Subject: Documentary

Good Evening Edward

Since the commission voted to approve the budget today which included the proposed documentary, which I and commissioner Wagner are adamantly against using taxpayer funds on especially when the budget is showing an almost million dollar deficit, we would like to give notice that we will not participate in this documentary and do not give permission to use our likeness in it, such as pictures. I am also copying general counsel and would like this letter included in the public record. I think it's a sad situation to even have to address this when there are so many important decisions regarding mapping that were not addressed. I have other feelings regarding this but out of respect I will keep those thoughts to myself.

I am also including Commissioner Wagner in this thread to make sure I have accurately conveyed her feelings or in case she has an additional comment she wants to add.

Respectfully

Commissioner Lange
