I-94 design-build project update: Traffic shifts on I-94 and US-127/M-50

April 12, 2021 -- Last week, crews continued building temporary shoulder widenings and the new westbound I-94 bridge over West Avenue. Additionally, crews continued to tackle a large peat excavation and swamp backfill operation where the new westbound I-94 roadway will be near the US-127/M-50 interchange.

During the coming weeks, the contractor will continue building the new bridge and will be shifting eastbound and westbound I-94 onto the outside shoulders from Airport Road to West Avenue to build temporary crossovers for future stages of work. Additionally, they will be shifting northbound and southbound US-127/M-50 in the coming weeks to build the median crossover that will be used for future traffic maintenance on US-127/M-50.

Traffic maintenance for this upcoming week will include:

The northbound US-127/M-50 ramp to westbound I-94 being closed, as well as one lane being closed on both northbound and southbound US-127/M-50 from Sparks Street to Springport Road. Nighttime single-lane closures will be in place Monday, Tuesday, and Wednesday of this week on westbound and eastbound I-94. Shoulder closures with a reduced speed zone will remain in place along eastbound and westbound I-94 from Airport Road to Dettman Road.
