IMMUNIZATION

KNOW THE FACTS.

16

DISEASES

Childhood vaccines prevent 16 different diseases by age 2!

Vaccination is a safe, highly effective, and easy way to help keep people healthy.

Before Pregnancy

Make sure your vaccination record is up to date. Being up to date will help protect you and your child from serious, preventable diseases.

During Pregnancy

Get the recommended vaccines to keep you and your baby safe:

- Whooping Cough
- Flu
- COVID
- RSV

After Pregnancy

Postpartum vaccination will help protect you from getting sick, and you can pass antibodies to the baby through breastmilk.

Vaccination Save Lives!

Vaccines Shield Against Illness.

Vaccines work by preparing the body to fight off infections before they can cause harm.

CIRCLE OF PROTECTION

An infant's family members and caregivers should be up to date on their vaccinations to help form a circle of disease protection around the infant, who might not yet be protected.
