Get Ahead of Lead: Use A Certified Filter

One way to reduce lead exposure is to use a certified lead-reducing drinking water filter.

The Michigan Department of Health and Human Services (MDHHS) recommends that Michigan households use a **certified lead-reducing drinking water filter** if your home has or if you are unsure if it has one of the following:

Lead or galvanized plumbing.

A lead service line carrying water from the street to the home.

Old faucets and fittings that were sold before 2014.

MDHHS
Michigan Department of Health & Human Services

A household may be eligible for a free filter if:

A child under 19 or a pregnant Medicaid enrollee lives there,

AND

The home has, or you are unsure if it has, lead plumbing, such as:

- Lead or galvanized plumbing.
- A lead service line carrying water from the street to the home.
- Old faucets and fittings that were sold before 2014.

To sign up for the Statewide Filter Support Program, use your phone's camera to scan the QR code on the left or visit Michigan.gov/GetAheadofLead.

To learn more about the program, please call the MDHHS Drinking Water Hotline at 844-934-1315.
