1.0 Introduction

The State Transportation Improvement Program (STIP) is a required four-year planning document that lists road, bridge, transportation alternatives and transit projects that the state intends to fund with federal aid provided under the Federal Aid Transportation Program in Fiscal Years (FY) 2026-2029. The primary purpose of this document is to provide information regarding the programs and projects to which state and local transportation agencies have committed resources to over the next four years. This document verifies that transportation revenues are available and sufficient to finance these improvements. This document gives the traveling public a better understanding of how improving roads they traverse on a daily basis come to fruition.

Who develops the STIP?

The transportation improvement projects reported in the STIP were selected through a coordinated effort by the Michigan Department of Transportation (MDOT), metropolitan planning organizations (MPOs), rural task forces (RTFs) and small urban committees. More details of this project selection process can be found in Chapter 3.

The STIP represents a multimodal list of projects for drivers, transit riders, bike riders and pedestrians. The project lists include improvements for roadways that MDOT owns and maintains on I, US and M-routes. Counties, cities, villages, and transit agencies develop a list of projects, in coordination with MDOT, which include safety improvements on roads, trails, sidewalks, bridges, and railways as well as capital and infrastructure for transit agencies. The planning process relies on the participation of state and local government officials, public and private transit providers, organizations representing the customers and providers of transportation in Michigan, and the general public.

How is the STIP developed?

The STIP is not a single report; it is comprised of 16 separate documents: 15 individual MPO transportation improvement programs (TIPs) and one statewide non-MPO STIP document. All projects within MPO boundaries, whether under the jurisdiction of MDOT or a local transportation agency, are listed in the relevant MPO TIPs and are governed by those documents. Each MPO TIP contains fiscal information for the projects listed in that TIP. MPO-approved TIPs, along with subsequent amendments, are available for review and comment at the respective MPOs throughout the state and are posted on their websites. The STIP lists only projects outside of the MPO

boundaries; however, it does contain fiscal information for the entire state. The TIPs are included in the STIP by reference.

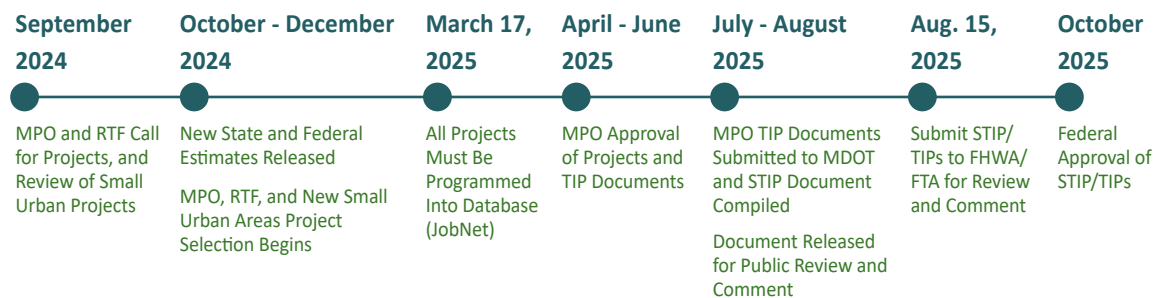

In addition to a listing of projects and programs, this report contains information on the federally mandated statewide and metropolitan transportation planning processes, MDOT's transportation goals, the public participation process for the STIP, and a fiscal plan that compares annual transportation revenues to commitments.

It takes several months of coordination to complete this document. Below is the timeline showing the coordination and timing of the development of MDOT's STIP:

MDOT's FY 2026-2029 STIP will serve as a four-year planning document for the state. The project list will be periodically updated through the amendment process. MDOT developed the FY 2026-2029 STIP in accordance with the Infrastructure Investment and Jobs Act (IIJA) as described in Code of Federal Regulations Title 23 Part 450, and additional applicable federal regulations.

Figure 1.1 STIP Program Timelines

Calendar years 2024-2025

How can someone get involved?

Michigan offers many opportunities to provide input throughout the development of this document because MDOT's mission of "serving and connecting people, communities and the economy through transportation" can only be accomplished when interested parties and the public are identified and brought into the planning process. The development of this document is a key time in which to participate before construction begins. Visit www.Michigan.gov/STIP to review and comment on the draft during the comment period, and to view the 2026-2029 Public Participation Plan. Contact your area's MPO, RTF, small urban committee, county road commission or city official to participate in a

1.0 Introduction, continued

regional transportation meeting. Web links to these organizations and other resource information can be found in Appendix B.

Tribal land TIP and Eastern Federal Lands Highway Division projects

For transportation planning within Tribal lands, FHWA works with Tribal Governments to develop the Federal Highway Administration Tribal Transportation Program (TTP). This document is developed separately from the STIP and the MPO TIPs. The TTP is included in the STIP by reference. The Tribal Transportation Program Transportation

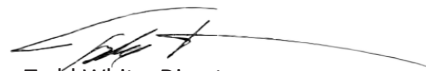

Improvement Program (TTPTIP) and the associated projects for Michigan can be found on MDOT's STIP website - [TTP-STIP-Michigan.pdf](#).

The Eastern Federal Lands Highway Division (EFLHD) of FHWA develops and manages the Federal Access Lands Program (FLAP) program to provide transportation access to and through Federal Lands. The FLAP program supplements state and local resources for public roads, transit systems, and other transportation facilities. The FLAP projects are listed in the appropriate STIP or MPO TIP document. The FLAP list of projects can also be found on MDOT's website - [FY25-FY28 EFL TIP - FINAL.xlsx](#).

2.0 Certification

In accordance with 23 CFR 450.218 - Development and Content of the STIP, MDOT hereby certifies that the statewide transportation planning process is being carried out in accordance with all applicable requirements of:

- 1) 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304.
- 2) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR Part 21.
- 3) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity.
- 4) Section 11101(e) of the Infrastructure Investment and Jobs Act (IIJA) and 49 CFR Part 26 regarding the involvement of disadvantaged business enterprises in U.S. Department of Transportation-funded projects.
- 5) 23 CFR part 230, regarding implementation of an equal employment opportunity program on federal and federal-aid highway construction contracts.
- 6) 23 CFR part 490, National Performance Management Measures.
- 7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR Parts 27, 37, and 38.
- 8) Applicable to nonattainment and maintenance areas in the state, Sections 174 and 176(c) and (d) of the Clean Air Act, as amended (42 U.S.C 7504 and 7506(c) and (d)) and 40 CFR parts 51.390 and part 93 and the South Coast II decision.
- 9) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving federal financial assistance.
- 10) Section 324 of Title 23 U.S.C., regarding the prohibition of discrimination based on gender.
- 11) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR Part 27 regarding discrimination against individuals with disabilities.

Todd White, Director

Bureau of Transportation Planning Michigan Department of Transportation

Date: 8/11/2025

3.1 The Planning Process Under 23 U.S.C.

The statewide planning process under 23 U.S.C. Section 134 requires each state to carry out a continuing, cooperative and comprehensive statewide multimodal transportation planning process. This includes the development of a state long-range transportation plan (SLRTP) and a STIP.

It is important to define the statewide transportation planning process and required documents for the state of Michigan. This statewide transportation planning process is multi-layered and responsive to both state and federal requirements as illustrated in the chart below.

implementation, MDOT has integrated the TAMP into its planning processes such that it informs project selection for the 5YTP and the STIP.

Once the statewide goals, objectives, strategies and policies are established, then MDOT will issue a call for projects. This is a process where MDOT receives and reviews applications for trunkline capital projects. Once selected, those projects are then included in both the 5YTP and the STIP.

The [5YTP](#) includes information about MDOT's near-term funding picture and transportation projects on the trunkline system that will start construction within the next five years. It provides the foundation for short-range planning and program development and is a rolling five-year program document, updated annually.

The Michigan planning process facilitates the safe and efficient management, operation and development of surface transportation systems that will serve the mobility needs of people and freight (including accessible pedestrian walkways and bicycle transportation facilities). It also fosters economic growth and development within and between states and urbanized areas while minimizing transportation-related fuel consumption and air pollution in all areas of the state, including those areas subject to the metropolitan transportation planning requirements of 23 U.S.C.134 and 49 U.S.C. 5303 (from 23 CFR 450.200).

Federal regulations 23 U.S.C. 134 and 135 require MDOT and Michigan's 15 MPOs to each develop

a long-range plan covering a minimum 20-year horizon that provides direction for development and implementation of multimodal transportation programs. The currently enacted SLRTP is the Michigan Mobility 2045: A Transportation Plan for a Connected Future (MM2045). MM2045 provides an overview of the findings and a high-level summary of the current assessment of key trends, demographic changes, initiatives and policies that will guide the selection of transportation projects between now and 2045.

Planning and Program Development Process

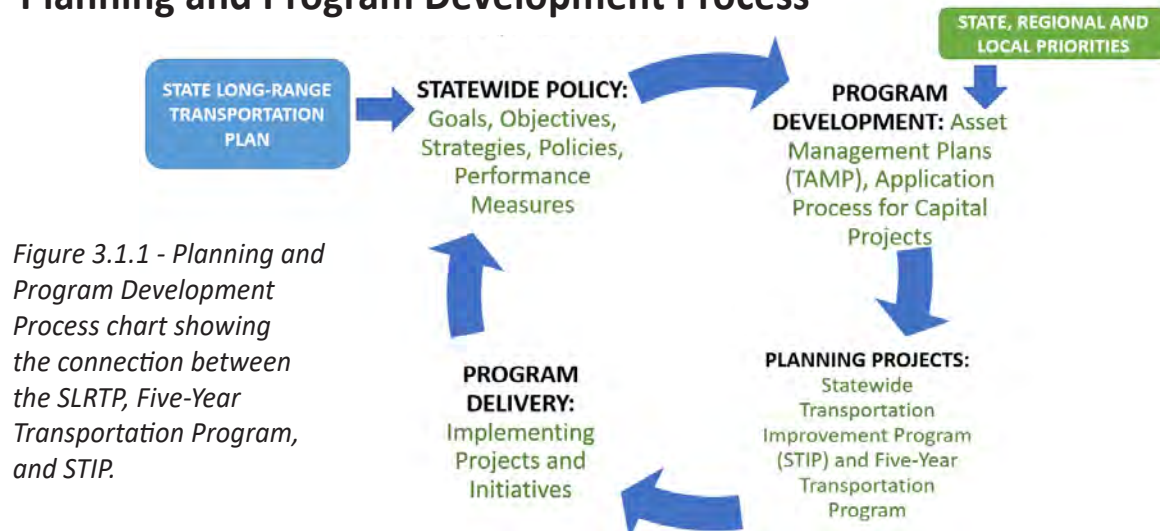

Figure 3.1.1 - Planning and Program Development Process chart showing the connection between the SLRTP, Five-Year Transportation Program, and STIP.

The [SLRTP](#) covers a 25-year planning horizon for the development and implementation of a multimodal transportation system. The SLRTP serves as a policy document that establishes a vision and associated priorities for transportation in Michigan, and provides the analysis needed to make decisions about the future.

The [Transportation Asset Management Plan \(TAMP\)](#) describes the asset management processes by which MDOT makes its program and project decisions for pavements and bridges on the National Highway System (NHS), using national performance measures linked to systemwide investment strategies. To ensure

FY 2026-2029 State Transportation Improvement Program

M-30 bridge project over the Tobacco River in Gladwin County.

3.1 The Planning Process Under 23 U.S.C., continued

The STIP is required by federal law to:

- Be consistent with the SLRTP.
- Cover a planning horizon of four years.
- Provide opportunities for public involvement.
- Meet air quality conformity regulations.
- Be fiscally constrained by year. This is done by providing fiscal information to show that the total estimated revenues are sufficient to meet or exceed the total proposed commitments, based on project estimates, by each fiscal year. The expected revenues and expenditures are listed in the Financial Chapter.

The STIP, with its associated MPO TIPs, is a culmination of multiple transportation planning processes. The projects selected for the STIP and TIPs are the result of the needs and policies identified in the SLRTP, the MDOT Five-Year Transportation Program, and each MPO's long-range plan. This STIP covers FY 2026-2029 and will include by reference the FY 2026-2029 TIPs prepared by each MPO.

3.2 State Long-Range Transportation Plan 2045

Michigan Mobility 2045 (MM2045) is the SLRTP for Michigan and provides the foundation for long-range transportation planning and policy for MDOT and Michigan. MM2045 provides the Vision, Guiding Principles, Goals, Objectives, and Strategies for developing a multimodal transportation system that serves the traveling public throughout Michigan for the next 25 years. The projects included in this STIP document follow the directions outlined in the plan.

MM2045 provides an assessment of state transportation existing conditions and inventory, revenues, needs and gaps under current

revenue trends. MM2045 takes into consideration continued population growth, demographic shifts and associated travel pattern changes, land use changes, employment growth, the shift to a service economy, impacts of immigration, freight community trends and needs, rail, aviation and marine transportation trends and needs, and the demand for public transit services.

MM2045 is a "family of plans" that fully integrates the state freight plan, the state rail plan, Michigan's first statewide active transportation plan, and a statewide transit strategy into the SLRTP. It provides the

long-term direction for the future of multimodal transportation for all of Michigan and serves as the umbrella of transportation plans and programs in Michigan. It provides long-term strategic direction on the transportation strategic investment decisions and the selection and prioritization of programs and projects.

MM2045 Vision

“In 2045, Michigan’s mobility network is safe, efficient, future-driven, and adaptable. This interconnected multimodal system is people-focused, equitable, reliable, convenient for all users and enriches Michigan’s economic and societal vitality.

Through collaboration and innovation, Michigan will deliver a well-maintained and sustainably funded network where strategic investments are made in mobility options that improve quality of life, support public health and promote resiliency.”

Guiding Principles

1. **Preservation:** Preserve, operate, enhance and right-size the existing multimodal network as efficiently and effectively as possible, build and manage it to withstand and recover rapidly from disruptions, and maintain a network that provides for predictable access, movement and interconnectivity.
2. **Modal Choice:** Build, maintain and operate a multimodal mobility network for all users that is safe, adapts to new demographic, economic and technological conditions, equitably distributes costs and benefits, responds to the public’s demand for more modal choices and strengthens economic opportunity with high-quality access to jobs, to commerce and between economic centers in and out of Michigan.
3. **Future-Oriented:** Protect mobility investments by pursuing and planning for emerging trends, embracing technology, seeking flexible and diversified funding and financing tools to strengthen cross-jurisdiction and multidisciplinary partnerships, and pursue innovation in every aspect of transportation.
4. **Sustainable Communities:** Foster livable, healthy and connected communities with convenient, multimodal access to jobs, services, social support, and activities by facilitating the safe and convenient movement of all people regardless of age, income, race or ability, providing strong intermodal connections, and engaging in health-promoting projects and policies that support clean air and clean water.

MM2045 Goals and Objectives by Goal Area

1. **Safety and Security:** Enhance the safety and ensure the security of the transportation network for all users and workers.
 - a. Reduce the number of lives lost and injuries sustained on Michigan’s transportation network, striving for zero.
 - b. Foster a community and workplace culture of safety first.
 - c. Reduce vulnerability from various threats; protect physical assets, cyber assets and transportation systems.
 - d. Prepare for and implement efficient coordinated response and recovery to emergency and disaster events.
2. **Network Condition:** Through investment strategies and innovation, preserve and improve the condition of Michigan’s transportation network so that all modes are reliable, resilient and adaptable.
 - a. Achieve and maintain a state of good repair of transportation assets within the limitations of available resources.
 - b. Cost-effectively maintain, operate and upgrade assets to maximize the useful life.
 - c. Incorporate resiliency, adaptability and redundancy in the transportation network, systems management and operations.
3. **Mobility:** Enhance mobility choices for all users of the transportation network through efficient and effective operations and reliable multimodal opportunities.
 - a. Improve access and connectivity between modes.
 - b. Provide accessible and equitable modal options for the movement of people.
 - c. Mitigate travel delays and alleviate congestion to provide predictable, reliable travel times.
 - d. Leverage technology, communications and management strategies to maximize safety and operational efficiency of existing systems.
 - e. Identify redundancy gaps in the network to ensure continued mobility in the event of disaster or other interruption.

3.2 State Long-Range Transportation Plan 2045, continued

4. Quality of Life: Enhance quality of life for all communities and users of the transportation network.
 - a. Create opportunities for safe physical activity, equitable transportation choice and community engagement.
 - b. Plan, develop and maintain transportation facilities in a manner that protects the natural, historic and cultural environment and avoids or minimizes adverse impacts.
 - c. Pursue community supportive transportation outcomes.
 - d. Strive for cleaner, more efficient and sustainable energy sources for transportation operations and facilities.
 5. Economy and Stewardship: Improve the movement of people and goods to attract and sustain diverse economic opportunities while investing resources responsibly.
 - a. Pursue transportation assets and operational improvements that will expand access to economic opportunities, jobs and core services.
 - b. Improve transportation connectivity to established and emerging activity centers and tourist destinations.
 - c. Create and enlarge competitive advantage for Michigan supply chains through higher productivity and dependability in the state freight system, supporting economic growth and strengthening economic resilience.
 - d. Coordinate transportation systems with land use for efficient and sustainable use of resources.
 6. Partnership: Strengthen, expand and promote collaboration with all users through effective public and private partnerships that reflect Michigan's diversity, equity and inclusion principles.
 - a. Ensure key transportation data is collected, maintained, usable and accessible to transportation partners and the public.
 - b. Use performance measurement to inform decision-making and show progress toward local, regional, state and national goals.
 - c. Strengthen collaborative partnerships between public and private sectors and leverage diverse investment opportunities.
 - d. Strengthen coordination of transportation facilities and services between agencies and municipalities.
 - e. Strengthen community engagement and open decision-making processes offered through a combination of inclusive traditional and innovative methods.
 - f. Ensure decision-making processes and public outreach are representative, responsive, transparent and accountable.
- MM2045 developed approximately 30 strategies that fall under the following eight categories:
1. Prioritizing Safety
 2. Managing Resources Responsibly
 3. Providing Accessibility and Mobility For All
 4. Supporting Michigan's Health
 5. Building Resilience
 6. Working Together
 7. Technology
 8. Economic Vitality
- Details on each of the strategies can be found in the MM2045 document at: www.Michigan.gov/MDOT/Programs/Planning/SLRP.
- This plan reflects changes in priorities, legislation and advancements in new technologies. It follows a strategic multimodal corridor approach to identifying priorities and building partnerships to achieve the vision and goals of the plan.
- Extensive public and stakeholder engagement was held over three years to inform MDOT, its partners and the citizens of Michigan on the priorities for transportation, along with their ideas for strategic direction. Through three rounds of public/stakeholder engagement, more than 14,000 participants, citizens and stakeholders provided

input on the direction of this plan through a myriad of options: online surveys, attendance at public meetings or workshops, telephone town hall meetings, social

media feeds and other in-person or virtual options. Information on the final plan is available at www.Michigan.gov/MDOT/Programs/Planning/SLRP.

3.3 Five-Year Transportation Program

The MDOT 5YTP is a state-required document that presents a high-level overview of planned investments in transportation programs and projects over a five-year period. Produced annually since 1999, each 5YTP overlaps across a four-year interval, while adding a fifth year of projects, providing a foundation upon which to build the STIP.

For more than 25 years, the 5YTP has served as an important internal and external communication tool, providing the public and stakeholders with the opportunity to engage in discussions about upcoming road and bridge projects and planned investments in Michigan's transportation

infrastructure. The 5YTP covers all components of the transportation network for which MDOT is responsible, including highways, bridges, bus, rail, aviation, marine and active (nonmotorized) transportation. The investment strategies for each area are established in consistency with the SLRTP and State Transportation Commission (STC) goals, ensuring a comprehensive approach to decision-making that prioritizes preservation of the transportation network and providing a safe and connected system for Michigan's citizens.

The key steps in the current development process of the 5YTP are reflected in the included diagram. Each year, a new 5YTP is developed and approved by the STC. In the process of creating this document, MDOT engages transportation partners, interested parties and the public on projects anticipated for construction over the next five years, key performance measures, investment and revenue projections,

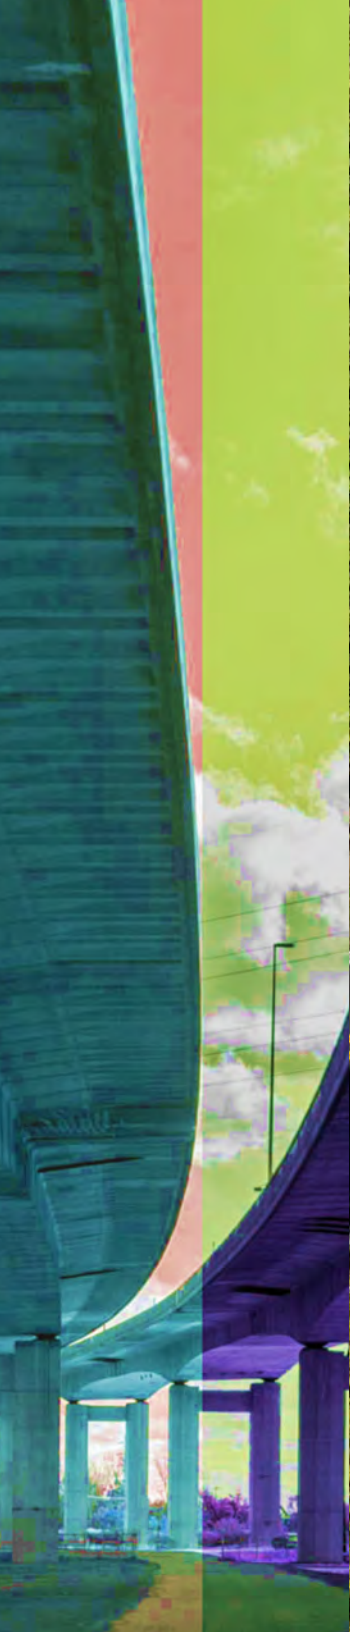

and process and policy updates that impact program development. During this STIP update, the 2026-2030 5YTP is being developed, with an expected approval date of Nov. 6, 2025, and will include updates on the transition to an expanded planning horizon covering up to 10 years to help ensure a more strategic alignment between resources and the goals and objectives of the SLRTP. Updates on progress with these efforts will be communicated as the process continues to evolve over the next two 5YTP development cycles.

For more information, including an interactive map of planned projects, please visit www.Michigan.gov/MDOT5YearProgram.

Figure 3.3.1 5YTP Development Process

The development of the Five-Year Transportation Program is yearlong, rolling, multi-stage process.

3.4 Metropolitan Planning

In metropolitan areas with 50,000 residents or more, 23 U.S.C. 134 requires that MPOs be designated by agreement between the governor and all affected local governments in order “to carry out a continuing, cooperative, and comprehensive multimodal transportation planning process, including the development of a metropolitan transportation plan (MTP) and a transportation improvement program (TIP), that (a) encourages and promotes the safe and efficient development, management, and operation of surface transportation systems to serve the mobility needs of people and freight (including accessible pedestrian walkways and bicycle transportation facilities) and foster economic growth and development, while minimizing transportation-related fuel consumption and air pollution; and (b) encourages continued development and improvement of metropolitan transportation planning processes guided by the planning factors set forth in 23 U.S.C. 134(h) and 49 U.S.C. 5303(h).” (From 23 CFR 450.300).

The MTP is the MPO’s long-range transportation plan document and it requires the analysis of transportation needs within their specific metropolitan planning area (MPA) in alignment with the plan’s vision, goals and objectives, and relevant federal requirements under 23 CFR 450. All currently planned federally funded and regionally significant projects must be identified, have fiscal constraint demonstrated and must meet air quality conformity requirements. The MTP must have a planning horizon of 20 years, be updated every five years (four years in air quality non-attainment areas) and be consistent with the statewide goals and objectives established in the SLRTP created by MDOT.

Each MPO is responsible for developing a four-year TIP document by working with city and county transportation agencies, local transit operators and state transportation officials within their designated areas. The MPO planning process is used to identify the MPO’s needs and prioritize projects within the metropolitan planning areas. As part of this process, each MPO is required to develop and implement a public involvement plan and process to ensure that the public and all interested parties shall be given a reasonable opportunity for comment on the TIP prior to federal approval of the original document and any amendments to the TIP. Each TIP lists all federal-aid and regionally significant road, street, highway and transit projects within its boundaries, whether under state or local jurisdiction. Any changes to the TIP project list, including adding projects, deleting projects or significant changes to projects already listed, requires an amendment to the TIP, requiring public involvement and federal approval. MPO TIPs are incorporated by reference into the STIP.

Michigan’s MPOs and primary census urbanized areas within those MPOs are identified below. Many smaller cities, towns and townships are also represented by the MPOs within their MPAs.

Table 3.4.1: MPOs and Primary Urbanized Areas in Michigan

MPO	Acronym	Urbanized Area(s)
Battle Creek Area Transportation Study	BCATS	Battle Creek
Bay City Area Transportation Study	BCATS	Bay City
Genesee County Metropolitan Alliance	GCMA	Flint
Grand Valley Metro Council	GVMC	Grand Rapids
Kalamazoo Area Transportation Study	KATS	Kalamazoo
Macatawa Area Coordinating Council	MACC	Holland
Midland Area Transportation Study	MATS	Midland
Region 2 Planning Commission	R2PC	Jackson
Saginaw Metropolitan Area Transportation Study	SMATS	Saginaw
Southeast Michigan Council of Governments	SEMGOG	Ann Arbor, Detroit, Port Huron, Monroe County, Brighton/Howell/ South Lyon, and Toledo, OH
Southwest MI Planning Commission	SWMPC	Niles, Buchanan, Cass
Traverse Transportation Coordination Initiative	TTCI	Traverse City
Tri-County Regional Planning Commission	TCRPC	Lansing
Twin Cities Area Transportation Study	TWINCATS	Benton Harbor-St. Joseph
West Michigan Metropolitan Transportation Planning Program	WestPlan	Muskegon, Grand Haven, and North Ottawa County

3.5 MDOT-MPO Cooperative Planning Process

MDOT and the state's MPOs are committed to the continuing, cooperative and comprehensive transportation planning process in Michigan. The goal of the process is to foster closer coordination in all aspects of the transportation plan and improvement program development process.

The process encourages teamwork and consensus-building to identify state and local transportation needs, evaluate proposed projects to address those needs, and utilize agreed-upon planning tools to reach a unified vision for the development of metropolitan transportation systems. The items listed below are factors to be considered in the overall planning process as originally established in the federal Transportation Equity Act for the 21st Century (TEA-21).

- 1) Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity and efficiency.
- 2) Increase safety of the transportation system for motorized and nonmotorized users.
- 3) Increase security of the transportation system for motorized and nonmotorized users.
- 4) Increase accessibility and mobility options available to people and for freight.
- 5) Protect and enhance the environment, promote energy conservation and improve quality of life.
- 6) Enhance the integration and connectivity of the transportation system across and between modes for people and freight.
- 7) Promote efficient system management and operations.
- 8) Emphasize preservation of the existing transportation system.
- 9) Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation.
- 10) Enhance travel and tourism.

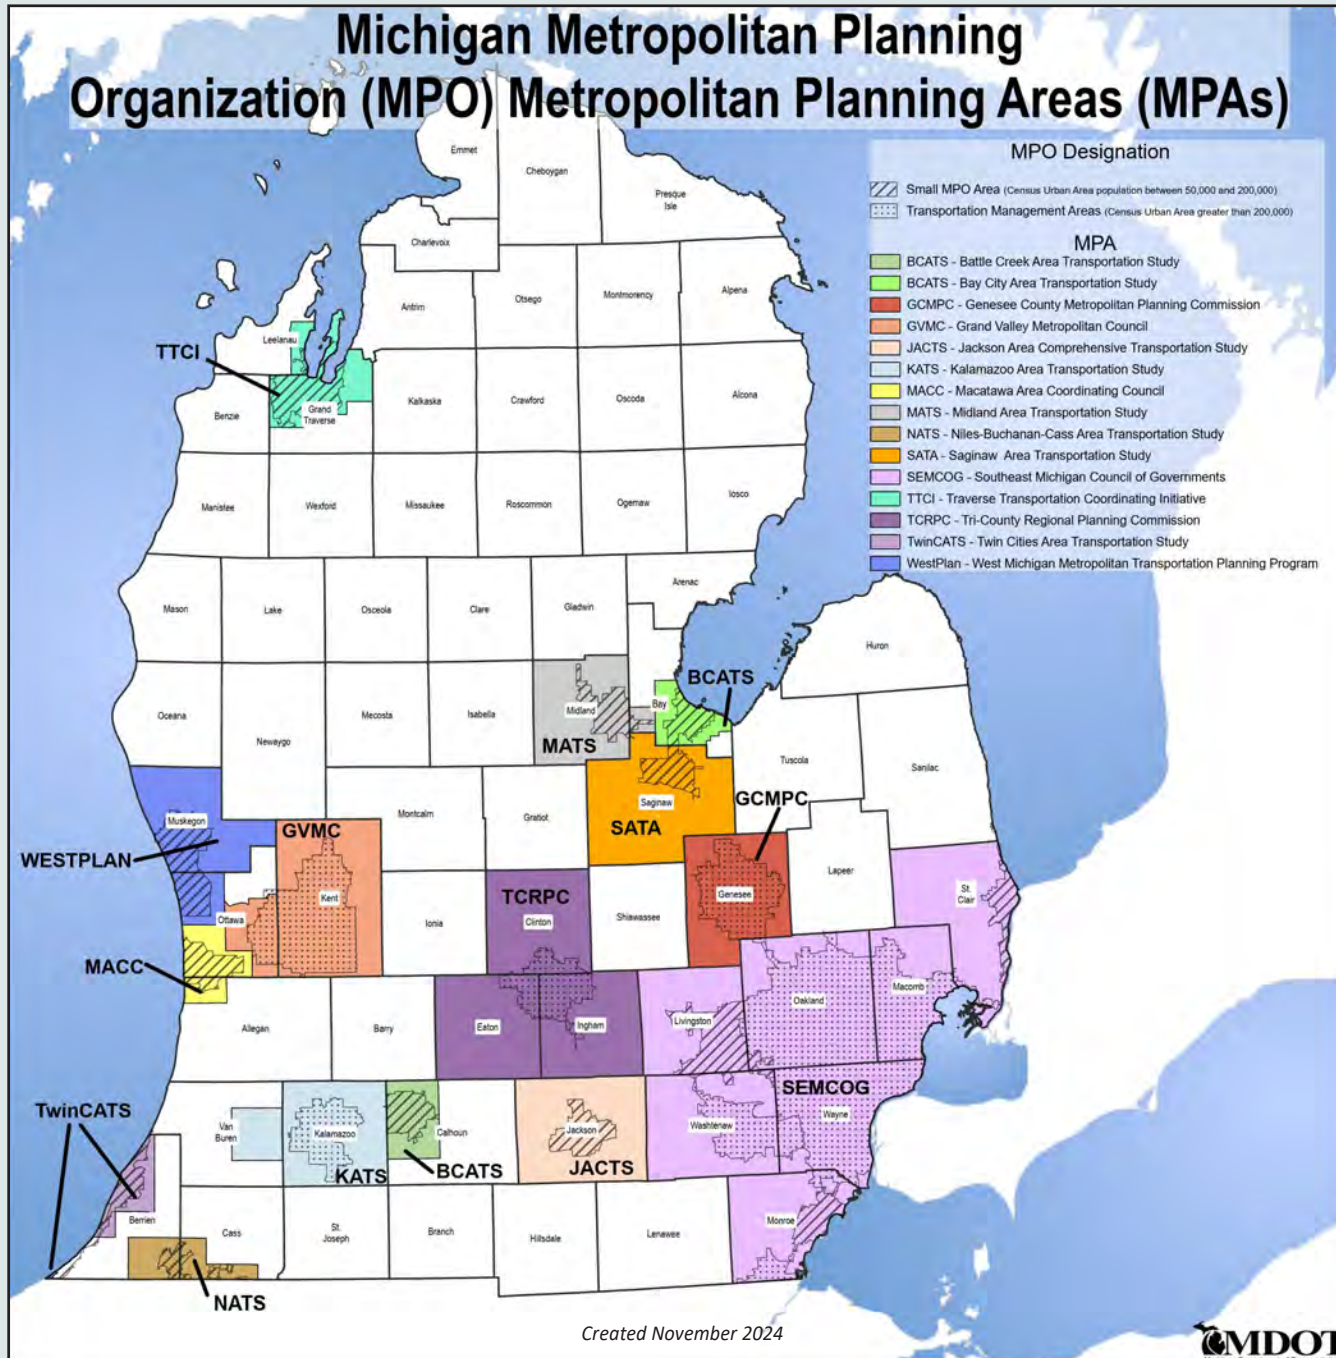

The federal Clean Air Act and Transportation Performance Measure (TPM) requirements must also be considered by the state and MPOs in the development of their transportation plans and programs.

Established in TEA-21, and unchanged in the Moving Ahead for Progress in the 21st Century Act (MAP-21), the Fixing America's Surface Transportation (FAST) Act, and the Infrastructure Investment and Jobs Act of 2021 (IIJA), is the requirement for MPOs to develop a documented public involvement plan and for the state to develop a documented public involvement process. The public involvement plan and process establishes that the public and all interested parties shall be given a reasonable opportunity to comment on the plan and be involved in the overall planning process.

Throughout this process, the MDOT Statewide Planning Section (SPS), MDOT region planners and the MPOs all work together to complete the federally required documents:

- The SPS provides guidance and oversight regarding federal and state transportation planning program requirements specifically related to the development of MPO core planning documents, including the MTP, the TIP, public involvement plans, federal Air Quality requirements, TPM requirements, federal and state program and project financial funding, etc.
- The SPS initiates the project approval process through the state JobNet system for the ultimate federal approval of federally funded projects.
- MDOT region planners provide coordination with local jurisdictions and planning agencies regarding proposed and current MDOT projects in their regions. They also provide guidance and oversight regarding federal and state planning requirements.

Map 3.5.1 - Michigan Metropolitan Planning Organization (MPO) Metropolitan Planning Areas (MPAs)

3.6 Rural Task Force Program

Local, federally funded transportation projects to be implemented in rural areas (areas outside of any adjusted census urban boundary (ACUB)) are selected by the applicable rural task force (RTF). The 22 RTFs represent the jurisdictions and agencies providing transportation services and include:

- Cities and villages with fewer than 5,000 residents,
- Rural transit providers,
- County road commissions/departments,
- MDOT, and
- Tribal governments, where appropriate.

Each RTF receives staff support from one of Michigan's 14 regional planning agencies (RPAs). Some of the activities the RPAs provide include:

- RPA staff communicating all MDOT correspondence to their respective RTF members,
- Scheduling, ensuring public participation and hosting county and regional RTF meetings, and
- Programming projects selected by the regional RTF committees and ensuring the RTF is fiscally constrained.

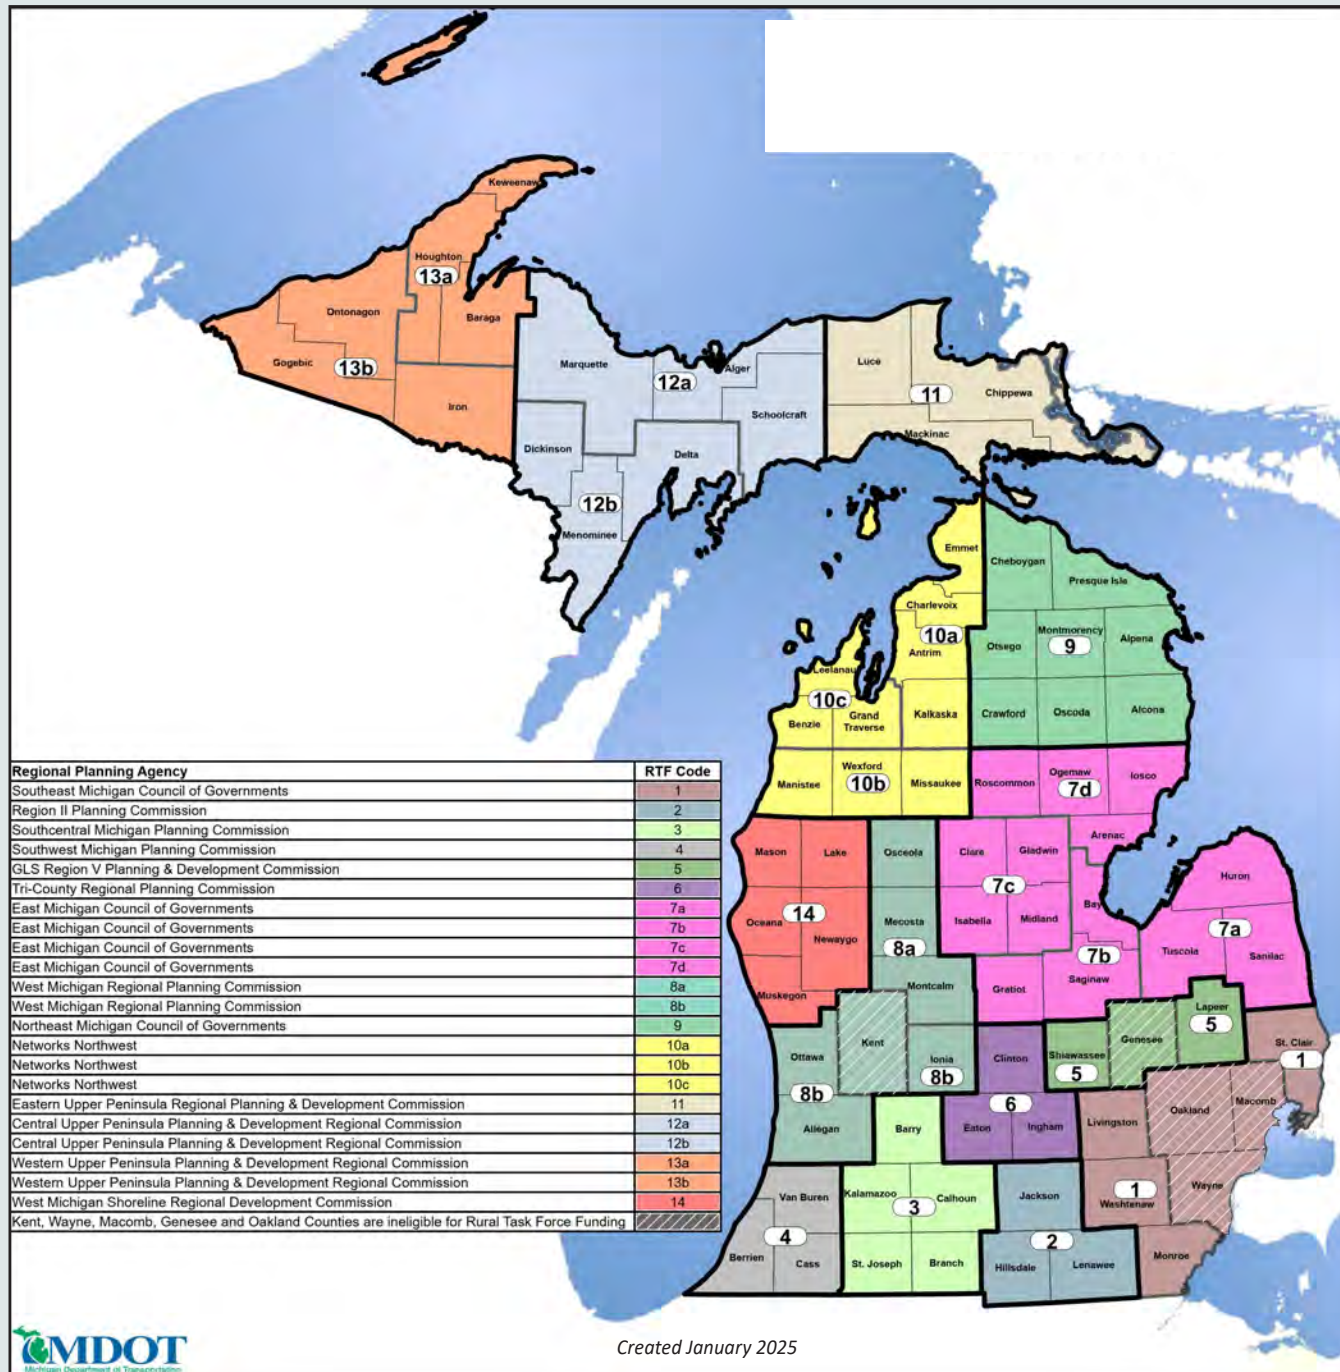

RTF funding levels for the federal Surface Transportation Block

Grant (STBG) Program are based on formulas agreed upon by the RTF Program Advisory Board. Funding levels for the Transportation Economic Development Fund Category D (TEDF D) funds are set by legislation. The RTF Program Advisory Board is a coalition of state, county, municipal and transit officials formed to provide statewide guidance and policy concerning the transportation program and to enhance the current transportation planning process in rural areas. Each RTF selects projects in accordance with established funding levels. MDOT reviews projects for eligibility and consistency with the criteria established for the federal STBG and the TEDF D Program.

Projects selected for funding through the RTF Program will either be in the Rural STIP or in an MPO TIP based on the geography of the project and will follow the appropriate planning process to be included in that document. Often, RTF jobs are grouped together into general program accounts (GPAs). RTF county and regional meetings are open to the public to encourage public involvement. For more information on the RTF program, go to MDOT's RTF program website (www.Michigan.gov/MDOT/Programs/Grant-Programs/Rural), contact the appropriate regional planning agency via the Michigan Association of Regions website (www.miregions.com), or contact MDOT's RTF program coordinator.

Map 3.6.1 - Michigan Rural Task Force Boundaries

3.7 Small Urban Program

The Small Urban Program serves urban areas with a population of 5,000 to 50,000, as defined by the U.S. census. Cities, villages, transit agencies and road commissions located within or serving these urbanized areas are eligible to receive STBG funds through the Small Urban Program. During calls for projects, MDOT requests that eligible areas submit road and transit capital projects for funding consideration.

All road and transit projects must be federal-aid-eligible within the ACUB and consistent with regional land use and development plans. The small urban areas must demonstrate that city, village, transit providers and county road commissions have been included as full partners in the project selection process and that the necessary public participation has been conducted prior to project submittal. Consultation with tribal governments is also required, where applicable. The Urban Area Project Selection Committee must hold

a public meeting to allow citizens within their community to participate in the project selection and prioritization process.

As of the 2020 census, there are 65 small urban areas in Michigan. For small urban areas that are within MPAs, the MPO is indicated; all others are in rural/non-MPO areas.

Projects selected for funding through the Small Urban Program will either be in the Rural STIP or in an MPO TIP based on the geography of the project and will follow the appropriate planning process to be included in that document. Many small urban projects are typically grouped together in a GPA based on work type in the Rural STIP or MPO TIPs; projects not eligible for the GPA will be listed individually in the STIP or MPO TIP. All small urban projects are listed on the Small Urban Program website under “Approved Projects”: www.Michigan.gov/MDOT/Programs/Grant-Programs/Small-Urban.

Map 3.7.1 - Small Urban Areas (as of 2020 U.S. Census Designated Areas)

4.0 Transportation Performance Management

This section outlines the anticipated effect of the STIP toward achieving the performance targets in identified performance areas.

FHWA defines TPM as a strategic approach that uses system performance information to make investment and policy decisions to achieve national performance goals. In short, TPM:

- Is systematically applied,
- Provides key information to help decision-makers understand the consequences of investment decisions across transportation assets or modes,
- Improves communication between decision-makers, stakeholders and the traveling public, and
- Ensures measures and targets are developed in cooperative partnerships and based on data and objective information.

Congress developed, through MAP-21 and the FAST Act, new rules for states and MPOs to collect data and establish performance targets to be utilized in transportation planning and programming processes. The FAST Act requires that the statewide planning process provides for the establishment of a performance-based approach to transportation decision-making to support national goals. The new federal performance measurement requirements focus on safety, pavement condition, bridge condition, system travel time reliability and freight movement reliability, congestion mitigation and air quality, and public transportation asset and safety management.

Performance Measures

MDOT coordinates with MPOs, regional planning agencies, county road associations, transit agencies and other agencies in developing methodology and assumptions, and target-setting for the performance measures. These stakeholder groups are involved when determining the performance data sets, methodology and targets. Statewide

performance targets will be set first, in accordance with federally established compliance dates, followed by MPO establishment of performance targets.

This 2026-2029 STIP describes the anticipated effect of the STIP toward achieving the performance targets in identified program areas.

Progress toward the goals identified through the TPMs will be measured and the fiscal plan and investment strategies will guide project selection. Ultimately, the investment strategies identified with the Michigan TAMP will support the MDOT Call for Projects process, the 5YTP, and the STIP/ TIP project selection. The progress toward performance targets will guide investment strategies and will influence funding allocations and decisions on project selection to be included in the STIP and TIPs.

Second Avenue bridge over I-94 in Detroit.

Table 4.1 Supporting Definitions (as defined in 23 CFR 207-807)

Category	Metric	Notes for Performance Area Applicability to Investment
Safety	Number of fatalities; rate of fatalities; number of serious injuries; rate of serious injuries; number of nonmotorized fatalities and nonmotorized serious injuries	• Partially supported by Road with work types that include constructing new or replacing existing curbs and gutters for drainage and safety; and maintenance that fixes hazards. • Fully supported by Bridges due to work types that include emergency repairs and maintenance that fixes hazards. • Fully supported by Routine Maintenance, such as potholes and removing debris that present road and bridge hazards. • Fully supported by System Safety, Management and Operations with work types that apply to speed, safety service patrol, pavement markings, signs, etc. • Fully supported by Roadside Facilities with work types related to rest areas, bicycle and pedestrian facilities, including nonmotorized paths. • Partially supported by Additional State and Federally Funded Highway Programs, such as Transportation Alternatives and Recreation Trails due to work types that support bicycle and pedestrian facilities, including nonmotorized paths. • Partially supported by Transit - Rural Capital due to improvements to bus and bus facilities, and support for enhanced mobility of seniors and individuals with disabilities
Pavement Condition	Percentage of pavements of the Interstate National Highway System (NHS) in Good or Poor condition; Percentage of pavements of the non-Interstate NHS in Good or Poor condition	• Fully supported by Road with reconstruction, resurfacing and maintenance work types that sustain and improve pavement condition. • Partially supported by Bridges with work types that maintain pavement conditions such as patching, overlays and sealers. • Fully supported by Routine Maintenance with work such as pothole filling, preventive and corrective maintenance, and vehicles for snow plowing and ice removal. • Partially supported by System Safety, Management and Operations with active traffic management improvements and alerts for drivers, and construction and maintenance of weigh stations. • Partially supported by Additional State and Federally Funded Highway Programs with planning studies, project development and scoping activities that focus on ways to improve conditions as well as promoting traffic reductions through carbon reduction and transportation alternatives.

Supporting Definitions (as defined in 23 CFR 207-807), *continued*

Category	Metric	Notes for Performance Area Applicability to Investment
Bridge Condition	Percentage of NHS bridges classified as in Good or Poor condition	• Partially supported by Road with work types that maintain bridge pavement condition, including repairs and sealing. • Fully supported by Bridges with work types that address the needs of structures of critical concern and maintain the statewide inventory of bridges in good or fair condition. • Fully supported by Routine Maintenance with work such as pothole filling, preventive and corrective maintenance, and vehicles for snow plowing and ice removal. • Partially supported by System Safety, Management and Operations with construction and maintenance of weigh stations. • Partially supported by Additional State and Federally Funded Highway Programs with planning studies, project development and scoping activities that focus on ways to improve conditions as well as promoting traffic reductions through carbon reduction and transportation alternatives
Reliability and Freight	Percent of the person-miles traveled on the Interstate and non-Interstate that are reliable; Freight Truck Travel Time Reliability (TTTR) Index (Interstate only)	• Partially supported by Road with reconstruction, resurfacing and maintenance work types that sustain and improve pavement condition and shoulders. • Fully supported by Bridges due to work types that include emergency repairs and maintenance that fixes hazards and addresses the needs of structures of critical concern and maintain the statewide inventory of bridges in good or fair condition. • Fully supported by Routine Maintenance with work such as pothole filling, preventive and corrective maintenance, and vehicles for snow plowing and ice removal. • Fully supported by System Safety, Management and Operations with work types that apply to speed, safety service patrol, pavement markings, signs and construction and maintenance of weigh stations. • Partially supported by Additional State and Federally Funded Highway Programs with planning studies, project development and scoping activities that focus on ways to improve conditions as well as promoting traffic reductions through carbon reduction and transportation alternatives.

Supporting Definitions (as defined in 23 CFR 207-807), continued

Category	Metric	Notes for Performance Area Applicability to Investment
Congestion Mitigation and Air Quality	Annual Hours of Peak Hour Excessive Delay (PHED) Per Capita; Percent of Non-SOV Travel; Total Emissions Reduction - PM2.5; Total Emissions Reduction - CO	• Partially supported by Road with reconstruction, resurfacing and maintenance work types that sustain and improve pavement condition and shoulders, improving driving condition and reducing fuel consumption in effect. • Fully supported by System Safety, Management and Operations including active traffic management improvements and alerts for drivers on congestion, dynamic shoulders, and alternate route and turn lanes to reduce traffic volumes. • Partially supported by Roadside Facilities with carpool parking lots and nonmotorized paths. • Fully supported by Additional State and Federally Funded Highway Programs due to Programs with planning studies, project development and scoping activities that focus on ways to improve conditions as well as promoting traffic reductions through carbon reduction and transportation alternatives
Public Transportation	Asset Management (State of Good Repair) • Rolling Stock (Percent Greater Than ULB) • Equipment (Percent Greater Than ULB) • Facilities (Percent Less Than 30 TERM scale) • Rail Infrastructure (if applicable); Safety (Fatalities, Injuries, Safety Events, System Reliability)	• Partially supported by Routine Maintenance with work such as pothole filling, preventive and corrective maintenance, and vehicles for snow plowing and ice removal. • Partially supported by System Safety, Management and Operations including active traffic management improvements and alerts for drivers on congestion, dynamic shoulders, and alternate route and turn lanes to reduce traffic volumes. • Partially supported by Roadside Facilities with carpool parking lots and nonmotorized paths. • Partially supported by Additional State and Federally Funded Highway Programs with planning studies, project development and scoping activities that focus on ways to improve conditions as well as promoting traffic reductions through carbon reduction and transportation alternatives

FY 2026-2029

State Transportation Improvement Program

4.0 Transportation Performance Management, continued

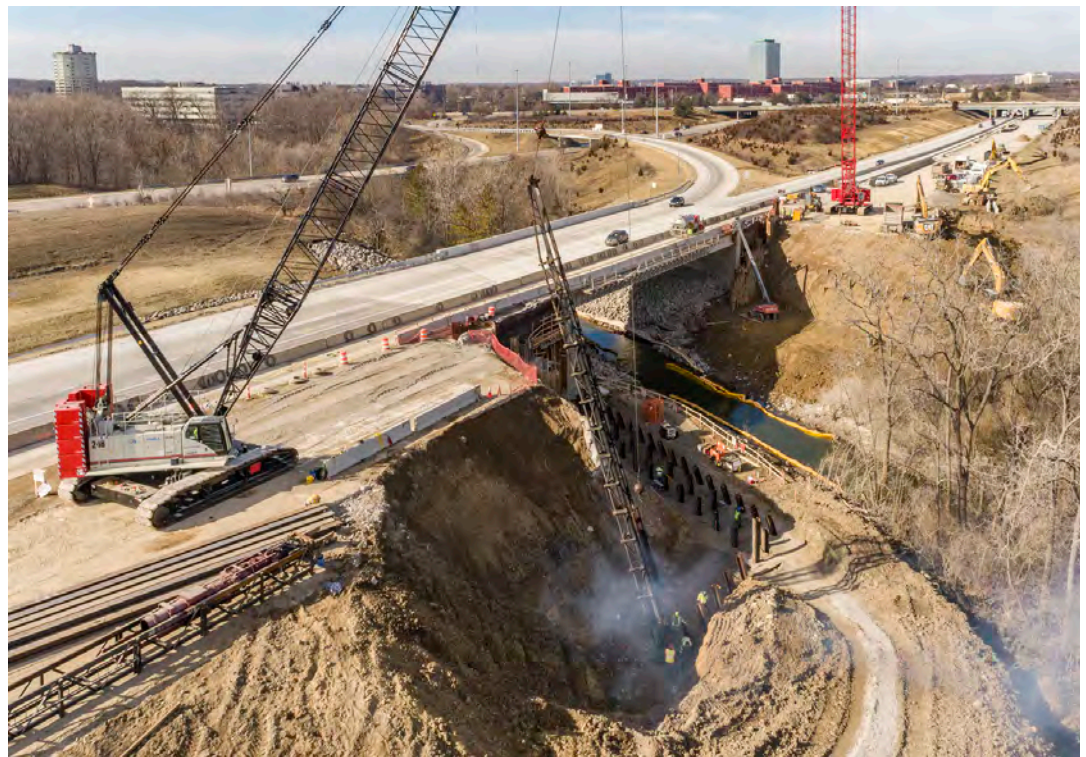

MDOT Investment Strategy Process

Department goals for state trunkline pavement and bridge condition are established by the STC and influence the way MDOT invests in and maintains state-owned transportation infrastructure. To do this, MDOT conducts investment planning. Investment strategies guide the allocation of capital resources to achieve the goals established. Investments are focused where they will most benefit the public, consistent with the direction established.

Investment strategies are developed utilizing anticipated available funding, life cycle planning, performance gap analysis, and the results of risk analysis. Annually, MDOT uses updated information on available funding and the estimated cost of future work by work type to perform life cycle analysis for pavement and bridge assets. This analysis is produced for strategies that would:

- Achieve and sustain a desired State of Good Repair (SOGR),
- Improve or preserve the condition of the pavement and bridge assets,
- Achieve the constrained Michigan targets for asset condition, and
- Achieve the national goals.

For each strategy, gaps in funding are identified. The risks associated with each strategy are also analyzed. The various strategies are also analyzed and compared to determine how they would impact the overall goals and objectives set by the STC. The desired mix of fixes, investment levels and funding targets are developed for the selected investment strategy and provided in the Highway Call for Projects memo. They form the basis for project selection and prioritization. The selected investment strategy is communicated to the public by way of the annual 5YTP.

Linking MDOT Investment to Performance Measures

MDOT's investment to achieve the constrained Michigan targets for asset condition are reflected in the 2026-2029 STIP program of projects. The following table identifies which performance areas are addressed by FY 2022-2025 MDOT investment categories. Each investment category may fully support (● in the chart), partially support (◐ in the chart), or not support (left blank in the chart) a performance area. The investment categories are made up of smaller investment types. A key to the MDOT investment categories can be seen on the next page:

Figure 4.1 5YTP Investment and Performance for STIP

			Safety	Pavement Condition	Bridge Condition	Reliability and Freight	Congestion Mitigation and Air Quality	Public Transportation
	2022-2025 Total Programmed to Projects	2022-2025 Annual Average Programmed to Projects						
Repair and Rebuild Roads	\$6,917,729,436	\$1,729,432,359	◐	●	◐	◐	◐	
Repair and Rebuild Bridges	\$1,755,717,715	\$438,929,429	●	◐	●	●		
Routine Maintenance	\$1,852,100,000	\$463,025,000	●	●	●	●		◐
System Safety, Management and Operations	\$916,421,844	\$229,105,461	●	◐	◐	●	●	◐
Roadside Facilities	\$51,509,325	\$12,877,331	●				◐	◐
Additional State and Federally Funded Highway Programs	\$571,650,844	\$142,912,711	◐	◐	◐		●	◐
Transit - Rural Capital	\$24,313,742	\$8,104,581	◐				◐	●
Grand Total	\$10,213,029,16	\$3,016,282,291	All numbers are based on funding targets in the JobNet database as of Feb. 4, 2025, except for Transit Rural Capital, which are 2023-2025 targets from JobNet database as of April 1, 2025.					

● = Investment Category fully supports a Performance Area ◐ = Investment Category partially supports a Performance Area

FY 2026-2029 State Transportation Improvement Program

4.0 Transportation Performance Management, continued

Figure 4.2 - Key of MDOT Investment Categories

Investment Category	Sub-Investment Categories
Road Rehabilitation and Reconstruction (R&R)	Rehabilitation and Reconstruction, Freeway Resurfacing Program, Non-Freeway Resurfacing Program
Road Capital Preventive Maintenance (CPM)	Road Capital Preventive Maintenance
Trunkline Modernization	Reconstruction on Trunklines to Improve Safety, Traffic Flow, Pavement and Bridge Condition, Freight Mobility, Accessibility
Bridge Program	Bridge Replacement, Bridge Preservation, Bridge Special Needs, Big Bridge Program, Blue Water Bridge, Culverts-Capital
Traffic and Safety	Pavement Markings, Safety Programs, Signs, Traffic Signals, Delineators
Routine Maintenance	Routine Maintenance
System Operations	Intelligent Transportation Systems (ITS), Congestion Mitigation and Air Quality (CMAQ), Commercial Vehicle Enforcement (CVE)
Transit - Rural Capital	Bus and Bus Facilities, Enhanced Mobility of Seniors and Individuals with Disabilities
Other Programs	State-Funded Required Programs, Program Development/Scoping, Training, Pump Stations, Transportation Alternatives, Railroad Crossings Program, Freeway Lighting, Wetland Pre-Mitigation, Noise Abatement, Discretionary, Recreation Trails, Carpool Parking Lot Program, Rest Areas, Economic Development, Capacity Improvement, New Roads

Additional information on performance management and performance measures may be found on FHWA's Transportation Performance Management site: <https://www.fhwa.dot.gov/tpm/>.

5.0 Public Participation

Public participation or involvement is a fundamental requirement of the transportation planning process. The federal requirements for a public participation plan are specified in 23 U.S.C. The act clearly requires not only a documented process but also implementation of that process for the SLRTP and the STIP. As stated in 23 U.S.C., “In carrying out the statewide transportation planning process, including development of the long-range statewide transportation plan and the STIP, the State shall develop and use a documented public participation process that provides opportunities for public review and comment at key decision points”. MDOT has developed a FY 2026-2029 STIP Public Participation Plan, which can be found on the [STIP website](#). This document outlines the multiple opportunities available for public involvement in the overall planning process.

Federal Regulations for the STIP

The federal regulations related to participation in transportation decision-making can be found in Title 23; Section 450.210. Additionally, the following federal regulations link the transportation planning process to the National Environmental Protection Act (NEPA) 23 U.S.C. 134 and 135; 42 U.S.C. 7410 et seq.; 49 U.S.C. 5303 and 5304; 49 CFR 1.85 and 1.90. These regulations leave the methods for carrying out participation to the discretion of each state; however, participation processes must provide:

- Early and continuous opportunities for involvement.
- Public meetings at convenient and accessible locations and times.
- Timely information on transportation issues, processes and procedures.
- Reasonable access to technical and policy information.
- Electronically accessible and available public information via the web.
- Adequate notice of involvement opportunities at key decision points.
- Methods for considering and responding to public input.
- A course of action for seeking out and considering the needs of traditionally underserved groups.
- Periodic review and evaluation of the participation process.

MDOT’s mission of “serving and connecting people, communities and the economy through transportation” can only be accomplished when customers are identified and brought into the planning process. A record of all comments received is maintained by the public information and hearings officer.

Document Availability

In accordance with federal requirements, the STIP is published with reasonable notification of its availability for review through regionally significant newspapers, public outreach throughout the state, MDOT region offices, various social media outlets (including X, Facebook, Threads, Bluesky, LinkedIn and YouTube), and MDOT’s [STIP website](#).

Consultation with Native American Tribal Governments

MDOT considers the concerns of Native American tribal governments that have jurisdiction over land within the state. The department provides meaningful and timely consultation with 12 federally recognized sovereign Native American tribal governments on a regular basis and prior to certain types of department actions. MDOT’s tribal affairs coordinator serves as a point of contact for Native American tribal governments to facilitate communication and problem resolution on transportation-related topics. Coordinating with Native American tribal governments is an essential part of determining transportation needs and the environmental impacts and mitigation of proposed projects.

Get Involved

MDOT is committed to providing multiple opportunities for public review and comment before finalizing the STIP. MDOT has developed the [MI Transportation Program Portal \(arcgis.com\)](#), which is a GIS web application that allows the public to view STIP project locations and provide comments on those projects. Directions for how to submit a comment can be found in Appendix D: Public Comments to the TOC.

Online Comment Form and Email Communications

Individuals can submit comments via an online comment form, which will be available on the [STIP website](#), or by email to MDOT-STIP@Michigan.gov.

FY 2026-2029 State Transportation Improvement Program

5.0 Public Participation, continued

Social Media

MDOT welcomes public comment on the draft STIP via social media as well, including:

X	@MichiganDOT
Facebook	Michigan Department of Transportation
Threads	@MichiganDOT
Bluesky	@MichiganDOT.bsky.social
LinkedIn	LinkedIn
YouTube	@MichiganDOT
MDOT's website	MDOT's STIP website

Subscribe to an Email List

If you would like to be notified of upcoming engagement opportunities, join either an MDOT region or Statewide News Releases email subscription service via GovDelivery. MDOT uses this service to provide relevant and useful information to subscribers statewide. You can sign up online by visiting www.Michigan.gov/MDOT, scroll to the bottom and enter your email address under “Sign up for emails from MDOT.” Please note that not all email subscriptions are available via text messaging.

In-Person and Virtual Meetings

MDOT strives to make it easy for the public to get involved in the transportation planning process. When feasible, MDOT will present information to the public at already-scheduled public meetings, such as MPO meetings, in order to maximize the reach and effectiveness of sharing information with interested citizens. Information on upcoming meetings can be found at Michigan.gov/MDOT in the “News and Outreach” section.

Written Comments via Postal Service

Written comments regarding the draft STIP can be mailed to the MDOT public involvement and hearings officer at:

Monica Monsma, Public Involvement and Hearings Officer
Environmental Services Section
Michigan Department of Transportation
P.O. Box 30050
Lansing, MI 48909

Go to Appendix D for a summary of public outreach and comments received.

6.0 Community Composition and Transportation Needs Analysis

Introduction

MDOT's mission is serving and connecting people, communities and the economy through transportation. In order to serve and connect all people, it is particularly important to know where people with different transportation needs and challenges are located throughout the state. Analyzing community composition across Michigan can assist MDOT with engaging all people and communities in the transportation decision-making process, as well as guiding transportation investments to address high-priority transportation issues and improve quality of life.

MDOT is also responsible for ensuring that its overall program fairly distributes benefits to all Michiganders and minimizes negative effects on any specific group of people. Title VI of the Civil Rights Act of 1964 prohibits discrimination on the basis of race, color or national origin in programs receiving federal financial assistance, including all state department of transportation activities. Additional federal nondiscrimination statutes include the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973, which prohibit discrimination against people with disabilities; Section 162 (a) of the Federal-Aid Highway Act of 1973 (23 USC 324), which prohibits discrimination on the basis of sex; and the Age Discrimination Act of 1975, which prohibits discrimination on the basis of age.

Nondiscrimination laws in the state of Michigan include the Elliott-Larsen Civil Rights Act, which prohibits discrimination on the basis of religion, race, color, national origin, age, sex, sexual orientation, gender identity or expression, height, weight, familial status, marital status or source of income; and the Meaningful Language Access to State Services Act, which proscribes certain translation requirements for state agency documents and communications.

MDOT takes steps to ensure that our policy decisions do not discriminate against any group of Michiganders by giving all residents opportunities to engage in the public decision-making process, ensuring that transportation benefits are distributed fairly, and minimizing negative impacts. One key step is preparing this Community Composition and Transportation Needs Analysis.

There are nine major categories of people that MDOT has identified with specific transportation needs and challenges:

- People with disabilities: People with physical, cognitive and independent living disabilities may have limited mobility options.

- Children under 15: Children rely on transportation provided by adult caregivers and/or require supervision while traveling (before they are eligible to drive).
- Seniors 65-plus: Older people may be prevented by cost or ability from driving vehicles or accessing other mobility options.
- Households without vehicles: Households without access to their own vehicles can have limited mobility.
- Low-income people: Vehicle ownership costs and other transportation costs may be a barrier to mobility for low-income people.
- Single-parent households: Single-parent households, with only one adult responsible for all household transportation needs, face unique mobility challenges.
- People of color: Due to past transportation investment decisions, people of color and communities of color may have additional transportation challenges. For example, highways or railroads creating barriers within communities, or high truck traffic.
- People whose primary language is not English (limited English proficiency, or LEP): People who primarily speak a language other than English may have difficulty participating in transportation decision-making in their community and communicating their transportation needs.
- People in places with greater natural disaster risk: People in places more prone to natural disasters like flooding, tornadoes, ice or extreme winter storms, erosion and extreme heat may lose access to transportation when the transportation system is damaged by these disasters.

The list below explains how each of these nine categories relate to existing federal and state nondiscrimination laws and regulations:

- People with disabilities (protected by ADA).
- Children under 15 (protected by the Age Discrimination Act of 1975).
- Seniors 65-plus (protected by Age Discrimination Act of 1975).
- Households without vehicles (related to low income).

FY 2026-2029 State Transportation Improvement Program

6.0 Community Composition and Transportation Needs Analysis, continued

- Low-income people (related to state Civil Rights protections around source of income; i.e., government support).
- Single-parent households (related to discrimination on the basis of sex, prohibited by the Federal-Aid Highway Act of 1973).
- People of color (protected by Title VI of the Civil Rights Act).
- People whose primary language is not English (LEP) (protected by Title VI of the Civil Rights Act, since primary language can be related to national origin).
- People in places with greater natural disaster risk (related to 23 CFR Part 667, Periodic Evaluation of Facilities Repeatedly Requiring Repair and Reconstruction due to Emergency Events).

Methodology

Three main sources are used to create this Community Composition and Transportation Needs Analysis. The first source is the non-MPO projects included in the MDOT STIP for 2026-2029. The second source is the U.S. census, from which the most recent demographic data (2023 five-year American Community Survey data, or ACS) was collected at the census tract level to determine the geographic locations of people in different demographic groups. The third source is the National Risk Index (NRI), version 1.19 (March 2023), created by the Federal Emergency Management Agency to identify the level of risk across the country for 18 natural hazards.

Using the ACS demographic data and the NRI natural disaster risk data, the 3,017 census tracts in Michigan are sorted into percentiles based on the number of people in each of the nine demographic and risk categories. Census tracts with the highest number of people (above the 70th percentile in the state) for each of the nine categories are identified as “focus areas” for each category. Many census tracts are focus areas for more than one of the nine categories: 1,254 are focus areas for one to three categories, 841 are focus areas for four to six categories, and 177 are focus areas for seven to nine categories. On Map 6.1, focus areas for one, two, or three total categories appear in light blue; four, five or six appear in dark blue; and seven, eight or nine appear in magenta.

Finally, the non-MPO projects in the 2026-2029 STIP are mapped in relation to these focus areas. Projects are considered to be in a focus area if they are fully or partially within 500 feet of a focus area census tract. On Map 6.1 and subsequent maps in this analysis, 2026-2029 STIP projects appear as orange dots or lines (depending on the length of the project). Note that projects in MPO areas appear in MPO TIP documents, while only non-MPO projects in rural and small urban areas appear in this STIP document.

See below for details about the population within MPO and non-MPO areas (Table 6.1), the population within focus areas (Table 6.2), and a breakdown of STIP projects by responsible jurisdiction - MDOT, RTFs, small urban areas, and transit agencies (Table 6.3).

Table 6.1: Population in MPO Areas and Non-MPO Areas

Geographic area	Population	Percent of population
Michigan	10,051,595	100%
MPOs	8,452,466	84%
Non-MPO Areas	1,599,129	16%

Table 6.2: Population in Focus Areas

Geographic area	Population	Percent of population
Michigan	10,051,595	100%
Focus areas (any, one or more)	8,611,807	86%
One to three focus areas	4,088,720	41%
Four to six focus areas	3,597,692	36%
Seven to nine focus areas	925,395	9%

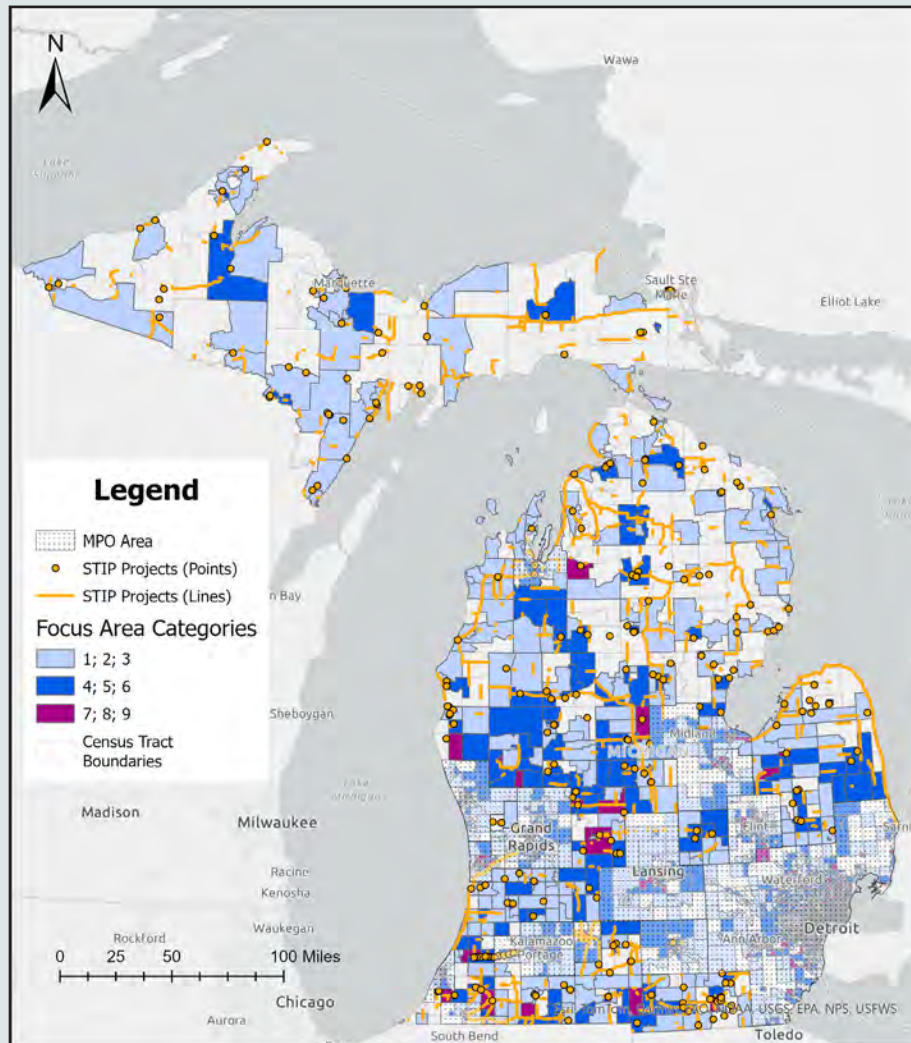

Table 6.3: Types of STIP Projects by Jurisdiction

Type of project	Number of projects	Cost of projects	Percent of project costs
Trunkline (MDOT)	198 projects	\$1,103,593,582	63%
Rural (local)	665 projects	\$605,508,233	35%
Small urban (local)	26 projects	\$15,690,756	1%
Multimodal (transit)	164 projects	\$31,386,104	2%
Total	1,054 projects	\$1,756,178,675	100%

Analysis

Map 1 shows focus areas (grouped by areas that have the highest number of people in one, two or three of the categories in light blue; in four, five or six of the categories in dark blue; and in seven, eight or nine of the categories in magenta) and the STIP projects (in orange). MPO areas, whose projects are not included in this STIP document or analysis, are overlaid as a dot grid.

Map 6.1 - Focus Areas and STIP Projects

Data source for this map include MDOT JobNet/SMART data STIP export for 2026-2029, U.S. Census Bureau American Community Survey five-year (2019-2023) population data, and FEMA National Risk Index, version 1.19 (March 2023)

Table 6.4: STIP Projects in Focus Areas

Project location	Number of projects	Cost of projects	Percent of project costs	Percent of population
Focus areas (any, one or more)	712 projects	\$1,444,335,822	82%	86%
One to three focus areas	461 projects	\$886,784,246	51%	41%
Four to six focus areas	221 projects	\$439,285,287	25%	36%
Seven to nine focus areas	30 projects	\$118,266,289	7%	9%

Table 6.4 shows a breakdown of the number of STIP projects, costs and percentage of costs across the grouped focus areas, along with the percentage of the population that lives in the focus areas. Comparing the percentage of project costs and the percentage of population in the focus areas shows that investment in the focus areas is similar to the population living in those areas.

In addition to overall focus areas, themed focus areas that highlight transportation needs that might be similar across multiple categories of people were developed:

- **Multimodal focus areas:** Areas with the highest numbers of people who benefit from transportation options other than car travel (people with disabilities, children under 15, seniors over 65, households without vehicles, low-income people, or single-parent households).
- **Safety focus areas:** Areas with the highest numbers of people who are more at risk in vehicles and on roadways, including those who are more likely to be vulnerable road users (people with disabilities, children under 15, seniors over 65, households without vehicles, low-income people, or people of color).
- **Underserved focus areas:** Areas with the highest number of people who have been underserved by transportation investments in the past (low-income people or people of color).
- **Resilience focus areas:** Areas with the highest number of people who are at higher risk of natural disasters and/or are more likely to have transportation challenges during emergency evacuations (people in places with greater natural disaster risk, people with disabilities, seniors over 65, households without vehicles, low-income people, or people of color).
- **Disaster risk focus areas,** a subset of resilience focus areas, are areas with the highest number of people in places with greater natural disaster risk, whether or not they also have the highest number of people in the other resilience categories (people with disabilities, seniors over 65, households without vehicles, low-income people, or people of color).

FY 2026-2029 State Transportation Improvement Program

6.0 Community Composition and Transportation Needs Analysis, continued

- Outreach focus areas: Areas with the highest number of people who are often underrepresented in public engagement activities (people with disabilities, households without vehicles, low-income people, single parent households, people of color, or people whose primary language is not English (LEP)).

Table 6.5 shows a breakdown of the population and percentage of population living in each of the themed focus areas.

Table 6.5: Population in Themed Focus Areas

Geographic area	Population	Percent of population
Michigan	10,051,595	100%
Multimodal focus areas	7,927,816	79%
Safety focus areas	8,001,707	80%
Underserved focus areas	4,736,045	47%
• People of color (POC) • Low income • Both	• 1,452,123 • 1,463,021 • 1,820,901	• 15% • 18% • 18%
Resilience focus areas	7,871,660	78%
• Disaster risk focus areas	• 3,944,347	• 39%
Outreach focus areas	7,413,931	74%

In alignment with these themed focus areas, STIP projects were grouped by work category subtype into themed project types that could benefit the themed focus areas:

- Multimodal projects: Transit projects and road projects with transit or active transportation (walk, roll, bike) components (ADA upgrades, sidewalks, trails, etc.).
- Safety projects: Projects in the traffic safety work category subtype.
- Resilience projects: Road projects with drainage improvement components (pump station upgrades, culvert replacements, stormwater and sewer improvements, etc.).
- Road and bridge projects. Projects in the road and bridge work category subtypes (separated primarily for analysis in the underserved focus areas).

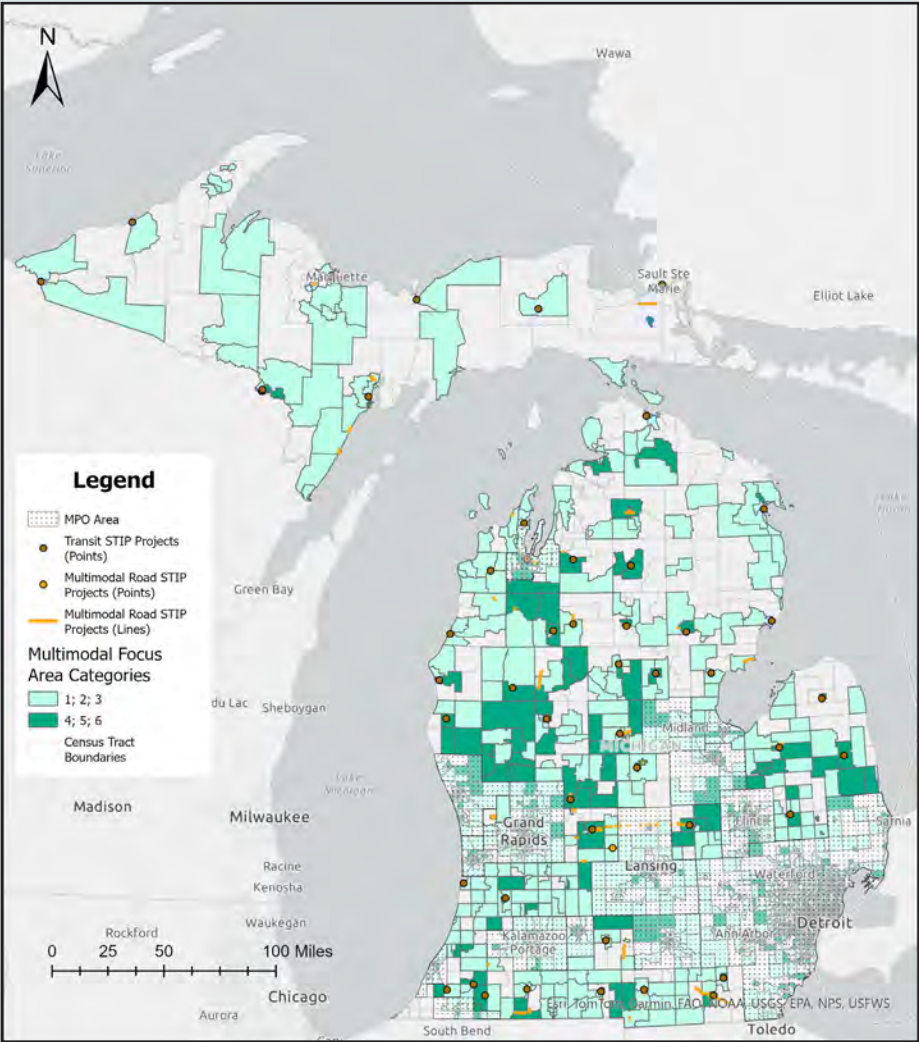

Table 6.6: Themed Project Types

Type of project	Number of projects	Cost of projects	Percent of project costs
Multimodal (transit)	215 projects	\$208,794,901	12%
Multimodal (transit)	164 projects	\$31,386,104	2%
Multimodal (road projects with multimodal components)	51 projects	\$177,408,797	10%
Safety	80 projects	\$99,615,315	6%
Resilience Improvements (road projects with drainage components)	48 projects	\$286,521,864	16%
Road Improvements and Maintenance (*includes multimodal and resilience road projects)	682 projects	\$1,321,543,000	75%
Bridge Improvements and Maintenance	119 projects	\$297,065,331	17%

Table 6.6 shows the number of projects, costs and percent of costs in each of the themed project types.

Map 6.2 shows the multimodal focus areas (grouped by areas that have the highest number of people in one, two or three of the multimodal categories in light green and in four, five or six of the multimodal categories in dark green) and the multimodal STIP projects that fall within these areas (in orange). MPO areas, whose projects are not included in this STIP document, are overlaid as a dot grid.

Map 6.2: Multimodal focus areas (one to three, four to six) and multimodal projects (MPO areas on top)

Data source for this map include MDOT JobNet/SMART data STIP export for 2026-2029, U.S. Census Bureau American Community Dervey five-year (2019-20230 population data, and FEMA National Risk Index, version 1.19 (March 2023)

Multimodal Focus Areas and Multimodal Projects

Type of project	Total	Total in any multimodal focus areas	Total in one to three multimodal focus areas	Total in four to six multimodal focus areas
Multimodal total	215 projects \$208,794,901 12% of total	192 projects \$173,903,201 83% of multimodal	133 projects \$78,889,596 38% of multimodal	59 projects \$95,013,605 46% of multimodal
Multimodal (transit)	164 projects \$31,386,104 2% of total	154 projects \$30,220,104 96% of transit	108 projects \$25,637,570 82% of transit	46 projects \$4,582,534 15% of transit
Multimodal (road)	51 projects \$177,408,797 10% of total	38 projects \$143,683,097 81% of walk/bike	25 projects \$53,252,026 30% of walk/bike	13 projects \$90,431,071 51% of walk/bike

Table 6.7 shows a breakdown of the multimodal projects in the multimodal focus areas. While multimodal projects account for 12 percent of overall investments in this STIP (and 2 percent of those investments are in transit), 83 percent of multimodal investment is taking place in multimodal focus areas, including 46 percent of investments in areas with the highest number of people in four, five or six multimodal categories.

FY 2026-2029 State Transportation Improvement Program

6.0 Community Composition and Transportation Needs Analysis, continued

Map 6.3 shows the safety focus areas (grouped by areas that have the highest number of people in one, two or three of the safety categories in light pink and in four, five or six of the safety categories in dark pink)

and the safety STIP projects that fall within these areas (in orange). MPO areas, whose projects are not included in this STIP document, are overlaid as a dot grid.

Map 6.3: Safety focus areas (one to three, four to six) and safety projects (MPO areas on top)

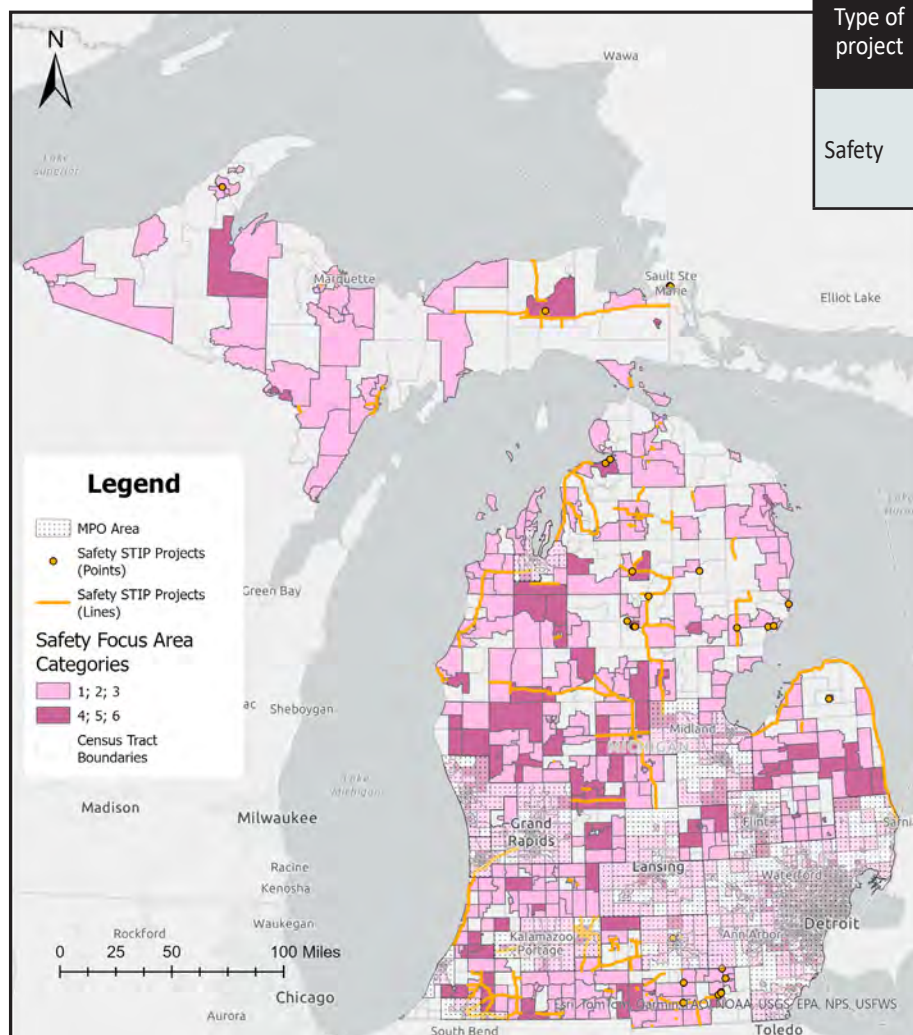

Table 6.8: Safety Focus Areas and Safety Projects

Type of project	Total	Total in any safety focus areas	Total in one to three safety focus areas	Total in four to six safety focus areas
Safety	80 projects \$99,615,315 6% of total	64 projects \$75,250,380 76% of safety	53 projects \$59,398,611 60% of safety	11 projects \$15,851,769 16% of safety

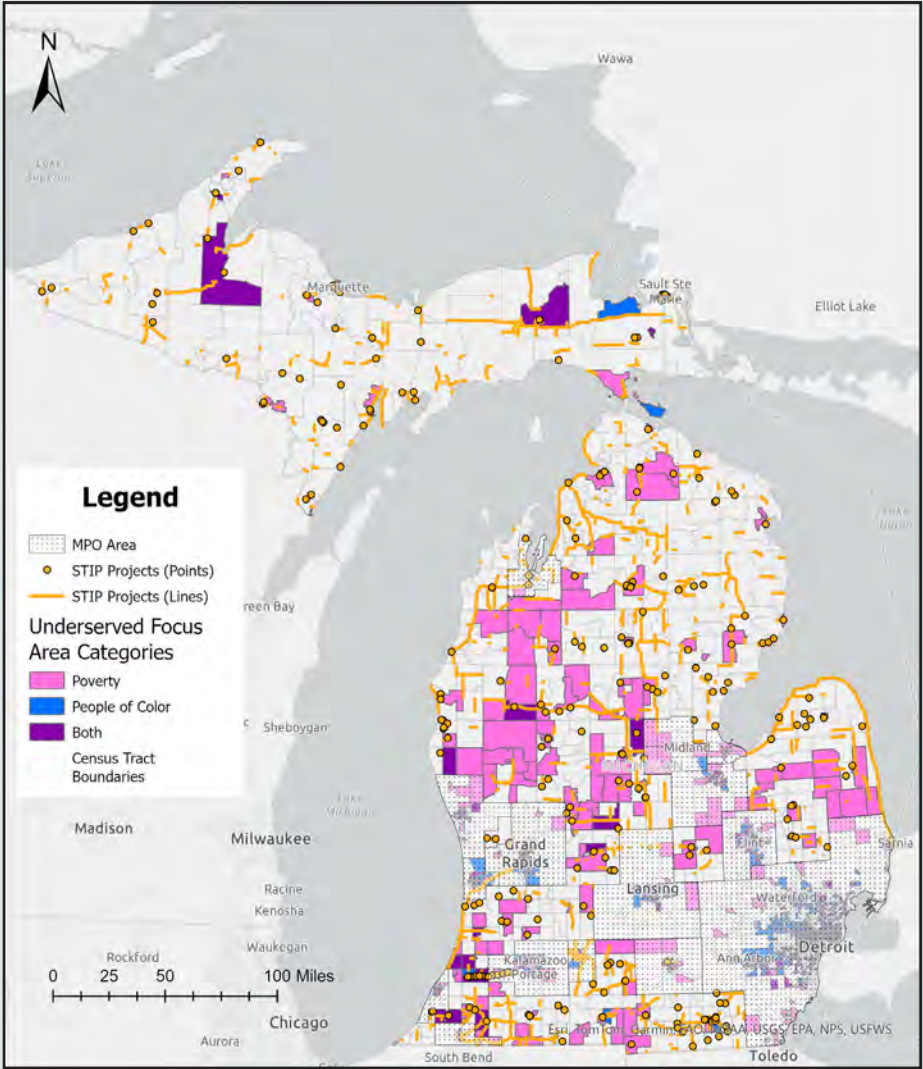

Table 6.8 shows a breakdown of the safety projects in the safety focus areas. Safety-specific projects account for 6 percent of overall investments in this STIP, while 76 percent of safety investment is taking place in safety focus areas.

Data source for this map include MDOT JobNet/SMART data STIP export for 2026-2029, U.S. Census Bureau American Community Survey five-year (2019-2023) population data, and FEMA National Risk Index, version 1.19 (March 2023)

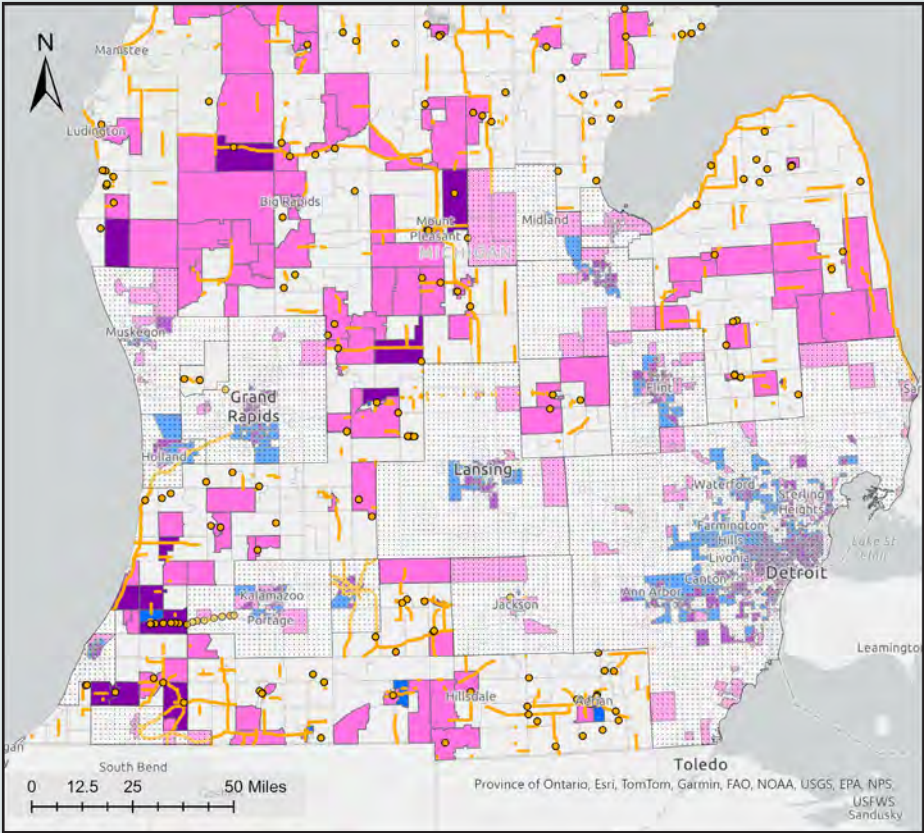

6.0 Community Composition and Transportation Needs Analysis, continued

Map 6.4 and 6.5 shows the underserved focus areas (including areas with the highest numbers of low-income people in pink; people of color in blue; and both low-income people and people of color in purple) and all of the STIP projects (in orange). MPO areas, whose projects are not included in this STIP document, are overlaid as a dot grid.

Map 6.4: Underserved focus areas and all projects (MPO areas on top)

Map 6.5: Inset of underserved areas in MPO areas

Data source for this map include MDOT JobNet/SMART data STIP export for 2026-2029, U.S. Census Bureau American Community Survey five-year (2019-2023) population data, and FEMA National Risk Index, version 1.19 (March 2023)

Road Improvements and Maintenance (*includes multimodal and resilience road projects)	682 projects \$1,321,543,000 75% of total	125 projects \$411,021,929 31% of road	9 projects \$43,062,431 3% of road	95 projects \$299,037,429 23% of road	21 projects \$68,922,069 5% of road
Bridge Improvements and Maintenance	119 projects \$297,065,331 17%	28 projects \$64,091,317 22% of bridge	0 projects \$0 0% of bridge	23 projects \$57,228,055 19% of bridge	5 projects \$6,863,262 2% of bridge
Total	1,054 projects \$1,756,178,675 100% of total	240 projects \$498,369,024 28% of total	9 projects \$43,062,431 3% of total	181 projects \$375,426,428 21% of total	50 projects \$79,880,165 5% of total

Type of project	Total	Total in disaster risk focus areas	Total in one to three resilience focus areas	Total four to six resilience focus areas
Resilience Improvements	48 projects \$286,521,864 16% of total	11 projects \$71,867,287 25% of resilience	33 projects \$206,295,341 72% of resilience	8 projects \$46,810,536 16% of resilience

Data source for this map include MDOT JobNet/SMART data STIP export for 2026-2029, U.S. Census Bureau American Community Dervey five-year (2019-20230 population data, and FEMA National Risk Index, version 1.19 (March 2023)

Map 6.6: Resilience priority areas one to three, four to five (with disaster-priority areas one to three, four to six in the two darkest colors) with resilience projects (MPO areas on top)

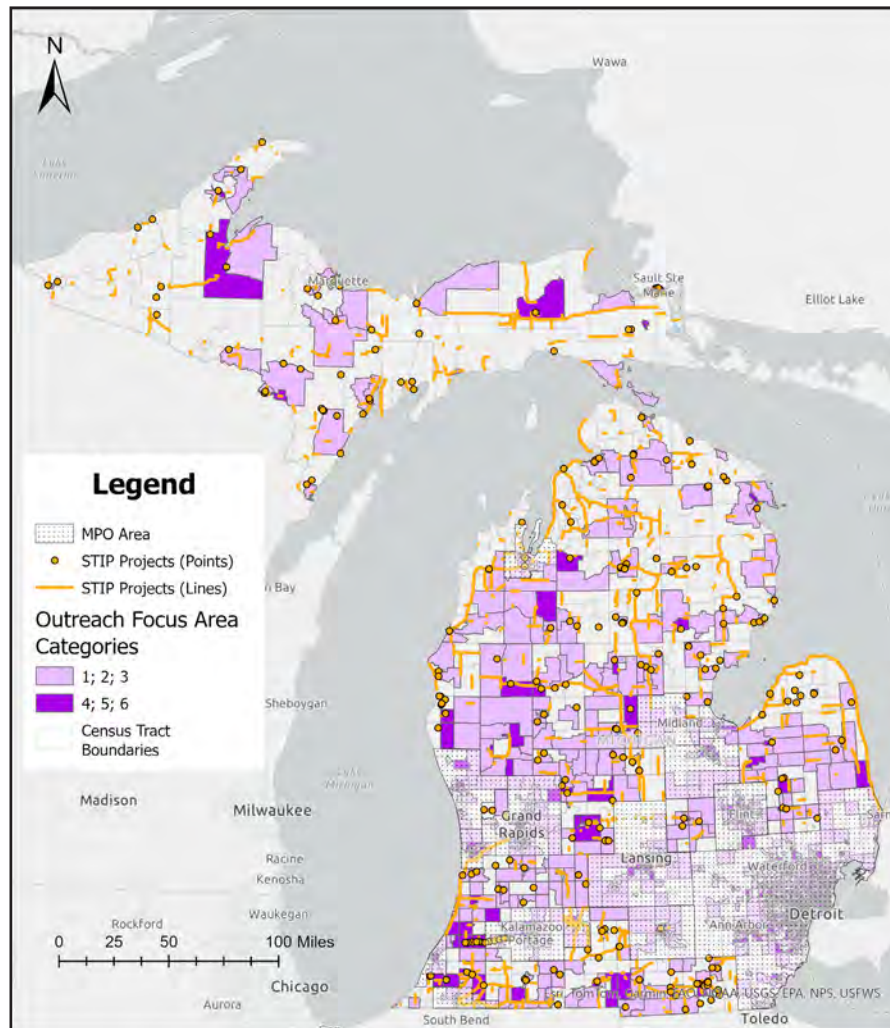

FY 2026-2029 State Transportation Improvement Program

6.0 Community Composition and Transportation Needs Analysis, continued

Map 6.7 shows the outreach focus areas (grouped by areas that have the highest number of people in one, two or three of the outreach categories in light purple and in four, five or six of the outreach categories in dark purple)

Map 6.7: Outreach priority areas (one to three, four to six) with all STIP projects (MPO areas on top)

purple) and the STIP projects (in orange). MPO areas, whose projects are not included in this STIP document, are overlaid as a dot grid.

In instances where projects intersect with outreach focus areas, we recommend MDOT and other transportation agency staff use the MDOT Guidelines for Stakeholder Engagement to discuss with the community additional needs related to the project, as appropriate to the context

of the community, at the appropriate time in the design process to meaningfully engage the public and incorporate feedback into the project. The guidelines are available online at <https://bit.ly/MDOT-Engagement-Guide>. An additional guide to virtual public involvement, created in 2021 in response to the shift in engagement due to the COVID pandemic, is available online at <https://bit.ly/MDOT-Virtual-Public-Involvement>.

Conclusion

Analyzing community composition across Michigan assists MDOT with engaging all people and communities in the transportation decision-making process, guiding transportation investments to address high-priority transportation issues and improve quality of life, while ensuring that the overall program fairly distributes benefits to all Michiganders and minimizes negative effects on any specific group of people.

This analysis shows that investments in this STIP are relatively well-aligned with where people live, including the locations of different categories of people with specific transportation needs and challenges. Further analysis and public engagement to identify the needs in particular focus areas, especially during the project development and selection processes, can help refine and adjust where future investments are located for better alignment. MDOT will continue to partner with MPOs and local transportation agencies to ensure that beneficial transportation investments can be made and coordinated with the responsible jurisdictions.

7.0 Air Quality Transportation Conformity

The Clean Air Act (CAA) was established to improve air quality, protect public health and protect the environment. The CAA has been amended over the years, most significantly in the 1990s. The CAA requires the U.S. Environmental Protection Agency (USEPA) to set, review and periodically revise the National Ambient Air Quality Standards (NAAQS). There are six NAAQS pollutants:

- Ozone (O₃)
- Nitrogen dioxide (NO₂)
- Carbon monoxide (CO)
- Lead (Pb)
- Sulfur dioxide (SO₂)
- Particulate matter (PM), which is subdivided into particulate sizes:
 - Less than 10 micrometers in diameter (PM₁₀)
 - Less than 2.5 micrometers in diameter (PM_{2.5})

Generators of air pollution are classified into four main types: stationary sources, area sources, non-road mobile sources and on-road mobile sources. Examples of generators by source category are shown in Figure 7.1

7.1 On-Road Mobile Sources

Commuter rail and vehicles expected to be on roadways, such as cars, trucks and buses

Stationary Sources

Industrial, refineries and electric utilities

Area Sources

Dry cleaners, paints and solvents

Non-Road Mobile Sources

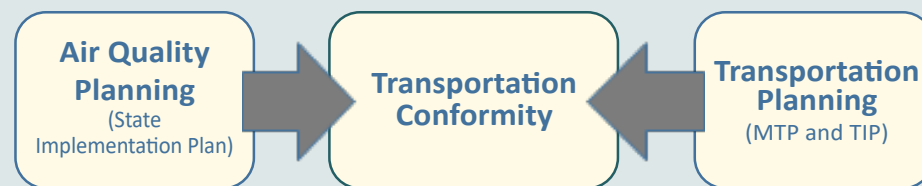

Boats, aircraft, trains and construction equipment

Pictures MDOT Photography Unit

The CAA links air quality planning and transportation planning through the transportation conformity process. Air quality planning is controlled by Michigan's State Implementation Plan (SIP), which includes the state's plans for attaining or maintaining the NAAQS. The primary transportation planning tools are the MPOs' MTP and, at both the metropolitan and state levels, the TIP. Transportation conformity ensures that federal funding and approvals are given to highway and transit activities that are consistent with the SIP and that these activities will not affect Michigan's ability to achieve the NAAQS.

Figure 7.2 Transportation Conformity Process

Transportation activities that are subject to conformity are MTPs, TIPs and all federal projects that receive FHWA or FTA funding or approval. The conformity process ensures emissions from implementing MTPs, TIPs and STIP projects are within acceptable levels specified within the SIP and meet the goals of the SIP.

Transportation conformity only applies to emissions from on-road sources for the following transportation-related pollutants:

- Ozone
- Particulate matter (particulate sizes 2.5 and 10)
- Nitrogen dioxide
- Carbon monoxide

In addition to emissions that are directly emitted from vehicles, regulations specifically require certain precursor pollutants to be addressed. Precursor pollutants are those pollutants that contribute to the formation of other pollutants. For example, ozone is not directly emitted but created when nitrogen oxides (NO_x) and volatile organic compounds (VOC) react with sunlight. Table 7.1 shows the transportation pollutants and their associated precursors. Pollutants can be directly emitted or only formed due to precursors. Not all precursors are required to be analyzed for a pollutant; it depends on what is causing the pollutant to form in an area.

FY 2026-2029 State Transportation Improvement Program

7.0 Air Quality Transportation Conformity, continued

Table 7.1 Transportation Pollutants and Precursor Emissions

*Transportation Pollutant	*Direct Emissions	**Nitrogen Oxides	**Volatile Organic Compounds	**Ammonia	**Sulfur Dioxide
Ozone		X	X		
Particulate Matter 2.5	X	X	X		
Particulate Matter 10	X	X	X	X	X
Nitrogen Dioxide		X			
Carbon Monoxide	X				

*Pollutants **Precursor Emissions

The Michigan Department of Environment, Great Lakes and Energy (EGLE) uses monitors throughout the state to measure pollutant levels to determine if concentrations exceed the NAAQS. When a new NAAQS is established, an area is classified as either:

- Attainment (pollutant level is below the standard).
- Nonattainment (area has more pollutant than allowed).
- Unclassifiable/attainment (insufficient information to support an attainment or nonattainment classification; conformity requirements are the same as for an attainment area).

Once a nonattainment area can demonstrate attainment of the standard, the area can be re-designated to attainment and is considered to be a maintenance area. Transportation conformity is required for nonattainment or maintenance areas. Maintenance areas are required to do conformity for 20 years.

Transportation conformity requires MPOs to make a determination that the MTP, TIP and projects conform to the SIP based on the findings of a regional qualitative or quantitative analysis. The determination affirms that regional emissions will not negatively impact the region's ability to meet

the NAAQS. Conformity has a two-step endorsement process. First, the MPOs must make a formal conformity determination through a resolution that the findings of a conformity analysis conform to the SIP; thus, emissions are at or below the budgets found in the SIP. Then FHWA, jointly with the FTA, after consultation with USEPA, issues a concurrence with the determination.

Michigan has three areas designated as nonattainment for the 2015 ozone NAAQS (2015 ozone standard):

- 1) Berrien County,
- 2) Allegan County (partial), and
- 3) Muskegon County (partial).

Michigan has two maintenance areas, both for the seven counties that form the Southeast Michigan Council of Governments (SEMCOG). The SEMCOG counties are a maintenance area for the 2006 24-hour particulate matter 2.5 NAAQS and the 2015 ozone NAAQS. Designations are listed in Table 7.2 and shown in Figure 7.2.

In February 2019, the FHWA, complying with the court's decision in South Coast Air Quality Management District v. U.S. EPA, started requiring areas in the country to conduct conformity that were both maintenance for the 1997 ozone standard and attainment for the 2008 ozone standard when the 1997 ozone standard was revoked. These areas are not considered traditional maintenance areas because the 1997 ozone standard was revoked, but they must fulfill the obligation to conduct conformity until the end of their maintenance plans. These areas are considered a limited orphan maintenance area (LOMA) or an orphan maintenance area (OMA) and must do a qualitative analysis if not doing a quantitative analysis. This affects 17 counties in Michigan. Areas doing conformity for the 2015 ozone NAAQS are satisfying the requirements for the 1997 ozone NAAQS. Table 7.2 lists the transportation pollutants and designations for areas in Michigan.

Many of Michigan's nonattainment, maintenance or conformity areas have geographic boundaries that include both MPO areas and rural areas (non-MPO). Having projects in both areas requires

conformity to be joint between MPO TIP (urban) and the STIP (rural). The Michigan Transportation Conformity Interagency Workgroup (MITC-IAWG) reviewed the projects in the 2026-2029 STIP and TIPs to determine if a new qualitative or quantitative conformity analysis was required. All areas did a new analysis either qualitative or quantitative. MITC-IAWG consultation documentation is included in each MPO's TIP. For more details on a specific MPO, consult that MPO's TIP.

One of the ways that MDOT and the MPOs try to reduce emissions is through the use of the Congestion Mitigation Air Quality (CMAQ) and the Carbon Reduction programs. These programs fund outreach and education programs as well as road, transit and active transportation projects.

Figure 7.3 Michigan Transportation Nonattainment and Maintenance Areas by Pollutant (March 2024)

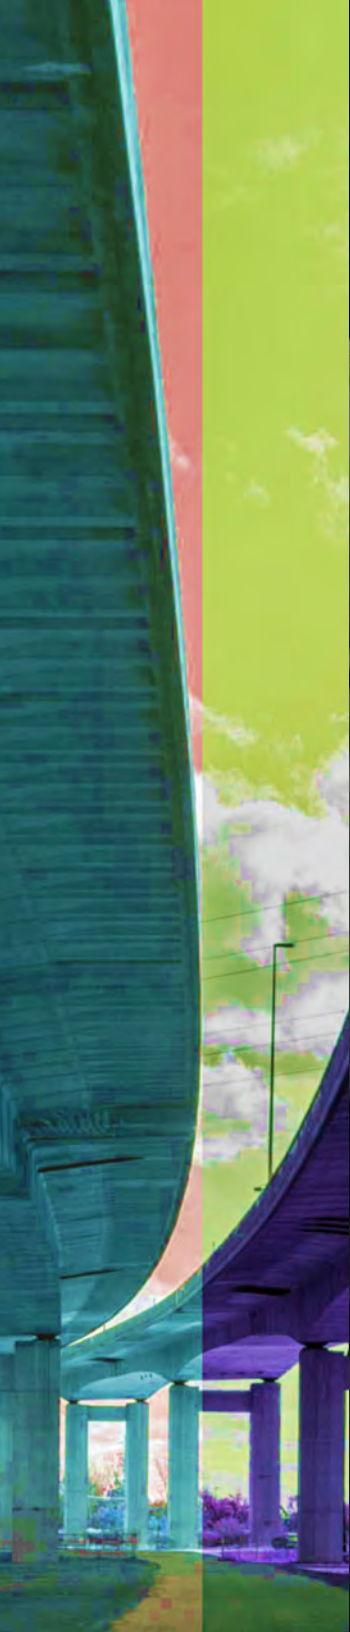

Prepared by Urban Travel Analysis Unit, Statewide Planning Division, Michigan Department of Transportation

Table 7.2 Transportation National Ambient Air Quality Standards (NAAQS) Designations in Michigan

Pollutant	Designation	Area(s)
2015 Ozone Standard (0.070 ppm)	Nonattainment	- Berrien County - Allegan County (Partial) - Muskegon County (Partial)
2015 Ozone Standard (0.070 ppm)	Maintenance	Detroit (SEMCOG counties: Livingston, Macomb, Monroe, Oakland, St. Clair, Washtenaw and Wayne)
2008 Ozone Standard (0.075 ppm)	Unclassifiable/Attainment	Entire State
1997 Ozone Standard (0.080 ppm)	Limited orphan maintenance or orphan maintenance	- Allegan County* - Muskegon County * - Benzie County - Cass County - Flint Area (Genesee and Lapeer counties) - Lenawee County - Grand Rapids Area (Ottawa and Kent counties) - Huron County - Kalamazoo - Battle Creek Area (Van Buren, Kalamazoo and Calhoun counties) - Lansing - East Lansing Area (Clinton, Eaton and Ingham counties) - Mason County *Whole county designation; qualitative analysis for area not covered by 2015 ozone NAAQS
2012 Particulate Matter (PM _{2.5})	Unclassifiable/Attainment	Entire State
2006 Particulate Matter (PM _{2.5})	Maintenance	Detroit - Ann Arbor (SEMCOG counties: Livingston, Macomb, Monroe, Oakland, St. Clair, Washtenaw and Wayne)
Nitrogen Dioxide	Unclassifiable/Attainment	Entire State
Carbon Monoxide	Unclassifiable/Attainment	Entire State

8.0 Financial Chapter

8.1 Introduction

The intent of the financial chapter is to describe the available federal-aid highway and transit resources and show that planned projects are fiscally constrained to those resources. The chapter will also illustrate how the resources available are used to deliver a comprehensive transportation system in a cost-effective and efficient manner. It specifically details:

- 1) Available highway and transit funding (federal, state and local).
- 2) Fiscal constraint (cost of projects cannot exceed revenues reasonably expected to be available).
- 3) Expected rate of change in available funding (unrelated to inflation).
- 4) Year of Expenditure (YOE) factor to adjust for predicted inflation.
- 5) Estimate of Operations and Maintenance (O&M) costs for the federal-aid highway system.

8.2 Available Highway and Transit Funding

Federal highway and transit funding is primarily derived from federal motor fuel taxes: 18.4 cents per gallon on gasoline and 24.4 cents per gallon on diesel, with 0.1 cent per gallon allocated to the Leaking Underground Storage Tank Trust Fund. These revenues are deposited in the Highway Trust Fund (HTF), with a portion allocated to the Mass Transit Account for distribution to public transit agencies and states.

In recent years, the HTF has experienced declining revenue from fuel tax collections, primarily due to improvements in vehicle fuel efficiency and the increased adoption of electric vehicles. Despite this decline, the fuel tax rate has not been updated by Congress since 1993 and has not been adjusted for inflation. As a result, significant transfers from the General Fund have been required to maintain the solvency of the HTF.

Federal transportation funding is currently authorized under the Infrastructure Investment and Jobs Act (IIJA), which is in effect through the end of FY 2026. After this date, it will either be extended or replaced by a new authorization bill. The funding targets in this document are based on the funding levels provided by the IIJA, with an assumed annual growth rate of 1.9 percent, consistent with trends from previous authorization bills. Program managers will receive updates as needed once a new authorization bill is passed, particularly for FYs 2027-2029.

There are numerous federal highway programs designed to serve different purposes.

Federal highway funds are apportioned to states based on formulas established by law. A portion of these funds is then allocated by MDOT to local agencies, taking into account factors such as population, mileage and regional needs. In Michigan, approximately \$1.6 billion of federal highway funds is spent annually to address capital needs on state-owned highways (I, M and US-routes) and local roads statewide.

In addition to federal requirements, state law dictates the allocation of federal aid in Michigan. Michigan Public Act (PA) 51 of 1951 (Act 51) governs how these funds are distributed within the state, specifying the allocation between MDOT and local entities. Under Act 51, approximately 25 percent of federal highway aid is designated for local jurisdictions to be used on federal-aid-eligible local roads, while the remainder is allocated for MDOT's use. In addition to highway programs, there are several federal transit programs, with transit funds distributed according to a complex set of formulas.

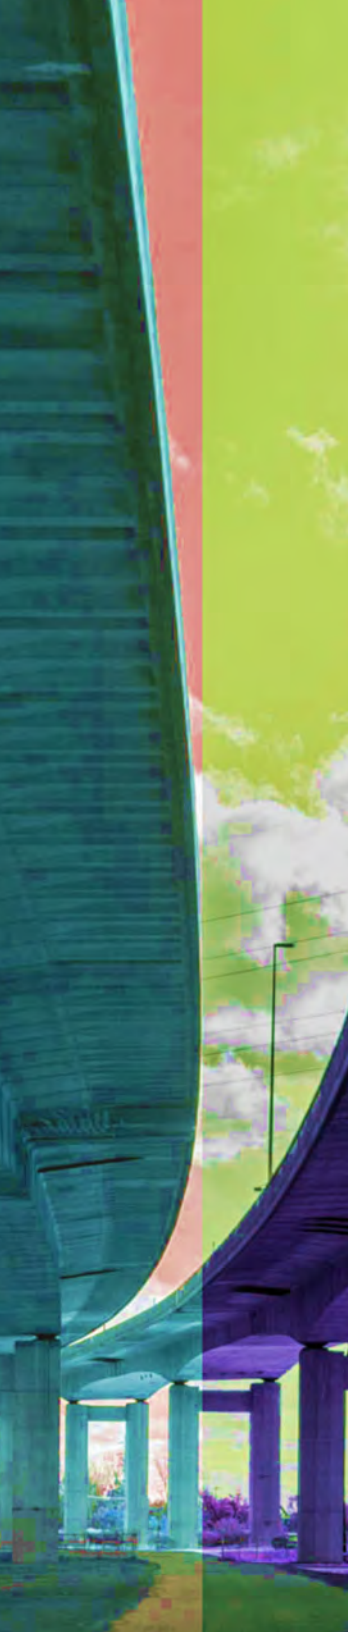

State funding for transportation primarily comes from vehicle registration fees, motor fuel taxes and additional general fund revenue. The current state motor fuel tax rate is 31.0 cents per gallon, with an annual increase tied to inflation that began Jan. 1, 2022, under PA 176 of 2015. For 2025, the increase is 3.1 percent. Additionally, the state levies a 6 percent sales tax on the wholesale and federal tax portion of motor fuel, but virtually none of this revenue goes to transportation.

Funding from motor fuel taxes and registration fees (excluding sales tax revenue) is deposited into the Michigan Transportation Fund (MTF), which functions similarly to the federal HTF but allows more flexibility in its use. The MTF receives approximately \$2.9 billion annually from fuel taxes and registration fees, with an additional \$600 million from the general fund starting in FY 2021, bringing the total to roughly \$3.5 billion annually.

After set-asides, the remaining MTF funds are distributed as follows: MDOT receives 39 percent for the State Trunkline Fund (STF), county road commissions receive 39 percent, and cities receive 22 percent. The Comprehensive Transportation Fund (CTF), which is designated for transit, receives about \$260 million annually, with an additional \$117 million from auto-related sales taxes.

8.3 Fiscal Constraint and Project Selection

The most important financial consideration when creating and/or maintaining a STIP is fiscal constraint. This means that each year's list of projects cannot exceed the amount of funding reasonably expected to be available in the fiscal year. Funding is considered "reasonably expected to be available" if the federal, state and local

funding amounts are based on amounts received in past years, with rates of change developed cooperatively between MDOT, transportation planning agencies and public transportation agencies. Note that these rates of change are not the same as inflation; rather, they are forecasts of the amount of funding that will be made available by the federal, state and local governments. In Michigan, this cooperative process is facilitated by the Michigan Transportation Planning Association (MTPA) whose members include the MPOs, with participation from MDOT, FHWA and FTA. The last approved federal growth rate for FYs 2026-2029 was 1.9 percent. This rate was updated and approved in 2024.

The State Transportation Commission establishes policies, goals and objectives that provide the basis for highway funding allocation decisions. MDOT developed an investment strategy process to accomplish the effective use of financial resources on the State Trunkline Highway Program. The process allocates an investment amount to various program categories (bridge, road, safety, etc.) annually, based on program improvement strategy, goals and statewide priorities. It sets the level of funding to achieve highway improvement priorities and provides a tool to constrain the overall statewide program against available revenues.

Project criteria can include pavement condition, traffic volumes, number of years since last repair and/or other factors. Michigan local agencies have a similar project selection process. Agencies throughout the state use asset management principles approved by the Michigan Transportation Asset Management Council, whose duties are prescribed by state law. Transit agencies each select projects based on internal assessment of capital and operational needs that are reviewed and approved by MDOT and/or FTA.

8.4 Year of Expenditure (YOE)

When MDOT, MPOs, RTFs and public transit agencies program their projects, they are expected to adjust costs using YOE dollars. YOE simply means that project costs have been adjusted for expected inflation. This is not the same as expected rates of funding change as discussed in the previous section. Each agency may have its own inflation factor(s), based on experience. However, MDOT has developed YOE factors for itself and any agency that has not developed its own. For the upcoming FY 2026-2029 STIP cycle, the YOE includes a 4 percent increase for FYs 2026, 2027, 2028 and 2029.

8.5 Summary: Resources Available for Capital Needs on the Federal-Aid Highway System

Table 8.1 contains a summary of the predicted resources that will be available for capital needs on the federal-aid highway system over FY 2026-2029. The only local (non-federal) funding included is funding required to match federal-aid funds.

This is usually about 20 percent of the cost of each project.

Table 8.5.1: Forecast of Resources Available for Capital Needs on the Federal-Aid Highway System (millions of dollars)

2026	2027	2028	2029
\$1,928.12	\$2,020.03	\$1,188.71	\$523.54

8.6 Estimate of Operations and Maintenance Costs for the Federal-Aid Highway System

Almost all federal-aid highway funding is restricted to capital costs; i.e., the cost to build and maintain the actual physical assets of the federal-aid highway system (essentially, all I, US and M-designated roads, plus most public roads functionally classified as “collector” or higher). O&M costs, such as snow and ice removal, pothole patching, rubbish removal, electricity costs to operate streetlights and traffic signals, etc., are the responsibility of MDOT or local road agencies, depending on road ownership. Nevertheless, federal regulations require an estimate of O&M costs on the federal-aid highway system over the years covered by the STIP. Table 8.2 contains a summary O&M cost estimate for roads on the federal-aid highway system. These funds are not shown in the STIP since most highway O&M costs are not eligible for federal aid. The amounts shown are increased by the agreed upon estimated YOE (i.e., inflation) factors.

Table 8.6.1: Forecast of Operations and Maintenance Costs on the Federal-Aid System (millions of dollars)

2026	2027	2028	2029
\$864.0	\$884.1	\$904.7	\$925.8

8.7 Summary: Resources Available for Capital Needs of Public Transit Agencies

Transit agencies receive their funding from a variety of federal, state and local sources. Federal funding is distributed, in large part, according to the population of the urbanized area and/or state. For example, Section 5307 (Urbanized Area Formula Grant) is distributed directly to large transit agencies located within the Grand Rapids, Kalamazoo, Lansing, South Bend, Ann Arbor, Detroit and Toledo TMAs (urbanized areas with more than 200,000 residents). Section 5307 funds are also distributed to federally specified transit agencies in urbanized areas between 100,000 and 199,999 residents. For areas with less than 100,000 population, the state can generally award funding at its discretion.

Other sources of funding are more specialized, such as Section 5310 (Transportation for Elderly and Persons with Disabilities) and Section 5311 (Formula Grants for Rural Areas).

The State of Michigan, through the MDOT Office of Passenger Transportation (OPT), also distributes CTF funding to match federal funding, for job access reverse commute service (providing access to available employment for persons in low-income areas), and for local bus operations (LBO). LBO operating funds are very important to the agencies as federal-aid funding for transit, like federal-aid funding for highways, is almost entirely for capital expenses.

Local funding can come from farebox revenues, a community’s general fund, millages and other sources. As with local highway funding, local transit funding can be difficult to predict. Therefore, this chapter will only include federal and state resources available for transit.

Table 8.3 contains a summary of the predicted resources that will be available for capital needs (and some operational needs, depending on the program) for public transit agencies during FY 2026-2029. Federal, state and local funding reasonably expected to be available is included.

Table 8.7.1: Forecast of Resources Available for Public Transit Capital Needs (millions of dollars)

2026	2027	2028	2029
\$1,424.30	\$226.37	\$235.90	\$191.14

8.8 Demonstration of Fiscal Constraint, FY 2026-2029

After determination of resources available for federal-aid highway and transit capital needs for FY 2026-2029, and matching those available resources to specific needs, a four-year program of projects is created within the context of the region’s transportation policies as contained in the FY 2026-2029 STIP. The list must be adjusted to each year’s YOY factor and then fiscally constrained to available revenues. Table 8.4 contains a summary of the cost of highway and transit projects programmed over the four-year STIP period, matched to revenues available in that same period. This table shows that the FY 2026-2029 STIP is fiscally constrained. Note: O&M costs of the federal-aid highway system are included in the text of this chapter; however, these costs are not included in the STIP itself, as nearly all highway O&M costs are ineligible for federal-aid funding.

Table 8.8.1: Demonstration of Fiscal Constraint FY 2026-2029 STIP (millions of dollars)

	2026	2027	2028	2029
Highway Funding	\$1,930.75	\$2,048.80	\$1,243.86	\$587.62
Highway Programmed	\$1,928.12	\$2,020.03	\$1,188.71	\$523.54
Transit Funding	\$1,424.30	\$226.37	\$235.90	\$191.14
Transit Programmed	\$1,424.30	\$226.37	\$235.90	\$191.14
Total Funding	\$3,555.05	\$2,275.17	\$1,479.76	\$778.76
Total Programmed	\$3,352.42	\$2,246.40	\$1,424.61	\$714.68
Difference	\$202.63	\$28.77	\$55.15	\$64.08

Table 8.8.2 demonstrates statewide fiscal constraint for the entire highway and transit programs, which includes both rural (non-MPO) and MPO programs in their entirety. Total new resources are equal to or more than total commitments for each of the four fiscal years. Overall, the financial information in this plan demonstrates that there are sufficient dollars available each fiscal year to deliver the proposed programs and projects contained in this report and the individual MPO TIPs. The financing of the plan is fundamentally sound and based on the best information currently available.

Table 8.8.2: Statewide Financial Constraint for FY 2026-2029

Fund Source	Total Revenue	Federal Revenue	Federal Commitment	State Commitment	Local Commitment	Total Commitment
FY 2026						
FY 2026, Local MPO-Based Constraints						
Carbon Reduction - Small MPO	\$2,243,000	\$1,753,000	\$864,192	\$0	\$490,000	\$1,354,192
Carbon Reduction - TMA	\$15,773,035	\$11,266,733	\$11,841,801	\$0	\$4,506,302	\$16,348,103
NHPP	\$0	\$0	\$0	\$0	\$0	\$0

*The STP-Exchange - Urban Counties template was created to hold transferred allocation that results from a local federal fund exchange between an urban county and a rural county. The revenue is transferred to the template after the specific fiscal year once MDOT has received the federal apportionment and the exchange agreement between the counties. The county is programming the projects based on board resolutions from each county.

Table 8.8.3 lists the financial constraint portion for the Rural/Non-MPO STIP for FY 2026-2029. This is financially constrained and demonstrates that there are sufficient revenues to meet the total commitments for each year.

Appendix D - Public Comments

Public Participation Efforts

The STIP teams works with the Office of Communications as well as its local partners and seven region offices (Bay, Grand, Metro, North, Southwest, Superior and University) to distribute announcements about public input opportunities and collect feedback for a 30-day period. MDOT used its public website, GovDelivery emailing list and social media accounts for notification. The STIP team paid special attention identifying and involving the underserved, minority and low-income population by holding public meetings at convenient and accessible locations and times, making materials available in alternative formats and languages upon request, and providing translators where there was an identified need.

Outreach efforts occurred in a few phases, each having their own goals and objectives. The period roughly from July 2024 to March 2025 focused on educating the public, advocacy groups and partners on how they could participate in the development of

the STIP process. The second phase included the release of the project list via the Michigan Transportation Planning Portal (MTPP), a website with an interactive GIS project map that had the ability to submit comments on specific projects, with outreach occurring from March 25 to Aug. 10, 2025. Once the STIP is federally approved, the ability will again become available for comments to be received on projects throughout the entire new STIP cycle from Oct. 1, 2026, to Sept. 30, 2029. The last phase of efforts included the formal 30-day public comment period beginning on July 10, 2025, and ending on Aug. 10, 2025, where comments were received on the document.

All public involvement pertaining to the STIP has been done in accordance with federal regulations found in 23 CFR 450.210 and included many activities as displayed in the table below.

Action	Public Activity	Public Comment Method	Timeframe	Notification Method	Use of Input	Results
MDOT	Draft STIP PPP released for review and comment.	Written comments submitted via web form, email, or US mail.	July - August 2024	Draft PPP was posted on MDOT website for a 45-day statewide public review and comment period.	Identify the most effective methods for engaging the public in the development of the STIP.	Comments received were included in the final STIP document.
MDOT	Notification of the 2026-2029 STIP development and public participation process to tribal and local government agencies.	Participation in upcoming meetings and written comment periods.	August 2024 – March 2025	Emailed STIP PPP and draft STIP to tribal and local government agencies.	Engage tribal governments and local governmental agencies in the STIP development process	Comments received were included in the final STIP document.
MDOT	Notification of the 2026-2029 STIP development and public participation process to trail and nonmotorized groups, and stakeholder groups.	Participation in upcoming meetings' written comment periods.	August 2024 – March 2025	Emailed STIP PPP and draft STIP to trail, nonmotorized, and partner groups.	Engaged trail, nonmotorized, and partners groups in the STIP development process.	Comments received were included in the final STIP document.
MDOT	Connect to MDOT region-level public involvement opportunities.	MDOT region offices provide information on the STIP at project-level public meetings held in regional areas.	August 2024 – March 2025	Region public meetings: MDOT sent notification via news releases, social media, and email distribution to partner group email subscriptions.	Engaged public and partners in the STIP development process.	Comments received were included in the final STIP document.

Appendix D- Public Comments

Action	Public Activity	Public Comment Method	Timeframe	Notification Method	Use of Input	Results
MDOT	Connect to Rural Task Force (RTF) stakeholders.	MDOT Statewide Planning Section staff provide information, presentation on STIP at RTF meetings as agenda item.	August 2024 – March 2025	MDOT sends information via email, requests to be on RTF agenda as presentation/discussion item.	Engaged public and partners in the STIP development process.	Comments received were included in the final STIP document.
MDOT	Connect to MPOs.	MDOT Statewide Planning Section staff provide information, presentation on STIP at MPO committee meetings and the Metropolitan Transportation Planning Association (MTPA) meetings as agenda item.	August 2024 – March 2025	MDOT sends information via email, requests to be on MPO agenda as presentation/discussion item.	Engaged MPO partners in the STIP development process.	Comments received were included in the final STIP document. A communication plan for the MTPP was developed and approved at an MTPA partner meeting.
MDOT	Connect to County Road Association of Michigan (CRA) and Michigan Association of Regions (MAR).	MDOT Statewide Planning Section staff provide information, presentation on STIP at MAR partner meetings as discussion item.	August 2024 – March 2025	MDOT sent information via email and was on MAR agenda as a discussion item.	Engaged county and regional planning agency partners in the STIP development process.	Comments received were included in the final STIP document.
MDOT	Connect to Small Urban Program.	MDOT Statewide Planning Section staff provide information, presentation on STIP at small urban committee meetings as agenda item.	August 2024 – March 2025	MDOT sends information via email, requests to be on Small Urban Committee agenda as presentation/discussion item.	Engaged county road associations, small cities, and transit agency partners in the STIP development process.	Comments received were included in the final STIP document.
MDOT	Connect to rural transit agencies.	MDOT Statewide Planning Section to provide information to agencies via email.	August 2024 – March 2025	Via MDOT Office of Passenger Transportation email subscription.	Engaged transit agency partners in the STIP development process.	Comments received were included in the final STIP document.
MDOT	Notification and instructions for the 2026-2029 STIP MTPP.	Comments about STIP and TIP programmed projects submitted via the website.	March 25, 2025 – Aug. 10, 2025	Emailed notification to the MPOs, RPAs, Byways Committees, and MDOT region planners for distribution. Presented information at RTF monthly meetings, Small Urban Committee meetings, and MPO Technical and Policy Committee meetings throughout the state.	Engage local agencies, partners, advocacy groups, and general public to comment on proposed projects within their regions.	Comments received and addressed according to the MTPP communication plan. Comments received through this portal are listed below.
MDOT	Provide draft STIP for 30-day public comment.	Written comments submitted via web form, email, or US mail.	July 10 - Aug. 10 2025	Prior to comment period, MDOT sends notification via news release, social media, and email distribution to stakeholder group subscriptions.	Engaged the public and all the partners listed above to comment on the overall document as well as projects within their regions.	Comments received were included in the final STIP document and listed below.

Appendix D - Public Comments

The 14 MPOs in Michigan were responsible for creating their own TIP documents and, as such, conducted their own public outreach and engagement efforts. Below is a table showing each MPO's public comment period start date, date of their public meeting, and date of the document being approved at their policy committee meeting.

MPO Area and Name	Public Comment Start Date	Date of Public Meeting	Policy Approval Date
Battle Creek (BattleCATS)	April 2, 2025	May 14 and 28, 2025	May 28, 2025
Bay City (BayCATS)	April 28, 2025	May 15, 2025	May 21, 2025
Benton Harbor (TWINCATS)	May 5, 2025	May 19 and June 17, 2025	May 17, 2025
Flint (GCMPC)	April 20, 2025	March 18 and 20, 2025 (Two meetings on March 20)	June 18, 2025
Grand Rapids (GVMC)	March 24, 2025	April 16, 2025	June 5, 2025
Holland (MACC)	May 5, 2025	May 21, 2025	June 2, 2025
Jackson (R2PC)	April 28, 2025	May 7 and 15, 2025	June 18, 2025
Kalamazoo (KATS)	Jan. 8, 2025	Feb. 25, 2025 Virtual webinars on March 13, 17 and 19, 2025	April 30, 2025
Lansing (TCRPC)	May 6, 2025	May 6, 2025	May 28, 2025
Midland (MATS)	April 14, 2025	April 17 and May 7, 2025	June 3, 2025
Muskegon (West Plan)	April 15, 2025	April 15, 2025	May 21, 2025
Saginaw (SATA)	May 23, 2025	June 7 and 13, 2025	June 26, 2025
Southeast Michigan (SEMCOG)	March 25, 2025	April 17 and 25, 2025 Numerous FAC meetings from August 2024 to April 2025	April 25, 2025
South Bend (NATS)	May 12, 2025	May 27 and June 17, 2025	May 17, 2025
Traverse City (TTCI)	March 7, 2025	April 23 and May 28, 2025	May 28, 2025

Public Participation and Results Summary

Between March 25 and Aug. 10, 2025, MDOT received 33 public comments on the draft FY 2026-2029 STIP. To promote awareness of and participation in the comment period, MDOT issued a news release and posted 11 social media posts across three platforms, with eight each on Facebook and X (formerly known as Twitter). Each post included information and a link to the STIP webpage where options for submitting comments were provided. Resources for people who require mobility, visual, hearing, written or other assistance were also publicized. Earned media included news websites and television channels in the Lake Orion, Negaunee, and Lansing viewing areas.

During the comment period, social media posts reached a total of 22,486 people, with 19,796 through Facebook and 2,690 through Twitter/X. Of this total, 53 engaged in some form over Facebook, including likes, shares, comments within the platform, and clicks on

the provided links to the MDOT STIP webpage. Corresponding data for Twitter/X was not available due to the monetary cost of acquisition.

Content for the FY 2026-2029 STIP period was provided both in a dynamic web format across four webpages, including the MTPP, as well as in a PDF format on the main STIP page. MDOT received a total of 1,584 views across 849 users on the STIP pages, and 1,204 views of the interactive map provided through the MTPP. The FY 2026-2029 PDF document had 97 total downloads. Type of device used to access the STIP pages was tracked, with 13.1 percent using a mobile device, 84.5 percent using a desktop, and 2.5 percent using a tablet. Comments received and addressed by platform over the March 25 - Aug. 10, 2025, comment period are shown and detailed below.

Appendix D- Public Comments

FY26-29 STIP PUBLIC COMMENT RESPONSES FROM MICHIGAN TRANSPORTATION PROGRAM PORTAL

Job ID	MDOT Region	Job Description	Comment(s) Received	Submitted By	Edits/Changes/Response
221781	University	Mill	Holy s#!^ this area needs a road diet and some dedicated bus lanes!	Alex L.	Thank you for your comment and for sharing your views and perspectives with us regarding this project. At this time, MDOT has not begun its engineering design process. We will add your email to our records to be you are included during future public engagement efforts on this topic.
221781	University	Mill	Please road diet Washtenaw, especially the stretch from where it turns into Huron all the way down to Stadium. It's harrowing to drive because the lanes are so narrow, the potholes could swallow a hatchback, and it's even worse if you walk, bike, or take the bus.	Molly K.	No response was requested.
221781	University	Mill	Please provide a road diet along Washtenaw Ave.	Jean L.	No response was requested.
221781	University	Mill	Please reconfigure from a 4 lane to 3 lane (with center turn lane) or, where possible, 2 lane with set aside bus/ROW. This stretch of Washtenaw between Stadium & South University has a lot of pedestrian traffic due to campus proximity and has far more car capacity than it needs. A narrower design would slow down drivers & simplify navigation for all users.	Scott T.	No response was requested.
221781	University	Mill	Please implement car lane reduction (road diet) and non-motorized transportation infrastructure (bike lanes) on Washtenaw Avenue between South University and Stadium Blvd. Four car lanes with no turn lane is very dangerous for all users. I am a driver, pedestrian, cyclist, and transit rider in Ann Arbor. I appreciate the other 4-to-3 car lane road diets that have been implemented recently, such as the one on Main Street, because they improve safety and comfort for me regardless of how I am getting around. Thank you for your consideration.	Laura H.	No response was requested.
221781	University	Mill	Please diet Washtenaw between Stadium and South University to one travel lane in each direction, a center turn lane, and physically protected bike lanes. Drivers frequently speed on this stretch within the city (next to schools, homes, parks, and businesses).	Mark S.	Thank you for your comment and for sharing your views and perspectives with us regarding this project. At this time, MDOT has not begun its engineering design process. We will add your email to our records to be you are included during future public engagement efforts on this topic.

Appendix D - Public Comments

Job ID	MDOT Region	Job Description	Comment(s) Received	Submitted By	Edits/Changes/Response
221781	University	Mill	Washtenaw between State and South University needs a road diet or another form of traffic calming. Too much speeding in heavily populated area with tons of pedestrians.	Barbara M.	Thank you for your comment and for sharing your views and perspectives with us regarding this project. At this time, MDOT has not begun its engineering design process. We will add your email to our records to be you are included during future public engagement efforts on this topic.
221781	University	Mill	Please road diet Washtenaw Ave in Ann Arbor from South University Ave to Stadium Blvd. Drivers drive too fast and too aggressively, and the road is too narrow in spots for the current lane configuration anyway. In addition, this road goes through residential areas adjacent to campus, and the current lane configuration encourages driver behavior that endangers pedestrians and cyclists.	Meredith K.	No response was requested.
221781	University	Mill	Washtenaw east of South University needs to be reconfigured. This should be three lanes with bike lanes.	Peter H.	No response was requested.
221781	University	Mill	Do not reduce the number of lanes. This road is already terrible.	Thomas T.	No response was requested.
222003	Bay	Construct roundabout; Fenton Road at Baldwin Road	Please do not tear out all of Fenton Road from Cook to Fenton in 2025 and then tear this intersection (Fenton and Bladwin) the year after to put a round about in. Please just wait and do it all at the same time.	Nicholas F.	Thank you for your comment. We understand the inconvenience that can come with road construction and appreciate your suggestion to coordinate the work from Cook Road to the Fenton and Baldwin intersection so that it's completed all at once. The reason the projects are scheduled in separate years is due to a combination of factors, including funding availability, project scope, and coordination with utility providers and other agencies. By phasing the work, we can better manage resources and minimize disruptions to traffic, businesses, and residents over time.

Appendix D- Public Comments

Job ID	MDOT Region	Job Description	Comment(s) Received	Submitted By	Edits/Changes/Response
222867	University	Microsurfacing; North Dixie Highway	Dixie Highway offers regional connectivity from Monroe, Sterling State Park to Frenchtown beach communities and beyond. It sees significant foot and bike traffic from daily commuters as well as heavy industrial traffic from the interstate and trucks hauling boats to the boat launch. Paint on the road, poor lighting, sparse crosswalks/sidewalks and lack of center islands provide no safety for vulnerable road users especially around the I-75 bridge and state park. Request a separated bike and hike trail with grade separated crossings. At a minimum the area needs sidewalks and lighted crosswalks near hotels, restaurants and busy intersections.	Anthony T.	Thank you for your interest in the Monroe County Road Commission's proposed 2026 microsurfacing project on North Dixie Highway. Microsurfacing is a preventative maintenance treatment that is applied to extend to service life of asphalt pavement. Sidewalks, crosswalks, lighting, and non-motorized facilities are beyond the scope and funding of this preventative maintenance project. The Monroe County Road Commission routinely acts as the grant sponsor for Townships or the County when they pursue funding for projects to construct or enhance non-motorized facilities. If there is interest in a future project of this nature along the North Dixie Highway corridor, we would recommend contacting Frenchtown Charter Township. You can also give me a call at (734)-240-5143 if you would like to discuss this further.
113501	University	Reconstruct possible ASCRL in sections; I-94 BL to M-14	Please do not let the City of Ann Arbor reduce the number of travel lanes. Traffic backs up now and it would be unusable.	Thomas T.	No response was requested
200122	Metro	Miscellaneous Bridge CPM; 37 structures on or over I-696 between Lahser and Dequindre Rd	When is the Barkman and Belanger overpass over I-696 have deck replacement	Brendan B.	Thank you for contacting the Michigan Department of Transportation (MDOT). In response to your question in the email below, Barkman and Belanger are both currently scheduled for Deck Replacements with substructure patching and bridge approach work in 2029. Please let me know if there is anything else I can help with.
213424	North	Construct Iosco Exploration Trail Phase 4 nonmotorized shared use pathway ; US-23 (Smith Street to East Point Road) AuSable Township MI	This listing has Forest Rd as the path. That is incorrect, the path was installed on US23, using the same start and end points.	Fred L. (Plainfield Twp Supervisor)	No response was requested

Appendix D - Public Comments

Job ID	MDOT Region	Job Description	Comment(s) Received	Submitted By	Edits/Changes/Response
213768	University	Road Diet, Intersection Realignment, Signal Modernization; Lake Lansing Road from Abbot Road to Hagadorn Road, Ingham County	As a regular driver along this road I am in support of this safety improvment!	Evan S.	No response was requested but comment was forwarded on to MPO.
214876	Southwest	Reconstruction from US-12 to Lafayette Street	JN#214876 - This project is indicated in FY 2026. This is a bit concerning because the local municipality was told last fall that the project was going to be done in 2029. How can others budget for projects when dates don't align?	Barry C. (City Engineer, City of Sturgis Engineering Dept)	Thank you for contacting the Michigan Department of Transportation. Based on what is programmed in JobNet, it looks like they've got ROW scheduled for 2026-2028. And they are looking to LET the project in December of 2028 with construction starting in the Spring of 2029.
215249	Grand	Resurfacing; Chicago Drive to 16th Street	"120th from Riley to 16th all needs to be re-surfaced. Both north and south bound. Pot holes. Man holes. Etc. Just horrible on car suspension. Especially the train tracks. Also, since Chicago dr was redone, IF you go the speed limit (north or south on 120th) you go airborne! What's up with that! (Only ""complaint"" from the BL redo.)"	Marcy H.	No response was requested but was forwarded on to MPO.
218821	Southwest	Vulnerable Road User Road Safety Audit; M-66 Wade to US-12, US-12 Centerville to Franks	"This project segment was originally scheduled to have limits of US-12 and the Indiana State Line. Why have the limits been altered? Also, the project is listed as FY2028 project. The municipality was told this project would be constructed during 2030. The ability to complete planned utility projects to meet MDOT's timeline requires an accurate/believable schedule from MDOT. What is the correct schedule for work? This makes more sense now. We have had two pedestrians/skateboarder killed just this spring between US-12 and just south of Wade Street. The Safety audit is great, especially if the improvements can be designed into the project construction scheduled for 2030. I was referring to the actual construction project."	Barry C. (City Engineer, City of Sturgis Engineering Dept)	Thank you for contacting the Michigan Department of Transportation. This project has been programmed as a Safety Audit and it's my understanding that this will be a "walk-around" type study where a local partners and a consultant hired by MDOT goes out and reviews the area and try to identify needed spot improvements for bicyclists and pedestrians. Hopefully this provides clarification.

Appendix D- Public Comments

Job ID	MDOT Region	Job Description	Comment(s) Received	Submitted By	Edits/Changes/Response
219059	North	Mill Crown Correction, and Overlay, ADA Ramp Upgrades; 14th Street from US-31 (Division Street) to Railroad Crossing	14th needs to be reconstructed the road is totally failing. Need to take into consideration the needs of bicyclists along this stretch.	Ken B.	No response was requested but comment was forwarded on to MPO.
220667	Superior	Bridge Capital Preventive Maintenance; Various Locations - City of Sault Ste. Marie	City has MDOT multibridge work occurring w OHM 2026 as well. Would be good to coordinate as detour routes and timing will be critical.	Tracey L. (Soils & Structures, Inc.)	Thank you for contacting the Michigan Department of Transportation (MDOT) with your comments related to the proposed 2026 bridge projects in the City of Sault Ste. Marie. The MDOT Newberry Transportation Service Center (TSC) will follow-up with the City of Sault Ste. Marie to discuss current project scopes and Maintenance of Traffic (MOT) plans.
220793	Superior	Safe Routes to School Pedestrian Improvements; Citywide, City of Negaunee	This roundabout needs to happen sooner than later - can it be bumped up in priority rather than losing funding for it by 2029	Kyle W.	No response was requested.
220933	University	On-street bicycle lanes; Grand River Avenue to Burcham Drive	In support of this improvement!	Evan S.	No response was requested.
220975	University	Asphalt Overlay over Chip Seal from Grass Lake Village Limits to Jackson County Line.	Work on this section of road is sorely overdue	Joe D.	No response was requested.

Appendix D - Public Comments

FY 2026-2029 STIP PUBLIC COMMENTS

ID	Date received	Please use the space below to provide comments.	Street Address, City, State, ZIP Code
1	July 10, 2025	MDOT should look at adding a hill climbing lane for trucks on US 2 from CR 577 to near the Norway City limits, WB lane, in Dickinson County. I can't count the times i am forced to slow down traveling West on US-2 because some loaded truck pulled out on US 2 by the bear and is just creeping along up the hill.	540 Cass Ave, Kingsford, MI 49802
2	July 10, 2025	We need to increase our investment in roads. We need more passing lanes along M-35 between Menominee and Escanaba. Continue roadside mowing so you can see the deer along the edges of the road.	
3	July 10, 2025	The cutbacks in rural transit agencies is hurting these agencies. I do not understand why we work so hard to build up transit systems only to turn around and cut back the funding amounts. This is shutting down some needed systems, depriving citizens of their only transportation method. This also creating job losses in the region.	1031S County Road 442, Cooks, MI. 49817
4	July 11, 2025	South Davis Rd., IRONWOOD, MI 49938 (last paved in 1994)	
5	July 11, 2025	We need passing lanes on M35 between Escanaba and Menominee. There is one but not nearly enough for all the traffic that goes through there. To many semi's and campers. Makes it very hard to pass and makes it very dangerous	2701 1st Ave.South, Apt. 414, Escanaba, Michigan 49829
6	July 13, 2025	US-31 thru Charlevoix Township and the City of Charlevoix (Barnard Rd to Mercer Blvd) is significantly deteriorated. No improvements are shown in the 2026-29 STIP. Our township believes that this road should be improved within gthe STIP timeframe.	12491 Waller Rd., Charlevoix, MI 49720
7	Aug. 4, 2025	Please put in a center turn lane on M-37 North from 96th st to M-82 E. in Newaygo Co.	
8	Aug. 4, 2025	Each funding cycle is a great opportunity to add some sort of light rail to Metro Detroit. While I would prefer a People Mover extension, a streetcar similar to the Q-Line would suffice. Light rail is easier to access for the disabled compared to busses, and tourists don't ride busses (the NFL draft numbers show this pretty clearly). I oppose ANY lanes dedicated to autonomous vehicles, as they offer low throughput, and taxpayers shouldn't be funding private companies.	
9	Aug. 10, 2025	I'm suggesting a roundabout at the corner of US31 and West Silver Lake Road near Grawn, MI. The angle of the road for northbound traffic makes it more difficult for southbound turning traffic to see oncoming traffic. The railroad crossing (only currently being used for a tourist business) also makes for a confusing corner for traffic not knowing where to stop and/or proceed.	Culver Road Traverse City, MI

State Transportation Improvement Program (STIP)

[Home](#) > [Programs](#) > [Planning](#) > [STIP](#)

Michigan's State Transportation Improvement Program (STIP) provides information regarding the programs and projects to which state and local transportation agencies have committed over the next four years and verifies that new resources available for transportation are sufficient to finance those improvements.

Michigan Transportation Program Portal

Each state is required under 49 U.S.C. 5304(g) to develop a Statewide Transportation Improvement Program covering a period of at least four years. The STIP is a staged, multi-year, statewide intermodal program of transportation projects, consistent with the statewide transportation plan and planning processes as well as metropolitan plans, transportation improvement programs (TIPs), and planning processes.

State Transportation Improvement Program (STIP)
2026-2029 Draft

The draft listing of projects for the 2026-2029 State Transportation Improvement Program (STIP) is available for review. To provide feedback, select a project on the map and use the link in the pop up.

The State Transportation Improvement Program (STIP) is a required four-year planning document that lists road, bridge, transportation alternatives, and transit projects that the state intends to fund with federal aid provided under the Federal Aid Transportation Program in Fiscal Years (FYs) 2026-2029. The primary purpose of this document is to provide information regarding the programs and projects to which state and local transportation agencies have committed resources to over the next four years. This document verifies that transportation revenues are available and sufficient to finance these improvements. This document gives the traveling public a better understanding of how improving roads they traverse on a daily basis come to fruition.

A note about the years shown: Projects are displayed by the year of obligation, meaning the year in which federal funds are/will be approved to start spending them on a particular project. Construction typically starts the following year, but there are exceptions.

A note about the project locations: Road & bridge project locations should be accurately reflected on the map. Transit projects, however, will be mapped to the transit facility and won't necessarily reflect where the project is taking place. For more information about transit projects visit the Office of Passenger Transportation Website

Get Involved: The earlier you can get involved and provide comments the more impact your input can have. The best way to influence a project in your area is to participate in early planning public meetings. To learn more about major projects and transportation studies, visit [this MDOT's Projects and Programs website](#).

Want to report a problem with a road, highway or bridge (I,M or US route)? If so, [contact MDOT](#) with the road name, closest intersection, city/town, and description of the issue.

Not seeing a project? There are numerous reasons projects may not appear on the STIP map, including the funding used, the type of project, and more. For more details, visit the [Help/FAQ's](#) tab.
