## LIMITED PROJECT AREA CONTAMINATION SURVEY REPORT M-153 (FORD ROAD) AT I-275 AREA TRAFFIC AND ENVIRONMENTAL STUDY CANTON, MICHIGAN

### 1.0 INTRODUCTION

On behalf of the Michigan Department of Transportation (MDOT) through CDM Smith, Somat Engineering, Inc. (Somat) performed a Limited Project Area Contamination Survey (PACS) of the proposed I-275 and M-153 Interchange project area (Site) in Canton, Michigan. The Site location is shown in **Figure 1**. The project involves developing possible alternatives to improve the operational service on M-153 including the network of local roads within the study area. Improvements are necessary to address traffic flow and safety concerns for all users.

The PACS of the Site was performed as part of and in support of the overall environmental studies and evaluation of the project alternatives.

Generally, Phase I site investigation tasks are performed in accordance with the American Society for Testing Materials (ASTM) Designation E 1527-05 and All Appropriate Inquiries, 40 CFR, Part 312. However, this PACS Project Scope of Work was limited to the state and federal environmental data records and historical aerial photographs. Only a “windshield” site reconnaissance was conducted. This limited scope was developed based on conversations with CDM Smith and approved by MDOT via email on June 27, 2012 and June 2013.

This limited PACS report presents the scope of work, a description of the Site, results of document review, site reconnaissance findings, and the conclusions and recommendations as they relate to the proposed project.

### 1.1 PURPOSE

The PACS was conducted in support of the proposed I-275 and M-153 interchange study in Canton, Michigan. The purpose of this PACS was to provide a professional opinion of recognized environmental conditions (RECs) in connection with the past and current uses of those properties along the project corridor where known or potential contamination may impact and/or intersect the project.

The term *recognized environmental condition* (defined in ASTM E 1527-05, Section 1.1.1) means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material threat of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be *de minimus* are not recognized environmental conditions.

## 1.2 SCOPE OF WORK

The Scope of Work was limited to the following:

- Site reconnaissance: “windshield survey limited to visual observations”,
- Review of state and federal environmental databases,
- Review of historical aerial photographs, and
- Review township files of REC properties on and/or adjoining the project.

The PACS was limited in nature and did not (nor was it intended to) evaluate historical resources to the level of inquiry outlined by ASTM E1527-05 Phase I Environmental Site Assessment or that of 40 CFR Part 312, All Appropriate Inquiry.

## 1.3 ESA STAFF

Mr. Duncan R. Mein, PE of Somat was the person with the primary responsibility for data assembly, interpretation, and technical conclusions with respect to this PACS.

Other Somat staff that provided technical support to various tasks included Mr. Jason T. Cunningham, Environmental Scientist, Mr. Chad Robinson, PE, Environmental Engineer, and Ms. Mala Hettiarachchi, PhD, PE, Environmental Engineer.

A copy of the resumes of the environmental professionals involved in this PACS is presented in **Appendix A**.

## 1.4 SITE DESCRIPTION

### Site Location

The I-275 and M-153 interchange study area is located in Canton, Michigan. The Site includes approximately a 2.5 mile length of Ford Road, a 2.5 mile length of I-275 including about a 0.7 mile wide corridor. The Study area along Ford Road starts about 0.1 mile east of Lotz Road and ends about 0.2 mile west of Sheldon Road. The I-275 study area has a north boundary about 0.3 mile north of Warren Road and a south boundary about 0.4 mile south of Cherry Hill Road. The west and east boundaries of the I-275 corridor include Haggerty Road and Lotz Road, respectively. The total study area is approximately 2 square miles. **Figure 2** shows the study area including site boundaries.

### Groundwater Flow Direction

Generally, groundwater flow direction would be expected to be consistent with surface water flow and local topography, and dependent upon seasonal variation in precipitation. Therefore, it is likely that, if and where it is present, the shallow groundwater flow direction in the area of the Site would be largely influenced by the close proximity of the surface water bodies and would be primarily toward the southeast.

## 2.0 HISTORICAL SITE USE REVIEW – AERIAL PHOTOGRAPHS

Historical use of the Site and adjoining properties was evaluated using historical aerial photographs. Specific uses of the identified buildings/structures and surrounding areas are commented on, however without corresponding city/county file review the observations are based primarily on professional opinion and current use. The following roads were consistently recognizable for all acquired sets of aerial photos.

- Ford Road
- Haggerty Road
- Sheldon Road
- Warren Road,
- Cherry Hill Road
- Lilley Road
- Lotz Road

Historical aerial photographs from 1937, 1940, 1949, 1957, 1961, 1967, 1972, 1985, 1993, 1999, 2000, 2005, and 2006 were inspected. The results of the review are summarized below. A copy of the aerial photography is presented in **Appendix B**.

**1937:** The majority of the areas within the project study limits appear to be of agricultural use and include farms with associated outbuildings and mixed use agricultural fields, wood lots, and open brush fields.

The alignment of Haggerty Road, north of Ford Road, at the intersection of Warren Road was observed to be offset. Haggerty Road intersects Warren Road in a T-junction and continues north approximately ¼ mile east after intersecting at another T-junction.

The aerial photograph Site observations are discussed by two primary geographical areas identified as Ford Road, and the area between Haggerty Road and Lotz Road, including north of Warren Road and south of Cherry Hill Road.

### Project Area - Ford Road

- Primarily agricultural (apparent) related land use,
- Structures/buildings concentrated at southeast corner of Ford Road and Lilley Road,
- Isolated buildings/structures east of Lilley Road,
- Few buildings concentrated on the north side of the Ford Road about ¼ mile west of Sheldon Road, and
- Possible fruit orchards/tree farms appear adjoining Ford Road to the south between Haggerty Road and Lotz Road in the present day I-275 alignment.

Project Area – between Haggerty Road and Lotz Road

- Structures/buildings concentrated at northeast corner of Cherry Hill Road and Fellow Creek,
- Structures/buildings south of Cherry Hill Road and Haggerty Road,
- Structures concentrated at the northwest corner of Warren Road and Haggerty Road intersection,
- Agriculture related land use (e.g., crop growth is visible) in southern areas closer to Fellow Creek,
- Structures/buildings at the northwest corner of the eastern T-junction of Haggerty Road and Warren Road, and
- Structures/buildings at the northwest and southeast corners of Cherry Hill and Lotz.

**1940:** Observed changes from the 1937 historic aerial photos are as follows:

Project Area - Ford Road

- New structures/buildings at the northwest corner of the Ford Road and Lotz Road,
- New structures/buildings concentrated south of Ford Road about ¼ miles east of Sheldon Road,
- Approximately three small orchards/tree farms appear adjoining Ford Road between Lotz and Haggerty roads and the northeast corner of the intersection of Ford and Lilley roads,
- New secondary roads are observed running off of Ford Road to the north and south,
- A possible dump area is observed approximately ½ mile southwest of the intersection of Ford and Sheldon roads, and
- New single family homes (apparent) appear along Ford Road between Lilley and Haggerty roads and also along Haggerty Road between Ford Road and Cherry Hill Road.

Project Area – between Haggerty Road and Lotz Road

- A new secondary road (Lotzford Road) appears running west off of Lotz Road approximately ½ mile north of Cherry Hill Road,
- New structures/buildings at the Lotzford Road and Lotz Road intersection,
- New structures/buildings on Lotz Road approximately ¼ mile north of Cherry Hills Road,
- New structures/buildings along Warren Road approximately ¼ mile from the Warren Road and Haggerty Road intersection, and

- Orchard/tree farm appears at the southwest corner of the Lotz/Cherry Hill intersection.

**1949:** Aerial photos for this year were not available along Ford Road west of the Haggerty Road. Observed changes from the 1940 historic aerial photos are as follows:

*Project Area - Ford Road*

- New buildings at the Ford Road and Haggerty Road intersection, and
- New individual structures/buildings north and south of Ford Road between Haggerty and Sheldon Roads.

*Project Area – between Haggerty Road and Lotz Road*

- New individual single family homes (apparent) along Haggerty Road north and south of Ford Road,
- New structures/homes at Warren Road and Haggerty Road intersection,
- New buildings/structures at Cherry Hill Road and Fellow Creek,
- Irrigation ponds (apparent) appear at the northwest corner of Haggerty and Warren,
- Possible dumping area at the west end of Lotzford Road,
- New structures/buildings at Lotz Road and Lotzford Road intersection,
- New structures/buildings at Lotz Road about ¼ mile north of Cherry Hill Road, and
- Orchards/tree farms previously observed around the intersection of Lotz and Cherry Hill do not appear.

**1957:** Aerial Photos for this year were not available along Ford Road west of the Haggerty Road. Observed changes from the 1949 historic aerial photos are as follows:

*Project Area - Ford Road*

- Single family homes (apparent) in a subdivision arrangement appear at the southeast corner of Sheldon and Ford,
- Single family homes (apparent) appear on Lilley Road north of Ford Road,
- A park or farming type complex appears ¼ mile west of Lilley Road on the north side of Ford Road, and
- New structures/buildings appear along Ford Road between Haggerty and Lotz.

Project Area – between Haggerty Road and Lotz Road

- Three new orchard/tree farm lots appear along the west side of Lotz Road between Ford Road and Lotzford Road.

**1961:** No significant changes from the 1957 historic aerial photos were observed, however, the resolution of the aerial photos east of Lilley Road was very poor and any new developments and activities were difficult to recognize. The only notable observation is as follows:

Project Area - Ford Road

- Several new buildings appear in the apparent subdivision development in the southeast quadrant of the Sheldon Road and Ford Road.

**1967:** Observed changes from the 1957 and 1961 historic aerial photos are as follows:

Project Area - Ford Road

- Expansion of the residential subdivision in the southeast quadrant of the Sheldon Road and Ford Road,
- New community development in the northeast quadrant of the Sheldon Road and Ford Road, and
- New buildings/structures at the northwest corner of the Ford Road and Lilley Road.

Project Area – between Haggerty Road and Lotz Road

- New single family homes (apparent) along Haggerty Road both north and south of Ford Road, and
- New single family homes (apparent) along Lotz Road between Warren and Cherry Hill.

**1972:** Observed changes from the 1967 historic aerial photos are as follows:

Project Area - Ford Road

- New housing developments (apparent) on north and south sides of Ford Road approximately ¼ mile west of Lilley Road, and
- New development / land clearing approximately ¼ mile north of Ford Road along the east side of Lilley Road.

Project Area – between Haggerty Road and Lotz Road

- A new industrial park or warehouse type building complex in the northeast quadrants of the Ford Road and Haggerty Road intersection,
- New residential housing subdivision (apparent – under construction) east side of Haggerty Road approximately ¼ mile north of Cherry Hill Road,
- Several new buildings/homes scattered along Haggerty Road within the Site,
- Large industrial/commercial building complex in the northwest corner of Ford Road and Lotz Road,
- New construction and buildings along Lotzford Road, and
- New construction and buildings at Cherry Hill Road and Lotz Road.

**1985:** Areas of heavy urban development including industrial/commercial and residential construction appear along both Ford Road and Haggerty Road within the Site. The land use and development is similar to current i.e., 2012. Observed changes from the 1972 historic aerial photos are as follows:

Project Area - Ford Road

- The I-275 expressway was constructed within the Site limits between Haggerty Road and Lotz Road,
- Morton Taylor Road was partially constructed (portion north of Ford Road does not appear completed),
- Most of the residential areas (as of 2012) west of Haggerty Road and north of Ford Road were constructed,
- Individual residential and residential subdivision constructions appear both north and south of Ford Road between Lilley and Sheldon,
- Commercial/retail (apparent strip mall) building appears at the northeast corner of Ford and Sheldon, and
- Commercial/retail buildings and development areas appear in the northeast and southeast portions of the Ford Road and Haggerty Road intersection.

Project Area – between Haggerty Road and Lotz Road

- The Haggerty Road alignment was rerouted approximately ½ mile south of Warren Road to run diagonally northeast and join with the northern portion of Haggerty (north of Warren),
- Large ground clearing (apparently pre-construction) at the southeast corner of Haggerty and Warren roads,
- Residential subdivisions appear along Haggerty Road within the Site:
  - the northwest corner of Cherry Hill and Haggerty, and
  - ½ mile north of Cherry Hill on the east side of Haggerty Road.,

- Several industrial/commercial buildings were observed along Ford Road west of I-275, and
- A residential building complex (apparent condominiums) appears in the southeast corner of the Haggerty Road and Cherry Hill Road intersection.

**1993:** Observed changes from the 1985 historic aerial photos are as follows:

*Project Area - Ford Road*

- Large residential subdivisions (apparent) appear within a ¼ mile north and south of Ford Road between Haggerty and Sheldon,
- Properties adjoining Ford Road (north and south) between Haggerty Road and Sheldon Road appear to be of commercial retail/industrial use. The buildings are set back off the road alignment with large parking areas (apparent), and
- New structures/buildings appear to the northwest and southwest of the Ford Road and Morton Taylor intersection; and also in the southwest corner Ford Road and Lilley Road.

*Project Area – between Haggerty Road and Lotz Road*

- New, large industrial/commercial buildings appear at the northwest and southwest corners of Haggerty and Warren roads between I-275 and Haggerty,
- New residential subdivisions appear on Haggerty Road between Ford Road and Cherry Hill Road,
- Large residential subdivisions (apparent) appear in the southwest and southeast portions of the Cherry Hill/Lotz Road intersection, and
- A Building/structure in the Southwest corner of the Haggerty Road and the Koppernick Road was observed.

**2000:** The density of the residential/commercial infrastructure appears higher than in 1993 and more comparable to the present (2012). Observed changes from the 1993 historic aerial photos are as follows:

*Project Area - Ford Road*

- Ford Road and its adjoining properties appear very similar to the present. Properties are a mix of residential and commercial/retail with the commercial/retail properties predominantly adjoining the roadway,
- Large commercial (apparent) buildings appear north of Ford Road between Haggerty and Lilley roads (present day – IKEA and western adjoining strip mall), and

- Large commercial buildings (apparent) also appear northeast and southeast of the Ford Road/Lotz Road intersection (present day – Wal-mart, Sam’s Club, and Home Depot).

*Project Area – between Haggerty Road and Lotz Road*

- New industrial/commercial complexes/parks appear to the east and west of Haggerty Road north of Warren Road and also in the southwest corner of the Haggerty Road/Warren Road intersection,
- New residential development (apparent) appears to be under construction in the northeast corner of Cherry Hill and Lotz Road, and
- Increased development of residential subdivisions along Lotz Road south of Ford Road.

**2005:** The density of the residential/commercial infrastructure is more comparable to the present (2012).

**2006:** The density of the residential/commercial infrastructure is more comparable to the present (2012).

*Data Gaps*

The following data gaps were identified. Further document review or inquiry may warrant a better assessment of possible environmental concerns.

- Aerial photographs were not available west of Haggerty Road for years 1949 and 1957,
- The 1961 aerial photograph east of Lilley Road is in very poor quality,
- Aerial photographs were not available for the southwest quadrant of Ford Road and Haggerty Road (between Haggerty Road and Lilley Road) for years 1937, 1940, 1949, 1957, 1961, 1967, 1972, 1985, and 2000,
- Aerial photographs were not available west of Lilley Road for years 1999, 2005, and 2006, and
- Aerial photographs were not available for the southern portion of I-275 and East of I-275 for years 1999, 2005, and 2006.

*Summary*

The study area appears to be used primarily for agricultural purposes before 1967. A significant part of the study area was covered by wood lots and open brush fields as well. Gradual increase in the density of residential structures was noted between 1967 and 1972. With the construction of I-275, a heavy urban development including industrial/commercial and residential construction appear along both Ford Road and Haggerty Road within the study area. The land

use and development was similar to current i.e., 2012 conditions as long ago as 1985. No RECs were identified during the historical aerial photo review.

### 3.0 REGULATORY ENVIRONMENTAL RECORD REVIEW

State and Federal environmental database records were reviewed to determine environmental concerns on or near the Site. One or more properties within the search radius were recorded in the following databases.

#### Federal Records:

- ERNS: U.S. Environmental Protection Agency (USEPA) Emergency Response and Notification System,
- TRIS: USEPA Toxics Release Inventory System,
- MLTS: Material Licensing Tracking System maintained by the Nuclear Regulatory Commission,
- RCRA NonGen: Resource Conservation and Recovery Act (RCRA) Non-Generators,
- RCRA SQG: RCRA Small Quality Generators,
- RCRA CESQG: RCRA Conditionally Exempt Small Quality Generators, and
- CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System.

#### State Records:

- LUST: Michigan Department of Environmental Quality's (MDEQ) Leaking Underground Storage Tank (LUST) Database,
- MI UST: Michigan Underground Storage Tank Database,
- MI AST: Michigan Aboveground Storage Tank database,
- MI SPILLS: Environmental pollution emergencies reported to the MI DEQ,
- MI DRYCLEANERS: A listing of dry-cleaning facilities in Michigan,
- MI SHWS: The State Hazardous Waste Sites records,
- MI AUL: Michigan listing of sites with institutional and/or engineering controls in place,
- MI NPDES: National Pollutant Discharge Elimination System permits and NPDES Storm Water permits, and
- MI BEA: Michigan Baseline Environmental Assessment Records.

The following summary table presents a summary of properties found in the database records within the search radius. **Figure 2** shows the search radius utilized to obtain environmental regulatory records. The environmental database report was obtained through Environmental Data Resources, Inc. (EDR).

A copy of EDR's database report is presented in **Appendix C**. As used in the table below, the following definitions apply:

- On-Site – a property that lies within the outer Site boundary as shown in **Figure 2**,
- Adjoining – a property that lines outside the Site Boundary (see **Figure 2**) but whose physical location shares an outer boundary with the Site, and
- < ½ mile – where distances are given, this implies that there are properties identified outside the Site boundary that are not immediately adjacent to the Site boundary.

### Summary of Environmental Database Results

Federal or State Records	Approximate Distance	Sites Listed
EPA Comprehensive Environmental Response, Compensation, Liability, and Information System (CERCLIS) List	Not known	1
RCRA Small Quantity Generators (SQG) list	Adjoining	2
	<1/2 miles	3
Emergency Response Notification System (ERNS)	Adjoining	2
RCRA Non-Generators	On-Site	4
	Adjoining	8
	< 1/2 miles	2
RCRA Conditionally Exempt Small Quality Generators (CESQG)	On-Site	2
	Adjoining < 1/2 miles	25 12
USEPA Toxics Release Inventory System (TRIS)	Adjoining	1
Material Licensing Tracking System (MLTS)	On-Site	1
	Adjoining	2
State Hazardous Waste Sites (SHWS)	> 1 mile	1
Michigan Underground Storage Tank (USTs)	On-Site	2
	Adjoining	7
	<0.5 miles	6
Michigan Leaking Underground Storage Tank (LUST)	On-Site	2
	Adjoining < 0.5 mile	4 4
State Institutional Control/Engineering Control Registry	Adjoining	1
Michigan Spill/Release Reporting (MI SPILLS)	Adjoining	1
Michigan Baseline Environmental Assessment Records (MI BEA)	Adjoining	3
	<1/2 miles	1
Michigan Dry Cleaners	Adjoining	2
	<1/2 miles	1
Michigan Historical Landfills	Unknown	2
Michigan Aboveground Storage Tanks (ASTs)	Adjoining	1
	< 1/2 miles	3

The specific properties identified within the selected search radii on the state and federal regulatory agency databases are summarized in **Table 1** immediately following this report text.

The following data gaps were identified. Further document review or inquiry may warrant a better assessment of environmental concerns.

- REC#37: Limited information found on the K & J historical landfill located at Lilley Road and Ford Road according to the state regulatory records,
- REC#38: Limited information found on the MC historical landfill located at Lilley Road according to the state regulatory records, and
- REC#39: Limited information found on the “Canton Township Dump” located at Lilley Road according to the state regulatory records.

#### **4.0 SITE RECONNAISSANCE**

Site reconnaissance, limited to a “windshield” survey, was performed at various times between July 23 and August 15, 2012 with photo-documentation performed by Somat staff. Photographs of the Site and adjoining properties were taken during the reconnaissance phase of the project; selected photographs showing site features and adjoining properties are presented in **Appendix D**.

##### **4.1 METHODOLOGY AND LIMITING CONDITIONS**

The Site reconnaissance involved observing the current Site and adjoining property uses and conditions. It was conducted in a manner that allowed for visual observations of Site features, including structures, open areas, and adjoining properties. The Site and adjoining properties were visually observed for ASTM RECs in an effort to determine if a release of petroleum or other hazardous materials has occurred to the Site surface, soil, surface water or groundwater. Indications of RECs may include, but are not limited to, chemical use and storage, evidence of buried or discarded drums or containers, and evidence of aboveground and underground storage tanks. The reconnaissance of site and adjoining properties was limited to observation of areas visible from public access roads.

##### **4.2 SUMMARY OF THE SITE RECONNAISSANCE FINDINGS**

###### *Chemical Use and Storage*

Outdoor use and/or storage of chemicals in the Site were not observed during the site reconnaissance. Chemical use and storage within the buildings cannot be commented because Somat’s scope of work did not include access of buildings in the Site. However, the observed adjoining dry cleaners, auto services, and oil change locations are considered RECs in connection with the Site because these businesses presumably store hazardous chemicals.

### USTs/ASTs

Somat observed evidence of underground storage tank systems (USTs) including fill ports, vent pipes, dispensers, concrete pads, and areas of replaced pavement within the Study Area. There were several adjoining gas stations that appeared to have USTs and these properties were identified as RECs.

### PCB Containing Equipment

Somat observed an electric substation (Koppernick Substation) located at 7101 Koppernick Road. The installation date of this substation is not known. Potential use of PCB oils within the transformers cannot be determined without knowing the age of the station.

### Waste Generation, Treatment, Storage, and Disposal

Somat observed multiple dumpsters near the commercial buildings. However, no visual evidence of the generation, treatment, storage, or disposal of liquid or solid wastes other than commercial and household wastes within the Site was observed.

On private property located on the east side of the I-275, close to Cherry Hill Road, at three different locations in the wooded area, Somat staff did observe abandoned 55-gallon drums on the ground surface, all apparently empty and severely rusted. No visual observation of stained soil in the vicinity of the drums was observed. The drums were located near an abandoned dilapidated wood structure building somewhat typical of a livestock shed and probably remaining from when the property was formerly farmland. Photographs of these items are provided in **Appendix D**. These locations were first noticed by Cardno JFNew, the consultant company conducting the wetland survey for this project.

## **4.3 RECs IDENTIFIED DURING SITE RECONNAISSANCE**

The portion of the Site along Ford Road is industrial and commercial. The northern portion of the Site (north of Ford Road) is also mainly industrial and commercial. The southern portion of the Site (south of Ford Road) is mostly residential. The following RECs were identified during the site reconnaissance:

<b>Property</b>	<b>Location</b>	<b>Comment</b>
BP Gas Station	44404 Ford Road	It appears that the fuel USTs are located in the western portion of the property
BP Gas Station	41345 Ford Road	It appears that the fuel USTs are located in the east portion of the property
Checkers Cleaners	43723 Ford Road	Dry Cleaners
Discount Tire	41550 Ford Road	Possibility of storing hazardous material

Property	Location	Comment
Galaxy Cleaners	42448 Ford Road	Dry Cleaners
Kingsboro Cleaners	3200 Lilley Road	Dry Cleaners
Koppernick Substation	7101 Koppernick Road	Possibility of PCB containing equipments ( <i>Age of the substation is not known</i> )
Midas Auto Service Center	41580 Ford Road	Possibility of storing hazardous material
Shell Gas Station	5640 Haggerty Road	It appears that the fuel USTs are located in the south portion of the property
Speedway Gas Station	5596 Lilley Road	It appears that the fuel USTs are located in the east portion of the property
Speedway Gas Station	45350 Ford Road	It appears that the fuel USTs are located in the east portion of the property
Speedy Auto Services	41450 Ford Road	Possibility of storing hazardous material
Valero Gas Station	41350 Ford Road	It appears that the fuel USTs are located in the east portion of the property
Valvoline Oil Change	44075 Ford Road	Possibility of storing hazardous material
Forest area adjacent to I-275 (private property)	(-83.440701, 42.309957)	Multiple rusty 55-gallon drums and other residential trash
Forest area adjacent to I-275 (private property)	(-83.440516, 42.309764)	Multiple rusty 55-gallon drums
Forest area adjacent to I-275 (private property)	(-83.440455, 42.309493)	Multiple rusty 55-gallon drums

Two storm water detention ponds are located on the Site at the corner of the Haggerty Road and Ford Road, east of IKEA's

overflow parking area.

## 5.0 FURTHER ASSESSMENT OF RECs

The RECs identified during the state and federal environmental database record review and Site reconnaissance which are presented in **Table 2** were further evaluated by performing a municipal offices file review at the Township of Canton offices in June 2013. The results of this document review are summarized below.

### 5.1 LOCAL FIRE DEPARTMENT

The documents review of the available Township of Canton Fire Department revealed that some previously identified REC properties were not on file with the fire department and some with files had no relevant environmental information. The table below presents a summary of the information for REC properties with environmental records.

<b>REC #</b>	<b>Relevant Fire Department Environmental Record</b>
2	Provided permit to install 12,000 gallon fuel USTs in 1978; one 10,000 gallon UST was installed in 1981
4	Plan review and authorization for AST for emergency generator on 4/1/99
5	Note regarding storing "Hazardous Material" behind building (by product of dry cleaning) was made on 12/10/02; fire department requested MSDS for dry cleaning solvents on 1/24/05
6	Confirmed records of the occupancy of the property by Checkers Cleaners
11	Two 7,500 gallon USTs noted in records dated 10/21/80; UST leak/spill noted on 5/21/06 - records; note on 6/27/06 regarding MDEQ approval to reopen the gas station; record dated 9/9/09 regarding MDEQ's recommendation to remove more soil
12	The property split into two units as of 01/6/10 records (42444 and 42448 -One Hour Martinizing)
16	According to the records from 8/3/98 – 4/9/13, the property was occupied by Shiloh Industries. No environmental records were found among the available records
17	A 1,000 propane tank installation application dated 7/20/1989; accidental trip of four pump suppression system was recorded on 10/01/2003
18	According to the records from 8/13/12, the property was occupied by Lighthouse Oil Change and Car Wash. No environmental records were found among the available records
24	Two 1,000 Gallon USTs were removed on 12/16/91 and 04/15/92. Intent to remove UST dated 09/03/92 noted; three 550 gallon oil ASTs were installed on 10/9/95
27	Shell Gas Station occupied the property from 5/04/98 to 08/03/10; MDEQ notice of migration of contamination dated 9/19/03 due to a release of gasoline from UST system
29	One 4,000 gallon and four 10,000 gallon USTs were noted in records dated 5/15/98; complaint regarding gasoline in storm sewer
30	According to the records from 10/29/09 – 9/14/12, the property was occupied by Kingsboro Cleaners. No environmental records were found among the available records
36	Follow up on a chemical survey on 02/18/08 was noted
42	Record regarding a discovery of release reported on 8/3/93 from a 550 gallon used oil tank
44	According to the records from 1/30/09 – 4/20/09, the property was occupied by Discount Tire Store. No environmental records were found among the available records

No new relevant environmental information was gleaned and no new RECs were identified as a result of this document review.

## 5.2 LOCAL BUILDING DEPARTMENT

The documents review of the available Township of Canton Building Department revealed that some previously identified REC properties were not on file with the building department and some with files had no relevant environmental information. This summary presents the information of the REC properties with environmental records.

REC No.	Relevant Building Department Environmental Record
2	Amoco oil occupied the property in 1979 and Three 12,000 gallon gasoline USTs were noted; One 10,000 gallon diesel UST was noted on records dated 8/5/81; BP Gas Station occupied the property on 01/29/08.
4	An oil tank was noted in the plan dated 11/2/00; A 250 gallon diesel AST installation permit application and removal application for an existing UST dated 5/5/99 was noted.
5	Occupancy of the property at 42424 Ford Road by Farmers Insurance Company was reported in records dated 3/19/85. Occupancy of the property at 42432 Ford Road by Feed Rite Pet Supply Company was reported in records dated 5/3/89. Occupancy of the property at 42444 Ford Road by Pine Tree Market was reported in the available records. However, no relevant environmental records were found among the available documents.
11	Clark Service Station from 1972; Three 7,500 gallon gasoline USTs on the plan dated 11/6/85
17	A picture of kerosene pump noted in 1987 records
18	Permit for 1,000 gallon UST for waste oil dated 10/8/84
24	Permit application dated 10/9/95 for three 550 gallon AST installation; Tank removal (2/6/92); Permit application dated 03/8/83 for two 1000 gallon tanks propane pumping station
27	Record of Shell Service Station dated 10/23/79; Three 10,000 gallon gasoline USTs in plan dated 12/2/94
29	Presence of four 10,000 gallon USTs was noted.
30	Not in compliance for backflow preventers for contaminated water was reported on 8/16/02, 7/20/99, and 12/16/05
36	Mention of proposed oil holding tank and fuel gas cylinder storage (6/19/86)
42	The records show the occupancy of the property by a hotel/motel prior to 1988. The occupant of the property after 1989 is Valvoline Oil Change. Several noncompliance (no backflow on water system and possible contamination) was reported on various dates from 1985 through 1998.
44	Certificate of occupancy and compliance dated 5/5/99 was issued for Discount Tire Company. No relevant environmental records were found among the available documents.

No new relevant environmental information was gleaned and no new RECs were identified as a result of this document review.

### 5.3 LOCAL ASSESSOR'S DEPARTMENT

The documents review of the available Township of Canton Assessor's Department revealed that some previously identified REC properties were not on file and some with files had no relevant environmental information. This summary presents the information of the REC properties with environmental records.

REC No.	Relevant Environmental Records
11	Three 7,500 gallon USTs noted in 1999 plan; LUST - institutional control and land use restrictions notice dated 2/10/10
16	Records show the occupancy of Greenfield Die and Manufacturing
17	Citgo Gas Station - Tank area on 1985 plan
18	Building permit dated 6/22/84 was issued to Lighthouse Car Wash
24	The Records show the occupancy of Plymouth Construction Equipment
27	Three 10,000 gallon USTs on site plan
29	Three 10,000 gallon USTs as of 1982; Speedway gas station demolished in 11/95
30	Records confirming the occupancy of the property by Kingsboro Cleaners were found

No new relevant environmental information was gleaned and no new RECs were identified as a result of this document review.

## 6.0 CONCLUSIONS AND RECOMMENDATIONS

Forty nine (49) RECs were identified during this PACS. The identified RECs are summarized in detail in **Table 2** and their locations are shown on **Figure 3**. Figures 3a to 3l also show the REC locations but at a smaller scale providing more localized area detail.

The conclusions from this PACS are presented below as a summary of on-Site and off-Site RECs. The definitions provided in **Section 3** also apply to the breakdown of potential locations with RECs.

Following the conclusions section Somat presents recommendations in **Section 5.2** specific to the nature of the conclusions and outlines additional assessments that would be required to further complete environmental due diligence of the Site.

## 6.1 CONCLUSIONS

Conclusions have been made regarding the current and past uses of the Site using only historical aerial photographs, federal and state electronic data records, municipal file review and a ‘windshield’ site reconnaissance. In the professional opinion of Somat, no evidence of RECs was encountered during this PACS that would suggest or indicate that there has been a release of substances on or to the Site which could necessitate an environmental response action or otherwise result in a material financial liability for owners or operations of the Site, *except* the following:

### On-Site RECs

The following five (5) properties/locations were identified as on-Site RECs.

- REC#2 - BP Gas Station: This property is located at 41345 Ford Road, Canton. Three USTs with the capacity of 12,000 gallons were installed on 04/26/1978. One UST with the capacity of 10,000 gallons was installed on 04/26/1981. The USTs are currently in-use,
- REC#17 - Valero Gas Station: This property is located at 41350 Ford Road, Canton. A gasoline release at this property was reported on 10/15/2008. Three gasoline USTs, one diesel UST, and one kerosene UST with the capacity of 10,000 gallons each were installed on 05/15/2008. The USTs are currently in-use,
- REC#47 – Abandoned drums: The GPS coordinate of this location is (-83.440701, 42.309957). Abandoned 55-gallon drums on the ground surface, all apparently empty and severely rusted were observed. The drums were located near an abandoned dilapidated wood structure building located in a private property.
- REC#48 – Abandoned drums: The GPS coordinate of this location is (-83.440516, 42.309764). Abandoned 55-gallon drums on the ground surface, all apparently empty and severely rusted were observed. The drums were located on private property.
- REC#49 – Abandoned drums: The GPS coordinate of this location is (-83.440455, 42.309493). Abandoned 55-gallon drums on the ground surface, all apparently empty and severely rusted were observed. The drums were located on private property.

**Table 2** presents a summary of the on-site RECs and reasons to identify them as RECs. **Figure 3** shows the locations of the all the identified RECs during this PACS.

Off-Site Adjoining RECs

The RECs located beyond the Site boundary are classified as “off-Site RECs”. As any off-Site RECs located immediately adjacent to the Site have a potentially higher likelihood of impacting the Site, this subset group of the off-site RECs is summarized separately from the other off-Site RECs.

*Adjoining RECs:* There were nineteen (19) RECs identified adjoining the Site. The adjoining RECs are summarized below. **Table 2** includes a summary of all the adjoining RECs and reason to identify them as RECs. **Figure 3** shows the locations of the all the identified RECs during this Limited PACS.

<b>Type of REC</b>	<b>Number of Properties</b>
Properties with Active USTs	3 (includes two former LUST sites)
Former UST Properties	4 (includes one former LUST and one active AST)
Former AST Spills	1
Properties where Michigan BEA conducted	3
Dry Cleaners	3
Other	5

*Other Off-Site RECs:* There were twenty two (22) off-Site RECs which are not adjoining to the Site. These RECs are summarized below. These RECs are less likely to represent adverse impacts to the proposed project than those on Site and adjoining the Site based on the distances from the Site and the requisite that any contaminants from these RECs be mobile and migrating in groundwater towards the Site. **Table 2** includes a summary of all the off-Site RECs and reason to identify them as RECs. **Figure 3** shows the locations of all the identified RECs during this Limited PACS.

<b>Type of REC</b>	<b>Number of Properties</b>
Properties with Active USTs	3 (includes two former LUST)
Former UST Properties	5 (includes one former LUST)
Properties with Active ASTs	3
Properties where Michigan BEA conducted	2
Drycleaners	1

Type of REC	Number of Properties
Possibility of PCB Containing Equipment	1
Other	7

### Data Gaps

Multiple data gaps were identified earlier in this report. Further document review or inquiry may warrant a better assessment of the potential environmental concerns associated with three historical landfills and dumps (K&J landfill {REC#37}, MC landfill {REC#38}, and Canton Township Dump {REC#38}) and the age of the transformers at the Koppernick substation which may contain PCBs.

## 6.2 RECOMMENDATIONS

The on-Site and adjoining RECs identified in this PACS may have adversely impacted the subsurface soil and/or groundwater beneath the Site. Therefore, further environmental evaluation in the form of Phase II ESA activities to assess the presence of soil/groundwater contamination may be required if the proposed project will involve subsurface work such as excavation or dewatering. If necessary such further investigation should be performed at the areas where contamination could be encountered from the identified on-Site and adjoining RECs. Such investigations support risk management for worker exposure and proper disposal of impacted materials during construction.

Should additional investigation/environmental assessment (i.e., Phase II ESA) later be deemed necessary and performed, the scope should be designed to focus on the on-Site and adjoining RECs identified above and may include:

- Performing further research to investigate the past chemical use and storage at select properties. Additional research may include fire and building department record search,
- Performing further research on historical landfill sites,
- Performing soil boring investigation or test pit excavation activities to evaluate the subsurface determined most likely to have been impacted by the RECs identified above,
- Collecting soil and groundwater samples from the test locations for chemical analysis may be warranted depending on the subsurface results. Chemical analysis of samples should be as follows:
  - ✓ *Petroleum use/storage locations:* Petroleum parameters, polychlorinated biphenyls (PCBs), lead, cadmium, and chromium,
  - ✓ *Dry cleaning locations:* Volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs),
  - ✓ *Discarded drums and/other unknown sources:* VOCs, SVOCs, PCBs, and metals.

✓ *Electric transformer locations: PCBs.*

The off-Site RECs which are not adjoining are less likely to cause adverse impacts. However, potential pollutants from these locations would reach the Site through contaminant transport via groundwater. If the project is anticipated to intersect the groundwater table, adverse impacts from off-Site REC locations may be expected.

REC ID.	Property name (EDR) <sup>(1)</sup>	Current Property Name <sup>(2)</sup>	Location	Distance from Site <sup>(3)</sup>	Reason to be Considered as a REC
1	5444 S. LILLEY ROAD	N/A	5444 S. LILLEY ROAD	> 1 MILE	Reported in Michigan State Hazardous Waste Sites (Source: Refuse systems; Pollutants: Benzo(a)anthracene, Chrysene, PCBs
2	AMOCO OIL CO	BP (GAS STATION)	41345 FORD RD	ON SITE	Three 12,000-gallon USTs were installed on 04/26/1978. One 10,000-gallon UST was installed on 04/26/1981. The USTs are active.
3	ATG PRECISION PRODUCTS LLC	ATG PRECISION PRODUCTS LLC	7545 N HAGGERTY RD	1/8 to 1/4 MILES	State regulation violation found on 09/02/2009. The Area of violation was reported as Generators - Manifest, used oil generators.
4	CANTON PLACE	CANTON PLACE	44505 FORD RD	ADJOINING	A 300-gallon diesel UST was installed on 07/28/1989 and removed on 06/29/1999.
5	CANTON PLAZA	CANTON PLAZA	42400-42454 FORD ROAD	ADJOINING	A Michigan Baseline Environmental Assessment of the property is on file with MDEQ indicating the known presence of subsurface contamination. Submitter: Canton Corners Company LLC
6	CHECKERS ONE HOUR CLEANERS	CHECKERS CLEANERS	43723 FORD RD	ADJOINING	Drycleaners
7	DISCOUNT COMPUTERS INC	DISCOUNT COMPUTERS INC	41106 KOPPERNICK RD	1/4 to 1/2 MILES	Included in RCRA-NonGen List and waste category is "Ignitable hazardous waste"; A violation determined on 01/30/2012; Type of violation was reported as large quantity generators - pretransport
8	DTE ENERGY LLC	N/A	5700 N CANTON CENTER RD	1/4 to 1/2 MILES	The property has an active AST according to the State regulatory records.
9	FIRE STATION #2	N/A	41500 WARREN RD	1/16 to 1/8 MILES	Two of 1000-gallon Gasoline USTs installed on 03/18/1978 were removed on 03/22/1995.
10	FIRESTONE MASTER CARE	FIRESTONE TIRE	44120 FORD RD	ADJOINING	A 550-gallon used oil UST was removed on 08/03/1993.
11	FORD & SHELDON INC	BP (GAS STATION)	44404 FORD RD	ADJOINING	Gasoline release was reported on 06/09/2006. Release closed date was reported as 11/10/2010. Three USTs 7500 gallon capacity each installed on 05/02/1973 and removed on 10/28/1996. Two 12,000 gallon gasoline USTs were installed on 11/01/1996 and currently these USTs are active. Also MI SPILLS has an incident record (Incident date: 05/21/2006; Company involved: Marathon Gas Station; Possible cracked fuel UST)
12	N/A	GALAXY CLEANERS	42448 Ford Road	ADJOINING	Possibility of storing hazardous material
13	GNS HOLDING, INC.	MTW	7261 COMMERCE BOULEVARD	1/16 to 1/8 MILES	A Michigan Baseline Environmental Assessment of the property is on file with MDEQ indicating the known presence of subsurface contamination.
14	GOLDEN CARRIAGE CLEANERS	GOLDEN CARRIAGE CLEANERS	45184 FORD ROAD	1/16 to 1/8 MILES	Drycleaners
15	GRAND/SAWKA OF CANTON, LLC	N/A	FORD ROAD AND SHELDON ROAD	ADJOINING	A Michigan Baseline Environmental Assessment of the property is on file with MDEQ indicating the known presence of subsurface contamination.

REC ID.	Property name (EDR) <sup>(1)</sup>	Current Property Name <sup>(2)</sup>	Location	Distance from Site <sup>(3)</sup>	Reason to be Considered as a REC
16	GREENFIELD DIE & MANUFACTURING	N/A	7295 N HAGGERTY RD	ADJOINING	This is a RCRA conditionally exempt small quantity generator, CESQG (waste category: Ignitable hazardous waste use). However, a release was reported in US EPA Toxics Release Inventory.
17	KNIGHT ENTERPRISES INC	VALERO GAS STATION (KNIGHT ENTERPRISES)	41350 FORD RD	ON SITE	A gasoline release was reported on 10/15/2008. Three 10,000-gallon gasoline, one 10,000-gallon diesel, and one 10,000-gallon kerosene active USTs were installed 05/05/1985.
18	LIGHTHOUSE CAR WASH	PENZOIL	41801 FORD RD	ADJOINING	4,000 gallon Used Oil UST was install on 04/01/1985 and remove date on 08/08/1996
19	LIVONIA SITE NO. 16	BUSINESS AREA	39400 FORD RD	1/8 to 1/4 MILES	A 275 gallon diesel UST was installed on 03/25/1985 and removed on 03/01/1993
20	LOWES HOME CENTERS INC	LOWES HOME CENTERS INC	44080 FORD RD	1/16 to 1/8 MILES	The state regulatory records indicated an active AST in the property. However, no further description is available. ; The property also included in the RCRA CESQG list as Diesel fuel-fired engine generators (Waste code D001: Ignitable hazardous waste)
21	MEIJER STORES LIMITED PARTNERS	MEIJER STORES	45001 FORD RD	1/4 to 1/2 MILES	Gasoline releases were reported on 01/11/1991 & 11/25/1992. Release closed dates were reported as 02/08/1996 and 04/05/1996, respectively. Four 12,000 gallon gasoline and one 12,000 gallon diesel active USTs were installed 06/10/1991 and One 20,000 gasoline, two 12,000 gallon gasoline, and one 12,000 diesel USTs were removed on 06/28/1991
22	NATIONAL CONCRETE PRODUCTS CO	N/A	8233 N HAGGERTY RD	> 1/2 MILES	6000-gallon diesel fuel USTs were removed in 1977.
23	NEWPAR (DBA) VERIZON WIRELESS	N/A	39400 FORD ROAD	1/8 to 1/4 MILES	The property has an active AST according to the State regulatory records.
24	PLYMOUTH CONSTRUCTION EQUIP	PLYMOUTH EQUIPMENT RENTAL	41889 FORD RD	ADJOINING	Gasoline release date: 04/06/1992 (release close date: 03/29/1993). 1,000-gallon Used Oil UST (removed 12/16/1991); 1,000-gallon gasoline UST (removed 01/09/1995); Active ASTs
25	RIERA, GIUSEPPA & ANGELA	N/A	6108-6120 CANTON CENTER	> 1/2 MILES	A Michigan Baseline Environmental Assessment of the property is on file with MDEQ indicating the known presence of subsurface contamination (1995).
26	SCHULER INC	SCHULER INC	7145 COMMERCE BLVD	1/8 to 1/4 MILES	The property also included in the RCRA CESQG list. A violation was reported on 02/01/2008. The violation type was reported as Used Oil - Generators (Date achieve compliance: 05/12/2008)
27	SHELL GAS STATION	SHELL GAS STATION	5640 N HAGGERTY RD	ADJOINING	A gasoline release was reported on 04/23/2001. Two active 10,000-gallon gasoline USTs were installed on 12/31/1970. One active 10,000-gallon gasoline UST was installed on 09/30/1971. One 1,000-gallon used oil USTs was installed on 04/06/1981 and removed on 07/09/1996.
28	SPEEDWAY # 8724	SPEEDWAY GAS STATION	45350 FORD RD	1/8 to 1/4 MILES	A substance released was reported on 05/05/2008. Two 10,000-gallon and one 8,000-gallon active gasoline USTs were install on 05/19/1989. A 8,000 gallon-diesel and 4,000-gallon kerosene active USTs were installed on 05/19/1989. Six USTs were removed on or before 07/01/1989.

REC ID.	Property name (EDR) <sup>(1)</sup>	Current Property Name <sup>(2)</sup>	Location	Distance from Site <sup>(3)</sup>	Reason to be Considered as a REC
29	SPEEDWAY #2358	SPEEDWAY GAS STATION	5596 N LILLEY RD	ADJOINING	A release was reported on 05/13/1989 and the release closed date was reported as 11/08/1996. Four 10,000-gallon (1 diesel and 3 gasoline) active USTs were installed on 05/07/1982. One 4,000-gallon active kerosene UST was installed on 10/16/1995; Gasoline spill (Incident location: Speedway Gas Station at Ford & Lilley) was reported on 05/11/1989.
30	STELLA'S KINGSBORO CLEANERS	KINGSBORO CLEANERS	3200 LILLEY RD	ADJOINING	Drycleaners
31	TOYS-R-US	TOYS-R-US	7900 N HAGGERTY RD	1/8 to 1/4 MILES	A 10,000-gallon Diesel UST was installed on 01/01/1989 and removed on 03/08/1999.
32	UNIQUE REFINISHERS INC	UNIQUE REFINISHERS INC	8021 N HAGGERTY RD	1/8 to 1/4 MILES	The property was included in the RCRA Small Quantity Generator, SQG, list. Waste type was reported as Ignitable hazardous waste use. Violations were noted in state regulatory records
33	WEYER HAEUSER COMPANY	WEYER HAEUSER COMPANY	1550 SHIRLEY INDUSTRIAL DR, WESTLAND	1/4 to 1/2 MILES	A substance release was reported on 12/28/1989 and the release was closed on 10/11/1995. 1,000 gallon UST installed on 04/18/1985 was removed from ground on 12/01/1989.
34	YAZAKI NORTH AMERICA INC	AEROCOSTA DISTRIBUTION	7763 N HAGGERTY RD	1/16 to 1/8 MILES	The property was included in the RCRA-CESQG. The waste type was reported as Waste Batteries (Waste code D001). Violations were reported in state regulatory records (Used Oil - Generators - date of violation: 04/28/2003; Date achieve compliance: 06/04/2003)
35	NOT REPORTED	N/A	44409 FORD RD	ADJOINING	A gasoline spill from an AST (Incident location: Gas station) was reported on 05/21/2006
36	N/A	SPEEDY AUTO SERVICES	41450 FORD ROAD	ADJOINING	Possibility of storing hazardous material
37	K & J LANDFILL	N/A	LILLEY ROAD AND FORD ROAD	UNKNOWN	MI historical landfill
38	M C LANDFILL	N/A	LILLEY ROAD	UNKNOWN	MI historical landfill
39	CANTON TOWNSHIP DUMP	N/A	ON LILLEY ROAD	UNKNOWN	This property was included in the CERCLIS list
40	FORMER CANTON FILLING STATION	N/A	107 S CANTON CENTER ROAD	> 1 MILE	A substance release was reported on 09/09/1998 and closed date was not reported
41	BLOOMFIELD PLAZA WEST SHOPING	N/A	6099 HAGGERTY ROAD, PLYMOUTH	ADJOINING	A Michigan Baseline Environmental Assessment of the property is on file with MDEQ indicating the known presence of subsurface contamination.
42	N/A	VALVOLINE OIL CHANGE	44075 FORD ROAD	ADJOINING	Possibility of storing hazardous material. Record regarding a discovery of release reported on 8/3/93 from a 550-gallon used oil tank.
43	N/A	KOPPERNICK SUBSTATION	7101 KOPPERNICK ROAD	1/8 to 1/4 MILES	Possibility of PCB containing equipment

REC ID.	Property name (EDR) <sup>(1)</sup>	Current Property Name <sup>(2)</sup>	Location	Distance from Site <sup>(3)</sup>	Reason to be Considered as a REC
44	N/A	DISCOUNT TIRE	41550 FORD ROAD	ADJOINING	Possibility of storing hazardous material
45	N/A	MIDAS	41580 FORD ROAD	ADJOINING	Possibility of storing hazardous material (auto service center)
46	N/A	SPEEDWAY GAS STATION	45350 FORD RD	1/4 to 1/2 MILES	Gas station with active USTs
47	N/A	N/A	SOUTH OF I-275 BETWEEN I-275 AND LOTZ ROAD	ON SITE	Private Property: Empty and corroded 55-gallon drums (GPS coordinates of the location: (-83.440701, 42.309957))
48	N/A	N/A	SOUTH OF I-275 BETWEEN I-275 AND LOTZ ROAD	ON SITE	Private Property: Empty and corroded 55 gallon drums (GPS coordinates of the location: (-83.440516, 42.309734))
49	N/A	N/A	SOUTH OF I-275 BETWEEN I-275 AND LOTZ ROAD	ON SITE	Private Property: Empty and corroded 55 gallon drums (GPS coordinates of the location: (-83.440455, 42.309493))

ON-SITE	The location of the REC is within the boundaries of the proposed project
ADJOINING	The location of the REC is on a property that is adjoining to the boundary of the proposed project

**SOMAT STAFF RESUMES**

# Duncan R. Mein, P.E.

## *Environmental Manager*

---

### Education:

- BS Geological Engineering, 1984  
Michigan Technological University,
- SPC Earth Science /Mathematics (Teaching), 1985  
Michigan Technological University

### Registrations:

- Professional Engineer, P.E., State of Michigan 1997, (License No. 42638)
- Certified Underground Storage Tank Professional (CP), State of Michigan Department of Environmental Quality, September 1996 (CP No. 597)

### Certifications and Special Training:

- OSHA 40-Hour HAZWOPER
- Risk Based Corrective Action (RBCA) Training, ASTM, October, 2006
- RRD Cleanup Criteria Training, MDEQ, June, 2007
- First Aid/CPR
- Certified Aggregate Wear Index Technologist, Michigan DOT, April 1988

Mr. Mein has over 26 years of experience in environmental engineering and consulting and meets the AAI/ASTM definition of Environmental Professional. His experience includes environmental site assessments, BEAs, soil and water sample collection and field analysis, hydrogeological investigation, remediation/cleanup, environmental decommissioning, storage tank management, brownfield redevelopment, asbestos surveys, soil gas surveys, and geophysical surveys. Further experience in building foundation installation, soils laboratory experience, and corrosion soil properties analyses for geotechnical engineering. He is SOMAT's Environmental Manager with responsibilities that involve project management, report and proposal writing, client consultation, staff supervision, senior technical and regulatory review, and business development.

### Major Project Experience

**Asbestos Abatement/Reduce and Remove Hazardous Materials Program at Detroit Water and Sewerage Department Wastewater Treatment Plant.** Design Manager responsible for the program which was part of the Detroit Wastewater Partnership 5-year, plant-wide rehabilitation project. The program consisted of subcontractor procurement and coordination, a plant-wide environmental study phase (asbestos, lead in paint, compliance), development of plant-wide environmental database, and project specific abatement/construction.

**Corporate Environmental Services (and Corporate Administrative Liaison) for Detroit Public Schools Program Manager Team (DPS PMT).** Project Manager for services in support of the 3-year (extended), DPS Capitol Improvement Program. Services included environmental site assessments, asbestos management, indoor air quality, drinking water quality, UST management, soil remediation, etc., at numerous DPS school locations.

**NPDES Phase II consulting support for various school districts including Dearborn Schools, West Bloomfield Schools, Pontiac Christian Academy, and Beacon Academy.** Project Manager responsible for evaluating permit compliance coverage, stormwater and hazardous material surveys, and developing permit compliant stormwater management plans for submittal to the MDEQ.

**Department Manager of Geo-Environmental Services Department of a multi-discipline engineering consulting company.** Responsibilities included: Direct supervision of professional and administrative staff/human resources (Troy, Detroit, Ann Arbor Offices), client maintenance, overall program and project management, report and proposal preparation and oversight, senior technical review and support, invoicing/profit/loss, department and corporate sales/marketing, presentations, and company MDEQ certified LUST professional. Department services include soil/groundwater investigations and remediation, environmental site assessments/due diligence, brownfield redevelopment, decommissioning oversight, UST/LUST management, ground-penetrating radar, environmental compliance /stormwater, etc.

**Environmental Assessment and Construction Readiness Assessment at 139-acre (formerly Herman Gardens) Detroit Housing Commission.** Program Manager for the environmental, geotechnical, surveying and civil engineering services to develop a risk based understanding of specific site characteristics in support and preparation of initiating and effectively implementing planned redevelopment construction activities at the site.

# Mala C. Hettiarachchi, PhD, P.E.

## Project Engineer

### Education:

- PhD Environmental Engineering, 2005  
University of Calgary,  
Canada
- MS Water Resources Engineering, 2001, Asian Institute of Technology, Thailand
- BS Civil Engineering, University of Moratuwa, Sri Lanka

### Registrations:

Professional Engineer, P.E.,  
State of Michigan 2009,  
(License No. 6201056664)

### Certifications and Special Training:

OSHA 40-Hour HAZWOPER

First Aid/CPR

Ms. Hettiarachchi has over 10 years of research and consulting experience in Environmental site investigations, Environmental data analysis/evaluations, Groundwater flow modeling, Groundwater plume evaluation, Groundwater remediation, Soil remediation, Water quality investigations, Hydrology and hydrodynamic analysis, Unsaturated flow modeling, and landfill engineering including waste-to-energy projects. Ms. Hettiarachchi has developed an innovative biofiltration technology to treat low volume point sources of methane, a greenhouse gas. Ms. Hettiarachchi was a key researcher in implementing the City of Calgary sustainable bioreactor landfill. Ms. Hettiarachchi has more than 10 peer reviewed publications in multiple environmental engineering topics. Ms. Hettiarachchi serves as a reviewer to technical journals such as Waste Management, and International Journal of Environmental Engineering.

### Major Relevant Project Experience

**Remedial investigation/feasibility study, Peters Cartridge Superfund Site, OH** – Performed data analysis to compare contaminant concentrations to applicable cleanup criteria, select priority areas using soil, groundwater, and surface water chemistry and the results of ecological risk assessment, identified potential remedial alternatives including best management practices and assisted preparing Remedial Investigation and Feasibility Study reports (2008-2009).

**Remediation of a LNAPL plume underneath a large active warehouse, All Steel Site, Montgomery, IL** – Performed the site investigation for the contaminant plume delineation; installation and monitoring of pilot dual phase extraction (DPE) system to remediate the LNAPL contamination of the aquifer and the vadoze zone; Design, installation, and monitoring (including groundwater sampling) of the full-scale DPE system; Data analysis to evaluate the effectiveness of the DPE system; Preparation of health and safety plan (HSAP); Preparation of air permit sampling schedule (2008-2009).

**Sediment investigation at Duluth Harbor and Lower St. Louis River, Duluth Minnesota** – Performed Analytical data validation; Data analysis to evaluate sediment quality using parameters such as mean probable effect quotients (mean PEC-Qs), partitioning sediment benchmarks (ESBs) toxic units for PAHs; Data analysis to compare sediment quality with MPCA sediment quality targets; technical report preparation; MS Access database preparation; preparation of NOAA Query Manager input. (On-going)

**Remedial investigation/feasibility study, Berry's Creek Superfund Site, NJ** – Performed the Water quality sampling including storm water events (manual and automated sampling) and sediment sampling; Surface water quality data analysis; sediment quality data analysis; Preparation of reporting material; Preparation of Work Plan and Quality Assurance Project Plan. (2008-2010)

**Groundwater flow analysis, Multiple Site, IL** – Developed a spreadsheet model to generate site-specific groundwater remediation objectives based on Illinois Tiered Approach to Corrective Action Objectives (TACO) assisted reviewing and analyzing the groundwater data obtained from the existing groundwater monitoring wells and piezometers to aid in the site assessment process.

# Jason T. Cunningham

## *Environmental Scientist*

---

### Education:

BS (In-progress)  
Environmental  
Studies/  
Land Resources  
University of Michigan  
Dearborn, Michigan

### Licenses:

Asbestos Hazard Evaluation  
Specialist, State of  
Ohio/ES35095

Asbestos Inspector, State of  
Michigan/A38202

### Certifications and Special Training:

OSHA 40-Hour HAZWOPER

OSHA Confined Space Entry –  
Supervisor, Entrant, and  
Attendant

Asbestos Management  
Planner, State of  
Michigan

OSHA 10-hour Safety Training  
for Construction Industry

NIOSH 582 method-  
Sampling/Evaluating  
Airborne Asbestos Dust

First Aid/CPR

Mr. Jason Cunningham has over 10 years of experience and is an Environmental Scientist for SOMAT. His responsibilities include performing environmental and geotechnical field services, environmental site assessments, asbestos and lead survey and abatement oversight, and soil, sediment and groundwater sampling. Mr. Cunningham is also responsible for soil and construction materials sampling and testing; and coordination of field activities for various environmental and geotechnical investigations.

### Major Relevant Project Experience

**Phase I ESA, Clifton Boulevard Transit Enhancement Program, Cleveland and Lakewood, Ohio** – Performed Site reconnaissance and background data (aerial photos, fire insurance maps, city departments) gathering and review for this 4.5-mile corridor proposed enhancement project. Key writer in preparing the final report. (2010)

**Phase I ESA, English Village, Detroit, Wayne County, Michigan** – Performed Site reconnaissance and background data (aerial photos, fire insurance maps, city departments) gathering and review for this multi-parcel proposed urban redevelopment project. Assisted in preparing the final report. (2008)

**Phase I and II ESAs, Forest Park, Detroit, Wayne County, Michigan** – Performed Site reconnaissance and background data (aerial photos, fire insurance maps, city departments) gathering and review for this 14-acre proposed urban redevelopment project. Performed test trenching and sample collection for analysis as part of Phase II activities. Assisted in data review and preparing the final reports. (2008)

**VA Health Care System, Ann Arbor, Washtenaw County, Michigan** - Provided site coordination and contractor oversight for this federal government asbestos abatement project using infrared heat technology and disposal of approximately 1,672 sf. of asbestos containing floor tile and mastic. The removal process complied with EPA, OSHA, and State of Michigan regulations. Also supported preparing contractor documents and specifications, and the final abatement report. (2007)

**Nova Environmental Inc., Ann Arbor, Michigan (2001- 2003):** Responsible for field management in asbestos and lead removal operations for various school projects. Responsibilities included:

- o Overseeing demolition, removal, and/or encapsulation of ACM
- o Conducting on site air quality testing and analysis; sample collection, slide preparation, microscopy, data interpretation, and corresponding reports
- o School District Projects: Bloomfield Hills School District, Fitzgerald Public Schools, Novi Community School District, Southfield Public School District, Waterford School District

### Other Responsibilities and Experience

- o Soil sampling and testing; geotechnical and environmental drilling oversight
- o Construction materials sampling and testing
- o Assisting in report making, bidding, permitting, attend project meetings
- o Maintaining relations with client, company's vendors and public awareness

# Chad C. Robinson, P.E.

## Senior Staff Engineer

---

### Education:

BS Civil Engineering, 2007  
Michigan Technological  
University,

### Registrations:

Professional Engineer, P.E.,  
State of Michigan 2012,  
(License No. pending)

### Certifications and Special Training:

First Aid/CPR

OSHA 40-Hour HAZWOPER

Confined Space Entry Training

OSHA 30-Hour Construction

ATSSA Traffic Control  
Supervisor

ACI Level I Field Tech

Mr. Robinson has over 5 years of experience in environmental and geotechnical engineering and consulting. He is involved in various environmental, geotechnical, and construction projects in which his responsibilities include field engineering, field sampling, engineering reporting, design and calculations, and laboratory testing. He has also been involved with QA/QC for test reports from State and Local construction material testing.

### Major Project Experience

**US EPA – Former Zephyr Oil Refinery, Muskegon Lake Area of Concern, Muskegon, Michigan** - The Zephyr Oil refinery operated for more than 40 years and historical releases of petroleum are suspected to have impacted the sediment, groundwater, and wetlands surrounding the site. The assessment included vibracore sampling, geoprobe sampling, and installation of groundwater monitoring wells, and groundwater and surface water sampling. Mr. Robinson provided field oversight and assistance during sampling and soil classification.

**USACE/MPCA – Sediment Investigation, Duluth Harbor and Lower St. Louis River Area of Concern, Duluth, Minnesota** - This sediment investigation project is being performed in and around the Lower St. Louis River and the Duluth Harbor, Minnesota for the purpose of establishing a baseline understanding of sediment contamination areas along the Minnesota shore line. Mr. Robinson developed the sampling analysis plan including the determination of sampling locations using statically oriented design methods. Mr. Robinson also provided field oversight and performed sediment sampling using vibracore. Also Mr. Robinson prepared maps (utilizing ArcGIS) to present the results of sediment quality assessment.

**MDOT Widening for Weave/Merge Lanes for US-131, Grand Rapids, Kent County, Michigan** - This project consists of a design for the addition of a weave/merge lane on both northbound and southbound US-131 between Leonard Street and Ann Street through downtown Grand Rapids. To accommodate the additional lanes along this section of the freeway, several structures will also require widening. The project scope included analyzing the subsurface conditions to provide foundation recommendations and construction considerations for the widening of the existing pedestrian culvert underpass at Webster Street, the existing US-131 Bridge over Richmond Street, and the existing US-131 Bridge over the GTW Railroad and Indian Mill Creek. Mr. Robinson coordinated fieldwork and drilling along with the project team. Mr. Robinson performed soil classification, laboratory testing, slope stability analysis, foundation analysis, retaining wall analysis, and report preparation.

### MDOT – M-20 at Schrader Creek, Mecosta, Mecosta County, Michigan -

This design-build project consists of the replacement of M-20 over Schrader Creek and the south branch of Schrader Creek with two bridges. Poor soils and minimal wetland impact at the crossings require that the bridges each be approximately 500 feet long. Mr. Robinson coordinated fieldwork including, underground utility clearance, traffic control, and drilling crews, as well as sample collection and soil classification, and deep foundation design, and construction inspection/observation.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### FEDERAL RECORDS

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 5 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 33 RCRA-CESQG sites within the searched area.

## EXECUTIVE SUMMARY

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 15 RCRA-NonGen sites within the searched area.

### STATE AND LOCAL RECORDS

MI SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality's Contaminated Sites List on Diskette With Address.

A review of the MI SHWS list, as provided by EDR, and dated 04/30/2012 has revealed that there is 1 MI SHWS site within the searched area.

Hazardous Waste Summary:

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Hazardous Waste Summary:**

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

**Environmental Interest/Information System**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Hazardous Waste Summary:

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

**Handler Activities Summary:**

U.S. importer of hazardous waste: No  
 Mixed waste (haz. and radioactive): No  
 Recycler of hazardous waste: No  
 Transporter of hazardous waste: No  
 Treater, storer or disposer of HW: No  
 Underground injection activity: No  
 On-site burner exemption: No  
 Furnace exemption: No  
 Used oil fuel burner: No  
 Used oil processor: No  
 User oil refiner: No  
 Used oil fuel marketer to burner: No  
 Used oil Specification marketer: No  
 Used oil transfer facility: No  
 Used oil transporter: No

**Hazardous Waste Summary:**

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D035  
 Waste name: METHYL ETHYL KETONE

Waste code: P001  
 Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P075  
 Waste name: NICOTINE, & SALTS

**Hazardous Waste Summary:**

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

**FINDS:**

Registry ID: 110003568274

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## FEDERAL RECORDS

### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/08/2012	Source: EPA
Date Data Arrived at EDR: 05/10/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 5	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

### DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

## CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810
Date Made Active in Reports: 03/12/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 14	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

## CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/28/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810
Date Made Active in Reports: 03/12/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 14	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

## LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/16/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/26/2012	Telephone: 202-564-6023
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 04/30/2012
Number of Days to Update: 80	Next Scheduled EDR Contact: 08/13/2012
	Data Release Frequency: Varies

## CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 08/19/2011	Source: EPA
Date Data Arrived at EDR: 08/31/2011	Telephone: 800-424-9346
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 05/15/2012
Number of Days to Update: 132	Next Scheduled EDR Contact: 08/27/2012
	Data Release Frequency: Quarterly

## RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Data Release Frequency: Quarterly

## RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012  
Date Data Arrived at EDR: 04/04/2012

Data Release Frequency: Quarterly

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/15/2012  
Date Data Arrived at EDR: 04/04/2012

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012  
Date Data Arrived at EDR: 04/04/2012

Data Release Frequency: Varies

## RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/30/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/11/2012
Number of Days to Update: 11	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

## US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/30/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/30/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/11/2012
Number of Days to Update: 11	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Varies

## ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/02/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 04/03/2012	Telephone: 202-267-2180
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 07/02/2012
Number of Days to Update: 72	Next Scheduled EDR Contact: 10/15/2012
	Data Release Frequency: Annually

## HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 04/01/2012	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 04/03/2012	Telephone: 202-366-4555
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 07/02/2012
Number of Days to Update: 72	Next Scheduled EDR Contact: 10/15/2012
	Data Release Frequency: Annually

## DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 07/29/2011	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 08/09/2011	Telephone: 202-366-4595
Date Made Active in Reports: 11/11/2011	Last EDR Contact: 05/08/2012
Number of Days to Update: 94	Next Scheduled EDR Contact: 08/20/2012
	Data Release Frequency: Varies

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: Quarterly

## US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/27/2011  
Date Data Arrived at EDR: 06/27/2011  
Date Made Active in Reports: 09/13/2011  
Number of Days to Update: 78

Source: Environmental Protection Agency

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 02/27/2012	Source: EPA
Date Data Arrived at EDR: 03/14/2012	Telephone: 703-416-0223
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 06/13/2012
Number of Days to Update: 92	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Annually

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy
Date Data Arrived at EDR: 10/07/2011	Telephone: 505-845-0011
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 05/29/2012
Number of Days to Update: 146	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Varies

### DEBRIS REGION 9: Torres Martinez Reservation Illegal Dump Site Locations

A listing of illegal dump sites location on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

Date of Government Version: 01/12/2009	Source: EPA, Region 9
Date Data Arrived at EDR: 05/07/2009	Telephone: 415-947-4219
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 07/03/2012
Number of Days to Update: 137	Next Scheduled EDR Contact: 10/08/2012
	Data Release Frequency: No Update Planned

### ODI: Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 08/18/2011	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 09/08/2011	Telephone: 303-231-5959
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 06/05/2012
Number of Days to Update: 21	Next Scheduled EDR Contact: 09/17/2012
	Data Release Frequency: Semi-Annually

### TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 09/01/2011	Telephone: 202-566-0250
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 05/29/2012
Number of Days to Update: 131	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2006	Source: EPA
Date Data Arrived at EDR: 09/29/2010	Telephone: 202-260-5521
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 06/29/2012
Number of Days to Update: 64	Next Scheduled EDR Contact: 10/08/2012
	Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)  
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 05/23/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)  
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 05/23/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/10/2012
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 04/30/2012
Number of Days to Update: 77	Next Scheduled EDR Contact: 08/13/2012
	Data Release Frequency: Annually

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 07/20/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/10/2011	Telephone: 202-564-5088
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 06/21/2012
Number of Days to Update: 61	Next Scheduled EDR Contact: 10/08/2012
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010	Source: EPA
Date Data Arrived at EDR: 11/10/2010	Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 04/17/2012
Number of Days to Update: 98	Next Scheduled EDR Contact: 07/30/2012
	Data Release Frequency: Annually

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011	Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011	Last EDR Contact: 06/11/2012
Number of Days to Update: 60	Next Scheduled EDR Contact: 09/24/2012
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/10/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/12/2012	Telephone: 202-343-9775
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 07/11/2012
Number of Days to Update: 49	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

Data Release Frequency: Varies

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Next Scheduled EDR Contact: 08/06/2012  
Data Release Frequency: Varies

## US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Last EDR Contact: 05/21/2012  
Next Scheduled EDR Contact: 09/03/2012  
Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 03/31/2012  
Date Data Arrived at EDR: 05/17/2012  
Date Made Active in Reports: 06/14/2012

Date Made Active in Reports: 10/22/2009	Last EDR Contact: 04/16/2012
Number of Days to Update: 76	Next Scheduled EDR Contact: 07/30/2012
	Data Release Frequency: Varies

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/18/2012	Telephone: 703-308-4044

## STATE AND LOCAL RECORDS

### SHWS: Contaminated Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/30/2012	Source: Department of Natural Resources & Environment
Date Data Arrived at EDR: 05/02/2012	Telephone: 517-373-9541

Number of Days to Update: 19	Next Scheduled EDR Contact: 08/13/2012
	Data Release Frequency: Varies

### SWF/LF: Solid Waste Facilities Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Data Release Frequency: Varies

## BEA: BASELINE ENVIRONMENTAL ASSESSMENT DATABASE

A Baseline Environmental Assessment (BEA) allows people to purchase or begin operating at a facility without being held liable for existing contamination. BEAs are used to gather enough information about the property being transferred so that existing contamination can be distinguished from any new releases that might occur after the new owner or operator takes over the property.

## EDR PROPRIETARY RECORDS

### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A	Source: EDR, Inc.
Date Data Arrived at EDR: N/A	Telephone: N/A

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/21/2012	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/22/2012	Telephone: 860-424-3375

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools
