AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: Category A3 Part 213 Facility ID #2540 REVIEW CONCLUSION: BEA is entirely of previously identified concerns, and further follow up is required. The limited Phase II ESA conducted for the 2017 BEA does not appear to identify a new concern. Comparison of previous data with 2017 data indicates that LNAPL was present and still is present, especially in the area of the dispenser island along Grand River Avenue. HB2 (2017) was conducted near the building and indicates the presence of LNAP

Point of Reference: Center of a Facility or Station
Highlights: Prior to foreclosure,the resident/owner illegally stored many vehicles, including cars, trucks,and motor homes, as well as various other mechanical equipment. This high-visibility site had been blighted for several years, often becoming overgrown with weeds and being a dumping ground for the resident. Re-use of this site would help catalyze further development adjacent to the I-94 interchange and enhance the appearance of the entryway to the City. This parcel may be bundled with adjacent parcels for larger commercial/industrial redevelopment including access to nearby parcels slated for economic development. Former Use: The subject property was initially developed in 1850 with a residential dwelling and detached garage. According to interviews conducted at the fire and planning departments, city officials suspected unpermitted automobile repair was conducted on the eastern portion of the property, near Kramer Street from approximately 2004 until 2010. This dwelling was demolished in 2010 by City of Ypsilanti after ownership of the property was transferred to Washtenaw County through tax reversion.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
