### 1.0 EXECUTIVE SUMMARY

This report documents a Project Area Contamination Survey (PACS) performed for the Blue Water Bridge (BWB) Plaza (the Project Area) for the Michigan Department of Transportation (MDOT). A PACS was previously conducted in 2002 to inform the National Environmental Policy Act (NEPA) decision. The purpose of this PACs is to reevaluate and inform a decision for the NEPA reevaluation. The Project Area covers approximately 99 acres and is roughly bounded by I-94/I-69, Riverside Drive, Scott Avenue, and the Black River on the west, Riverview Street on the north, Pine Grove Avenue to Church Street to 10th Avenue on the east, and Scott Avenue and Lyon Street on the south. The Project Area is situated in Port Huron, St. Clair County, Michigan as shown on Figure 1 in Appendix A.

The purpose of the PACS is to investigate parcels of property for known or potential environmental contamination that could affect the Project's design, cost, or schedule. The primary objectives in conducting the PACS are to determine: 1) whether any recognized environmental conditions (RECs) exist in connection with the Project Area; 2) if a Preliminary Site Investigation (PSI) is necessary to evaluate the RECs; and 3) to provide suggested mitigation for any issues.

The PACs evaluation included the following activities: 1) governmental database records search, with a review of supplemental state or local agency records to help clarify key information in the database search report, as appropriate; 2) site reconnaissance to help identify properties or uses that could potentially impact the Project Area as well as to verify the database findings; and 3) historical sources review (aerial photographs, Sanborn fire insurance maps, street directories, and topographic maps) to obtain information regarding the historical use of properties near or within the Project Area.

The current PACS identified 27 RECs both within and immediately adjacent to the Project Area as shown on Figure 2 in Appendix A. The list number of the RECs below correspond to the REC numbers illustrated on Figure 2. The following table summarizes the RECs:

- The Wilton's TV Appliance Repair facility at 2703 Pine Grove Avenue, immediately north
  of the Project Area is a UST facility. The UST was reportedly removed, but no information
  was available regarding whether any contamination existed on the property. Because this
  property is immediately adjacent to the Project Area, and groundwater flow in the area
  generally flows south, contaminants could have migrated and impacted the Project Area.
- 2. An instant oil change facility has been present at 2624 14<sup>th</sup> Avenue, immediately west of the north part of the Project Area since the late 1980s. Before that, the property was occupied by an auto body repair facility and a battery sales facility. No information is available regarding whether contamination exists on the property. Because this property

### **115**D

is immediately adjacent to the Project Area, contaminants could extend onto or have migrated and impacted the Project Area.

- 3. The former Koehn's Texaco service station at 1719 Hancock Street was a former gas station during at least the 1970s and was situated immediately north and west of the Project Area. No information is available regarding whether the USTs associated with the former gas station were removed, or whether soil and/or groundwater contamination exists in connection with the facility. Groundwater on several nearby properties has been shown to flow to the south, which would allow contaminants to migrate and impact the Project Area.
- 4. The former Star Location 1268 facility at 2601 13<sup>th</sup> Avenue is situated within the northern part of the Project Area. This is a LUST facility with an open investigation, and soil and groundwater contamination exists on the property.
- 5. The Speedway #8825 facility at 2619 and 2621 Pine Grove Avenue is immediately east of the Project Area. Contamination exists in connection with this facility that extends under Hancock Street, and groundwater flow at the facility has been shown to flow to the south toward the Project Area.
- 6. The Speedway #7721 facility at 2610 Pine Grove Avenue is northeast of the Project Area. Soil and groundwater contamination associated with this facility exists and has migrated to the southwest toward the Project Area.
- The BP gas station (former Amoco Oil) at 2539 Pine Grove Avenue is within the excluded area and in close proximity to the Project Area. Contamination exists on the property at concentrations exceeding unrestrictive regulatory criteria and may have migrated and impacted the Project Area.
- 8. The former Port Huron Towing business occupied 1700 Hancock Street, mostly within the excluded area between the northern part of the Project Area and the north-central part of the Project Area, from at least the mid-1950s through the mid-1970s. Aerial photographs show what appears to be an impound yard or a junkyard with many vehicles parked in it. The vehicles appear to have leaked fluids, contaminating the soil and groundwater. Construction of a sewer line through the area occupied by the former towing company encountered contaminated soil. The contamination may extend onto or have migrated and impacted the Project Area.
- 9. The Duty Free Americas facility at 2425 Pine Grove Avenue on the northern portion of the Project Area was formerly the location of an automobile manufacturing facility and machine shops with both aboveground and underground petroleum storage and probable solvent

use. Soil and groundwater contamination likely exists in connection with the former manufacturing operation.

- 10. The former United 4006 Tulsa Oil facility at 2401 Pine Grove Avenue is situated on the northern part of the Project Area. It was a gas station from the early 1950s through the 1980s. Although the USTs were removed, no information is available regarding whether contamination is present in connection with the former gas station operation.
- 11. The former USA Station #315 facility at 2432 Pine Grove Avenue is on the northern part of the Project Area and is an open LUST facility. The property is contaminated with petroleum compounds, the extent of which has not been defined.
- 12. The former Pete's Car Care facility at 2402 Pine Grove Avenue is an excluded property at the northeast corner of Pine Grove Avenue and Elmwood Street and is surrounded by the Project Area. The property is contaminated with petroleum compounds, the extent of which has not been defined, and could have migrated and impacted the Project Area.
- 13. The Detroit Edison Pine Grove Substation at 1508 Elmwood Street has been present on the Project Area since 1926. The electrical equipment within the substation may have leaked during the last 95 years, contaminating the soil and/or groundwater with transformer oil and other substances, including polychlorinated biphenyls (PCBs).
- 14. The ""MI Dept. of Transportation Blue Water Bridge" facility at 1410 Elmwood Street within the Project Area is listed in the LUST database and has had multiple releases reported. At least one of the release investigations is still listed as open, indicating that contamination exists on the Project Area.
- 15. The former Koppels Shell at 2327 Pine Grove Avenue was a gas station in the 1950s and early 1960s and was situated on the central portion of the Project Area under the existing bridge plaza. No information is available regarding whether the USTs were removed or whether soil or groundwater contamination exists. This area is currently under about 25 feet of fill.
- 16. The former Moser Coal Yard at 2201 Pine Grove Avenue was on the central portion of the Project Area during the 1950s and 1960s. Residual coal apparently remained on the property after this operation ceased. Coal residue contains heavy metals, and can contaminate soil underlying coal storage areas, particularly when stored on the ground. This area is currently under about 25 feet of fill.
- 17. The former Bradley's Citgo facility at 2307 Pine Grove Avenue was a gas station during the 1950s and 1960s and was situated on the central portion of the Project Area under the

existing bridge plaza. No information is available regarding whether the USTs were removed or whether soil or groundwater contamination exists. This area is currently under about 25 feet of fill.

- 18. The former Pete's Marathon Car Care facility at 2308 Pine Grove Avenue was a gas station from the 1940s through the late 1970s and was situated on the central portion of the Project Area under the existing bridge plaza. The USTs were removed and some of the contaminated soil was excavated and disposed; however, residual contamination remains. The release investigation is currently listed as open. This area is currently under about 25 feet of fill.
- 19. The former London Farm Dairy facility at 2119 12<sup>th</sup> Avenue occupied the south-central part of the Project Area and is a LUST facility with an open investigation. Soil and groundwater contamination exists on the property. In addition, WSP observed a hydraulic hoist remaining in the ground at the location of the former garage building on the east part of the property.
- 20. The former Guizar's Auto Company at 2107-2111 Pine Grove Avenue was a gas station and auto repair facility situated on the southeast part of the Project Area from the 1940s through the 1960s. There is no information available regarding whether the USTs associated with the former gas station were removed or whether soil and/or groundwater contamination exists.
- 21. The former Ayotte Dugal B facility at 2108 Pine Grove Avenue was a gas station that operated immediately east of Pine Grove Avenue and north of (abandoned) Mansfield Street within the Project Area from the 1960s through the 1980s. No information is available regarding whether the USTs were removed or whether soil or groundwater contamination exists.
- 22. The former One Hour Cleaners facility at 2037 Pine Grove Avenue was situated on the southeast part of the Project Area. This facility was a gas station from about 1940 through the 1960s, and a dry cleaner from the late 1960s through 2001. Soil and groundwater contamination associated with either or both former businesses likely is present on the property.
- 23. The former Shell Port Huron #3 facility at 2014 Pine Grove Avenue was situated between Pine Grove Avenue and 10<sup>th</sup> Avenue on the southeast part of the Project Area was a gas station from the early 1970s through the late 1990s and is a LUST facility. The investigation is listed as open, and contamination exists on the property.

- 24. A former gas station was present at 2004 10<sup>th</sup> Avenue, immediately northeast of the southeast portion of the Project Area from the 1930s through 1950s. No information is available regarding whether the USTs were removed, or whether soil and/or groundwater contamination exists in connection with the former operation. Groundwater at a nearby facility was shown to flow to the west, which could allow contamination to migrate and impact the Project Area.
- 25. The property at 1413 Lyon Street and 1915 10th Avenue, situated within the southeast portion of the Project Area, were occupied by auto repair facilities and oil storage beginning in the late 1940s and lasting until the 1970s. Auto repair facilities often have contamination associated with them as a result of leaks, spills, drips, poor housekeeping, and/or improper waste disposal practices.
- 26. A gas station immediately southeast of the southeast corner of the Project Area has been at 1912-18 Pine Grove Avenue from 1959 through 2014, and a release was reported in 1991. High concentrations of soil and groundwater contaminants are present on the property, and contamination has migrated off the property onto the Project Area. An activity and use limitation (AUL) is filed with MDOT for contamination that remains in the Pine Grove Avenue right-of-way.
- 27. The property at 1310 Lyon Road is immediately south of the southeast part of the Project Area and operated as a gas station from the late 1940s through the early 1970s. Contamination may have migrated from this facility onto the adjacent Project Area.

Based on the information gathered as part of this PACS evaluation, review of the relevant data, and understanding of the planned activities, WSP recommends the following activities be completed:

- 1) Conduct Preliminary Site Investigation (PSI) testing activities to evaluate the above RECs for the presence or absence of contamination to serve as a basis for worker protection and contaminant material handling, management, and disposal.
- 2) The open LUST investigations for incidents within the Project Area should be brought to closure in accordance with Part 213 of Michigan's Natural Resources and Protection Act of 1994 (1994 PA 451 Part 213) so that proposed construction activities do not exacerbate contamination or impede investigatory or cleanup activities that need to be conducted.
- The construction contract should include provisions to handle, manage, and dispose of contaminated waste in case unanticipated contamination is encountered during project construction activities.

## vsp

This executive summary briefly discusses the conclusions of this assessment. Reading it should not be considered a substitute for reading the entire report. Only the report in its entirety should be relied upon to provide complete information regarding the observations when reviewing the environmental conditions for the Project.

### 2.0 INTRODUCTION

The work for this PACS was completed by Adam Heft and reviewed by David VanGoethem. All activities were completed by an Environmental Professional, as defined in §312.10 of 40 CFR Part 312. Both individuals have the specific qualifications based on education, training, and experience to assess a corridor of the nature, history, and setting of the Project.

This PACS follows the guidance set forth in Section 14.13 of the MDOT Road Design Manual and detailed in Task 2810: Project Area Contamination Survey of the MDOT Program/Project Management System Task Manual and was conducted in general accordance with American Society of Testing Materials (ASTM) E1527-13: Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Although this evaluation incorporates several elements of a Phase I Environmental Site Assessment (ESA), this assessment does not constitute an "all appropriate inquiry" (AAI) in accordance with U.S. EPA's "Standards and Practices for All Appropriate Inquires" (40 CFR Part 312), nor a complete Phase I ESA in accordance with ASTM E1527-13.

### 2.1 Purpose of PACS

The purpose of the PACS is to investigate parcels of property or areas of known or potential environmental contamination that could affect the Project Area's design, cost, or schedule. The primary objectives in conducting the PACS are to determine: 1) whether any RECs exist in connection with the Project Area; 2) if PSI testing is necessary to evaluate the RECs; and 3) to provide suggested mitigation for any issues.

### 2.2 Project Location

The Project Area is bounded by roads as follows: from the I-94/I-69/Hancock Street intersection, south along I-94/I-69 to Riverside Drive, northwest to Scott Avenue, then southeast along Scott Avenue to the Black River, then across I-94/I-69 along Scott Avenue, east to the a point east of 11<sup>th</sup> Avenue, then generally southeast to Lyon Street, east to Poplar Street, north to Scott Avenue and 10<sup>th</sup> Avenue, north along 10<sup>th</sup> Avenue to Elmwood Street, west half a block then north to Church Street, west to Pine Grove Avenue, northwest along Pine Grove Avenue to Riverview Street, then west to I-94/I-69. Several properties within the northern part of this area are excluded from this portion of the Project Area (collectively referred to as the "Excluded Area"): property

occupied by McDonalds Restaurant, the BP gasoline station, the Wendy's Restaurant, The Speedway gas station at the northwest corner of Hancock Street and Pine Grove Avenue, the Penzoil facility and a florist shop at the northeast corner of Hancock Street and 14<sup>th</sup> Avenue, and a vacant parcel at the northeast corner of Pine Grove Avenue and Elmwood Street. The Project Area is located within the city of Port Huron, St. Clair County, Michigan as shown on Figures 1 and 2 in Appendix A.

### 2.3 General Project Background and Description

The Blue Water Bridge (BWB) is the third-busiest crossing between the United States and Canada, and the second busiest truck crossing between the two countries. MDOT began studying the BWB plaza for expansion in 2002. The study was driven by the small size of the existing plaza (18 acres), along with the need for increased border security, new inspection technologies, procedures, and policies, traffic growth, safety concerns, and aging and functionally obsolete infrastructure leading to the plaza.

MDOT successfully completed an Environmental Impact Statement (EIS) and obtained a Record of Decision (ROD) through the Federal Highway Administration in 2009, completing environmental clearance for a recommended alternative to move forward into detailed design and construction of a 38-acre plaza expansion for a total plaza size of 56 acres. At that time, the project was divided into four separate construction contracts. Additionally, significant real estate acquisition occurred resulting in the purchase of 125 residences and 16 businesses by MDOT for the plaza and corridor expansion.

In May 2010, Customs and Border Protection (CBP) announced it could not fund their portion of the plaza expansion. In response MDOT and CBP created a more affordable plaza expansion proposal consisting of a 16-acre expansion that would only process commercial inspections. This revised alternative was defined in the Blue Water Bridge Land Port of Entry Feasibility Study Revision on behalf of the General Services Administration (GSA) in December 2011.

A \$30 million Transportation Investment Generating Economic Recovery (TIGER) grant and other sources provided funding to complete the first construction contract in 2012 which involved the reconstruction of 2.2 miles of the I-94/I-69 corridor approaching the BWB plaza, and the replacement and widening of the I-94/I-69 bridge over the Black River.

In 2013, MDOT investigated a more comprehensive solution to replace the reduced proposal announced in 2010, which did not address many of the operational and circulation issues that exist at the current plaza. MDOT updated the BWB master plan, which included the concept of a revised 33.5-acre expansion that provides a better solution for future plaza needs. This option remains within the approved footprint of the ROD.

The current project primarily consists of refining the master plan alternative, completing an environmental re-evaluation and feasibility study with GSA, CBP, and other federal partners including the United States Department of Agriculture (USDA), and United States Food and Drug Administration (FDA) within the plaza.

The plaza alternative would be constructed on the west side of Pine Grove Avenue and to the north and south of the existing plaza. The proposed expansion includes new customs processing and inspection for commercial vehicles, relocation of Duty Free to the south side of the plaza, new passenger vehicle secondary inspection on existing plaza, replacement of toll facilities, new MDOT administration building, new satellite maintenance facilities, reconfiguration of the plaza, new exit control to deter port runners, new exit ramp to Pine Grove Avenue and provides three outbound lanes through the plaza.

An environmental re-evaluation is occurring to review environmental impacts due to changes in the project design, scope, affected environment or proposed mitigation, and provide updated analysis required by any new laws, regulations, or guidance established since the 2009 ROD.

### 2.4 PACS Scope-of-Work

This PACs evaluation included the following activities: 1) governmental database search by Environmental Data Resources (EDR), with review of supplemental state or local agency records to help clarify key information in the EDR report, as appropriate; 2) site reconnaissance to help identify properties that could potentially impact the Project Area as well as verify the EDR database findings; 3) historical sources review (aerial photographs, Sanborn fire insurance maps, street directories, and topographic maps) to obtain information regarding the historical use of properties in the Project Area; and 4) an interview with an MDOT representative about historical activities within the Project Area. This PACS report was prepared to discuss the information gathered through the above activities.

### 2.5 Deviations

No deviations from the above scope of work occurred.

### 2.6 Significant Assumptions

Certain information contained in this report was obtained from agencies and various other sources. In preparing this report, WSP relied on the information provided by these sources unless WSP had actual knowledge the information was incorrect or believed that certain information was incorrect based on other information obtained while performing the study. Except as discussed in the report, WSP did not verify the accuracy of the information provided to it.

### 2.7 Special Terms and Conditions

In the professional judgment of WSP, the scope of this investigation was sufficient to determine whether further investigation is needed, given the nature and specific circumstances of the Project. WSP performed this evaluation in conformance with the care and skill currently exercised by reputable environmental consulting firms practicing under similar conditions. No other warranty or representation of any kind, expressed or implied, at common law or created by statute, is extended, made or intended by WSP's rendering of consulting services or furnishing oral and/or written reports of its findings.

Contaminants may be hidden in subsurface materials, having been intentionally covered, or because they were covered by foliage, water, snow, concrete, asphalt, or other materials. This contamination may not be present in predictable locations. The most that WSP could do is formulate a logical assessment program with reasonable time and cost limits to reduce, but not eliminate, the client's risk of later discovering previously unknown contamination. More extensive exploration could reduce the probability of finding contamination, if present; however, even after extensive exploration, WSP would be unable to say with total certainty that no environmental issues are present in connection with the Project Area.

WSP conducted what it believes was an appropriate inquiry for a PACS. This inquiry was not an exhaustive assessment. A point exists at which the cost of the information obtained, or the time required to gather it outweighs the usefulness of the information and, in fact may be a material detriment to the orderly completion of the report. WSP attempted to balance the cost and time to perform this evaluation with the need to reduce uncertainty about unknown conditions by obtaining additional information.

No warranty can be made that conditions observed were representative of areas not observed. Tests or data collected for this report were obtained only for the purposes stated in this report and should not be used for reasons other than those intended.

This report does not constitute legal advice, nor does it purport to give legal advice. Environmental conditions and regulations are subject to constant change and reinterpretation. It should not be assumed that current conditions and/or regulatory positions will remain constant. Furthermore, because the facts stated in this report are subject to professional interpretation, differing conclusions could be reached by other Environmental Professionals.

### 2.8 Reliance

WSP has no obligation to any third party who intends to or will rely on this report and specifically disclaims such responsibility. WSP assumes no obligation for reporting any facts revealed by the

PACS or contained in the report to any entity other than MDOT. MDOT may rely on the conclusions in this report.

### 3.0 RECORDS REVIEW

Reasonably ascertainable documents and photographs were searched to assist in compiling information about the historic use of the Project Area. These reasonably ascertainable items included local governmental records, regulatory agency records, aerial photographs, historical topographic maps and street directories. An EDR report was obtained, which identified facilities included in governmental databases that are known to be contaminated or that use contaminating substances.

### 3.1 Federal and State Environmental Database Record Sources

Databases maintained by various state and federal agencies were reviewed for information regarding the Project and nearby properties. The compilation of data was performed by EDR. EDR searches governmental agency databases for information about contaminated properties and potentially contaminated properties within a specified search range buffer from the alignment. EDR searched standard distances ranging from "target property" to one mile from the approximate Project Area limits for all databases. Information regarding the listed facilities, relevant to this Project, is included in the EDR report in Appendix B.

The "Target Property" boundary depicted in the EDR report is not an exact representation of the Project Area, the boundaries of which have changed somewhat since the EDR search report and historical information sources were ordered. The boundary depicted on the EDR documents is a reasonable approximation of most of the Project Area and was sufficient to conduct an adequate evaluation.

The facilities within certain relevant databases were reviewed to ascertain the potential impact of these facilities on the Project Area. The evaluation considered (a) the likely contaminating substances that were or could have been released, (b) the pathways these contaminants would likely follow to reach surface water or underlying groundwater, (c) the potential that groundwater or surface water would migrate from these facilities onto or beneath the Project Area, and (d) the potential that pumping from water wells in the area might influence the movement of groundwater and contaminants.

When facilities were identified as being within the search distance, they were included and mapped in the EDR report. Several facilities in the EDR report are unmapped (referred to as "orphan" sites) due to an incomplete address, an inaccurate address, or a street address that could not be accurately identified. Where possible, the locations of the unmapped sites were

J:\env\31000318.001\BWB PACS report.docx

ascertained, and the potential impact of these sites was evaluated for this assessment. A brief summary of each of the relevant databases and the facility listings is presented below. The databases deemed relevant by WSP generally included those that either indicate contamination is known or likely present, was once present and has been remediated, or where chemicals or waste are currently or formerly used, stored, generated, or disposed.

#### 3.1.1 NPL: National Priorities List

The National Priorities List (NPL) identifies the most serious hazardous waste sites regulated under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Sites on the NPL have been targeted by the U.S. EPA for priority cleanup. This database was last updated in January 2022.

No NPL facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.2 Proposed NPL: Proposed National Priorities List

This database includes sites that have been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing. This database was last updated in January 2022.

No Proposed NPL facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.3 Delisted NPL: Delisted National Priorities List Sites

The NPL identifies the most serious hazardous waste sites as defined by CERCLA regulations. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) allows the U.S. EPA to remove sites from the NPL when no further response is appropriate. This database was last updated in January 2022.

No Delisted NPL facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.4 SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the U.S. EPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act

## vsp

(CERCLA). This dataset also contains sites which are either proposed to or on the NPL and the sites which are in the screening and assessment phase for possible inclusion on the NPL. This database was last updated in January 2022.

No SEMS facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.5 SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the NPL, unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site. This database was last updated in January 2022.

No SEMS-ARCHIVE facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.6 CORRACTS: Corrective Action Report

The CORRACTS database includes facilities that handle hazardous wastes and at which RCRA corrective action has occurred. This database was last updated in February 2022.

No CORRACTS facilities were identified as being within the applicable search distance of the Project Area.

## 3.1.7 RCRA-TSDF: Resource Conservation and Recovery Act - Treatment, Storage, or Disposal Facilities

The Resource Conservation and Recovery Act - Treatment, Storage, or Disposal Facility (RCRA-TSDF) database is obtained from the U.S. EPA's RCRA Information System (RCRIS). RCRIS contains data compiled for RCRA and the Hazardous and Solid Waste Amendments (HSWA) of 1984. TSDF sites are defined in 40 CFR 260.10 as facilities which treat, store, or dispose of RCRA hazardous waste. This database was last updated in February 2022.

No RCRA-TSDF facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.8 RCRA Generators:

The Resource Conservation and Recovery Act – Generators Database contains data compiled in accordance with the 1984 Hazardous and Solid Waste Amendments (HSWA) to RCRA. RCRA Generator Facilities are divided into three categories: Fully Regulated Generators (FRGs) producing more than 1,000 kilograms of hazardous and/or one kilogram of acutely hazardous waste per month, Small Quantity Generators (SQGs) producing between 100 and 1,000 kilograms of hazardous and/or less than one kilogram of acutely hazardous waste per month, and Conditionally Exempt SQGs (CESQGs) producing less than 100 kilograms of hazardous waste and less than one kilogram of acutely hazardous waste. This database was last updated in February 2022.

The database search identified nine facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.9 RCRA-NonGen: RCRA Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Non-Generators do not presently generate hazardous waste. This database was last updated in February 2022.

The database search identified nine facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.10 US ENG CONTROLS: Engineering Controls Sites List

The U.S. EPA created this database, which lists facilities with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. This database was last updated in November 2021.

No US Engineering Controls facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.11 US INST CONTROL: Sites with Institutional Controls

The U.S. EPA developed a listing of properties with institutional controls in place. The institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent

exposure to contaminants remaining on the property. Deed restrictions are generally required as part of the institutional controls. This database was last updated in November 2021.

No US Institutional Controls facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.12 ERNS Spills: Emergency Response Notification System

The Emergency Response Notification System (ERNS) is a national database with information regarding releases of oil and hazardous substances. This database was last updated in December 2021.

No ERNS facilities were identified within the Project Area.

#### 3.1.13 US Brownfields

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Included in this listing are Brownfields properties that receive federal support through the U.S. EPA's Targeted Brownfields Assessment (TBA) program, and Cooperative Agreement Recipients and Brownfields properties addressed by Targeted Brownfields Assessments. This database was last updated in February 2022.

The database search identified two facilities that warranted further consideration; an opinion of the potential impact of these facilities to the Project Area is discussed in Section 5.2. Additional information regarding these facilities is in the EDR report in Appendix B.

#### 3.1.14 INVENTORY: Listing of Contaminated Sites

The Inventory of Facilities in Michigan has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform EGLE about the facilities and can pursue cleanup independently. Facilities that are not known to EGLE are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and a list of releases for which corrective actions have been completed and a list of releases for which the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that

new or prospective property owners/operations disclose to EGLE identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 facilities and Part 213 facilities. There may be more than one BEA for each facility. This database was last updated in January 2022.

The database search identified 25 facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.15 PART 201: Part 201 Site List

A Part 201 Listed site is a location that has been evaluated and scored by EGLE using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform EGLE about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to EGLE are not on the list, nor are sites with releases that resulted in low environmental impact. This database was last updated in October 2013.

The database search identified two facilities that warranted further consideration; an opinion of the potential impact of these facilities to the Project Area is discussed in Section 5.2. Additional information regarding these facilities is in the EDR report in Appendix B.

#### 3.1.16 DEL PART 201: Delisted List of Contaminated Sites

A delisted site has been removed from the Part 201 List because information known to EGLE at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use. This database was last updated in August 2013.

The database search identified two facilities that warranted further consideration; an opinion of the potential impact of these facilities to the Project Area is discussed in Section 5.2. Additional information regarding these facilities is in the EDR report in Appendix B.

#### 3.1.17 State Landfill (SWL/LF) Facilities

SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps

J:\env\31000318.001\BWB PACS report.docx

that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. This database was last updated in December 2021.

No state landfill facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.18 HISTORIC LF: Inactive Solid Waste Facilities

This database is used to compile information regarding inactive solid waste facilities. The facilities in this database are tracked separately from active solid waste disposal facilities. This database was compiled before March 1997; no plans exist to update the database.

No Historic Landfill facilities were identified as being within the applicable search distance of the Project.

#### 3.1.19 LUSTs: Leaking Underground Storage Tanks

LUST records contain an inventory of reported leaking underground storage tank incidents. The database contains information about the locations of leaking tanks, the identity of leaked material, and the status of site cleanup. This database was last updated in November 2021.

The database search identified 19 facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.20 UST: Underground Storage Tanks

USTs are regulated under Subtitle I of the RCRA and must be registered with the state department responsible for administering the UST program. The information includes facility, owner and tank information as submitted on the registration forms. This database was last updated in October 2021.

The database search identified 18 facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.21 ASTs: Aboveground Storage Tanks

The database contains a list of registered aboveground storage tanks and includes facility, owner and tank information as submitted on registration forms. This database was last updated in November 2021.

The database search identified two facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.22 AUL: Engineering and Institutional Controls

This database lists facilities that have engineering and Institutional controls in place. This database is maintained and updated by the state regulatory agency. This database was last updated in November 2021.

The database search identified five facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.23 Brownfields

The Brownfield database contains all EGLE funded Part 201 and Part 213 sites as well as LUST sites that have been redeveloped by private entities using the Baseline Environmental Assessment (BEA) process. This is not a complete listing of all potential Brownfield properties. This database last updated in January 2016.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2. Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.24 BEA: Baseline Environmental Assessment

Michigan's BEA database contains information regarding properties where contamination has been identified at concentrations that exceed cleanup criteria. BEAs provide liability protection for lenders and purchasers of property identified as contaminated. Information regarding these contaminated facilities is maintained by EGLE's Remediation and Redevelopment Division. This database was last updated in April 2022.

The database search identified nine facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.25 FINDS: Facility Index System

The Facility Index System (FINDS) contains a computerized inventory of over 600,000 facilities regulated by the U.S. EPA. FINDS is used as a cross-check for sites identified though other sources. EDR has on-line access to the FINDS system. This database was last updated in November 2021.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2 Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.26 ECHO: Enforcement and Compliance History Online Database

The Enforcement and Compliance History Online (ECHO) database provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. This database was last updated in January 2022.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2. Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.27 AIRS: Permit and Emissions Inventory Data

EGLE tracks permit and emissions inventory data. This database was last updated in March 2022.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2. Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.28 DRYCLEANERS: Drycleaner Establishments

The Drycleaners database is maintained by EGLE and contains a list of drycleaning facilities in Michigan. This database was last updated in November 2021.

The database search identified two facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.29 WDS: Waste Data System

The Waste Data System (WDS) tracks activities at facilities regulated by the Solid Waste, Scrap Tire, Hazardous Waste, and Liquid Industrial Waste programs. This database was last updated in November 2021.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2. Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.30 SPILLS: List of Spills

The state SPILLS database includes sites where environmental pollution emergencies were reported to EGLE such as tanker accidents, pipeline breaks, and release of reportable quantities of hazardous substances. This database was last updated in June 2021.

No MI SPILLS facilities were identified as being within the Project Area.

#### 3.1.31 EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludge, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

No EDR MGP facilities were identified as being within the applicable search distance of the Project Area.

#### 3.1.32 EDR Historic Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies records that present unique and sometimes proprietary data about past sites and operations that typically create environmental concerns but may not show up in current government records searches.

The database search identified 12 facilities that warranted further consideration; an opinion of the potential impact of each facility to the Project Area is discussed in Section 5.2. Additional information regarding the facilities is in the EDR report in Appendix B.

#### 3.1.33 EDR Historic Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as records that present unique and sometimes proprietary data about past sites and operations that typically create environmental concerns but may not show up in current government records searches.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2. Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.34 RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2. Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.35 RGA Part 201: Recovered Government Archive State Hazardous Waste Facilities List

The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists.

The database search identified one facility that warranted further consideration; an opinion of the potential impact of this facility to the Project Area is discussed in Section 5.2. Additional information regarding the facility is in the EDR report in Appendix B.

#### 3.1.36 RGA LF: Recovered Government Archive Solid Waste Facilities List

The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists.

No RGA LF facilities were identified as being within the Project Area.

### 3.2 Summary Table

The EDR report identified a total of 71 facility listings in various government databases within the search distance of the Project Area. WSP evaluated the facilities identified in the EDR report and consolidated the listings; numerous facilities were listed as separate listings under different or slightly different names or addresses. This evaluation reduced the number of facilities to 48. Where possible, each facility was identified and located during the reconnaissance to help evaluate its potential impact to the Project Area. These facilities may be listed in more than one database; the total number of listings, by database and within the respective search distance as discussed in the paragraphs above is depicted in Table 1.

|                                | Total      |                   | Total     |  |  |  |  |
|--------------------------------|------------|-------------------|-----------|--|--|--|--|
| Database                       | Number of  | Database          | Number of |  |  |  |  |
|                                | Listings   |                   | Listings  |  |  |  |  |
| STANDARD ENVIRONMENTAL RECORDS |            |                   |           |  |  |  |  |

| LEAD SMELTERS | 0                              | WY MANIFEST | 0                              |

### 3.3 National Pipeline Mapping System

WSP accessed the National Pipeline Mapping System (NPMS) website for publicly available information regarding pipelines in the vicinity of the Project area. This website includes graphical portrayals of the location and ownership of various pipelines, including pipelines carrying petroleum, high pressure natural gas, liquefied petroleum products, and chemicals. It also includes information about pipeline incidents.

The online mapping system did not identify any pipelines, accidents, or incidents within the Project area. The nearest feature was an oil transmission pipeline over four miles to the southwest of the Project area. The pipelines are not believed to pose a risk to the Project Area.

### 3.4 Regulatory Agency File and Records Review

Additional agency file information may be reviewed, when appropriate, to supplement the findings in the EDR database report for facilities identified in the environmental database record sources listed above. The purpose of the regulatory file review is to obtain sufficient information to assist the environmental professional in determining if a recognized environmental condition, historical recognized environmental condition, controlled recognized environmental condition, or a *de minimis* condition exists in connection with the listing.

Additional agency file information was requested from EGLE through the Freedom of Information Act (FOIA) for 17 of the following 48 facilities because they are within or in close proximity to the Project Area. The facility names and addresses below are taken directly from the EDR report:

- MI Dept. of Transportation Blue Water Bridge, 1410 Elmwood Street
- Pete's Car Care, 2402 Pine Grove Highway (Avenue)
- Duty Free Americas, 2425 Pine Grove Avenue
- Pete's Marathon Car Care, 2308 Pine Grove Avenue
- United 4006 Tulsa Oil Corp., 2401 Pine Grove Avenue
- Amoco Oil Co., 2539 Pine Grove Avenue

- Ecolab, 1720 Hancock Street
- Amoco Oil Co., 124 Franklin Road
- USA Petroleum Corporation, 2432 Pine Grove Avenue
- CA Wood Auto Co., 2516 Pine Grove Avenue
- MDOT, 2308 Pine Grove Avenue
- Shell Port Huron #3, 2014 Pine Grove Avenue
- Former London Farm Dairy, 2119 12<sup>th</sup> Avenue
- Ayotte Dugal B, 2108 Pine Grove Avenue
- MDOT, 2136 Pine Grove Avenue
- One Hour Cleaners, 2307 Pine Grove Avenue
- Star Location 1268, 2601 13<sup>th</sup> Avenue
- Koehns Texaco Service, 1719 Hancock Street
- Speedway #8825, 2621 Pine Grove Avenue
- Speedway #7721, 2610 Pine Grove Avenue
- Blue Water Transit, 1520 Hancock Street
- Marina, 1913 Riverside Drive
- Clark Oil #635, 1912-18 Pine Grove Avenue
- Michigan Dept. State Police, 2510 10<sup>th</sup> Avenue
- 3846113 Canada Inc., Pine Grove & Riverview
- Wilton's TV & Appliance Inc., 2703 Pine Grove Avenue
- Family Dollar Stores, 2700 Pine Grove Avenue
- Joe's Sinclair Service, 1310 Lyon Street
- Star Location #1325, 1839 Riverside
- Begin Transport, 2741 Pine Grove Avenue
- Pine Grove Corp., 1643 Garfield Behind Cleaners 290
- Troy Dry Cleaners, Inc., 1629 Garfield
- 2830-2866 Pine Grove Ave. & 1631-1641 Garfield
- Kemp Printing, 1722 Poplar Street

- Shell Port Huron #2, 2856 Pine Grove Avenue
- MDOT Right-of-Way Former Davis, 819 State Street
- City of Port Huron WTP, 915 Whipple Street
- Metalor Technologies USA Corporation, 1640 Thomas Street
- Thomas Edison Inn/Blue Water Convention Center, 500 Thomas Edison Parkway
- Speedway #8822, 2190 Water Street
- Blue Water Fuel, 2180 Water Street
- Port Huron Hotels, 2021-2025 Water Street
- Henkel Corporation, 1600 Washington Avenue
- Acheson Colloids Co., 1600 Washington Avenue
- Speedy Q Market #206, 2020 Water Street
- Barbru Grocery, 2738 Gratiot Avenue
- Light House Party Store, 2740 Gratiot Avenue
- E B Eddy Paper Inc., 1700 Washington Avenue

EGLE responded to the records request and if available, provided electronic file information for each facility; some facilities had no file information, and in two instances, the file information could not be located. The FOIA file review information is summarized in Section 5.2. WSP believes adequate information was available in the EDR database search report to evaluate the other potential sites of concern. It should be noted that a handful of facilities summarized in Section 5.2 were identified during the historical records review, and were not listed in any governmental database, thus, they were not included in the preceding list.

### 3.5 Physical Setting Sources

#### 3.5.1 Current USGS Topographic Map

WSP obtained and reviewed a copy of the most recent USGS topographic map of the Port Huron, Michigan (2019) and N. Lakeport, Michigan (2019) Quadrangles for information regarding the Project Area. According to the maps, the ground elevation is approximately 600 feet above mean sea level. I-94 crosses the Project Area from the southwest corner through the center, and to the east side of the Project Area. M-25 bounds the east edge of the Project Area from the southeast corner to the north side. Other streets are also present. The Black River bounds the southwest corner of the Project Area.

#### 3.5.2 Soils Overlying the Bedrock Formation

The map, "Quaternary Geology of Southern Michigan" (Farrand and Bell, 1982), shows that the surficial soil on most of the Project Area is composed of pale brown to reddish-brown fine to medium-grained sand, which commonly includes beds or lenses of small gravel. The sand is chiefly quartz sand, but the gravel is rich in igneous and metamorphic rocks. These soils chiefly occur as former beach and near offshore littoral deposits of the glacial Great Lakes and may include intercalated lacustrine clay. These deposits are often locally veneered by discontinuous sheets or dunes of eolian sand and may include considerable areas of organic soils. These deposits are typically 30 feet to 100 feet thick (Farrand and Bell, 1982).

The map, "Quaternary Geology of Southern Michigan" (Farrand and Bell, 1982), shows that the surficial soil on the remaining (southern) portion of the Project Area is composed of pale brown, well sorted, fine- to medium-grained sand. The sand is mostly quartz, with some heavy minerals. It occurs chiefly in massive dune ridges parallel to present leeward shorelines, but also as parabolic dunes on former (Late Wisconsinan) lake and outwash plains. It is subject to continued movement in blowouts where vegetation is disturbed, especially near present-day coasts. The dune sand is typically three to 100 feet thick (Farrand and Bell, 1982).

#### 3.5.3 Bedrock Geology

According to the map, "Bedrock Geology of Southern Michigan" (Wilson and Milstein, 1987), the uppermost bedrock unit below the Project Area is the Late Devonian to Early Mississippian-age Antrim shale, which is approximately 150 feet below the ground surface. This formation is composed of black shale that is related to uplift in the Appalachian Region during this time period. The Antrim shale interfingers with the Ellsworth Shale in the middle of the Michigan Basin and has a maximum thickness of approximately 660 feet. Minor amounts of gas were recovered from the Antrim Shale (Dorr & Eschman, 1970) prior to 1970; however, significant gas was recovered from this formation in the northern part of the state during the late 1980s, 1990s, and 2000s.

#### 3.5.4 Hydrology and Hydrogeology

The Project Area is within the Eastern Lower Peninsula Hydrologic Province as defined by the U.S. Geological Survey. Moderately thick, low-yielding deposits of glacial lacustrine clay overlie low-yielding Devonian and Mississippian-aged shale containing highly mineralized water. The province relies heavily on surface water, primarily from Lake Huron and Lake Erie (Rheaume, 1991). The direction of groundwater flow in the unconsolidated glacial materials above the bedrock is reportedly to the southwest and south in the northern part of the Project Area and is generally to the west and southwest in the southeast part of the Project Area.

### 3.6 Historical Use Information

The evaluation included a review of historical aerial photographs, Sanborn fire insurance maps, street directories, and topographic maps to help obtain information regarding the historical use of properties within the Project Area.

#### 3.6.1 Sanborn Maps

During the late 1800's and throughout much of the 1900's, the Sanborn Map Company periodically prepared detailed maps showing the locations and types of buildings and uses of properties in areas of many towns and cities throughout the United States. Included on these maps are the locations of aboveground and underground storage tanks, and other features now recognized as RECs. Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut now possesses the most complete archive of these maps.

WSP requested EDR to search for fire insurance maps for the Project Area. EDR identified and provided WSP with Sanborn maps for the years 1911, 1950, and 1967. A copy of the portion of the maps which includes the Project Area is in Appendix D. Details shown on the maps are discussed below.

The portions of the Project Area north of Elmwood was not covered by the maps and the portion of the Project Area south of Elmwood and west of 12<sup>th</sup> Avenue was also not covered by the maps.

#### 1911 Sanborn Maps

The 1911 Sanborn Maps showed a Baptist church was at 2131 10<sup>th</sup> Avenue at the southwest corner of Harker Street and 10<sup>th</sup> Avenue. The Everitt-Metzger-Flanders Company occupied a large U-shaped building north of Elmwood Street and west of Pine Grove Avenue; this was an automobile parts manufacturer, and the building was occupied by machine shops. The machine shops included a 6,000-gallon crude oil UST, an oil house, and one or more gasoline USTs north of the main U-shaped building. A spur line, platform, and coal storage area were along the east side of the barn, and the main railroad line was just east of the spur line. The Project Area was sparsely developed, with most structures present being dwellings. The remainder of the covered portion of the Project Area was vacant, undeveloped land.

A Methodist Church was at 1425 Elmwood Street, on the north side of Elmwood Street, west of 10<sup>th</sup> Avenue.

#### 1950 Sanborn Maps

The 1950 Sanborn Maps showed a gasoline station with two USTs was situated at 2014 Pine Grove Avenue in the area between Pine Grove Avenue and 10<sup>th</sup> Avenue. A bottling works facility and attached warehouse was at 2016 11<sup>th</sup> Avenue. An auto repair facility was at the north end of

J:\env\31000318.001\BWB PACS report.docx

the residential lot with address1413 Lyon Street. Another auto repair facility was at the northeast corner of Scott Avenue and 10<sup>th</sup> Avenue at 2004-06 10<sup>th</sup> Avenue. A second gasoline station with three USTs was at 2037 Pine Grove Avenue at the southwest corner of Pine Grove Avenue and Mansfield Road. A railroad line (PMRR) was present in the center of 12<sup>th</sup> Avenue. A third gasoline station with three USTs was at 2111 Pine Grove Avenue in the area between Pine Grove Avenue and 11<sup>th</sup> Avenue. A dairy was at the southeast corner of Pine Grove Avenue and Harker Street. The International (Blue River) Highway Bridge approach, ticket office, immigration & customs building, and a bus garage were situated at the southwest corner of 10<sup>th</sup> Avenue and Elmwood Avenue; all structures except the bus garage were on the elevated level. The large U-shaped facility north of Elmwood Street and west of Pine Grove Avenue was no longer occupied by the machine shops, it appeared to have been occupied by contractors. The property at the northwest corner of Harker Street and Pine Grove Avenue. The Detroit Edison Company Pine Grove Sub Station Transformer Yard was situated at the southwest corner of Elmwood Street and 12<sup>th</sup> Avenue and 10<sup>th</sup> Avenue force Sub Station Transformer Yard was situated at the southwest corner of Elmwood Street and 12<sup>th</sup> Avenue and included one commercial building that was constructed in 1926.

A gasoline station with two USTs was at 1310 Lyons Road, on the south side of Lyon Road between 10<sup>th</sup> Avenue and Pine Grove Avenue.

#### 1967 Sanborn Maps

The 1967 Sanborn Maps showed a gasoline station with two USTs was situated at 2014 Pine Grove Avenue in the area between Pine Grove Avenue and 10<sup>th</sup> Avenue. The bottling works facility at 2016 11<sup>th</sup> Avenue had been enlarged. The gasoline station with three USTs at 2037 Pine Grove Avenue was no longer present and had been replaced by a used car sales facility. The auto repair facility with address 1413 Lyon Street was now used for oil storage, and a larger auto repair facility was immediately east of this location at 1915 10<sup>th</sup> Avenue. A rug cleaning facility was present on the north side of Scott Avenue east of 12<sup>th</sup> Avenue. The gas station at 2111 Pine Grove Avenue was also an auto repair and used car sales facility. Another gasoline station was across Pine Grove Avenue at 2108 Pine Grove Avenue. The dairy that was present in 1950 had been enlarged to occupy the south side of Harker Street from Pine Grove Avenue to 10<sup>th</sup> Avenue. Two additional gasoline stations were at 2307 and 2308 Pine Grove Avenue at the northwest and northeast corners of Pine Grove Avenue and Harker Street. The Blue River Bridge Plaza had been enlarged somewhat since 1950 and included more ramps to the elevated plaza level. The large U-shaped building north of Elmwood Street and west of Pine Grove Avenue was miscellaneous warehouses. An oil house and a gasoline station were situated on the north side of Elmwood Street between the railroad line and Pine Grove Avenue and had an address of 2401 Pine Grove Avenue.

A gasoline station with two USTs was at 1310 Lyons Road, on the south side of Lyon Road between 10<sup>th</sup> Avenue and Pine Grove Avenue. A second gasoline station was at 1910 Pine Grove

### visp

Avenue, on the north side of Lyon Road between Pine Grove Avenue and Poplar Street, replacing a dwelling that was formerly present. An auto repair facility was at 1915 10<sup>th</sup> Avenue with an oil storage building behind (west) of the auto repair facility.

#### 3.6.2 Aerial Photographs

Digital aerial photographs for the years 1937, 1941, 1957, 1964, 1967, 1973, 1976, 1987, 1999, 2006, 2009, 2012, and 2016 were obtained from EDR. A satellite aerial image for 2019 was reviewed from the Google Earth Pro website. No aerial photographs prior to 1937 were reviewed. The aerial photographs are included in Appendix C.

#### 1937 Aerial Photograph

The clarity of the photographs was poor. The Project Area contained several streets, including Pine Grove Avenue, Elmwood Street, Mansfield Street, 10<sup>th</sup> Avenue, 11<sup>th</sup> Avenue, 12<sup>th</sup> Avenue, Scott Avenue, Riverview Street, Riverside Drive, and Hancock Street. A faint trail was visible along the east side of 12<sup>th</sup> Avenue and extended north of Elmwood Street; this is likely a railroad line. The portion of the Project Area west of 12<sup>th</sup> Avenue appeared to be primarily farmland, with a large U-shaped building situated immediately west of 12<sup>th</sup> Avenue and north of Elmwood Street. The portion of the project Area east of 12<sup>th</sup> Avenue was much more developed with residential dwellings and a few commercial buildings along Pine Grove Avenue. A gas station may have been present at the northwest corner of Pine Grove Avenue and Hancock Street. The north end of the Project Area appeared to contain a residential dwelling. Several dwellings and vacant land were on the southwest part of the Project Area; the Black River bounded the southwest edge of the Project Area.

#### 1941 Aerial Photograph

The clarity of the photographs was very good. The land use within the Project Area was similar to that shown on the 1937 photograph; however, a large commercial complex (the original Blue Water Bridge Plaza building was present between Pine Grove Avenue and 10<sup>th</sup> Avenue immediately south of Elmwood Street. Several small, unnamed streets were present in the central portion of the Project Area, with a few small structures or dwellings along them; small fields or garden plots were present within the area delineated by the new roads. A commercial structure was visible north of Scott Street on the east side of 11<sup>th</sup> Avenue.

#### 1957 Aerial Photograph

The clarity of the photographs was good. The land use within the Project Area was similar to that shown on the 1941 photograph; however, the Project Area was much more developed. I-94 was present along the west edge of the Project Area and a ramp extended east across the Project Area to the plaza building. The area north of Elmwood Street had been developed with two more large structures and streets/parking areas. Additional buildings were present along the west side

#### J:\env\31000318.001\BWB PACS report.docx

## vsp

of Pine Grove Avenue and the south side of Hancock Street. The area south of the I-94 ramp had been developed as a residential neighborhood. The area between Hancock Street and Riverview Street was occupied by a residential neighborhood. The dwellings on the southwest part of the Project Area had been demolished, and a bridge with two spans over the Black River was now present. Riverside Drive was no longer a through street; it was cut by the I-94 bridge approach, and Scott Avenue now looped southwest close to the edge of the Black River to go under the bridge.

#### 1964 Aerial Photograph

The clarity of the photographs was fair to good. The land use within the Project Area was similar to that shown on the 1957 photograph; however, the I-94 expressway and ramps were more developed, and a ramp connected to the customs plaza facility via a bridge over Pine Grove Avenue. The property immediately west of 12<sup>th</sup> Avenue in the central part of the Project Area was occupied by a new commercial building. Additional commercial buildings (a motel) were present in the northwest portion of the Project Area. A gas station was visible at the northwest corner of Pine Grove Avenue and Mansfield Street. A second gas station was at the southwest corner of Pine Grove Avenue and Hancock Street, a third was at the northwest corner of Pine Grove Avenue and Lyon Street.

#### 1967 Aerial Photograph

The clarity of the photograph was good. The land use within the Project Area was similar to that shown on the 1964 photograph; however, an additional gas station was at the northwest corner of Pine Grove Avenue and Elmwood Street. The likely railroad line along the east side of 12<sup>th</sup> Avenue was less obvious, indicating it was probably no longer in use. A possible junkyard occupied the area along the south side of Hancock Street, west and south of the gas station at the corner of Hancock Street and Pine Grove Avenue.

#### 1973 Aerial Photograph

The clarity of the photograph was good. The land use within the Project Area was similar to that shown on the 1967 photograph; however, some structures that had been south of the I-94 ramp and east of 12<sup>th</sup> Avenue had been demolished and was vacant property. Most of the dwellings that were present between Hancock Street and Riverview Street had been replaced by commercial buildings. The triangle-shaped part of the Project Area north of the I-94 bridge and the Black River and bounded by Riverview Drive and Scott Avenue now contained an apartment complex with two buildings, carports, and a parking lot.

#### 1976 Aerial Photograph

The clarity of the photograph was good. The land use within the Project Area was similar to that shown on the 1973 photograph; however, a commercial building was situated at the southwest corner of Scott Avenue and Pine Grove Avenue. The junkyard had been partially replaced by a commercial structure immediately south of the gas station.

#### 1987 Aerial Photograph

The clarity of the photograph was fair. The land use within the Project Area was similar to that shown on the 1976 photograph.

#### 1999 Aerial Photograph

The clarity of the photograph was good. The central portion of the Project Area had been redeveloped with new expressway ramps, and an expanded customs plaza was on the east part of the Project Area. Two new large buildings were between the ramps on the west central part of the Project Area, and one new large building was north of the new ramp from Pine Grove Avenue to the customs plaza, replacing the former U-shaped farm building. The motel on the west part of the Project area north of the ramps to the customs plaza had been replaced with a new hotel facility. 12<sup>th</sup> Avenue ended south of the new ramps and was no longer a through street to Pine Grove Avenue. The last dwelling north of Hancock Street had been demolished and the property was vacant.

#### 2006 Aerial Photograph

The clarity of the photograph was fair. The land use within the Project Area was similar to that shown on the 1999 photograph.

#### 2009 Aerial Photograph

The clarity of the photograph was good. The land use within the Project Area was similar to that shown on the 2006 photograph; however, the commercial building along Riverview Street had been demolished and the property was vacant.

#### 2012 Aerial Photograph

The clarity of the photograph was good. A new expressway off-ramp was present on the southern portion of the Project Area from the southwest corner of the Project Area to Pine Grove Road, connecting with Harker Street. Nearly all of the structures that had previously been present on the southern third of the Project Area had been demolished. Mansfield Road was no longer present west of Pine Grove Avenue. The conditions on the northern portion of the Project Area were similar to that shown on the 2009 photograph; however, the commercial building north of Hancock Street had been demolished, and the property was vacant. The apartment complex on the southwestern part of the Project Area had been demolished and the area was partially

J:\env\31000318.001\BWB PACS report.docx

## visp

vegetated and partially gravel used as a possible construction staging area. The bridge over the Black River had been enlarged with the addition of a third span.

#### 2016 Aerial Photograph

The clarity of the photograph was fair. The land use within the Project Area was similar to that shown on the 2006 photograph. The southwest part of the Project Area was fully vegetated and appeared to be landscaped.

#### 2019 Aerial Photograph

The clarity of the photograph was excellent. The land use within the Project Area was similar to that shown on the 2016 photograph.

#### 3.6.3 Historic Topographic Maps

WSP obtained a copy of historic topographic maps for the years 1939, 1949, 1952, 1961, 1968, 1973, 1976, 1991, 2014, 2016, and 2017 from EDR. The historic topographic maps are included in Appendix E.

#### 1939 Historic Topographic Map

The 1939 historic topographic map did not cover the northern part of the Project Area. Several streets were depicted crossing the Project Area; only Pine Grove Avenue and Elmwood Street were labeled. A railroad line extended north-south across the Project Area along 12<sup>th</sup> Avenue, and a short spur line extended to the east of the line from south of Elmwood Street. Numerous dwellings were present along the streets, mostly along the south edge and on the southeast third of the Project Area. A U-shaped building was partially visible at the edge of the coverage area west of Pine Grove Avenue and north of Elmwood Street. Much of the southeast part of the Project area and a narrow linear feature leading north (a drainage ditch) were depicted as low, and the southwest corner of the Project Area was sloped to the southwest and the nearby Black River with two dwellings depicted in this area.

#### 1949 Historic Topographic Map

Conditions on the 1949 historic topographic map were generally similar to those shown on the 1939 map.

#### 1952 Historic Topographic Map

Conditions on the 1952 historic topographic map were generally similar to those shown on the 1949 map; however, a large building labeled U.S. Customs was situated at the east edge of the Project Area east of Pine Grove Avenue and south of Elmwood Street. The Project Area was shaded pink, indicating it was within the City of Port Huron. A bridge was present over the Black

River on the southwest part of the Project Area; the two dwellings formerly present in this area were no longer present.

#### 1961 Historic Topographic Map

The 1961 historic topographic map covered only the northern portion of the Project Area that was not shown on the prior maps. This area was all shaded pink, indicating it was within an urban area. Two commercial structures were depicted within this part of the Project Area, plus one additional commercial structure that was in the excluded area between parts of the Project Area on the south side of Hancock Street. A railroad line was present on the Project Area, crossing Pine Grove Avenue near the south edge of the coverage area; it extended north of the City of Port Huron and off the map.

#### 1968 Historic Topographic Map

Conditions on the 1968 historic topographic map were generally similar to those shown on the 1952 map (and only covered the southern part of the Project Area); however, I-94 was present along the west edge of the Project Area, with a ramp extending east through the customs plaza. Riverside Drive was no longer a through street; it was cut by I-94. Scott Avenue curved south and under the bridge over the Black River, connecting Riverside Drive on either side of I-94.

#### 1973 Historic Topographic Map

Conditions on the 1973 historic topographic map were generally similar to those shown on the 1968 map; however, two large structures were depicted in the triangular area between Riverside Drive and Scott Avenue west of I-94. This area was not shaded pink and was therefore not within the city limits.

#### 1976/1978 Historic Topographic Maps

The 1976/1978 historic topographic maps together covered the entire Project Area. Conditions on the 1976/1978 historic topographic maps were generally similar to those shown on the 1973 and 1961 maps.

#### 1991 Historic Topographic Map

Conditions on the 1991 historic topographic map were generally similar to those shown on the 1973 map; however, nine commercial structures plus the U.S. Customs Plaza building were depicted as being within the southern part of the Project Area. Most of the Project Area west of Pine Grove Avenue and north of Mansfield Road was unshaded, indicating it was not within the City of Port Huron. The railroad along the east side of 12<sup>th</sup> Avenue was no longer depicted.

#### 2014 Historic Topographic Map

The 2014 historic topographic map covered the entire Project Area. No structures were depicted, and only the roads and topographic elevation lines were shown. A new bridge span over the Black River was present, and a new exit ramp from I-94 to Pine Grove Road was present. Mansfield Road was no longer present west of Pine Grove Avenue.

#### 2016 Historic Topographic Map

The 2016 historic topographic map covered only the northern portion of the Project Area. The conditions on this portion of the Project Area were similar to those depicted on the 2014 historic topographic map.

#### 2017 Historic Topographic Map

The conditions on the 2017 historic topographic map were similar to those depicted on the 2014 historic topographic map.

#### 3.6.4 Street Directories

WSP reviewed city directory information compiled by EDR and supplemented it with information obtained from directories reviewed at the Library of Michigan on May 20, 2022, July 19, 2022, and August 24, 2022. Polk's City Directory had coverage for the Project Area and surrounding area from 1930 to 1985. Data from 1992 through 2017 was provided from the EDR digital archive. No coverage for the area was available by address listing prior to 1930. Specifically, information was obtained from one or both sources from the 1930, 1933, 1936-37, 1940-41, 1946-47, 1950-51, 1953-54, 1963, 1965, 1966, 1970, 1975, 1980, 1985, 1992, 1995, 2000, 2005, 2010, 2014, 2015, 2017, and 2020 directories. A copy of the city directory information obtained from EDR is included in Appendix F.

#### Project Area Listings of Potential Concern

- 2014 Pine Grove Avenue was a gasoline service station under various names from at least 1930 until about 1992.
- 2037 Pine Grove Avenue was a Texaco gasoline service station in 1963 and was a onehour cleaner facility from 1970 through 2017.
- 2108 and 2118 Pine Grove Avenue were likely the same property and had gasoline stations listed under various names from at least 1963 through 1980. A dairy was listed at the 2108 address in 1985.
- 2201 Pine Grove Avenue was occupied by Moser & Sons Coal Yard from at least 1963 through 1966.

### 1150

- 2307 Pine Grove Avenue was occupied by a gas station under various names from at least 1950 through 1966.
- 2308 Pine Grove Avenue was occupied by a gasoline service station under various names from at least 1966 through 1980.
- 2327 Pine Grove Avenue was occupied by Koppel's Shell gas station from 1950 to 1963.
- 2401 Pine Grove Avenue was occupied by Tulsa Oil gasoline service station from at least 1953 through 1985.
- 2402 Pine Grove Avenue is immediately north of Elmwood Street and was occupied by a gasoline service station under various names from the late 1930s through 2005.
- 2432 Pine Grove Avenue is immediately south of Church Street and was occupied by a gasoline service station under various names from about 1992 through 2007. It was a used car sales facility from the early 1960s through about 1990.
- 1701 Elmwood Street was a "vacant factory" in 1930 and was occupied by Wing Ridge Stables in 1933. The address of the stables changed to 1521 Elmwood Street in 1936 but also included Oak Grove Dairy.
- 1702 Elmwood Street was occupied by a Detroit Edison Substation in 1930 and 1933. The address of the facility changed to 1602 Elmwood Street in 1946.
- 1700 and 1710 Hancock Street were occupied by Port Huron Towing in 1966, and by the Can-Am Export Store from 1980 through 1992.
- 2601 13<sup>th</sup> Avenue was occupied by Buff's Car Wash from the early 1970s through 2009
- 1413 Lyon Street and 1915 10<sup>th</sup> Avenue were occupied by auto repair facilities (possibly related). A small auto repair was in a garage on the north end of a residential lot at 1413 Lyon Street beginning in the late 1940s and lasting until the early 1950s. Beginning in the 1950s, a larger auto repair facility was at 1915 10<sup>th</sup> Avenue; it was present until the 1970s.
- 2016 11<sup>th</sup> Avenue was occupied by a bottling company from at least 1946 through 1985, and by Sweeney Cleaning Service in 1992 and 1995.

The London Farm Dairy was listed at 2136 Pine Grove Avenue from at least 1946 through 2000. The Blue Water Bridge was listed at 2340 Pine Grove Avenue from 1941 through 1985. Various brokers were listed at 2321 Pine Grove Avenue from 1995 through 2017, and the Duty Free Shop was listed at 2425 Pine Grove Avenue from 2000 through 2017. Various U.S. governmental

agencies and Michigan Department of Transportation occupied 1410 Elmwood Street from 1941 through 2017. 1718 and 1720 Hancock Street were occupied by a bowling alley and hotel under various names from 1975 through 2017. Riverview Apartments were present on the southwest portion of the Project Area from 1971 through about 2012.

#### Nearby and Adjacent Listings of Potential Concern

- 1310 Lyon Road was an auto supply facility from the late 1930s through the late 1940s after which it became a gas station. The gas station was present from the late 1940s through the early 1970s.
- 1912 Pine Grove Avenue is immediately southeast of the southeast corner of the Project Area and was occupied by a gasoline service station under various names from at least 1963 through 2017.
- 2516 Pine Grove Avenue is immediately northeast of the Project Area and was occupied by Cawood Auto Buick Honda from 1992 through 2017. This facility was first listed in 1980 as Cawood Auto Co. at 1528 Hancock Street.
- 2539 Pine Grove Avenue is approximately 150 feet north of the Project Area and was occupied by a gasoline service station under various names from at least 1966 through 2017.
- 2610 Pine Grove Avenue is approximately 265 feet east of the Project Area and was occupied by a gasoline service station under various names from about 1930 through 1992. Port Huron Towing was also listed at this address in 1953.
- 2621 Pine Grove Avenue is immediately east of the Project Area and was occupied by a gasoline service station under various names from 1970 through 2017.
- 1719 Hancock Street is immediately north and west of the Project Area and was occupied by Koehn's Texaco gas station in 1975. This facility also appeared to have had an address of 2614 14<sup>th</sup> Avenue and was occupied by Macs Radio & TV Service from the early 1960s through the early 1980s.
- 2624 14<sup>th</sup> Avenue is immediately west of the Project Area and was occupied by an instant oil change facility under various names from the late 1980s through 2020. In 1985 it was occupied by an auto body repair facility. From the early 1960s through the early 1970s, it was occupied by Port Huron Battery; it was vacant from the early 1970s through the early 1980s.

 2710 14<sup>th</sup> Avenue is immediately north of the Project Area and was occupied by Wilton's TV & Appliance Repair in 1989-90. This facility also has a current address of 2703 Pine Grove Avenue.

### 3.7 Prior Reports

A PACS report was completed for a portion of the Project Area by Soil and Materials Engineers, Inc. (SME) and Wilbur Smith Associates in 2002; the report was revised in 2003. The southern part of the current Project Area (south of Mansfield Road) was not included in the prior PACs; however, the northern portion of the prior PACs included several areas north and northeast of the existing Project Area.

The prior PACS identified several RECs, including the following:

- Four operating gas stations
- Two car dealerships with maintenance garages
- A former truck stop
- An on-site, one-hour dry cleaner
- Possible heating oil USTs associated with structures in the Project Area
- Nine former gas stations
- Five auto dealerships
- A coal yard with an associated railroad spur
- An electrical substation
- A machine shop
- A sheet metal contracting business with an associated railroad spur
- Three open LUST sites, six closed LUST sites, six active UST sites, five closed UST sites, and three RCRA generator sites

Some of the different RECs overlap with others. For instance, the former truck stop is also a LUST facility.

### 3.8 Historic Use Information Summary

Based upon the foregoing historical information, it appears as though the Project Area was mixed residential and undeveloped land, with one industrial car parts manufacturing facility and machine shop on it as early as 1911. This facility was vacant by 1930, and subsequently used as a stable and later by contractors as warehouse space and sheet metal fabrication. Numerous gas stations have been present on the Project Area along the Pine Grove Avenue corridor starting in the 1920s and continuing through the present day, although the greatest number were present in the 1950s and 1960s. One former gas station was also subsequently used as a dry cleaner from about 1970 through 2017. A few auto repair facilities have been present between the late 1930s and the 1970s. The Blue Water Bridge Plaza has been present since construction of the bridge in 1938; the plaza itself has undergone several expansions since its construction, most recently in the early 2000s. A Detroit Edison electrical substation has been present on the central portion of the Project Area immediately north of the bridge plaza since 1926. An apartment complex was on the southwest portion of the Project area from the early 1970s until about 2012 or 2013.

### 4.0 RECONNAISSANCE

### 4.1 Methodology and Limiting Conditions

Adam Heft and David VanGoethem, the WSP staff members who performed the Project Area reconnaissance, are Environmental Professionals as defined in 40 CFR §312.10(b)(1). They performed the reconnaissance on May 3, 2022; Mr. VanGoethem performed follow-up reconnaissance of portions of the Project Area on July 20, August 11, and August 23, 2022. WSP gathered information about activities and potential contaminants on and adjacent to the Project Area and viewed publicly accessible areas to learn about potential contaminating activities. The purpose of the reconnaissance was to identify sites of potential environmental concern based on the current property use and to confirm locations of potential facilities of concern identified in the EDR database report. The 'windshield' survey reconnaissance was conducted from public rights-of-way and was not intended to be an exhaustive, comprehensive walkover. WSP did not view the interiors of any buildings or structures on the Project Area as part of its reconnaissance.

### 4.2 General Project Observations

The Project Area is generally bounded by the I-94 expressway, Riverside Drive, and Scott Avenue along the west edge, Riverview Street on the north edge, Pine Grove Avenue, Church Street, Elmwood Street and 10<sup>th</sup> Avenue along the east edge, and Pine Grove Avenue, Lyon Street and Scott Avenue along the south edge. The Project Area covers approximately 99 acres, and includes governmental structures, commercial offices/businesses, vacant areas, an electrical substation/building, roads, and parking areas as shown on Figure 2.

J:\env\31000318.001\BWB PACS report.docx

The central portion of the Project Area is occupied by the Blue Water Bridge customs plaza and associated roads, ramps, and parking areas. A "hazardous materials area" is situated on the elevated plaza at the east edge of the Project Area along the south edge of the eastbound toll area. It is a concrete paved area with drains to a subsurface catchment that can be pumped out if needed. At the time of the reconnaissance, the area was unused, and no evidence of stains or hazardous materials were present. One large and one small structure were present in the parking lot at the southwest end of the plaza. The large structure housed the X-ray system for trucks crossing the border. The small structure was a maintenance building which was unused at the time of the reconnaissance.

The northern part of the Project Area was vacant property that was partially grassy, and partially gravel and concrete parking areas. The gravel parking area at the north end of the Project Area was being used as a construction staging area. WSP observed a 1,000-gallon diesel AST situated at the southeast part of this parking area; the ground around the tank was not stained by fuel spills or drips. A few pieces of heavy equipment (a front-end loader, two tandem vibratory rollers, and a bobcat) were parked in the area, and several precast concrete structures, steel manholes, and construction barrels/barricades were stored near the AST. The northwest part of the northern end of the Project Area was used for parking by employees of the adjacent Pennzoil Instant Oil Change facility. A line of concrete parking bumpers was half buried in the grass on the central part of the Northern part of the Project Area. One pole-mounted transformer was situated on the central area of the northern part of the Project Area.

The north-central portion of the Project Area was occupied by a bowling alley, parking areas, a vacant, grassy area, the Duty Free Americas facility, a Quality Inn hotel, the DTE substation building, and the former methane blower building (which was empty and unused at the time of the reconnaissance. A fenced area on the south side of the substation building housed electrical equipment owned by DTE and connected to the area's power grid. WSP observed one padmounted transformer at the southeast corner of the Quality Inn. Four pole mounted transformers were also noted along the east edge of the vacant grassy property south of the bowling alley. The transformers were a mixture of ages, and some of the transformers had a blue, non-PCB sticker affixed to them. WSP did not observe evidence of leaks or stains around or beneath any of the transformers. WSP also observed pieces of concrete and asphalt in the grassy area south of the bowling alley, indicating that this area had been previously disturbed and/or filled.

The excluded area along the south side of Hancock Street includes a Wendy's restaurant, an operating BP gasoline service station, and a McDonalds restaurant. WSP observed two padmounted transformers on the excluded properties, one near the southeast corner of the Wendy's restaurant and one at the southwest corner of the McDonalds property. Three pole-mounted transformers were observed on the southwest end of the excluded BP gas station building. Three USTs were situated on the southeast part of the BP gas station property, with several dispensers

beneath the canopy between the building and the intersection between Pine Grove Avenue and Hancock Street.

The southern portion of the Project Area was mostly vacant, landscaped grassy areas with trees and hills that was recontoured after MDOT acquired the property for the last expansion and reconstruction of the plaza and ramps. The area between the ramp to the plaza and the exit ramp leading to Pine Grove Avenue was occupied by one structure currently in use as MDOT offices. The area to the west of the structure was a parking lot used for storage (the former London Dairy Truck Stop property). WSP observed the location of a former structure at the east end of the parking area and the remains of 12<sup>th</sup> Avenue along the east side of that structure. Two hydraulic hoists and a pit were visible in the remaining concrete floor of the former structure. WSP also observed four 55-gallon drums situated at the west end of the parking lot. Two structures were situated on the southwest corner of Pine Grove Avenue and Mansfield Street that appeared to be occupied by an insurance company. The other was a medical office building situated at the northwest corner of 11<sup>th</sup> Avenue and Scott Avenue.

The southwest portion of the Project Area, west of I-94 and bounded by Riverside Drive and Scott Avenue was primarily covered with grass, with brush and a few small trees in the western portion of that area, east of Scott Street.

While performing its reconnaissance of the Project Area, WSP photographed the characteristics of the Project Area and surrounding properties from public rights-of-way. A copy of selected photographs is included in Appendix G.

WSP did not observe any pits, ponds, or lagoons (associated with waste disposal or treatment), pools of liquids, odors, stained soil or pavement, or stressed vegetation, within the Project Area during its reconnaissance.

#### 4.2.1 Solid Waste

WSP observed significant quantities of fill soil in the elevated portion of the Plaza and ramps leading onto the Blue Water Bridge. This was confirmed by the interview with Mr. Smith, below. In addition, most of the Project Area has been disturbed and/or contains fill from former structures that were demolished, particularly along the north side of Scott Avenue on the southern portion of the Project Area.

### 4.3 Interview

WSP interviewed MDOT representative Dave Smith during part of the reconnaissance. Mr. Smith accompanied WSP while viewing the Bridge Plaza area and provided information regarding the

construction of the plaza. Mr. Smith said that he has been involved with the bridge plaza operations since 1994 and has lived in the area since 1970.

Mr. Smith informed WSP that the most recent bridge plaza construction involved the construction of the south ramp, which occurred from 2008 to 2010. He further indicated that the previous construction activities at the plaza in the 1980s involved the placement of up to about 25 feet of fill material on the original ground surface, and installing footer drains around the perimeter of the wall. Mr. Smith said that the source of the fill material was from the Mid-Michigan Aggregate Company sand pit, and that the volume of fill brought in as part of the construction was in the millions of cubic yards.

Mr. Smith said that the small building on the north side of the plaza near the southwest corner of the DTE substation was formerly the "methane blower building" which housed fans and air handling equipment used to draw methane from the base of the deep support columns for the plaza and safely vent it to the air to prevent a buildup of the gas and a potentially explosive atmosphere. Mr. Smith said that the building is currently empty; it was determined several years ago that operation of the venting system was not necessary, since air monitoring of the collection system showed that methane was no longer migrating along the support columns.

WSP asked Mr. Smith about utilities on the Project Area. Mr. Smith indicated that SEMCO provides natural gas, DTE provides electricity, the City of Port Huron provides water, and MDOT provides the sewers.

Mr. Smith provided information about some of the current and former buildings on the Project Area. He said that there were formerly maintenance buildings situated in the southwest parking lot. The eastern building contained offices, and the west building was used for salt storage and cold storage of various items. The building that is currently situated in that parking lot is an X-Ray machine for scanning trucks for hidden/illicit cargo. Mr. Smith also indicated that a hotel was formerly attached to the south side of the bowling alley on the northwest part of the Project Area.

WSP asked Mr. Smith about his knowledge of any contamination on the Project Area. Mr. Smith said that he was aware that contaminated soil had been found during the construction of a sewer line along the access road west of the McDonalds restaurant on the north part of the Project Area, but that he was unaware of the source of the contamination. The contaminated soil that was excavated for the installation of the sewer line was placed on the northeast part of the vacant property to the southwest of McDonalds. He also said that he was aware that back in the 1940s and 1950s, the bridge authority used to park leaking tanker trucks in a lot in the central portion of the plaza, which is now situated under 25 feet of fill soil.

Mr. Smith stated that the drums that were present at the west end of the south parking lot were generated in the week or so before the initial reconnaissance as a result of geotechnical soil boring

drilling and were stockpiled there until the drilling is complete, at which time they will be properly disposed.

### 5.0 EVALUATION

### 5.1 Evaluation Purpose and Criteria

The purpose of the PACS is to investigate parcels of property for known or potential environmental contamination that could affect the Project Area's design, cost, or schedule. The primary objectives in conducting the PACS are to determine: 1) whether any RECs exist in connection with the Project Area; 2) if a PSI is necessary to evaluate the RECs; and 3) to provide suggested mitigation for any issues.

### 5.2 Findings and Opinions

Using information gathered as part of this PACS, WSP evaluated the potential RECs, CRECs, HRECs, and *de minimis* environmental conditions identified on both the Project Area and at nearby facilities as to their possible impact to the Project Area. To assess the potential impact of these facilities, WSP used its best professional efforts to evaluate the possible contaminants that could be present, the toxicity and mobility of these contaminants, and geological factors that could influence the migration of possible contaminants.

Each of the facilities listed in the subsections below has been evaluated regarding its potential impact to the Project Area. The facility names and addresses depicted in the following subsections was taken directly from the EDR report Those listings that are considered to be RECs in connection with the Project Area are identified with "Site #X" in the heading after the facility name; these facility locations are depicted on Figure 2 in Appendix A with a dashed outline of the approximate property boundary.

Fill soil is known to be present on the Project Area in significant quantities. WSP was informed that "millions of cubic yards" of soil were brought to the Project Area when the elevated customs plaza was constructed; the fill is up to about 25 feet thick on top of the original ground surface. In addition, numerous structures were demolished, and fill was likely placed to bring basements or crawl spaces up to grade. Ridges of soil and plants are present along the southern part of the Project Area. WSP understands that the fill brought to the Site originated at the Mid-Michigan Aggregate sand pit and was not uncontrolled fill of unknown quality. The fill soil is therefore not considered to be a REC.

#### 5.2.1 Wilton's TV & Appliance Inc. (Site #1)

The Wilton's TV & Appliance Inc. facility at 2703 Pine Grove Avenue in Port Huron, Michigan, is immediately north of the north end of the Project Area. The facility is listed in the UST database. According to information in the EDR report, one 1,000-gallon gasoline UST was installed in 1976 and removed from the ground in July 1990. No additional information was available regarding potential contamination associated with this property. Based on its close proximity to the Project Area, this facility is considered to be a REC.

#### 5.2.2 North Port Pennzoil (Site #2)

The North Port Pennzoil facility at 2624 14<sup>th</sup> Avenue is immediately adjacent to the northern part of the Project Area. This facility was not listed in any database in the EDR report; however, it was listed as a REC in the prior PACS. This facility has been an oil change facility since the late 1980s, was an auto body repair facility in the mid-1980s and was a battery sales facility in the 1960s and 1970s. The operation of this facility has involved the use, storage, and disposal of hazardous substances and petroleum products for over 50 years. Although contamination is not known to exist on this property, the current and past use has likely involved spills, drips, or possibly improper disposal of these substances on the property, which may have migrated and impacted the Project Area. This facility is therefore considered to be a REC.

#### 5.2.3 Koehn's Texaco Service (Site #3)

The Koehn's Texaco Service facility at 1719 Hancock Street in Port Huron, Michigan, is immediately north and west of the Project Area. The facility is listed in the HIST AUTO database. The facility was a gas station from 1973 through 1979. No information was available regarding whether contamination exists on this property; however, gas station properties are often contaminated. Because this property is immediately north of the Project Area across Hancock Street and immediately west of the northern part of the Project Area, it is possible that contaminants associated with the facility have migrated and impacted the Project Area. This facility is therefore considered to be a REC.

#### 5.2.4 Star Location 1268 (Site #4)

The Star Location 1268 facility (Buff's Auto Wash – 13<sup>th</sup> Street) at 2601 13<sup>th</sup> Avenue in Port Huron, Michigan, is within the northern part of the Project Area. The facility was listed in the INVENTORY, LUST, and UST databases. According to information in the EDR report, a release was reported from the UST system in March 1991, and the investigation remains open. One 1,000-gallon diesel UST and three 8,000-gallon gasoline USTs were removed from the property in June 1991.

# vsp

WSP requested information on the LUST release from EGLE; however, WSP was informed that EGLE was unable to locate the records for this facility. The prior PACS included information regarding this facility: "This site reportedly had five USTs that were removed and taken to a Type II landfill. A majority of the site has reportedly been remediated and the impacted soil was disposed of at a Type II landfill. However, the site appeared to still have impacted soil on the eastern portion of the property extending beneath 13th Avenue and along the western wall beneath the utility areas and building foundation." Contamination exists on the property in connection with the 1991 release since the investigation was not completed or closed. Based on the foregoing information, this facility is considered to be a REC.

#### 5.2.5 Speedway #8825 (Site #5)

The Speedway #8825 facility (a.k.a. Total Petroleum Inc., Mitchell's Service) at 2621 and 2619 Pine Grove Avenue in Port Huron, Michigan, is immediately east of the Project Area. The facility is listed in the LUST, UST, Financial Assurance, WDS, RCRA-VSQG, and HIST AUTO databases. A release was reported from the UST system on the property in June 1999, and the investigation was closed in 2000. The facility has two 10,000-gallon gasoline USTs, one 4,000gallon kerosene UST, one 8,000-gallon diesel UST, and one 4,000-gallon diesel UST currently in use. One 500-gallon used oil UST, one 1,000-gallon heating oil UST, one 3,000-gallon diesel UST, one 8,000-gallon gasoline, one 12,000-gallon UST, and one 6,000-gallon gasoline UST were removed from the property. The facility has been a gas station since 1950 and is a generator of D001 ignitable waste with no violations.

Information in a Closure Report obtained from EGLE indicated that groundwater samples collected in 1999 showed that further delineation to the south in the Hancock Street right-of-way was needed. Groundwater analytical results showed that the drinking water criteria were exceeded; however, the groundwater was argued to be "Groundwater Not in an Aquifer" as defined by EGLE, and therefore the criteria were inapplicable. A potentiometric surface map for the facility shows groundwater flow was toward the south-southeast.

Although the site investigation was closed and the groundwater criteria were deemed inapplicable, it is possible that the contamination has migrated and impacted the Project Area. This facility is therefore considered to be a REC.

#### 5.2.6 Speedway #7721 (Site #6)

The Speedway #7721 facility (a.k.a. Marathon Oil) at 2610 Pine Grove Avenue in Port Huron, Michigan, is approximately 265 feet east of the northern part of the Project Area at the northeast corner of Pine Grove Avenue and Hancock Street. The facility was listed in the LUST, UST, WDS, INVENTORY, AIRS, and HIST AUTO databases. This property was occupied by a gas station from about 1926 until the late 1990s. A release was reported from the UST system in November

1989, and the investigation was closed in 1996. One 4,000-gallon gasoline UST, three 12,000-gallon gasoline USTs, three 10,000-gallon gasoline USTs, and one 8,000-gallon diesel UST were removed from the property. The USTs were situated at the south end of the property. A soil venting system operated at this property.

Soil contamination existed on the property; however, during a station rebuild, 3,804 cubic yards of contamination soil were excavated from the north and south portions of the property and disposed. Groundwater was identified in an approximately three-foot thick zone above a confining clay layer approximately eight feet below the ground surface. The groundwater was designated as "Groundwater Not in an Aquifer" as defined by EGLE; however, groundwater contamination was identified on the property in multiple monitoring wells, and off-site to the south and west. The extent of the groundwater contamination does not appear to have been fully defined because it was classified as groundwater not in an aquifer. With contamination extending off the property to the south and west, it is possible that contamination has migrated and impacted the Project Area. This facility is therefore considered to be a REC.

#### 5.2.7 Amoco Oil Co. (Site #7)

The Amoco Oil Co. facility (a.k.a. Drouillard's Standard Service, Sunrise Store #56) at 2539 Pine Grove Avenue in Port Huron, Michigan, is within the excluded area and in close proximity to the northern part of the Project Area. The facility was listed in the RCRA-NonGen/NLR, FINDS, ECHO, LUST, UST, INVENTORY, Financial Assurance, WDS, and HIST AUTO databases. According to information in the EDR report, this facility was a small quantity generator of D001 ignitable waste in 2011 and no violations have been reported. This facility was also listed as a gasoline station since the early 1960s. Three 12,000-gallon gasoline USTs are currently in use; four 8,000-gallon gasoline USTs and one 500-gallon used oil UST are listed as removed. A 1989 release from the UST system was reported as closed in 1996. A total of 315 cubic yards of contaminated soil was excavated and disposed as part of the removal of the prior UST system in 1989. A soil vapor extraction and pump and treat remediation system pilot test was run in 1994; only 21 gallons of groundwater were recovered, and the site was determined not to be conducive to that type of remediation. The closure was based on utility worker direct contact criteria, and the groundwater was classified as "Groundwater Not in an Aquifer".

Although this facility received an unrestricted closure, contamination remains in groundwater on the property, even though it is classified as groundwater not in an aquifer. In addition, surface spillage or drips have likely occurred in the vicinity of the pump islands during customers filling of their vehicles. Groundwater may have migrated and impacted the Project Area. This facility is therefore considered to be a REC.

#### 5.2.8 Port Huron Towing (Site #8)

Port Huron Towing formerly occupied 1700 Hancock Street, mostly within the excluded area between the northern part of the Project Area and the north-central part of the Project Area from at least the mid-1950s through the mid-1970s. This facility was not listed in any database in the EDR report. No information was available to indicate any potentially contaminating activities occurred on this property, or that any USTs or ASTs were present; however, aerial photographs show what appears to be an impound yard or a junkyard with many vehicles parked in it. The vehicles may have been involved in accidents prior to their arrival at the storage yard and may have leaked fluids, contaminating the soil and groundwater. This facility is therefore considered to be a REC.

#### 5.2.9 Duty Free Americas (Site #9)

The Duty Free Americas facility (a.k.a. Everitt-Metzger-Flanders Company) at 2425 Pine Grove Avenue (and historically, 2447 and 2505 Pine Grove Avenue and 1605 and 1701 Elmwood Street) in Port Huron, Michigan, is within the Project Area. The facility is listed in the UST database. According to information in the EDR report, this facility had one 4,000-gallon diesel UST; the tank was installed in 1990 and removed in 2018. EGLE records indicate that the UST was red tagged in 1997, and not subsequently used. No contamination is known to exist in connection with this UST.

This property was historically occupied by the Everitt-Metzger-Flanders Company, an automobile parts manufacturer with several machine shops, as early as 1911. The machine shops included a 6,000-gallon crude oil UST, an oil house, and one or more gasoline USTs north of the main U-shaped building. A railroad spur line, platform, and coal storage area were along the east side of the barn, and the main railroad line was just east of the spur line. The facility was vacant in 1930 and had an address of 1701 Elmwood Street at that time. It was a stable in 1933 and occupied by the Port Huron Thresher Company and Trippensee Manufacturing Company in the 1940s with address 1605 Elmwood Street. It was used by various contractors in 1950. According to the prior PACS, this facility included addresses 2425, 2447, and 2505 Pine Grove Avenue and businesses included a florist, sheet metal contracting, and commercial sales.

The use of this facility as a machine shop with likely cutting oil and/or solvent use, aboveground and underground petroleum storage, a railroad spur line, and coal storage likely contaminated the soil and groundwater on the Project Area. This facility is therefore considered to be a REC.

#### 5.2.10 United 4006 Tulsa Oil Corp. (Site #10)

The United 4006 Tulsa Oil Corp. facility at 2401 Pine Grove Avenue is within the Project Area. The facility is listed in the UST database. According to information in the EDR report, this facility had one 6,000-gallon diesel UST, one 8,000-gallon gasoline UST, and two 20,000-gallon gasoline

J:\env\31000318.001\BWB PACS report.docx

### nsp

USTs. All tanks are listed as removed in 1988. According to the prior PACS, this facility was listed as a gasoline service station from 1953 through the late 1980s.

Although no information was available regarding whether contamination exists on the property, the fact that the facility was a gas station for over 30 years makes it likely that contamination is present within the Project Area. This facility is therefore considered to be a REC.

#### 5.2.11 USA Station #315 (Site #11)

The USA Station #315 facility (a.k.a. USA Petroleum Corporation) at 2432 Pine Grove Avenue in Port Huron, Michigan, is on the northeastern part of the Project Area at the southeast corner of Pine Grove Avenue and Church Street. The facility is listed in the RCRA VSQG, LUST, UST, INVENTORY, FINDS, ECHO, WDS, and HIST AUTO databases from 1992 through 2007; it was also listed in the street directories as a used car sales facility from 1963 through 1992. The facility was a generator of D001 ignitable waste with no violations identified.

Two 15,000-gallon gasoline USTs and one 15,000-gallon diesel/gasoline UST were registered for this facility; the tanks were installed in 1991, two were removed in 2010, and the third was closed in place. A release of gasoline and MTBE was reported from this facility in May 2010, and the status of the release is listed as "open". No additional information was available regarding this facility. The presence of a LUST facility with an open investigation on the Project Area is considered to be a REC.

#### 5.2.12 Pete's Car Care (Site #12)

The Pete's Car Care facility at 2402 Pine Grove Avenue in Port Huron, Michigan, is an excluded property surrounded by the Project Area at the northeast corner of Pine Grove Avenue and Elmwood Street. The facility is listed in the HIST AUTO database as Pete's Car Care. It was a gas station from the late 1930s through 1982. No additional information regarding this facility, including whether the USTs were removed or whether contamination exists is available. The presence of a former gas station that operated for almost 50 years on a property completely surrounded by the Project Area is therefore considered to be a REC.

#### 5.2.13 Detroit Edison Pine Grove Substation (Site #13)

The Detroit Edison Pine Grove Substation is situated at the southwest corner of Elmwood Street and Pine Grove Avenue, and has addresses including 1508, 1608 and 1702 Elmwood Street and 2341 Pine Grove Avenue. This facility was not listed in any database in the EDR report. The substation has been present on the Project Area since 1926 and includes an area containing transformers and other electrical components. The transformers likely contain PCB oil, and leakage has likely occurred in the 95 years since the substation was constructed, potentially

impacting the subsurface soil and/or groundwater. The presence of the substation electrical equipment is considered to be a REC.

#### 5.2.14 MI Dept. of Transportation Blue Water Bridge (Site #14)

The MI Dept. of Transportation Blue Water Bridge facility (a.k.a. Blue Water Bridge Maintenance Garage, MDOT – Blue Water Bridge) at 1410 Elmwood Street in Port Huron, Michigan, is within the Project Area. The facility is listed in the RCRA-VSQG, FINDS, ECHO, BROWNFIELDS, RGA LUST, LUST, UST, INVENTORY, PART 201, AIRS, WDS, and RGA PART 201 databases. The facility was a conditionally exempt small quantity generator of D001 ignitable waste during construction of highways, streets, and bridges, in particular the Blue Water Bridge. No violations were identified in connection with this facility listing. A release of an unknown substance was reported from a UST system in 1991, and a release of gasoline from a UST system was reported in 1993; the 1991 release is listed as open and the 1993 release is listed as closed. The USTs were reportedly removed from the facility.

WSP requested information on the LUST releases from EGLE; however, WSP was informed that EGLE was unable to locate the records for this facility. The prior PACs included information regarding this facility: "This site reportedly had a release in 1991 and one in 1993. Based on the information reviewed, impacted soil was observed in 1991 due to releases from two 2,000-gallon USTs located on the northern portion of the site, which contained gasoline and diesel fuel. In 1993 a release was observed from a 1,000-gallon gasoline tank located in the central portion of the site. The release in 1991 reportedly was not completely remediated. The release identified in 1993 reportedly was remediated." Contamination exists on the property in connection with at least the 1991 release since the investigation was not completed or closed. Based on the foregoing information, this facility is considered to be a REC.

#### 5.2.15 Koppel's Shell (Site #15)

The Koppel's Shell at 2327 Pine Grove Avenue was a gas station that was present from at least 1950 through 1963 and is within the Project Area. This facility was not listed in any database in the EDR report. No information was available regarding how many or what size USTs were present at this location, or whether the USTs were removed from the ground when the station was demolished and later covered by the expansion of the Blue Water Bridge expansion. The presence of a former gas station on the Project Area is considered to be a REC.

#### 5.2.16 Moser Coal (Site #16)

The Moser Coal Yard at 2201 Pine Grove Avenue was situated at the northwest corner of Pine Grove Avenue and Harker Street from at least 1950 through the late 1960s within the Project Area. This facility was not listed in any database in the EDR report. Coal residue contains heavy metals,

and can contaminate soil underlying coal storage areas, particularly when stored on the ground. The historic presence of a coal storage area on the Project Area is considered to be a REC.

#### 5.2.17 Bradley's Citgo (Site #17)

The Bradley's Citgo facility at 2307 Pine Grove Avenue was a gasoline station near the northwest corner of Pine Grove Avenue and Harker Street within the Project Area. It was depicted on the Sanborn maps and street directories during the 1950s and 1960s. This facility was not listed in any database in the EDR report. No information was available regarding how many or what size USTs were present at this location, or whether the USTs were removed from the ground when the station was demolished and later covered by the expansion of the Blue Water Bridge expansion. The presence of a former gas station in the Project Area is considered to be a REC.

#### 5.2.18 Pete's Marathon Car Care (Site #18)

The Pete's Marathon Car Care facility (a.k.a. MDOT, Baker's Dozen/Can AM 5027) at 2308 Pine Grove Avenue in Port Huron, Michigan, is within the Project Area. The facility is listed in the INVENTORY, LUST, UST, and HIST AUTO databases and was a gas station from 1948 until 1978. A release from five 4,000-gallon USTs on the property was reported in May 1991; the release investigation is currently listed as open.

The prior PACS indicates that the facility had five USTs that were removed, the building was demolished, and that approximately 13,000 cubic yards of contaminated soil were excavated and disposed at a landfill. The addition to the Blue Water Bridge Plaza was constructed on top of this property. The soil excavation did not remove all of the contaminated material; some remained along the western portion of the property and extended beyond Pine Grove Avenue. Although significant contamination had been remediated, the presence of residual contamination within the Project Area is considered to be a REC.

#### 5.2.19 Former London Farm Dairy (Site #19)

The Former London Farm Dairy facility (a.k.a. Ryder Transportation Services) at 2119 12<sup>th</sup> Avenue is within the Project Area. The facility is listed in the LUST, UST, INVENTORY, WDS, RCRA NonGen/NLR, RCRA-VSQG, FINDS, and ECHO databases. According to the former PACS, this facility operated from the early 1950s until 2001. A pump island was situated in the center of the property.

According to the EDR report, three releases were reported from UST systems at the facility, including two in 1990 and one in 1991. All three releases are listed as closed. The facility had three 12,000-gallon diesel USTs. WSP obtained information from EGLE regarding a fourth release that was reported in 2004 from a 12,000-gallon diesel UST discovered during construction of bridge work on the property; it is unclear whether the UST for which the fourth release was

J:\env\31000318.001\BWB PACS report.docx

reported was one of the original three USTs. It appears that the 2004 release remains as "open" status, and no additional information was available regarding the release from EGLE. This facility formerly was a generator of D001 ignitable waste, and no violations were reported. Because at least the 2004 release appears to have not been investigated or closed, contamination likely remains on the property.

WSP also observed the presence of one or more hydraulic hoists and a pit or drain in the floor of the former maintenance garage on the eastern portion of this property. The hoists may have leaked, and the hydraulic oil reservoirs for the hoists likely remain in the ground at this location. Because of the foregoing information and the fact that this location is within the Project Area, this facility is considered to be a REC.

#### 5.2.20 Guizar's Auto Co. (Site #20)

The Guizar's Auto Co. facility at 2107-2111 Pine Grove Avenue was a gasoline station in the 1940s, 1950s, and 1960s. This facility is located within the Project Area in the area bounded by Pine Grove Avenue, the abandoned Mansfield Street, and the abandoned 12<sup>th</sup> Avenue. This facility was not listed in any database in the EDR report. The prior PACS report indicated that the property was an auto dealership and service garage from the 1960s through 2002. EGLE indicated that it had no records regarding this facility. Gas stations and auto repair facilities generally have soil and groundwater contamination associated with them. The presence of a former gas station and auto repair facility on the property is considered to be a REC.

#### 5.2.21 Ayotte Dugal B (Site #21)

The Ayotte Dugal B facility at 2108 Pine Grove Avenue in Port Huron, Michigan, is within the Project Area at the northeast corner of the abandoned Mansfield Road and Pine Grove Avenue. The facility is listed in the HIST AUTO database. It was listed as a gas station from 1972 through 1975. The street directories also indicate that a gas station was present at this location from 1966 through 1980.

EGLE indicated that it had no records regarding this facility. There is also no information available regarding whether the USTs associated with the former gas station had been removed. Gas stations generally have soil and groundwater contamination associated with them. Contamination from this facility may have migrated and impacted the Project Area. This facility is therefore considered to be a REC.

#### 5.2.22 One Hour Cleaners (Site #22)

The One Hour Cleaners facility (a.k.a. One Hour Martinizing) at 2037 Pine Grove Avenue in Port Huron, Michigan, is within the Project Area. The facility is listed in the HIST CLEANER, DRYCLEANERS, RCRA-NonGen/NLR, FINDS, and ECHO databases. According to information

J:\env\31000318.001\BWB PACS report.docx

in the EDR report, this facility was a one-hour dry cleaner from 1969 through 2001. The prior PACS also indicates that this facility was a gas station from about 1940 through the early 1960s; the 1950 Sanborn map shows three USTs were present at this property. The facility was a generator of D001 ignitable waste, and no violations were reported.

EGLE indicated that it had no records regarding this facility. There is also no information available regarding whether the USTs associated with the former gas station had been removed. Gas stations generally have soil and groundwater contamination associated with them, and dry cleaners often had leaks or spills or improper handling and disposal of wastes that could also have contaminated the property. The presence of a former gas station and dry cleaner operation within the Project Area is considered to be a REC.

#### 5.2.23 Shell Port Huron #3 (Site #23)

The Shell Port Huron #3 facility (a.k.a. Shell Oil Company, Dimon's Shell Service) at 2014 Pine Grove Avenue in Port Huron, Michigan, is immediately east of the Project Area in the wedge of greenspace between Pine Grove Avenue and 10<sup>th</sup> Avenue. The facility was listed in the UST, LUST, RCRA NonGen/NLR, FINDS, ECHO, INVENTORY, WDS, and HIST AUTO databases. The site is currently a vacant, grass-covered property, but was listed as a gas station from 1971 through 1997. Three USTs were listed for this facility, including a 1,000-gallon used oil UST and two 8,000-gallon gasoline USTs. A release of gasoline was reported in July 2000 and the release investigation is listed as open. RCRA non-generators do not presently generate hazardous waste. This site was formerly a generator of D001 ignitable waste, and no violations were reported.

Groundwater was identified in borings drilled on the property at depths of approximately four feet below the ground surface. The direction of groundwater flow at this facility was found to be to the east in August 2000, and to the west-southwest in April/May 2001. Soil and groundwater contamination remains on the property at concentrations exceeding regulatory criteria. It is unclear whether all USTs were removed from the property when the station was demolished. Because of the foregoing information, this facility is considered to be a REC.

#### 5.2.24 Former Gasoline Station (Site #24)

A former gasoline station was present at 2004 10<sup>th</sup> Avenue, immediately east and north of the southeast corner of the Project Area. This facility was not listed in any database in the EDR report. A gasoline service station was listed under different names from at least 1936 through 1953. No information was available regarding whether contamination exists at this property, or whether the USTs were ever removed. Information obtained from EGLE for nearby properties of concern shows that groundwater is present, and that it may flow to the west in this area, allowing contaminants to migrate and impact the Project Area. This facility is therefore considered to be a REC.

#### 5.2.25 Former Auto Repair and Oil Storage (Site #25)

The property at 1413 Lyon Street and 1915 10th Avenue on the southeast portion of the Project Area were occupied by auto repair facilities (possibly related). This facility was not listed in any database in the EDR report. A small auto repair was in a garage on the north end of a residential lot at 1413 Lyon Street beginning in the late 1940s and lasting until the early 1950s. Beginning in the 1950s, a larger auto repair facility was at 1915 10th Avenue; it was present until the 1970s. While the auto repair facility was at the location on 10<sup>th</sup> Avenue, the garage on Lyon Street was used for oil storage.

No additional information was available regarding these facilities, or whether contamination exists in connection with the historic auto repair activities. Auto repair facilities often have contamination associated with them as a result of leaks, spills, drips, poor housekeeping, and/or improper waste disposal practices. The presence of historic auto repair operations on the Project Area is therefore considered to be a REC.

#### 5.2.26 Clark Oil #635 (Site #26)

The Clark Oil #635 facility (a.k.a. Clark Retail Enterprises Inc., Clark Station #635, Clark Oil Co., Admiral Petroleum II LLC #5873) at 1912-18 Pine Grove Avenue in Port Huron, Michigan, is immediately adjacent to the southeast corner of the Project Area. The facility is listed in the LUST, UST, INVENTORY, SPILLS, AUL, BEA, RCRA-VSQG, FINDS, ECHO, and WDS databases. The facility was listed as a gas station from 1991 through 2014; the 1967 historic Sanborn map also showed the property was occupied by a gas station that had been constructed in 1959. This site was a generator of D001 ignitable waste, and no violations were reported.

A release was reported from the UST system on the property in 1991, and the investigation was closed in 2018. Two 7,500-gallon gasoline USTs are listed as removed from the ground, and two 12,000-gallon gasoline USTs are listed as in use. Approximately 745 cubic yards of contaminated soil was excavated and disposed at a landfill during the UST removal activities. The AUL is filed with MDOT, indicating that contamination remains in the Pine Grove Avenue right-of-way. A spill of gasoline was reported on the property in 2010 when an automatic shut off on a dispenser failed, and two or three gallons of gasoline overfilled onto the ground.

According to a BEA report for the facility obtained from EGLE, high concentrations of soil and groundwater contaminants are present on the property; some of the soil constituents exceed the C<sub>sat</sub> concentrations, indicating that non aqueous phase liquid (NAPL) could be present although NAPL has not been identified in the monitoring wells on or off the property. The contaminants appear to extend off the property under Pine Grove Avenue primarily to the southwest (onto the Project Area). Groundwater, which is present approximately three to four feet below the ground surface, has been shown to flow to the east, west, and southwest. Because contamination from

this facility has migrated off the property to the east and west into the adjacent rights-of-way and onto the Project Area, WSP considers this facility to be a REC.

#### 5.2.27 Former Gas Station (Site #27)

The property at 1310 Lyon Road in Port Huron, Michigan, is immediately south of the southeast part of the Project Area. This facility was not listed in any database in the EDR report. This property was an auto supply business from the late 1930s through the late 1940s, when it became a gas station. It operated as a gas station until the early 1970s. No additional information is available regarding this facility, including whether the USTs were removed or whether contamination exists in connection with the historical gas station operation. Because of the close proximity of this former gas station to the Project Area, this facility is believed to be a REC.

#### 5.2.28 Ecolab

The Ecolab facility at 1720 Hancock Street in Port Huron, Michigan, is within the Project Area. The facility was listed in the RCRA-VSQG, FINDS, and ECHO databases. This site was a generator of D001 ignitable waste, and no violations were reported. WSP requested file information for this property from EGLE; however, EGLE indicated that it had no records regarding this facility.

The address of this facility corresponds to the Quality Inn on the northwestern part of the Project Area. During the reconnaissance, WSP observed no evidence of Ecolab as a current or former business at this address. WSP believes that the listing of this facility at 1720 Hancock Street may be erroneous, and that it is unlikely that contamination associated with this business has impacted the property. This facility is therefore not considered to be a REC.

#### 5.2.29 Blue Water Transit

The Blue Water Transit facility at 1520 Hancock Street in Port Huron, Michigan, is approximately 160 feet northeast of the Project Area at the southeast corner of Pine Grove Avenue and Hancock Street. The facility was listed in the AST database. One 15,000-gallon compressed natural gas AST is listed as in use at this facility. WSP did not observe the AST or any other development at the mapped location; the property was a small, triangular-shaped property that was covered by grass and a few small trees. WSP believes that this facility was erroneously mapped and is actually located at another location. This facility is therefore not considered to be a REC.

#### 5.2.30 Shell Port Huron #2

The Shell Port Huron #2 facility at 2856 Pine Grove Avenue in Port Huron, Michigan, is approximately 975 feet north of the Project Area. The facility is listed in the LUST, UST, INVENTORY, Financial Assurance, and WDS databases. A petroleum release was reported in

# visp

2000 and the release incident remains open. According to the EDR report, the facility has four 12,000-gallon gasoline USTs currently in use. One 1,000-gallon used oil UST, one 4,000-gallon diesel UST, one 4,000-gallon gasoline UST, one 6,000-gallon gasoline UST, and one 8,000-gallon gasoline UST were listed as removed. Although contamination exists at this property, the facility is believed to be too distant for the contaminants to migrate and impact the Project Area. This facility is therefore not considered to be a REC.

#### 5.2.31 2830-2866 Pine Grove Ave. & 1631-1641 Garfield

The 2830-2866 Pine Grove Ave. & 1631-1641 Garfield facility in Port Huron, Michigan, is approximately 700 feet north of the Project Area. The site was listed in the INVENTORY and BEA databases. Although contamination exists at this property, the facility is believed to be too distant for the contaminants to migrate and impact the Project Area. This facility is therefore not considered to be a REC.

#### 5.2.32 Begin Transport

The Begin Transport facility at 2741 Pine Grove Avenue in Port Huron, Michigan, is approximately 350 feet north of the Project Area. The facility is listed in the RCRA-NonGen/NLR database. RCRA non-generators do not presently generate hazardous waste. This site was formerly a generator of D001 ignitable waste, and no violations were reported. Based upon the foregoing information, and since no known contamination is associated with this facility, this facility is not considered to be a REC.

#### 5.2.33 3846113 Canada Inc.

The 3846113 Canada Inc. facility was plotted at Pine Grove Avenue and Riverview Road in Port Huron, Michigan by EDR. The only street address given in the EDR report for this business is 2814 14<sup>th</sup> Avenue; however, WSP researched the company, and this company address is in Markham, ON (a suburb of Toronto, Ontario). WSP believes that the plotting of this facility near the Project Area is erroneous. The facility is listed in the RCRA NonGen/NLR database. RCRA non-generators do not presently generate hazardous waste. This facility was a generator of D001 ignitable waste with no violations; the EDR report indicates the NAICS description was for "remediation services". Based on the foregoing information, this facility is not considered to be a REC.

#### 5.2.34 Family Dollar Stores

The Family Dollar Stores facility at 2700 Pine Grove Avenue in Port Huron, Michigan, is approximately 290 feet northeast of the Project Area. This facility is listed in the RCRA-VSQG database. This facility is a generator of D001 ignitable waste with no violations. No contamination

is known to exist in connection with this facility. This facility is therefore not considered to be a REC.

#### 5.2.35 CA Wood Auto Co.

The CA Wood Auto Co. facility (a.k.a. Cawood Pontiac Buick Honda) at 2516 Pine Grove Avenue in Port Huron, Michigan, is immediately northeast of the Project Area at the northeast corner of Pine Grove Avenue and Church Street. The facility was listed in the LUST, UST, INVENTORY, DEL PART 201, BEA, RCRA-VSQG, FINDS, ECHO, and WDS databases. This property has been an automobile dealership and service facility since the late 1950s. Five USTs were removed from this facility, including one 550-gallon motor oil UST, one 550-gallon transmission fluid UST, one 1,000-gallon used oil UST, one 1,500-gallon motor oil UST, and one 5,000-gallon gasoline UST. One of the USTs was situated north of the main building, and the others were situated along the southwest corner of the main building. A release from a UST system was reported in June 1991 and closed in August 1991. Approximately 120 cubic yards of contaminated soil were excavated and disposed as part of the UST removal activities. This site was formerly a generator of D001 ignitable waste, and several violations were reported in the generators – general, pre-treatment, and recordkeeping categories.

WSP reviewed a BEA prepared by PM Environmental for the property in 2019. A total of 18 soil borings were drilled on the property to evaluate RECs associated with the current and historical uses of the property. Groundwater was typically encountered in soil borings drilled on the property at depths between two and four feet below the ground surface. Laboratory analytical results indicate that trimethylbenzene compounds were present in groundwater at concentrations exceeding the most restrictive residential cleanup criteria established by EGLE, making the site a Facility. The contamination associated with this facility appears to be restricted to the property and has not migrated off site or impacted the Project Area. This facility is therefore not considered to be a REC.

#### 5.2.36 MDOT

The MDOT facility at 2136 Pine Grove Avenue in Port Huron, Michigan, is within the Project Area. The facility is listed in the RCRA NonGen/NLR database. RCRA non-generators do not presently generate hazardous waste. This site was formerly a generator of D001 ignitable waste, and no violations were reported. This facility does not appear to correspond to any structure currently in the Project Area and is mapped at the intersection of Pine Grove Avenue and Harker Street. This listing is likely the result of construction of bridge and highway work for the plaza expansion and may have been a temporary or prior building address used as an office by MDOT at the time. Based on the foregoing information, this facility is not considered to be a REC.

#### 5.2.37 Michigan Department of State Police

The Michigan Department of State Police facility at 2510 10<sup>th</sup> Avenue in Port Huron, Michigan, is approximately 560 feet northeast of the Project area, northeast of the intersection of Church Street and 10<sup>th</sup> Avenue. The facility is a residential dwelling and is listed in the RCRA NonGen/NLR database. In 2009, this facility was a generator of D001 ignitable waste; the EDR report indicates the NAICS description was for "remediation services" likely indicating this was a cleanup of a drug house. Based on the foregoing information, it is believed that this facility is too distant to pose a threat to the Project Area, therefore, this facility is not considered to be a REC.

#### 5.2.38 Former City Bottling Works

The city bottling works was formerly present at 2014 11<sup>th</sup> Avenue from at least 1946 through 1985. The facility was subsequently occupied by Sweeny Cleaning Services in the early to mid-1990s. It is unclear exactly what activities occurred in the bottling works; however, it is likely that machinery was used to sterilize, fill, cap, and package bottles for shipment. The bottling machinery would require periodic maintenance. The cleaning company was a facility that responded to off-site businesses or homes to do cleaning. While cleaning chemicals were likely stored at the facility, no cleaning was likely conducted on the property. No information exists to suggest that contamination exists on the property, and the activities conducted likely did not involve the widespread or regular use of quantities of chemicals. This facility is therefore not considered to be a REC.

#### 5.2.39 Amoco Oil Co.

The Amoco Oil Co. facility at 124 Franklin Road in Port Huron, Michigan, was plotted by EDR as immediately northeast of the Project Area at the northeast corner of Church Street and Pine Grove Avenue, which corresponds to the CA Wood Auto property. The facility was listed in the UST database and had one 2,000-gallon UST that is listed as closed in place in 1975. WSP was unable to ascertain the location of this facility but believes that it is not located in proximity to the Project Area. This facility is therefore not considered to be a REC.

#### 5.2.40 Marina

The Marina facility (a.k.a. Mitch's Landing) at 1913 Riverside Drive in Port Huron, Michigan, is immediately south of the Project Area on the east bank of the Black River south of I-94. The facility is listed in the AST and UST databases. According to information in the EDR report, this facility has a 6,000-gallon AST currently in use, and a 10,000-gallon gasoline/kerosene UST that was installed in 1976 and removed from the ground in 2012. No information is available regarding whether contamination exists on the property. The AST is situated approximately 200 feet south of the edge of the Project Area, and only 20 feet from the water's edge. Aboveground piping extends from the AST to the fuel dispenser on the dock southwest of the store. Groundwater, if

present, likely flows southwest to the adjacent Black River, and is unlikely to impact the Project Area. This facility is therefore not considered to be a REC.

#### 5.2.41 Star Location #1325

The Star Location #1325 facility at 1839 Riverside Road in Port Huron, Michigan, is approximately 600 feet south of the Project Area. The facility is listed in the UST database. According to information in the EDR report, one 550-gallon gasoline UST and one 1,000-gallon gasoline UST were removed from the property in 1981. This facility is mapped at a residential dwelling, which is unlikely to be the correct location of the facility where the USTs were situated. Based upon the foregoing information, and since no known contamination is associated with this facility, this facility is not considered to be a REC.

#### 5.2.42 Joe's Sinclair Service

The Joe's Sinclair Service facility at 1310 Lyon Street in Port Huron, Michigan is immediately southeast of the Project Area on the south side of Lyon Street between 10<sup>th</sup> Avenue and Pine Grove Avenue. This facility is listed in the HIST AUTO database as a gasoline station from 1969 through 1971. Historic Sanborn maps show that a gasoline station with two USTs was on the property in 1950. No additional information is available regarding whether contamination exists on the property, or whether groundwater is present and may flow northwest toward the Project Area. Gas station properties are often contaminated; however, contaminants typically are limited to an area of only up to a few hundred feet from the source. The direction of groundwater flow at the north end of the Project Area was to the south, which would carry contaminants from this facility away from the Project Area. Based upon the foregoing information, this facility is not considered to be a REC.

#### 5.2.43 Pine Grove Corp.

The Pine Grove Corp. facility at 1643 Garfield Behind Cleaners 290 [sic] in Port Huron, Michigan, is approximately 550 feet north-northeast of the Project Area. The facility is listed in the UST database. According to information in the EDR report, one 2,000-gallon gasoline UST was installed on the property in 1993, and it was removed in 1998. No contamination was identified in connection with the UST at this facility. Based upon the foregoing information, this facility is not considered to be a REC.

#### 5.2.44 Troy Dry Cleaners, Inc.

The Troy Dry Cleaners, Inc. facility (a.k.a. Troy Laundry Inc.) at 1629 Garfield Street in Port Huron, Michigan, is approximately 700 feet north-northeast of the Project Area. The facility is listed in the DRYCLEANERS, RCRA-VSQG, FINDS, and ECHO databases. The facility is a generator of D001 ignitable waste, and no violations have been identified. It is unclear whether contamination

exists at this property, but if so, the facility is believed to be too distant for the contaminants to migrate and impact the Project Area. This facility is therefore not considered to be a REC.

#### 5.2.45 Kemp Printing

The Kemp Printing facility at 1722 Poplar Street in Port Huron, Michigan, is approximately 1,250 feet southeast of the Project Area. The site was listed in the RCRA-NonGen/NLR, FINDS, and ECHO databases. According to information in the EDR report, this facility was a small quantity generator of ignitable waste, and no violations were reported. Based upon the foregoing information, its distance from the Project Area, and since no known contamination is associated with this facility, this facility is not considered to be a REC.

#### 5.2.46 MDOT Right-of-Way Former Davis

The MDOT Right-of-Way Former Davis facility at 819 State Street in Port Huron, Michigan, is approximately 1,600 feet east of the Project Area. The facility is listed in the LUST and INVENTORY databases. Groundwater, if present at this location, likely flows east to the nearby St. Clair River, and is unlikely to flow west to impact the Site. Based upon the foregoing information, this facility is not considered to be a REC.

#### 5.2.47 City of Port Huron WTP

The City of Port Huron WTP facility (a.k.a. City of Port Huron WTP, City of Port Huron – Whipple St.) at 915 Whipple Street in Port Huron, Michigan, is approximately 1,650 feet southeast of the Project Area. The site is listed in the INVENTORY, LUST, UST and WDS databases. According to the EDR report, a release from the UST system on the property was reported in 1989, and another in January 1990. Both releases are listed as open. Two unregistered USTs were removed from the property in 1990. Groundwater, if present at this location, likely flows east to the nearby St. Clair River, and is unlikely to flow northwest to impact the Site. Based upon the foregoing information, this facility is not considered to be a REC.

#### 5.2.48 Metalor Technologies USA Corporation

The Metalor Technologies USA Corporation facility at 1640 Thomas Street in Port Huron, Michigan, is approximately 1,740 feet south of the Project Area. The site was listed in the INVENTORY, BEA, and WDS databases. Groundwater, if present at this location, likely flows west to the nearby Black River, or southeast toward the St. Clair River, and is unlikely to flow north to impact the Site. Based upon the foregoing information, this facility is not considered to be a REC.

#### 5.2.49 Thomas Edison Inn/Blue Water Convention Center

The Thomas Edison Inn/Blue Water Convention Center facility (a.k.a. Thomas Edison Inn & Contiguous Parcels) at 500 Thomas Edison Parkway in Port Huron, Michigan, is approximately 1,900 feet east of the Project Area. The site is listed in the BROWNFIELDS, FINDS, and BEA databases. According to the EDR report, the property was formerly a cement plant and use by the Grand Trunk Railway (including a roundhouse). The contaminants associated with the prior uses of the property are likely to be relatively immobile or will have limited migration. In addition, the direction of groundwater flow at this facility (if present) is likely to be east to the adjacent St. Clair River, which is away from the Project Area. Based upon the foregoing information and its distance from the Project Area, this facility is not considered to be a REC.

#### 5.2.50 Speedway #8822

The Speedway #8822 facility (a.k.a. 2190 Water Street) at 2190 Water Street in Port Huron, Michigan, is approximately 1,600 feet southwest of the Project Area on the other side of the Black River. The site is listed in the INVENTORY, BEA, and AUL databases. No specific information was available regarding contamination at this facility. Based upon the facility's distance from the Project Area, and the presence of the Black River between the facility and the Project Area, this facility is not considered to be a REC.

#### 5.2.51 Blue Water Fuel

The Blue Water Fuel facility at 2180 Water Street in Port Huron, Michigan, is approximately 1,860 feet southwest of the Project Area on the other side of the Black River. The site is listed in the LUST, UST, AUL, INVENTORY, BEA, Financial Assurance, and WDS databases. Based upon the facility's distance from the Project Area, and the presence of the Black River between the facility and the Project Area, this facility is not considered to be a REC.

#### 5.2.52 Port Huron Hotels

The Port Huron Hotels facility at 2021-2025 Water Street in Port Huron, Michigan is approximately 1,690 feet southwest of the Project Area on the other side of the Black River. The facility is listed in the INVENTORY, BEA, and BROWNFIELDS databases. Based upon the facility's distance from the Project Area, and the presence of the Black River between the facility and the Project Area, this facility is not considered to be a REC.

#### 5.2.53 Speedy Q Market #206

The Speedy Q Market #206 facility at 2020 Water Street in Port Huron, Michigan, is approximately 2,175 feet southwest of the Project Area on the other side of the Black River. The site is listed in the INVENTORY, Financial Assurance, LUST, UST, AUL, and WDS databases. Three releases were reported from the UST system on the property: one in 1991 which is listed as closed, one

J:\env\31000318.001\BWB PACS report.docx

in 2009 and one in 2011, both of which are listed as open. Based upon the facility's distance from the Project Area, and the presence of the Black River between the facility and the Project Area, this facility is not considered to be a REC.

#### 5.2.54 E B Eddy Paper Inc.

The E B Eddy Paper Inc. facility at 1700 Washington Avenue in Port Huron, Michigan, is approximately 2,800 feet south of the Project Area. This property is listed in the DEL PART 201 and NPDES databases. Based upon the facility's distance from the Project Area, this facility is not considered to be a REC.

#### 5.2.55 Henkel Corporation

The Henkel Corporation facility (a.k.a. Acheson Colloids Co.) at 1600 Washington Avenue in Port Huron, Michigan is approximately 2,600 feet south of the Project Area. The facility was listed in the LUST, UST, and PART 201, INVENTORY, AIRS, and WDS databases. According to information in the EDR report, contaminants at this facility include petroleum, coal products, and trichloroethylene. The address for this facility is a residential dwelling; therefore, it is likely not the actual location of the contaminated facility. WSP believes that the actual facility location is in the industrial area west of the dwelling's location and is still about a half mile south of the Project Area. Groundwater, if present at this location, likely flows west to the nearby Black River, or southeast toward the St. Clair River, and is unlikely to flow north to impact the Site. Based upon the foregoing information, this facility is not considered to be a REC.

#### 5.2.56 Barbru Grocery

The Barbru Grocery facility (a.k.a. Light House Party Store) at 2738-40 Gratiot Avenue in Port Huron, Michigan, is approximately 2,700 feet northeast of the Project area. The site is listed in the INVENTORY, LUST, UST, and WDS databases. A release from the UST system on the property was reported in 1991 and another was reported in 2005; the release investigations are both currently listed as open. This facility is believed to be too distant from the Project Area and therefore is not considered to be a REC.

### 6.0 CONCLUSIONS

This report documents a PACS performed for the Blue Water Bridge (BWB) Plaza (the Project Area) for MDOT. A PACS was previously conducted in 2002 to inform the NEPA decision. The purpose of this PACs is to reevaluate and inform a decision for the NEPA reevaluation. The Project Area covers approximately 99 acres and is roughly bounded by I-94/I-69, Riverside Drive, Scott Avenue, and the Black River on the west, Riverview Street on the north, Pine Grove Avenue to Church Street to 10th Avenue on the east, and Scott Avenue and Lyon Street on the south.

The Project Area is situated in Port Huron, St. Clair County, Michigan as shown on Figure 1 in Appendix A.

The purpose of the PACS is to investigate parcels of property for known or potential environmental contamination that could affect the Project's design, cost, or schedule. The primary objectives in conducting the PACS are to determine: 1) whether any RECs exist in connection with the Project Area; 2) if a PSI is necessary to evaluate the RECs; and 3) to provide suggested mitigation for any issues.

The PACs evaluation included the following activities: 1) governmental database records search, with a review of supplemental state or local agency records to help clarify key information in the database search report, as appropriate; 2) site reconnaissance to help identify properties or uses that could potentially impact the Project Area as well as to verify the database findings; and 3) historical sources review (aerial photographs, Sanborn fire insurance maps, street directories, and topographic maps) to obtain information regarding the historical use of properties near or within the Project Area.

The current PACS identified 27 RECs both within and immediately adjacent to the Project Area as shown on Figure 2 in Appendix A. The list number of the RECs below correspond to the REC numbers illustrated on Figure 2. The following table summarizes the RECs:

- The Wilton's TV Appliance Repair facility at 2703 Pine Grove Avenue, immediately north
  of the Project Area is a UST facility. The UST was reportedly removed, but no information
  was available regarding whether any contamination existed on the property. Because this
  property is immediately adjacent to the Project Area, and groundwater flow in the area
  generally flows south, contaminants could have migrated and impacted the Project Area.
- 2. An instant oil change facility has been present at 2624 14<sup>th</sup> Avenue, immediately west of the north part of the Project Area since the late 1980s. Before that, the property was occupied by an auto body repair facility and a battery sales facility. No information is available regarding whether contamination exists on the property. Because this property is immediately adjacent to the Project Area, contaminants could extend onto or have migrated and impacted the Project Area.
- 3. The former Koehn's Texaco service station at 1719 Hancock Street was a former gas station during at least the 1970s and was situated immediately north and west of the Project Area. No information is available regarding whether the USTs associated with the former gas station were removed, or whether soil and/or groundwater contamination exists in connection with the facility. Groundwater on several nearby properties has been shown to flow to the south, which would allow contaminants to migrate and impact the Project Area.

### 1150

- 4. The former Star Location 1268 facility at 2601 13<sup>th</sup> Avenue is situated within the northern part of the Project Area. This is a LUST facility with an open investigation, and soil and groundwater contamination exists on the property.
- 5. The Speedway #8825 facility at 2619 and 2621 Pine Grove Avenue is immediately east of the Project Area. Contamination exists in connection with this facility that extends under Hancock Street, and groundwater flow at the facility has been shown to flow to the south toward the Project Area.
- The Speedway #7721 facility at 2610 Pine Grove Avenue is northeast of the Project Area. Soil and groundwater contamination associated with this facility exists and has migrated to the southwest toward the Project Area.
- 7. The BP gas station (former Amoco Oil) at 2539 Pine Grove Avenue is within the excluded area and in close proximity to the Project Area. Contamination exists on the property at concentrations exceeding unrestrictive regulatory criteria and may have migrated and impacted the Project Area.
- 8. The former Port Huron Towing business occupied 1700 Hancock Street, mostly within the excluded area between the northern part of the Project Area and the north-central part of the Project Area, from at least the mid-1950s through the mid-1970s. Aerial photographs show what appears to be an impound yard or a junkyard with many vehicles parked in it. The vehicles appear to have leaked fluids, contaminating the soil and groundwater. Construction of a sewer line through the area occupied by the former towing company encountered contaminated soil. The contamination may extend onto or have migrated and impacted the Project Area.
- 9. The Duty Free Americas facility at 2425 Pine Grove Avenue on the northern portion of the Project Area was formerly the location of an automobile manufacturing facility and machine shops with both aboveground and underground petroleum storage and probable solvent use. Soil and groundwater contamination likely exists in connection with the former manufacturing operation.
- 10. The former United 4006 Tulsa Oil facility at 2401 Pine Grove Avenue is situated on the northern part of the Project Area. It was a gas station from the early 1950s through the 1980s. Although the USTs were removed, no information is available regarding whether contamination is present in connection with the former gas station operation.
- 11. The former USA Station #315 facility at 2432 Pine Grove Avenue is on the northern part of the Project Area and is an open LUST facility. The property is contaminated with petroleum compounds, the extent of which has not been defined.

### **115**D

- 12. The former Pete's Car Care facility at 2402 Pine Grove Avenue is an excluded property at the northeast corner of Pine Grove Avenue and Elmwood Street and is surrounded by the Project Area. The property is contaminated with petroleum compounds, the extent of which has not been defined, and could have migrated and impacted the Project Area.
- 13. The Detroit Edison Pine Grove Substation at 1508 Elmwood Street has been present on the Project Area since 1926. The electrical equipment within the substation may have leaked during the last 95 years, contaminating the soil and/or groundwater with transformer oil and other substances, including polychlorinated biphenyls (PCBs).
- 14. The ""MI Dept. of Transportation Blue Water Bridge" facility at 1410 Elmwood Street within the Project Area is listed in the LUST database and has had multiple releases reported. At least one of the release investigations is still listed as open, indicating that contamination exists on the Project Area.
- 15. The former Koppels Shell at 2327 Pine Grove Avenue was a gas station in the 1950s and early 1960s and was situated on the central portion of the Project Area under the existing bridge plaza. No information is available regarding whether the USTs were removed or whether soil or groundwater contamination exists. This area is currently under about 25 feet of fill.
- 16. The former Moser Coal Yard at 2201 Pine Grove Avenue was on the central portion of the Project Area during the 1950s and 1960s. Residual coal apparently remained on the property after this operation ceased. Coal residue contains heavy metals, and can contaminate soil underlying coal storage areas, particularly when stored on the ground. This area is currently under about 25 feet of fill.
- 17. The former Bradley's Citgo facility at 2307 Pine Grove Avenue was a gas station during the 1950s and 1960s and was situated on the central portion of the Project Area under the existing bridge plaza. No information is available regarding whether the USTs were removed or whether soil or groundwater contamination exists. This area is currently under about 25 feet of fill.
- 18. The former Pete's Marathon Car Care facility at 2308 Pine Grove Avenue was a gas station from the 1940s through the late 1970s and was situated on the central portion of the Project Area under the existing bridge plaza. The USTs were removed and some of the contaminated soil was excavated and disposed; however, residual contamination remains. The release investigation is currently listed as open. This area is currently under about 25 feet of fill.

- 19. The former London Farm Dairy facility at 2119 12<sup>th</sup> Avenue occupied the south-central part of the Project Area and is a LUST facility with an open investigation. Soil and groundwater contamination exists on the property. In addition, WSP observed a hydraulic hoist remaining in the ground at the location of the former garage building on the east part of the property.
- 20. The former Guizar's Auto Company at 2107-2111 Pine Grove Avenue was a gas station and auto repair facility situated on the southeast part of the Project Area from the 1940s through the 1960s. There is no information available regarding whether the USTs associated with the former gas station were removed or whether soil and/or groundwater contamination exists.
- 21. The former Ayotte Dugal B facility at 2108 Pine Grove Avenue was a gas station that operated immediately east of Pine Grove Avenue and north of (abandoned) Mansfield Street within the Project Area from the 1960s through the 1980s. No information is available regarding whether the USTs were removed or whether soil or groundwater contamination exists.
- 22. The former One Hour Cleaners facility at 2037 Pine Grove Avenue was situated on the southeast part of the Project Area. This facility was a gas station from about 1940 through the 1960s, and a dry cleaner from the late 1960s through 2001. Soil and groundwater contamination associated with either or both former businesses likely is present on the property.
- 23. The former Shell Port Huron #3 facility at 2014 Pine Grove Avenue was situated between Pine Grove Avenue and 10<sup>th</sup> Avenue on the southeast part of the Project Area was a gas station from the early 1970s through the late 1990s and is a LUST facility. The investigation is listed as open, and contamination exists on the property.
- 24. A former gas station was present at 2004 10<sup>th</sup> Avenue, immediately northeast of the southeast portion of the Project Area from the 1930s through 1950s. No information is available regarding whether the USTs were removed, or whether soil and/or groundwater contamination exists in connection with the former operation. Groundwater at a nearby facility was shown to flow to the west, which could allow contamination to migrate and impact the Project Area.
- 25. The property at 1413 Lyon Street and 1915 10th Avenue, situated within the southeast portion of the Project Area, were occupied by auto repair facilities and oil storage beginning in the late 1940s and lasting until the 1970s. Auto repair facilities often have contamination associated with them as a result of leaks, spills, drips, poor housekeeping, and/or improper waste disposal practices.

- 26. A gas station immediately southeast of the southeast corner of the Project Area has been at 1912-18 Pine Grove Avenue from 1959 through 2014, and a release was reported in 1991. High concentrations of soil and groundwater contaminants are present on the property, and contamination has migrated off the property onto the Project Area. An activity and use limitation (AUL) is filed with MDOT for contamination that remains in the Pine Grove Avenue right-of-way.
- 27. The property at 1310 Lyon Road is immediately south of the southeast part of the Project Area and operated as a gas station from the late 1940s through the early 1970s. Contamination may have migrated from this facility onto the adjacent Project Area.

Based on the information gathered as part of this PACS evaluation, review of the relevant data, and understanding of the planned activities, WSP recommends the following activities be completed:

- 1) Conduct Preliminary Site Investigation (PSI) testing activities to evaluate the above RECs for the presence or absence of contamination to serve as a basis for worker protection and contaminant material handling, management, and disposal.
- 2) The open LUST investigations for incidents within the Project Area should be brought to closure in accordance with Part 213 of Michigan's Natural Resources and Protection Act of 1994 (1994 PA 451 Part 213) so that proposed construction activities do not exacerbate contamination or impede investigatory or cleanup activities that need to be conducted.
- 3) The construction contract should include provisions to handle, manage, and dispose of contaminated waste in case unanticipated contamination is encountered during project construction activities.

# 8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

# 9.0 GLOSSARY

This section of the report provides definitions of acronyms and special terms used in the report. It is not all inclusive.

**AAI:** All Appropriate Inquiry. An investigation into the historical use and possible presence of contamination on a property that is a necessary component for persons seeking to establish one of the three CERCLA defenses as part of conducting due diligence.

**ACM:** Asbestos Containing Material. This is a material that contains more than one percent of an asbestos mineral. These materials are only identified in WSP's reports if an asbestos survey was performed prior to, or in conjunction with, WSP's environmental assessment.

**AST:** Aboveground Storage Tank. Any aboveground storage container larger than a 55-gallon drum, either empty or full.

**ASTM:** American Society of Testing Materials. This is the organization that creates standards for materials and testing; in this case, the standard for environmental site assessments, which is also based on the U.S. EPA standards for all appropriate inquiry.

**AUL:** Activity and Use Limitation. A legal mechanism that imposes land use controls (such as an ordinance barring the installation of water wells in a municipal area) or engineering controls (such as a deed restriction limiting a property's use to commercial zoning).

**BEA:** Baseline Environmental Assessment. A process used in Michigan whereby the conditions of a property are established prior to purchase, occupancy, or foreclosure, and protects the new purchaser or lessee from liability associated with preexisting contamination on the property.

**CERCLA:** Comprehensive Environmental Response, Compensation, and Liability Act. Facilities regulated by this act are listed in the CERCLIS database.

**CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System. The CERCLIS database lists properties that are on or are proposed to be on the National Priorities List.

**CFR:** Code of Federal Regulations. The regulatory code developed by federal agencies pursuant to acts passed by the US Congress.

**CREC:** Controlled REC. A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the

# wsp

applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

**Data Failure:** Data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met.

**Data Gap:** A data gap is a lack or inability to obtain information required by the ASTM and AAI standards, in spite of good faith efforts to obtain the information.

**De minimis:** Conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

**Due Diligence:** The care a reasonable person should take before entering into a transaction with another party.

**EDR:** Environmental Data Resources. This company owns the Sanborn Fire Insurance Map Company holdings, and provides the governmental records search used in WSP's reports.

**EGLE:** Michigan Department of Environment, Great Lakes, and Energy. The State of Michigan agency that oversees environmental issues. Formerly the MDEQ.

**EGLE-RRD:** Michigan Department of Environment, Great Lakes, and Energy – Remediation and Redevelopment Division.

**Environmental Professional:** An individual who, as defined in the standards for all appropriate inquiry, possess the education and experience requirements to conduct and/or oversee certain aspects of environmental site assessments.

**EPA:** The U.S. Environmental Protection Agency.

**ESA:** Environmental Site Assessment.

**Good Faith Effort:** According to the AAI standards, good faith effort is "the absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned."

**Good Faith Effort:** According to the AAI standards, good faith effort is "the absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned."

# visp

**HREC:** Historic Recognized Environmental Condition. A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria without subjecting the property to any required controls. HRECs are not considered to be RECs.

**LUST:** Leaking Underground Storage Tank.

**MDEQ:** Michigan Department of Environmental Quality. The former name of the State of Michigan agency that oversees environmental issues. Currently EGLE.

**NPL:** National Priorities List. A list of contaminated properties whose cleanup is being overseen by the U.S. EPA.

**PCB:** Polychlorinated Biphenyls. A contaminant commonly found in old hydraulic equipment or electrical transformers.

**RCRA:** Resource Conservation and Recovery Act. The RCRA database includes selective information on facilities that generate, transport, store, treat and/or dispose of hazardous wastes.

**REC:** Recognized Environmental Condition. The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

**SHWS:** State Hazardous Waste Sites. Properties included in the SHWS database have been identified by the State environmental regulatory agency as having been contaminated with hazardous wastes.

**USC:** U.S. Code. The full set of Laws passed by the U.S. Congress.

**User:** The individual or entity for which the Phase I environmental assessment has been prepared.

**UST:** Underground Storage Tank. Any buried storage container larger than a 55-gallon drum, either empty or full. Underground storage tanks do not include septic tanks.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 8 RCRA-VSQG sites within approximately 0.25 miles of the target property.

### Lists of state and tribal leaking storage tanks

MI LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Quality's Leaking Underground Storage Tank (LUST) Database.

A review of the MI LUST list, as provided by EDR, and dated 11/08/2021 has revealed that there are 18 MI LUST sites within approximately 0.5 miles of the target property.

### Lists of state and tribal registered storage tanks

MI UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality's Michigan UST database.

A review of the MI UST list, as provided by EDR, has revealed that there are 17 MI UST sites within approximately 0.25 miles of the target property.

#### ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 02/23/2022 has revealed that there are 2 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

#### Local Lists of Hazardous waste / Contaminated Sites

MI PART 201: A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

A review of the MI PART 201 list, as provided by EDR, and dated 10/01/2013 has revealed that there is 1 MI PART 201 site within approximately 1 mile of the target property.

| HENKEL CORPORATION                        | 1600 WASHINGTON AVE | S 1/4 - 1/2 (0.482 mi.) | R74    | 229  |
| Facility Status: Interim Response in pro- | gress               |                         |        |      |
| Facility ID: 74000157                     |                     |                         |        |      |

MI INVENTORY: The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release: a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

A review of the MI INVENTORY list, as provided by EDR, and dated 01/19/2022 has revealed that there are 24 MI INVENTORY sites within approximately 0.5 miles of the target property.

MI DEL PART 201: A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

A review of the MI DEL PART 201 list, as provided by EDR, and dated 08/01/2013 has revealed that there are 2 MI DEL PART 201 sites within approximately 1 mile of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

#### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 11 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

THOMAS EDISON INN/BLUE WATER CONVENTION CENTER (Continued)

sphalt shingled gable roof commercial hotel building located on the orthern portion of an approximately 9.43 acre parcel of land bordered to the north by State Street, to the west by St Clair Street, to the south by Thomas Edison Drive and to the east by the Thomas Edison Parkway and St Clair River. The Property also consists of one outparcel of approximately 2.59 acres (mainly parking lot) and four former residential lots located along the east side of St Clair Street. The building footprint is approximately 62,337 square feet and is comprised of approximately 150 rooms, a pool, a dining lounge, 14 meeting rooms and a ballroom. The building was built in approximately 1984. Former uses of the 500 Thomas Edison Parkway Property address are non-existent, as the original address of the Property was 500 State Street until a petition was filed in 1987 with the City of Port Huron for the current 500 Thomas Edison Parkway address. However, former uses of the 500 State Street address include a cement plant (Peerless Cement Corporation) from approximately the late 1920s until the early 1970s and the Grand Trunk Rail Road operations prior to that (including a roundhouse) back to the 1880s. The building is surrounded by a asphalt paved parking area and accessed from both Thomas Edison

Drive and State Street.

northern portion of an approximately 9.43 acre parcel of land bordered to the north by State Street, to the west by St Clair Street, to the south by Thomas Edison Drive and to the east by the Thomas Edison Parkway and St Clair River. The Property also consists of one outparcel of approximately 2.59 acres (mainly parking lot) and four former residential lots located along the east side of St Clair Street. The building footprint is approximately 62,337 square feet and is comprised of approximately 150 rooms, a pool, a dining lounge, 14 meeting rooms and a ballroom. The building was built in approximately 1984. Former uses of the 500 Thomas Edison Parkway Property address are non-existent, as the original address of the Property was 500 State Street until a petition was filed in 1987 with the City of Port Huron for the current 500 Thomas Edison Parkway address. However, former uses of the 500 State Street address include a cement plant (Peerless Cement Corporation) from approximately the late 1920s until the early 1970s and the Grand Trunk Rail Road operations prior to that (including a roundhouse) back to the 1880s. The building is surrounded by a asphalt paved parking area and accessed from both Thomas Edison Drive and State Street. 421

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19 Source: EPA Telephone: N/A Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 07/11/2022 Data Release Frequency: Quarterly

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19 Source: EPA Telephone: N/A Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 07/11/2022 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

### Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19 Source: EPA Telephone: N/A Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 07/11/2022 Data Release Frequency: Quarterly

### Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021 Date Data Arrived at EDR: 06/24/2021 Date Made Active in Reports: 09/20/2021 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 07/11/2022 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 07/25/2022 Data Release Frequency: Quarterly

### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 07/25/2022 Data Release Frequency: Quarterly

#### Lists of Federal RCRA facilities undergoing Corrective Action

#### CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/28/2022 Date Data Arrived at EDR: 03/02/2022 Date Made Active in Reports: 03/17/2022 Number of Days to Update: 15 Source: Environmental Protection Agency Telephone: 312-886-6186 Last EDR Contact: 04/06/2022 Next Scheduled EDR Contact: 07/04/2022 Data Release Frequency: Quarterly

#### Lists of Federal RCRA generators

## RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/28/2022 Date Data Arrived at EDR: 03/02/2022 Date Made Active in Reports: 03/17/2022 Number of Days to Update: 15 Source: Environmental Protection Agency Telephone: 312-886-6186 Last EDR Contact: 04/06/2022 Next Scheduled EDR Contact: 07/04/2022 Data Release Frequency: Quarterly

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/28/2022 Date Data Arrived at EDR: 03/02/2022 Date Made Active in Reports: 03/17/2022 Number of Days to Update: 15 Source: Environmental Protection Agency Telephone: 312-886-6186 Last EDR Contact: 04/06/2022 Next Scheduled EDR Contact: 07/04/2022 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/28/2022 Date Data Arrived at EDR: 03/02/2022 Date Made Active in Reports: 03/17/2022 Number of Days to Update: 15 Source: Environmental Protection Agency Telephone: 312-886-6186 Last EDR Contact: 04/06/2022 Next Scheduled EDR Contact: 07/04/2022 Data Release Frequency: Quarterly

#### Federal institutional controls / engineering controls registries

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Source: Department of the Navy Telephone: 843-820-7326 Last EDR Contact: 02/07/2022 Next Scheduled EDR Contact: 05/23/2022 Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

| Date of Government Version: 11/19/2021  | Source: Environmental Protection Agency |

|                                         | Data Release Frequency: Varies          |

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/19/2021 Date Data Arrived at EDR: 11/19/2021 Date Made Active in Reports: 02/14/2022 Number of Days to Update: 87 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 02/23/2022 Next Scheduled EDR Contact: 06/06/2022 Data Release Frequency: Varies

#### Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2021 Date Data Arrived at EDR: 03/01/2022 Date Made Active in Reports: 03/10/2022 Number of Days to Update: 9 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 03/22/2022 Next Scheduled EDR Contact: 07/04/2022 Data Release Frequency: Quarterly

## Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list. This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

### Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields and USTfield Site Database

All state funded Part 201 and 213 sites, as well as LUST sites that have been redeveloped by private entities using the BEA process. Be aware that this is not a list of all of the potential brownfield sites in Michigan.

Date of Government Version: 01/15/2016 Date Data Arrived at EDR: 02/02/2016 Date Made Active in Reports: 04/04/2016 Number of Days to Update: 62 Source: Department of Environment, Great Lakes, and Energy Telephone: 517-373-4805 Last EDR Contact: 04/18/2022 Next Scheduled EDR Contact: 08/01/2022 Data Release Frequency: Varies

#### BROWNFIELDS 2: Brownfields Building and Land Site Locations

A listing of brownfield building and land site locations. The listing is a collaborative effort of Michigan Economic Development Corporation, Michigan Economic Developers Association, Detrot Edison, Detroit Area Commercial Board of Realtors

Date of Government Version: 01/19/2022 Date Data Arrived at EDR: 01/20/2022 Date Made Active in Reports: 04/13/2022 Number of Days to Update: 83 Source: Economic Development Corporation Telephone: 888-522-0103 Last EDR Contact: 04/18/2022 Next Scheduled EDR Contact: 08/01/2022 Data Release Frequency: Varies

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 11/16/2021 Date Data Arrived at EDR: 11/18/2021 Date Made Active in Reports: 02/08/2022 Number of Days to Update: 82 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 02/23/2022 Next Scheduled EDR Contact: 06/06/2022 Data Release Frequency: No Update Planned

### **INVENTORY:** Inventory of Facilities

The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

Date of Government Version: 01/19/2022 Date Data Arrived at EDR: 01/19/2022 Date Made Active in Reports: 04/13/2022 Number of Days to Update: 84 Source: Department of Environment, Great Lakes, and Energy Telephone: 517-284-5136 Last EDR Contact: 01/19/2022 Next Scheduled EDR Contact: 05/02/2022 Data Release Frequency: Quarterly

#### PART 201: Part 201 Site List

A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

Date of Government Version: 10/01/2013 Date Data Arrived at EDR: 10/03/2014 Date Made Active in Reports: 10/03/2014 Number of Days to Update: 0

CDL: Clandestine Drug Lab Listing

A listing of clandestine drug lab locations. Date of Government Version: 10/22/2021

Date Data Arrived at EDR: 11/23/2021 Date Made Active in Reports: 02/15/2022 Number of Days to Update: 84 Source: Department of Environment, Great Lakes, and Energy Telephone: 517-284-5103 Last EDR Contact: 07/22/2019 Next Scheduled EDR Contact: 11/04/2019 Data Release Frequency: No Update Planned

#### DEL PART 201: Delisted List of Contaminated Sites

A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

Date of Government Version: 08/01/2013 Date Data Arrived at EDR: 08/01/2013 Date Made Active in Reports: 09/11/2013 Number of Days to Update: 41 Source: Department of Environment, Great Lakes, and Energy Telephone: 517-373-9541 Last EDR Contact: 07/22/2019 Next Scheduled EDR Contact: 11/04/2019 Data Release Frequency: Varies

#### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 11/16/2021 Date Data Arrived at EDR: 11/18/2021 Date Made Active in Reports: 02/08/2022 Number of Days to Update: 82 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 02/23/2022 Next Scheduled EDR Contact: 06/06/2022 Data Release Frequency: Quarterly

### PFAS: PFAS Contaminated Sites Listing

PFAS have been widely used in numerous industrial and residential applications since the 1950a??s. Their stability and unique chemical properties produce waterproof, stain resistant, and nonstick qualities in products. They are found in some firefighting foams and a wide range of consumer products such as carpet treatments, non-stick cookware, water-resistant fabrics, food packaging materials, and personal care products.

Date of Government Version: 11/12/2021 Date Data Arrived at EDR: 11/12/2021 Date Made Active in Reports: 01/31/2022 Number of Days to Update: 80 Source: Department of Environment, Great Lakes & Energy Telephone: 517-284-9278 Last EDR Contact: 02/08/2022 Next Scheduled EDR Contact: 05/23/2022 Data Release Frequency: Varies

#### Local Land Records

#### LIENS: Lien List

An Environmental Lien is a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 USC \* 9607(1) and similar state or local laws. In other words: a lien placed upon a property's title due to an environmental condition

Date of Government Version: 10/22/2021 Date Data Arrived at EDR: 01/12/2022 Date Made Active in Reports: 03/31/2022 Number of Days to Update: 78 Source: Department of Environment, Great Lakes, and Energy Telephone: 517-241-7603 Last EDR Contact: 04/14/2022 Next Scheduled EDR Contact: 07/25/2022 Data Release Frequency: Varies

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 07/11/2022 Data Release Frequency: Semi-Annually

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Date of Government Version: 01/01/2017 Date Data Arrived at EDR: 02/03/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 63 Source: Environmental Protection Agency Telephone: 615-532-8599 Last EDR Contact: 02/08/2022 Next Scheduled EDR Contact: 05/23/2022 Data Release Frequency: Varies

#### US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 12/13/2021 Date Data Arrived at EDR: 12/17/2021 Date Made Active in Reports: 03/17/2022 Number of Days to Update: 90 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 03/21/2022 Next Scheduled EDR Contact: 07/04/2022 Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 02/01/2022 Next Scheduled EDR Contact: 05/16/2022 Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 02/03/2022 Next Scheduled EDR Contact: 05/16/2022 Data Release Frequency: Varies

#### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/17/2020 Date Made Active in Reports: 09/10/2020 Number of Days to Update: 85 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 03/18/2022 Next Scheduled EDR Contact: 06/27/2022 Data Release Frequency: Every 4 Years

### TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2018 Date Data Arrived at EDR: 08/14/2020 Date Made Active in Reports: 11/04/2020 Number of Days to Update: 82 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 02/18/2022 Next Scheduled EDR Contact: 05/30/2022 Data Release Frequency: Annually

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 01/19/2022 Date Data Arrived at EDR: 01/19/2022 Date Made Active in Reports: 04/11/2022 Number of Days to Update: 82 Source: EPA Telephone: 202-564-4203 Last EDR Contact: 01/19/2022 Next Scheduled EDR Contact: 05/02/2022 Data Release Frequency: Annually

#### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19 Source: EPA Telephone: 703-416-0223 Last EDR Contact: 04/01/2022 Next Scheduled EDR Contact: 06/13/2022 Data Release Frequency: Annually

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 10/20/2021 Date Data Arrived at EDR: 11/05/2021 Date Made Active in Reports: 11/12/2021 Number of Days to Update: 7

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35

Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

#### PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019 Date Data Arrived at EDR: 07/01/2019 Date Made Active in Reports: 09/23/2019 Number of Days to Update: 84 Source: Environmental Protection Agency Telephone: 202-343-9775 Last EDR Contact: 03/28/2022 Next Scheduled EDR Contact: 07/11/2022 Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40 Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 08/30/2019 Date Data Arrived at EDR: 11/15/2019 Date Made Active in Reports: 01/28/2020 Number of Days to Update: 74

Source: Department of Energy Telephone: 505-845-0011 Last EDR Contact: 02/17/2022 Next Scheduled EDR Contact: 05/30/2022 Data Release Frequency: Varies

## LEAD SMELTER 1: Lead Smelter Sites

A listing of former lead smelter site locations.

Date of Government Version: 01/25/2022 Date Data Arrived at EDR: 02/03/2022 Date Made Active in Reports: 02/22/2022 Number of Days to Update: 19

Source: Environmental Protection Agency Telephone: 703-603-8787 Last EDR Contact: 05/03/2022 Next Scheduled EDR Contact: 07/11/2022 Data Release Frequency: Varies

#### LEAD SMELTER 2: Lead Smelter Sites

A list of several hundred sites in the U.S. where secondary lead smelting was done from 1931and 1964. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust

Date of Government Version: 04/05/2001 Date Data Arrived at EDR: 10/27/2010 Date Made Active in Reports: 12/02/2010 Number of Days to Update: 36

Source: American Journal of Public Health Telephone: 703-305-6451 Last EDR Contact: 12/02/2009 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

#### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

| ABANDONED MINES: Abandoned Mines<br>An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide<br>information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory<br>contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated<br>with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE<br>program officials. It is dynamic to the extent that it is modified as new problems are identified and existing<br>problems are reclaimed. |                                                                                                                                                                                                                  |  |

#### PCS: Permit Compliance System

PCS is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

| Facility and manifest data. Manifest is a docu transporters to a tsd facility.                                                                            | ment that lists and tracks hazardous waste from the generator through                                                                                                                                     |

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are

comparable across all states.

Private Schools

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
   Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE SUMMARY**

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

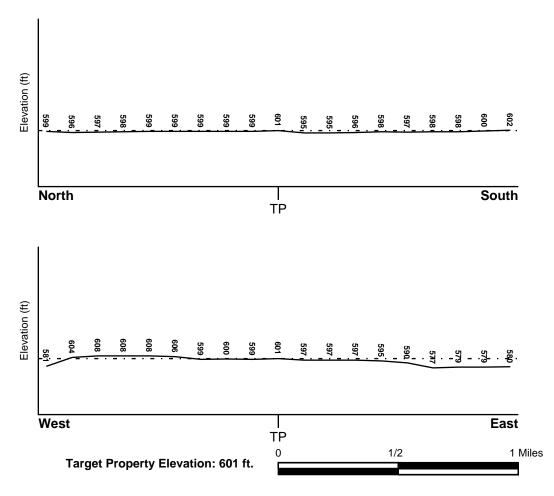

## **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE SUMMARY**

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

| Flood Plain Panel at Target Property      | FEMA Source Type                                                     |
|-------------------------------------------|----------------------------------------------------------------------|

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

| Site-Specific Hydrogeological Data*: |            |  |
|--------------------------------------|------------|--|
| Search Radius:                       | 1.25 miles |  |
| Status:                              | Not found  |  |

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

#### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

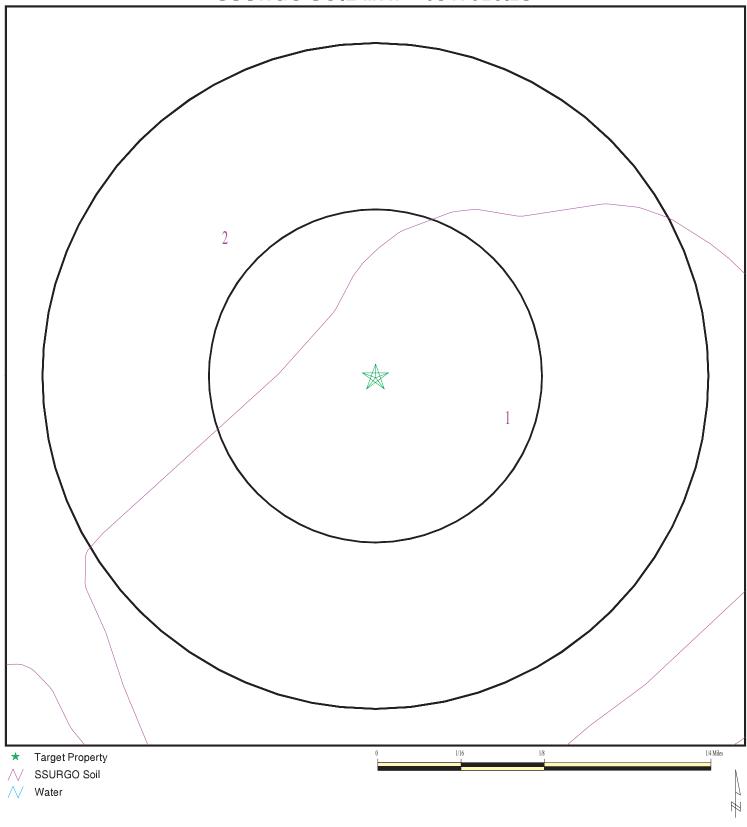

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### GEOLOGIC AGE IDENTIFICATION

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

| Soil Map ID: 1                        |                                                                                                                                           |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Soil Component Name:                  | Londo                                                                                                                                     |
| Soil Surface Texture:                 | loam                                                                                                                                      |
| Hydrologic Group:                     | Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures. |
| Soil Drainage Class:                  | Somewhat poorly drained                                                                                                                   |
| Hydric Status: Partially hydric       |                                                                                                                                           |
| Corrosion Potential - Uncoated Steel: | High                                                                                                                                      |

#### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Natural Resources Telephone: 517-241-2254

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

#### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### LOCAL / REGIONAL WATER AGENCY RECORDS

#### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### STATE RECORDS

Water Well Data

Source: Department of Environmental Quality

Telephone: 517-335-9218
 The data in this file was obtained from Wellogic, the Michigan Department of Environmental Quality Statewide Groundwater Database (SGWD). Wellogic contains approximately 425,000 water well records found within the State of Michigan, and although it represents the best available data, it cannot be considered a complete database of all the wells or well records in existence. Locations of verified municipal and private water well sites compiled from Michigan

Department of Public Health, Water Well and Pump Records. Available in the following MI counties: Calhoun, Eaton, Genesee, Ingham, Jackson, Kalamazoo, Kent, Midland, Muskegon, Oakland, Ottawaw, Saginaw, St. Clair, Washtenaw.

#### **OTHER STATE DATABASE INFORMATION**

Michigan Oil and Gas Wells Source: Department of Environmental Quality Telephone: 517-241-1528 Locations of oil and gas wells are compiled from permit records on file at the Geological Survey Division (GSD), Michigan Department of Natural Resources.

#### RADON

State Database: MI Radon Source: Department of Environmental Quality Telephone: 517-335-9551 Radon Test Results

Michigan Radon Test Results

Source: Department of Environmental Quality Telephone: 517-335-8037 These results are from test kits distributed by the local health departments and used by Michigan residents. There is no way of knowing whether the devices were used properly, whether there are duplicates (or repeat verification) test (i.e., more than one sample per home), etc.

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

# **Certified Sanborn® Map Report**

# O4/21/22Site Name:Client Name:Blue Water Bridge Plaza ProjecWSP1410 Elmwood Street6011 W. St. Joseph Hwy, Suite 400Port Huron, MI 48060LANSING, MI 48917EDR Inquiry # 6947026.3Contact: Adam Heft

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

WSP (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

#### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provide in this Report as legal advice.

### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

## **EXECUTIVE SUMMARY**

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDRis licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.
