

I-94 Road and Bridge Construction in 2018 and 2019

Frequently Asked Questions (FAQs)

1. Are you building an additional travel lane in each direction?

- We will be building the new bridges to accommodate the additional travel lane in each direction. The additional lane will not be constructed with this project.
- We will be connecting the merge/weave lanes between the Cooper Street ramps and the Elm Street ramps.

2. Will sound walls be constructed with this project?

- Sound walls will not be constructed with this project. When the additional through-lane is constructed, a re-evaluation will be done to determine if a noise analysis is required and if any potential mitigation is needed.

3. How long will the Cooper Street bridge be out of service?

- Approximately March-October 2019. More detailed information will be shared in early 2019.

4. Are you going to buy my property?

- No. All the property acquisitions for the current project are complete.

5. How will I get around on I-94 during the project?

- Two lanes will be open in each direction during the daytime. Nighttime lane closures will occur. Ramps will be detoured during the project.

6. How will you be getting rid of the rock along I-94 without damaging cars?

- The contractor will be required to perform this work in a manner that is safe and effective, similar to other complex work adjacent to traffic.
