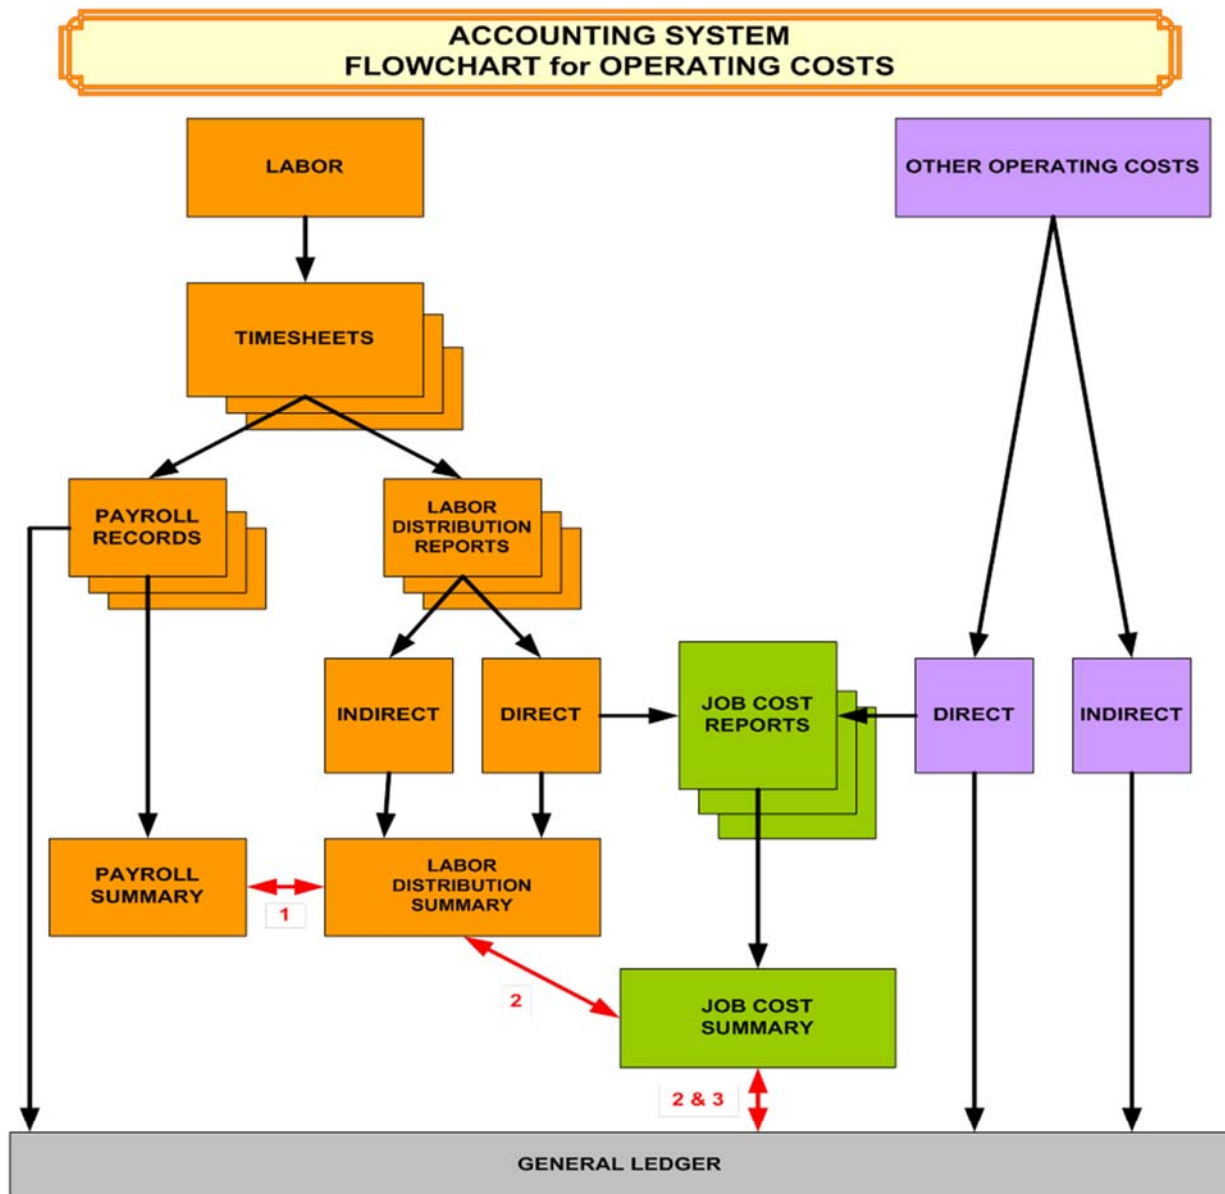

- (1) Billing unallowable costs
- (2) Including unallowable costs in indirect cost rate calculations
- (3) Including costs in direct billings and indirect cost rate calculations that are directly associated unallowable costs
- (4) Failure to allocate indirect costs to unallowable direct costs

The list below identifies costs that are generally ineligible for cost reimbursement on government contracts (either as direct or indirect costs). The list is not all-inclusive, but identifies many types of costs commonly incurred by companies.

Listing of Common Unallowable Costs With FAR Reference:

- 31.205-1 Advertising
- 31.205-1(f)(2) Trade Show Expenses

The following flowchart reflects the essentials of an accounting system for operating costs. Thorough and complete process descriptions, discussed above, will allow MDOT to assess the propriety and/or the effectiveness of the design of the consultant's internal control.

ESSENTIAL!! RECONCILIATION PROCEDURES:

1. Labor Distribution Summary Total equals Payroll Summary Total for labor
2. Direct labor on Labor Distribution Summary Report equals labor on Job Cost Summary Report which equals direct labor in General Ledger
