

<p style="text-align: center;">DESIGN AND CONSTRUCTION 6th Grade Math</p>	Code	Activity 1: How Much Traffic Can the Road Handle?	Activity 2: Not in My Backyard!!	Activity 3: How Much Does Land Cost?	Activity 4: Keep Me on the Road	Activity 5: Take the Short Way Home	
Numbers and Operations							
Multiply and divide fractions	N.MR						
Understand division of fractions as the inverse of multiplication.	N.MR.06.01						
Given an applied situation involving dividing fractions, write a mathematical statement to represent the situation.	N.FL.06.02						
Solve for the unknown in equations.	N.MR.06.03						
Multiply and divide any two fractions, including mixed numbers, fluently.	N.FL.06.04						
Represent rational numbers as fractions or decimals							
Order rational numbers and place them on the number line.	N.ME.06.05						
Represent rational numbers as fractions or terminating decimals when possible, and translate between these representations.	N.ME.06.06						
Understand that a fraction or a negative fraction is a quotient of two integers.	N.ME.06.07						

DESIGN AND CONSTRUCTION	Code	Activity 1: How Much Traffic Can the Road Handle?	Activity 2: Not in My Backyard!!	Activity 3: How Much Does Land Cost?	Activity 4: Keep Me on the Road	Activity 5: Take the Short Way Home	
Add and subtract integers and rational numbers							
Understand integer subtraction as the inverse of integer addition. Understand integer division as the inverse of integer multiplication.*	N.MR.06.08						
Add and multiply integers between -10 and 10; subtract and divide integers using the related facts. Use the number line and chip models for addition and subtraction.*	N.FL.06.09						
Add, subtract, multiply and divide positive rational numbers fluently.	N.FL.06.10						
Find equivalent ratios							
Find equivalent ratios by scaling up or scaling down.	N.ME.06.11						
Solve decimal, percentage and rational number problems							
Calculate part of a number given the percentage and the number.	N.FL.06.12						
Solve contextual problems involving percentages such as sales taxes and tips.*	N.MR.06.13						
For applied situations, estimate the answers to calculations involving operations with rational numbers.	N.FL.06.14						
DESIGN AND CONSTRUCTION	Code	Activity 1: How Much Traffic Can the Road Handle?	Activity 2: Not in My Backyard!!	Activity 3: How Much Does Land Cost?	Activity 4: Keep Me on the Road	Activity 5: Take the Short Way Home	

Solve applied problems that use the four operations with appropriate decimal numbers.	N.FL.06.15						
Use exponents							
Understand and use integer exponents, excluding powers of negative bases; express numbers in scientific notation.*	N.ME.06.16						
Understand rational numbers and their location on the number line							
Locate negative rational numbers (including integers) on the number line; know that numbers and their negatives add to 0, and are on opposite sides and at equal distance from 0 on a number line.	N.ME.06.17						
Understand that rational numbers are quotients of integers (non zero denominators), e.g., a rational number is either a fraction or a negative fraction.	N.ME.06.18						
Understand that 0 is an integer that is neither negative nor positive.	N.ME.06.19						
Know that the absolute value of a number is the value of the number ignoring the sign; or is the distance of the number from 0.	N.ME.06.20						
DESIGN AND CONSTRUCTION	Code	Activity 1: How Much Traffic Can the Road Handle?	Activity 2: Not in My Backyard!!	Activity 3: How Much Does Land Cost?	Activity 4: Keep Me on the Road	Activity 5: Take the Short Way Home	
ALGEBRA							
Calculate rates							
Solve applied problems involving rates, including speed.	A.PA.06.01						
Understand the coordinate plane							

Plot ordered pairs of integers and use ordered pairs of integers to identify points in all four quadrants of the coordinate plane.	A.RP.06.02						
Use variables, write expressions and equations, and combine like terms							
Use letters, with units, to represent quantities in a variety of contexts, e.g., v lbs., k minutes, x cookies.	A.FO.06.03						
Distinguish between an algebraic expression and an equation.	A.FO.06.04						
Use standard conventions for writing algebraic expressions	A.FO.06.05						
Represent information given in words using algebraic expressions and equations.	A.FO.06.06						
Simplify expressions of the first degree by combining like terms, and evaluate using specific values.	A.FO.06.07						
DESIGN AND CONSTRUCTION	Code	Activity 1: How Much Traffic Can the Road Handle?	Activity 2: Not in My Backyard!!	Activity 3: How Much Does Land Cost?	Activity 4: Keep Me on the Road	Activity 5: Take the Short Way Home	
Represent linear functions using tables, equations, and graphs							
Understand that relationships between quantities can be suggested by graphs and tables	A.RP.06.08						
Solve problems involving linear functions whose input values are integers; write the equation; graph the resulting ordered pairs of integers, e.g., given c chairs, the “leg function” is $4c$; if you have 5 chairs, how many legs?; if you have 12 legs, how many chairs?*	A.PA.06.09						

Represent simple relationships between quantities using verbal descriptions, formulas or equations, tables, and graphs, e.g., perimeter-side relationship for a square, distance-time graphs, and conversions such as feet to inches.	A.RP.06.10						
Solve equations							
Relate simple linear equations with integer coefficients, e.g., $3x = 8$ or $x + 5 = 10$, to particular contexts and solve.*	A.FO.06.11						
Understand that adding or subtracting the same number to both sides of an equation creates a new equation that has the same solution.	A.FO.06.12						
DESIGN AND CONSTRUCTION	Code	Activity 1: How Much Traffic Can the Road Handle?	Activity 2: Not in My Backyard!!	Activity 3: How Much Does Land Cost?	Activity 4: Keep Me on the Road	Activity 5: Take the Short Way Home	
Understand that multiplying or dividing both sides of an equation by the same non-zero number creates a new equation that has the same solutions.	A.FO.06.13						
Solve equations of the form $ax + b = c$, e.g., $3x + 8 = 15$ by hand for positive integer coefficients less than 20, use calculators otherwise, and interpret the results.	A.FO.06.14						
MEASUREMENT							
Convert within measurement systems							
Convert between basic units of measurement within a single measurement system, e.g., square inches to square feet.	M.UN.06.01						
Find volume and surface area							
Draw patterns (of faces) for a cube and rectangular prism that, when cut, will cover the solid exactly (nets).	M.PS.06.02						

Compute the volume and surface area of cubes and rectangular prisms given the lengths of their sides, using formulas.	M.TE.06.03						
DESIGN AND CONSTRUCTION	Code	Activity 1: How Much Traffic Can the Road Handle?	Activity 2: Not in My Backyard!!	Activity 3: How Much Does Land Cost?	Activity 4: Keep Me on the Road	Activity 5: Take the Short Way Home	
GEOMETRY							
Understand and apply basic properties							
Understand and apply basic properties of lines, angles, and triangles, including:	G.GS.06.01						
Understand and apply basic properties of lines, angles, and triangles, including: <ul style="list-style-type: none"> • triangle inequality • relationships of vertical angles, complementary angles, supplementary angles • congruence of corresponding and alternate interior angles when parallel lines — are cut by a transversal, and that such congruencies imply parallel lines • locate interior and exterior angles of any triangle, and use the property that an exterior — angle of a triangle is equal to the sum of the remote (opposite) interior angles • know that the sum of the exterior angles of a convex polygon is 360°. 	G.GS.06.01						
Understand the concept of congruence and basic transformations							
Understand that for polygons, congruence means corresponding sides and angles have equal measures.	G.GS.06.02
