

***Independent Citizens Redistricting Commission
January 24, 2024 Meeting Public Comment***

Date of Submission: January 20, 2024

Method of Submission: Email To <Redistricting@Michigan.gov>

Name: Ajthorp95

Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mr. Alec Thorp

Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mrs. Marilee Corey

Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Ms. Jacqueline Knable

I write to urge you to co-sponsor the Tax Excessive CEO Pay Act to rein in runaway economic inequality.

Please address destructive economic inequality and co-sponsor the Tax Excessive CEO Pay Act.

The US has had many opportunities to stop supporting Israel's indiscriminate violence towards Palestinians. Despite this, the US remains staunch in its support for Israel, increasing the suffering of Palestinians and fueling the resistance.

Now is the time to immediately end all support to Israel and call for a ceasefire.
stop the genocide of Palestinians
end USA support of Israel for its attacks on civilian Gazans
no more military or financial support of Israel

I stand with Yemen and their fight against US terrorism

Sincerely,
mr dan sabatinelli

The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Ms. Lorna Paisley

Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn

area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mrs. Marla Flores-Jauregui

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mr TONY JAAFAR

Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mr and Mrs Thomas Nieland

Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mr. Russ Ziegler

Name: Dwayne Thomas
Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's

mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mr. Dwayne Thomas

The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,

Ms. caroline shulene

Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority

of the Arab community to stay and vote together.

Sincerely,
Ms. Cecilia Perry

Name: Jennifer Ivers

Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,

Mrs. Jennifer Ivers

Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority

of the Arab community to stay and vote together.

Sincerely,
MR Arthur Rosenberg

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Ms. Erin Connolly

Subject: Do Not Fragment and Dilute the Arab American Community

Dear Cynthia Orton,

I write to strongly urge that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not - and need not - come at the expense of marginalizing and fragmenting Arab American voters. Both groups, both populations are in need of fair representation in our society.

Arab Americans add an important voice to our American society; they are indeed Americans! By their fair inclusion in the voting process we will improve mutual understanding, overcome cultural differences and strengthen their positive contribution to our entire society. They already participate by working, paying taxes, creating employment, contributing in many other ways to their community. They deserve to have a meaningful voice through voting, helping to select our leaders and deciding issues democratically.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Ms. Linda Krauskopf

Subject: Do Not Fragment and Dilute the Arab American Community
Dear Cynthia Orton,

I write to demand that you do not fragment Arab American voters by breaking up the greater Dearborn area into multiple districts.

In considering a district map which creates three or more districts, the commission will be diluting the Arab American vote, denying this community of interest long term representation. The greater Dearborn area is home to the most concentrated population of Arab Americans in the United States. Ensuring that they are able to elect representatives that reflect them and their interests is essential to the MICRC's mission. I support the effort to empower Black voters, but this must not come at the expense of marginalizing and fragmenting Arab American voters.

As the redistricting process continues, I sincerely hope to see proposed maps which allow the majority of the Arab community to stay and vote together.

Sincerely,
Mr. Chris Guillory
