

Subject: MIHP Important Update: Directory Audit Information Required – Thank you

Date: April 14, 2023

Maternal Infant Health Program Directory Update – Exciting News!

MDHHS Maternal Infant Health Program has been granted a wonderful opportunity to redevelop an agency map to be placed on our recently redesigned MIHP website. This enhanced information will expand visibility of program providers to families and community partners.

Beginning on June 1, 2023, MDHHS Maternal Infant Health Program Directory will contain the MIHP program name and contact information, coordinator's name and contact information, counties served, languages spoken by the home visiting staff, and the population focus. We will no longer have a specialty designation field. The enhancements will include "population focus" and "languages spoken by home visiting staff". It is the MIHP Provider's responsibility to assess any legal or confidentiality considerations when determining what population focus to list on the Agency Directory. The population focus field has a limit of three items. In addition, languages spoken by home visiting staff field, is the agency's responsibility to accurately report languages spoken, which may include ASL, Spanish, Arabic etc. This does not include the use of interpretive services. This field is unlimited to accommodate each language spoken by home visiting staff.

Your timely response is required and appreciated. Please return the form via fax or to the mihp@michigan.gov mailbox no later than April 21, 2023. Thank you.
